COAXIAL SWITCHES

BUNKER RAMO AMPHENOL

303 Series/High Isolation Miniature & Standard Size Microwave Coaxial Switches

AMPHENOL 303 SERIES
High Isolation Miniature
Fail-Safe 1P2T

Broadband Miniature Switch Series Offering State-of-the-Art Characteristics through 18 GHz

Ideally suited for applications where crosstalk interference must be kept to an absolute minimum, Amphenol's miniature 303 Series provides uniform characteristics through KU band (18 GHz) with isolation of 60 dB minimum, VSWR of 1.5:1 maximum and insertion loss of 0.5 dB maximum. When operating at lower frequencies, isolation can be greater than 90 dB with 0.2 dB insertion loss and VSWR of 1.2:1.

New Amphenol SMA connectors . . . offering significantly better electrical and mechanical performance than competitive designs . . . contribute to the switch's high reliability and fine electrical performance. The miniature 1P2T weight only 2 ozs. and, excluding terminals, is less than 1½ inches high by $1\frac{11}{32}$ inches wide by ½ inch. In addition to its compact design and reliable RF performance, this switch is capable of operating in environments where temperatures reach 100°C.

Standard Size 303 Series Switches offering High Isolation Qualities through 12.4 GHz

Amphenol's 303 Series of standard size switches is constantly expanding. Cataloged here are a representative collection of the more popular variations. Many combinations of these basic items are available. The ideal switching device tailored for your specific application can be selected from the options described in the table of General Characteristics. This is true of the miniature size 303 Series as well. Whatever combination of specifications you select . . . whether other coil voltage, hermetic sealing, auxiliary contacts, cut-throat latching, etc. . . . the same high isolation and uniform RF performance characteristic of Amphenol's 303 Switch Series will prevail.

RF PERFORMANCE

Frequency (GHz)	VSWR (Max.)	Isolation (dB)	Insertion Loss (Max.)
MINIATURE SIZE			
0-3.0	1.2	>90 dB	0.2 dB
3.0-8.0	1.3	>80 dB	0.3 dB
8.0-12.4	1.4	>70 dB	0.4 dB
12.4-18.0	1.5	>60 dB	0.5 dB
STANDARD SIZE			
0-3.0	1.3	>80 dB	0.25 dB
3.0-6.0	1.4	>75 dB	0.35 dB

MINIform / Sub-Miniature, High Power, Microwave Coaxial Switches

For Applications Requiring Minimum Size, High Power, Minimum Crosstalk and Low Cost

GENERAL CHARACTERISTICS

ELECTRICAL
- Frequency Range: 0-6.0 GHz
- Connectors: SMA, SUB-Minax 27 Series and Printed Circuit Pins
- Switching Time: 15 ms Maximum
- Switching Action: Break Before Make
- Coil Resistance: 12 VDC Coil: 65 ohms, 28 VDC Coil: 250 ohms (Also available in other DC coil voltages)
- Function: 1P2T Failsafe

ENVIRONMENTAL (per MIL-S-3928B)
- Temperature Range: −55°C to 100°C
- Moisture Resistance: 10 Day Cycle
- Shock: MIL-STD-202D, Method 202C, Test Condition A, 15 G's Peak
- Vibration: MIL-STD-202D, Test Condition A, 55 to 2000 Hz at ±10 G's

RF PERFORMANCE (SMA)

VSWR
- 0-2 GHz: 1.1 max.
- 2-4 GHz: 1.2 max.
- 4-6 GHz: 1.3 max.

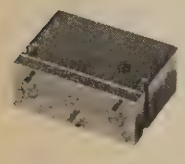
Isolation
- 0-1 GHz: >80 dB
- 1-3 GHz: >70 dB
- 3-6 GHz: >50 dB

Insertion Loss
- 0-3 GHz: 0.1 dB max.
- 3-5 GHz: 0.2 dB max.
- 5-6 GHz: 0.3 dB max.

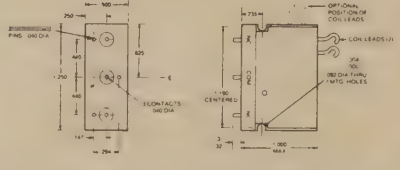
RF Power
- 0.1 GHz: 400 watts
- 1.0 GHz: 120 watts
- 3.0 GHz: 70 watts
- 6.0 GHz: 45 watts

MECHANICAL
- Life: 1 million cycles min.
- Weight: 1.2 oz.

Amphenol 303 Series MINIform is the industry's most inexpensive miniature high-power, high-performance line of microwave coaxial switches — offering for the first time superior operational performance through six GHz in an economical unit weighing only 1.2 ounces.



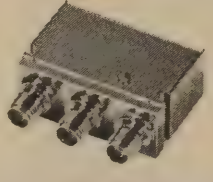
The switches are the smallest and least expensive of this type ever introduced by Amphenol and are designed to outperform all comparable offerings by industry available until now. Displacing less than one-half cubic inch volume, the tiny switches' ratings include performance through 150 watts below specified frequency limitations, offering immediate physical and operational compatibility for a host of signalling, communications and EDP matrix switching applications.



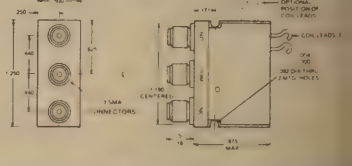
Amphenol 303 Series MINIform switches are 1P2T configurations offered in choice of three popular termination styles: SMA connectors, Amphenol SUB-Minax 27 Series connectors, or printed circuit contacts suitable for solder and solderless wrap board termination. All switches can be provided with coil voltages of 6, 12, 26, 48 and 120 VDC.

Although ideal for typical microwave applications through six GHz where 60 dB isolation is offered by new units, Amphenol's MINIform switches also offer unusually high power handling capabilities for communciations applications for the first time. Through 0 to 1.0 GHz, for example, the MINIform can switch up to 150 watts CW while maintaining maximum VSWR of only 1.1, 0.1 dB insertion loss and 80 dB minimum crosstalk attenuation. Over the range of 1.1 through 3 GHz, VSWR climbs only to 1.2 with power handling capacity of up to 70 watts CW while maintaining 75 dB minimum crosstalk attenuation and 0.1 dB maximum insertion loss.

PRINTED CIRCUIT



Coil Volts	AMPHENOL Part No.
12 VDC	303-10001-2
28 VDC	303-10001-3



CONNECTORS (SMA shown)

Coil Volts	SMA Conn.	27 Series
12 VDC	303-10002-3	303-10003-2
28 VDC	303-10002-3	303-10003-3

Coaxial Relays

Precision coax units. Maximum time to operate and release is 20 milliseconds. Gold-plated, fine silver contacts assure reliable low-level operation. Minimum life expectancy is 1,000,000 cycles, when switch is operated at speeds of less than 10 Hz. Switches are impedance matched to 50-ohm cable, though loss is negligible with 75-ohm cable. Operation is break-before-make. All materials are corrosion resistant.

Units meet applicable portions of military connector specs as follows: BNC — Mil-C-3608 and N — Mil-C-71.

SCHEMATICS

TE: High frequency electrical characteristics are typical values (not maximum) as measured in a 50 ohm circuit and may be used for most design analyses. For more exacting applications, maximum values in the quency range may be obtained upon request. SWR measured to common with a matched 50 ohm termination. For additional specifications request Amphenol RF Switches Catalog SS-1.

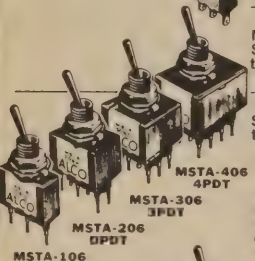
ALCOSWITCH®

DIV. OF ALCO ELECTRONIC PRODUCTS, INC.



MST MINIATURE TOGGLE SWITCHES

The original Alcoswitch Series of high quality ultra-miniature toggle switches combines high current capacity and long life in a ½" case. Slim, bat handle or optional plastic caps(*) are provided. Terminals and contacts are solid silver. Case material is black phenolic resin; 1/4-40 threaded bushing. Rated 5 amps at 115 VAC. SPDT and DPDT types have life cycle of over 80,000 on-off operations. High voltage barriers between terminals and contacts.

Hardware supplied mounted. (On) Indicates momentary positions.

MSTE SERIES MINIATURE TOGGLE SWITCHES

"E" Series has the most-wanted features. Waterproof 'O' rings are located inside toggle and on shoulder. A mechanical shoulder on the bottom of bushing prevents "tear-offs" when single mounting nut is employed. High voltage barriers between terminals inside as well as outside. Case has superior plastic material capable of withstanding higher impact; guards against accidental damage. Low-loss case has extremely high resistance between terminals and case ground, and its high temperature coefficient is ideally suited for prolonged soldering and printed circuits. Turret type terminals are used for simplified wiring or for P.C. Extra-wide, solid silver contacts are bonded, not riveted, on copper-silver plated terminals. Long-life cycle over 100,000 On-Off operations. (SPDT). 6 amps @ 125 VAC.

Hardware supplied mounted. (On) Indicates momentary positions.

MSTG SERIES MINIATURE TOGGLE SWITCHES

Mustang Series is for designers who prefer the feel of a larger toggle switch but have space limitations behind today's compact panel. Alcoswitch ½" case is utilized, however Mustang mounting requirements are the same as larger switches with 13/32" bushings. This concept is a space-saver in all Mustang models and is especially true in 3 Pole and 4 Pole Series where non-miniature switches are bulky in size. Mustang switches have the most-wanted features as itemized in the "E" Series story with the exception of waterproof 'O' rings. Case construction is of low-loss, high impact and high temperature materials with turret terminals and silver contacts. 6 amps @ 125 VAC.

Hardware supplied mounted.

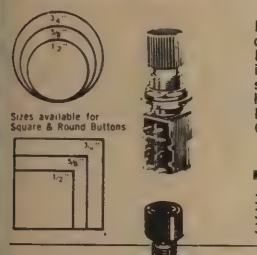
MINIATURE PUSH BUTTON SWITCHES

MSP Miniature Pushbutton Switches, snap-action, 5 amps @ 115VAC. Solid silver contacts, terminals. Bushing size, ¼-40 with keyway. Black phenolic case. 25,000 life cycle.

MSPE Waterproof Pushbutton Switches, 6 amps resistive, 2 amps inductive @ 125VAC. Double "O" waterseals, low-loss "E" Series case; turret terminals. Versatile "double-throw".

MSP-103 Economy Pushbutton Switches, 3 amps @ 125VAC. Low-pressure. Silverplated brass contacts, terminals. Plunger travels .098". Depth behind panel, ¾". 1-pc. ¼-40 bushing.

MSPS-103C is similar to MSP-103C except smaller diameter .310. Rated 0.5 amps @ 125 VAC.



MSPG Mustang Push Button Switches rated 6 amps @ 125 VAC (Specs same as MSPE series, less waterproof). 15/32" bushings.

ILLUMINATED PUSH BUTTON SWITCHES

MSPN Illuminated Push Button Switches are snap-action types capable of handling a high current rating for its small size. DPDT action in a miniature case with separate connections to its replaceable T-1¾ grooved base lamps. Side terminals for simplified wiring or P.C. use. Metal construction, phenolic case, hole. Wide choice of plastic buttons. **TRANSPARENT** colors: Red, Amber, Blue, Green, Clear. **TRANSLUCENT:** Red, Yellow, Green, White. Uses grooved base lamps.

MAGNETIC REPULSION PUSH BUTTON SWITCHES

Momentary switches designed for data entry. Ceramic magnets eliminate springs. Contacts are glass-encapsulated reeds. Plunger is keyed, non-rotating. Metal case withstands abuse, serves as shield. Rated 100 mA @ 50 VDC, resistance 100 milliohms. Contact bounce 1 m/sec. Plunger travel 5/64". Operating force, under 2 ozs. Life, 10 million.

MINIATURE ROTARY SWITCHES

MRA Adjustable-Stop Rotary Switches are miniature types rated 500 mA @ 125 VAC. Features: adjustable-stop; non-shorting; 36° spacing; up to 4 poles on single deck; solid silver terminals and contacts. Types with suffix **S,** ⅛", dia. shaft less knob. Bushing, ¼-40

MRA 30° Position Rotary Switches are slightly larger than standard MRA Series and have ⅛" shaft. Other specs similar to MRA Series. Knobs not included. Type MRA 30° can be converted to an adjustable-stop switch when used with KCVS-500 knob (see Alco miniature knob listings).

MSRE Waterproof Rotary Switches are non-adjustable. Similar to MRA Series but feature internal and external 'O' rings. One-piece metal case construction, and molded in terminals. ⅛" shaft. Ideal for printed circuits. Supplied less knob. Rated 500 mA @ 125 VAC. Can be converted to an adjustable-stop switch when used with KCVS-500 knob (see knob listings).

MRA Printed Circuit Rotary Switches are miniature versions of above types created for printed circuit mounting. Terminals are silver clad and designed to facilitate firm anchoring to the P.C. board. Available in 1, 2, 3 or 4 poles on a single deck with a maximum of 12 positions. The 1, 2 and 3 pole models have an adjustable-stop feature. ⅛" dia. shaft, less knob. See MRA story for specs.

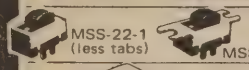
DIV. OF ALCO ELECTRONIC PRODUCTS, INC.



MINIATURE PRINTED CIRCUIT SLIDE SWITCHES

(All switches make before break).

Two mounting styles are available: The MSS-1200R, 2250R, 4200R and 4300R are furnished with right angle levers for side mounting. MSS-1200, 2200, 2250, 4200, 4300 and 6300 with upright levers are for direct mounting to the printed circuit board. The MSS-4300 and 6200 have threaded screw holes on the top of the mounting frame for 4-40 screws. Metal tabs extend downward into the printed circuit board for a firm mounting.

All contact, movable parts and terminals are silver or gold plated. The standard models have silverplated brass with the movable contact of plated beryllium brass. The others are gold-plated over nickel. The positive wiping action assures a low contact resistance over the life of 15,000 cycles at rated load. Rated at 0.3 amp @ 125 VAC.

MINIATURE PUSH BUTTON MOTOR START SWITCHES

Mount in a 1" hole. Rated to carry 6 amps @ 230 VAC. These switches may be used to control circuits independently or with optional relays. All models supplied with a single (N.O.-N.C.) contact block but have provisions for additional (SU) blocks thereby converting to DPDT, 3PDT, 4PDT.

3-Way Selector Power Switch is the same basic model as above but instead has a bar knob with pointer. Electrical and physical specifications are the same available in black only.

Key-Lock Push Button type is an accident-proof power switch that has its own key lock to prevent unwanted operations of machines and controls. The switch functions only when the key disengages the lock. Same specs as the series described above.

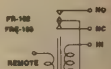
COMPACT FOOT SWITCH FOR RELIABLE OPERATION

SPDT momentary-contact switch has spring return and non-skid base. Size: 3¼"x3¼"x1".

Model	Supplied	One-24	25-99	100-499
SFK	Less Cable	4.65	3.16	2.79

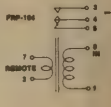
LOW-VOLTAGE RELAY



All units are capable of handling up to 7 Amps @ 117 VAC and may be operated from remote switches located up to several hundred feet away. The remote circuit carries a low voltage which is fully isolated to minimize any possibility of shock hazards.

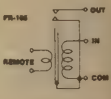
Operating Voltage: 80-125 VAC 60 Hz.
Primary Coil Current: Below 40 mA
Secondary Voltage (open): Below 30 volts.
Contact Voltage: 95-125 volts.
Dielectric Strength: One minute @ 1200 VAC.
Coil Temperature Ascent: Under 158°F.
Insulation Resistance: Over 30 megohms @ 500 VDC.

Load:



FR-102:	7 amps (pwr factor 1)
	5 amps (pwr factor .75)
FRE-103:	7 amps (pwr factor 1)
	5 amps (pwr factor .75)
FRP-104:	7 amps (pwr factor 1)
	5 amps (pwr factor .75)
FR-105:	7 amps (pwr factor 1)
	5.5 amps (pwr factor .75)

FR-102 SPDT BASIC relay has a SPDT feature — has two coils — a primary and secondary. When the secondary is shorted, the primary and associated outer core turns into a relay.



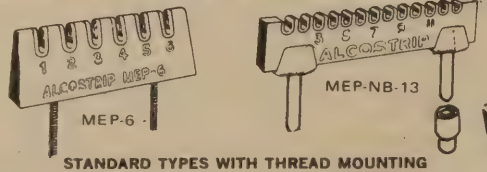
FRE-103 SPDT PLUG-IN relay has a stylized plastic case holds the laminated core inside and also has a patented three-way receptacle on the top portion that allows selection of either a Normally Open or Normally Closed circuit.

FRP-104 SPDT OCTAL base plug feature is added to the basic ALCOSWITCH RELAY for the industrial user. Wiring is not required for the FRP-104, only for the socket.

FR-105 SPST BASIC is similar to the FR-102 in specifications and application, but more compact in width and depth.

Model	Contacts	Description	One-99	100-499	999-999
FR-102	SPDT	Basic Relay for 117 VAC	4.45	3.47	3.03
FR-102-230	SPDT	Basic Relay for 230 VAC	4.85	3.78	3.30
FRE-103	SPDT	Plug-in	4.95	3.82	3.37
FRP-104	SPDT	Octal	5.45	4.25	3.71
FR-105	SPST	Basic Relay for 117 VAC	3.85	3.01	2.62
FR-105-230	SPST	Basic Relay for 230 VAC	4.25	3.32	2.89

CERAMIC TERMINAL STRIPS

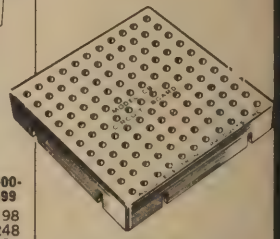


Ceramic-base terminal strips with fired silver, copperplated and tinned terminals to facilitate high-temperature soldering of components and leads. Features permanent bond between metal and ceramic. Standard 2-56 threaded studs are extra long for cutting to any required dimension. Board ht. 0.590" from base. Depth of slots, 0.197". Dielectric Strength: more than 10 seconds at 1500 VDC between terminals. Insulated Resistance: over 1000 megohms at 500 VDC megger. Dip Solder Test: no exfoliation at 250°C for 5 seconds.

UNIVERSAL TYPES WITH SNAP MOUNTING

ALCO's new concept allows for horizontal or vertical mounting of terminal strips. Each strip is supplied with 2 types of mounting hardware.

Model	No. of Terminal Slots	Size Overall Width	Mtg. Ctrs.	One-24	25-99	100-499	500-999
MEH-NB-9	9	3.000	2.500	.80	.53	.48	.44
MEH-NB-18	18	3.000	2.500	1.45	.96	.87	.798
MEH-NB-19	19	3.000	1.750	1.45	.96	.87	.798
MEH-NB-40	40	3.000	2.500	2.20	1.46	1.32	1.21



STANDARD TYPES WITH THREAD MOUNTING

Model	No. of Terminal Slots	Size Overall Width	Mtg. Ctrs.	One-24	25-99	100-499	500-999

TRON® SUBMINIATURE PIG-TAIL FUSES

Glass-tube construction with 1-1/2" leads of #24 tinned copper for 1/100-5 amp ratings, #18 tinned copper for 7-15 amp ratings. Hermetically sealed. Color coded to indicate amp ratings. For circuits with fault current of 50 amps or less (1/100-5 amps for 125 V or less, 7-15 amps for 32 V or less). GLN, GLX body size, .140" x .3"; GFA body size, .145" x .3".

Buss No.	Amperes	Net Price For Ten	100
GLN	1/100	$13.90	$116.00
GLN	1/32, 1/20, 1/16, 1/10, 1/8, 3/10, 4/10, 7, 8, 15	11.70	98.00
GLX	15/100, 2/10, 1/4, 1/2, 6/10, 3/4, 1, 1-1/2, 2, 3, 4, 5	15.10	126.00
GFA	1/100, 1/32, 1/20, 1/16, 1/10, 1/8, 15/100, 2/10, 1/4, 3/10, 4/10, 1/2, 6/10	5.00	42.00
GFA	3/4, 1, 1-1/2, 2, 3, 4, 5, 7, 8, 15	4.40	37.00

SUBMINIATURE PRONG TYPE UNIT

Rated 125 V or less, fault current not over 300 amps; open at 200% within 10 sec or less. Use AF knob for waterproof. Size, .270" dia., .250" lg. (body).

Buss No.	Amperes	Net Price For Ten	100
GMW	1/200, 1/100, 1/64, 1/32, 1/16	$8.30	$70.00

FUSETRON DUAL-ELEMENT FUSES

Long time-lag prevents useless shut-downs caused by ordinary fuses opening on starting currents or other harmless overloads, yet protects against short-circuits. On normal installations will guard motors against burn-out from overloads or single phasing. U/L Listed for motor running and circuit protection up to 250 volts.

TRON RECTIFIER FUSES

For Protection of Semiconductor Rectifiers and Similar Applications

Especially designed for protection of semiconductor rectifiers, thyristors and other solid state devices. High interrupting capacity and very fast clearing to restrict let-through current and energy to very low values. Give safe short-circuit protection for systems with fault current to 200 kA at 600 volts or less. Carry 100%, open at 1000 secs between 150% and 180% of rating; open within 1 sec at 250% of rating.

GBB SERIES

Size, 1-1/4" length x 1/4" diameter.

Buss No.	Amperes	Max. Volts	Net Each

Plug Fuses Fustat Fuses

Add-On Fuse Block

FUSETRON DUAL-ELEMENT PLUG FUSES

Time-delay fuses recommended by N.E. Code. Won't blow under motor-starting or other current surges, yet provide full protection against heavy currents or short circuits. For voltages up to 125 volts. U/L Approved.

Type "T" Amperes	Net Price For Four	100
3/10, 4/10, 1/2, 6/10, 8/10, 1, 1-1/8, 1-1/4, 1-4/10, 1-6/10, 1-8/10, 2, 2-1/4, 2-1/2, 2-8/10, 3-2/10, 3-1/2, 4, 4-1/2, 5, 5-6/10, 6-1/4, 7, 8, 9, 10, 12, 14	$0.92	$20.00
15, 20, 25, 30	.52	11.00

FUSTAT FUSES AND ADAPTERS

Time-delay fuses with type S base recommended by N.E. Code. Prevents over-fusing when used with proper size adapter. For voltages up to 125. U/L Listed.

Adapters not included with Fustat fuses, order them separately and specify size.

Fustat Fuses & Amps	Adapter	Fustat Fuses & Amps	Adapter

*Adapter will also take all smaller sizes. †Adapter will also take 2, 1-8/10 sizes. ‡Adapter will also take 2-1/2, 2-1/4, 2, 1-8/10 sizes. §Adapter will also take 4, 3-1/2 sizes. #Adapter will also take 5, 4-1/2, 4, 3-1/2 sizes. •Adapter will also take 8, 7 sizes. ⋀Adapter will also take 10, 9, 8, 7 sizes. ⌐Adapter will also take 20 amp size.

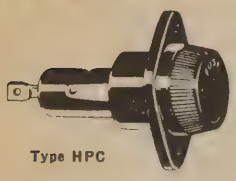
Fustats — 3/10 thru 14 amp size. ..... Net $0.23
15 thru 30 amp size. ..... Net .20
Adapters — SA1 thru SA30. ..... Net Each .16

CLEAR WINDOW PLUG FUSE

Shockproof — insulated with porcelain-like high voltage power lines. Top cap protects fingers from shock and cuts. Always fit fuseholders. U/L Approved.

Type "W" Amperes	Net Price For Five	100
1, 2, 3, 5, 6, 8, 10	$0.55	$10.00
15, 20, 25, 30	.50	9.00

FUSE ASSORTMENT



Sturdy metal stand holds 130 fuses. 5 fuses each, 26 different sizes individually boxed in 5" boxes. Inventory feature shows what fuses need reordering.
No. 130—Net Each $20.49

OTHER STANDARD AND SPECIAL FUSES, BLOCKS AND HOLDERS

If the fuses, fuse blocks and holders shown do not fit your requirements ask for information on other types. Fuses and fuse mountings to meet JAN and Military specifications also available. If you have a special problem in protection, send description or sketch giving number of circuits, type of fuse, terminals, etc., desired. We welcome such inquiries.

**These switches are applicable to low voltage D.C. requirements. Available in 3 and 4 Pole Series. For Lighted Tippette add Prefix "L" to above numbers

Actuator - Suffix # — 1L 5/8" Long Lined (Standard)
— 1C 5/8" Cross Serrated
— 1S 5/8" Smooth
— 2L 5/16" Long Narrow
— 2S 5/16" Short Narrow s/ears
— 3L Offset 5/8" Long Lined
— 3C Offset 5/8" Cross Serrated
— 3S Offset 5/8" Smooth

For Double Actuator Add "D" to end of above number.

For Double Actuator with interlock, Add "DI" to end of above number.

Standard Colors are WHITE, -WH and BLACK, -BL, Other colors available upon request.

Imprinting on Actuators may be had upon request.

Brackets — In addition to the illustrations shown, we offer a variety of brackets — offset, flat, angled, open ear, snap-in, etc. Specials can be made upon request. Snap-in style is designed for panel thickness of approximately .040" to .100". For mounting information and dimensions consult factory. This model bracket is available on single, double and three pole Tippettes — Single and double pole lighted Tippettes. Narrow or wide bezels.

Wire Lead Enclosures — This Snap-On enclosure is available in the single and double pole Tippette and single pole Lighted Tippette series. It is designed to protect and provide safer insulation for normally exposed lead connections.

LIGHTED TIPPETTE FEATURES

Actuators, Brackets & Accessories — Available in the same styles as listed in the Tippette Series. Lenses are Red, Amber, Clear and White. Special variations and colors available.

Lamp Characteristics

Neon (Standard)
120*-240 Volts .002 Amps

Incandescent
6 Volts .20 Amps
12 Volts .08 Amps
24 - 28 Volts .04 Amps.

*Available with "High Brightness" in 120.

MAGNETIC PROXIMITY SWITCH

For Counting Position Limiting Sequence Control Mounts in Any Position

Precision, fast acting, suitable to sequential control functions on machine tools, packaging, material handling and similar industrial devices.

Strong, encapsulated, assures freedom from contamination by cutting oils, dust, powder, chips, etc. Operates up to hundreds of millions of cycles — temperature range −30°C to +105°C. Speed (Max) 200 cycles/sec repeatability within .005".

Switch actuates when brought into proximity with ferrous metals or other magnetic materials. No mechanical linkage necessary for operation. Operating sensitivity in nom. 1/8" make, 1/2" break. Switch elements sealed in glass, unit is potted in epoxy resin. Case is impervious to oil, water, gas, all common solvents.

Typical actuators include indexing tables, cams, wheels, push rods, die sets, line objects such as food and beverage cans, components, parts, vehicles, rotating and swinging objects, etc.

INTERSWITCH

THUMBWHEEL SWITCHES IN STOCK...

SELECTION UNLIMITED

Thousands of different standard switch configurations, numerous standard options, and a wide variety of standard accessory items are stocked in volume at our factory, over and above the most popular designs stocked by local distributors. Your exact switch assembly specifications can be supplied quickly, thanks to this **instant availability of 5 million standard types!**

- **7 Standard Switch Sizes**
- **262 Standard Logic Codes:** others produced to order
- **Up to 16 Switch Positions**
- **4 Terminal Configurations:** solder lug, PC edge connector, PC pins, wire-wrap terminals
- **2 Module/Accessory Colors:** black, tan
- **6 Thumbwheel Colors:** black, green, red, blue, yellow, white
- **Special Markings To Order**
- **Optional Features** (partial list): switch with limit stops, blind slave switch, make-before-break contacts, spacers — marked or blank.

For detailed product data, or custom designs, call your nearest **INTERSWITCH** field engineering representative or our applications engineers.

Description	Part Number
Solder lugs w/o mounting ears	CU 400 217U
Printed Circuits pins	CU 400 354

IN STOCK — DATA-PROGRAMMING MODULES

These inexpensive, miniature coding devices use binary coding techniques and a plastic key for actuating four internal switches (available with or without internal series diodes) connected to pins in the base. Insertion of a numbered key into the module body automatically produces the corresponding digital binary-coded output on the base pins. (A variety of codes is available.) Compact, visual presentation of coded programs; any element can be changed at any time; entire program can be replaced in seconds, using mylar templates. For mounting on PC boards.

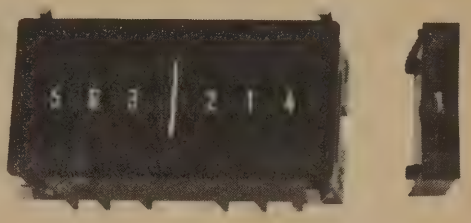
INTERSWITCH

...FOR IMMEDIATE DELIVERY

from your local INTERSWITCH distributor



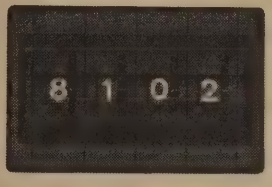
ompact size/featherweight action/positive detent/highly legible readout/many mechanical configurations

NTERSWITCH thumbwheel switches have been designed — nd thoroughly field proven — to afford the logic designer nd packaging expert complete design freedom through al- ost unlimited choice of electrical and mechanical configura- ons, switching logic, terminations, and circuit capacity.

ependable operation and unequalled stability of electrical haracteristics are built into every switch style by careful lection of materials, attention to the human-engineering spects of design, and design simplification to reduce the umber of component parts to a practical minimum.

Type M

Thinnest thumbwheel switch made



Size: 5/16" wide x 1-5/16" high x 2-5/8" deep

Component Boards: standard board or long board for mounting components

Environmental: salt spray, humidity, shock, vibration per MIL-STD-202; temperature range —40°C to +70°C

ype H

or operation ver widest mperature range

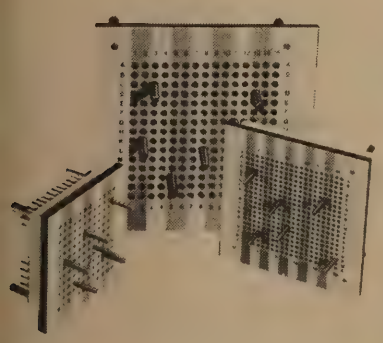
ze: 3/8" wide x 1-5/16" high x 2-5/8" deep

omponent Board: standard board or long board for mounting components

nvironmental: salt spray, humidity, shock, vibration per MIL-STD-202; temperature range —40°C to +85°C

Type B

Popular industry standard



Size: 1/2" wide x 2-1/4" high x 2-5/8" deep

Component Board: standard terminal board or long board for mounting components

Environmental: salt spray, humidity, shock, vibration per MIL-STD-202; temperature range — 20°C to +70°C

IN STOCK — INTERSWITCH MATRIX BOARDS

Matrix boards are fundamental to the programming of thousands of different kinds of instruments, computers, machines, and control systems. Often, they are the most effective answer to steadily increasing demands for more interconnections per unit of space, and for more flexibility in the choice of interconnecting logic and programming means.

The three standard **INTERSWITCH** matrix boards are stocked at all times — as are accessory shorting pins and diode plugs.

10 x 10 x 4.5mm hole spacing	—#676-11-080-02
15 x 15 x 6mm hole spacing	—#674-11-800-02
20 x 20 x 3mm hole spacing	—#673-11-008-02
3mm shorting pin (black)*	—#673-31-100-00
3mm shorting pin (red)*	—#673-31-100-02
3mm diode plug (black)*	—#673-21-301-00
3mm diode plug (red)*	—#673-21-301-02
6mm shorting pin (black	—#674-31-100-00
6mm shorting pin (red)	—#674-31-100-02
6mm diode plug (black)	—#674-21-301-00
6mm diode plug (red)	—#674-21-301-02

*Fits 4.5mm boards also

INTERSWITCH

ONE OF THE **PURDY** GROUP OF COMPANIES

INTERSWITCH thumbwheel switches, matrix boards, and data-programming modules are stocked by leading electronics distributors from coast to coast. Your local distributor can make immediate delivery of any of the popular items identified above.

TOGGLE SWITCHES – HEAVY DUTY

J-B-T INSTRUMENTS, INC.

32nd Year

WHY IT PAYS TO SPECIFY J-B-T TOGGLE SWITCHES

• **J-B-T** concentrates on trouble - free switches. Among the four groups of toggle switches J-B-T produces more than 170 models made to Government Specifications. Market studies indicate that while these switches are a must in military applications, almost half are produced for non-military use where the principal requirement is dependability. J-B-T apparently is specified because:

1. **Materials are good.** For instance, in MIL and AN heavy duty models, J-B-T uses generous proportions of selected silver alloys in integral construction for contact surface areas — to add overload protection, dissipate heat, and keep contact resistance under .005 ohms.
2. **The design is good.** All MS models have silicone rubber bushing seal for sand, dust and specified toggle seal tests. Medium-duty types MS25098 and MS25100 also feature case-to-terminal sealing and a new design which provides fast break and wider gap to surpass the 125 VDC endurance tests of MIL-S-3950C.
3. **The value is good.** The many features required to meet Government standards, and J-B-T's rigid in-plant testing pay off in long, useful life. Nevertheless, because J-B-T makes **only** quality MIL or General Purpose switches, quantity production permits a surprisingly small price differential over run-of-the-mill brands.
4. **Deliveries are comparatively good.** See your distributor. Production is scheduled to back up his stocks with factory inventory of finished switches and work in process to meet predictable demand.

Cut-away view showing heavy duty MIL construction

Group I

HEAVY DUTY SINGLE- AND DOUBLE-POLE — MIL, AN, AND JAN TYPES

Series MS35058 and MS35059 to MIL-S-3950C; Series ST40A-H, ST42A-H, ST50K-T, ST52K-T to JAN-S-23, MIL-S-21195A (Ships), or DDAX Drawings

• **MIL-S-3950C SERIES** — Single-pole MS35058 with suffix —21 and above, and double-pole MS35059 types with suffix —21 and above are recommended when maximum reliability is required. Temperature, endurance, and altitude requirements exceed earlier MS types (suffix —1 to —19), AN3021 and AN3027 switches to MIL-S-6745, and ST styles to JAN-S-23 and MIL-S-21195A (Ships). All MS switches contain a silicone rubber bushing seal to meet sand and dust and toggleseal tests.

NOMINAL RATINGS: 20 Amp. at 125 VAC, 10 Amp. at 250 VAC. For MIL Requirements on Electrical Ratings ask for Condensed Catalog TS-966A.

SIZE: Single-hole; bushing 15/32"-32NS-2A by 15/32" high; toggle lever, 11/16" long. Bodies including terminals: **SP:** 1⅛" x ⅝" x 1-1/16" deep; **DP:** 1-21/64" x ¾" x 1-1/32" or 1-13/64" deep.

TERMINALS: Series MS35058 and Series MS35059 MIL-S-3950C switches have solderable 6-32 electro-tinned screw terminals; ST42's and ST52's use solder lug.

For more complete technical data, request Catalog TS-7.

TOGGLE SWITCHES — MEDIUM DUTY & CROSS-REFERENCE

J-B-T INSTRUMENTS, INC.

Group II

SINGLE & DOUBLE POLE — GOVERNMENT QUALITY

Series MS25098 and MS25100 to MIL-S-3950C; Series ST12-27 to JAN-S-23, MIL-S-21195A (Ships), or DDAX Drawings

Cut-away view showing self-wiping double-grip contacts

MS25100-23 DPDT Rear Connected; Lever Seal

ST27N, DPDT Side and Rear Connected ¼" Bushing

MEDIUM DUTY refers to current-carrying capacity rather than to life characteristics of these Group II switches which are widely used for both military and non-military applications. Some models are rated at 6 amp. at 125 VAC-DC, 3 amp. at 250 VAC-DC. Other models are rated 3 amp. at 125 VAC-DC, 1 amp. at 250 VAC-DC, as listed on next page. Self-wiping, heavily silver plated double-grip contacts provide exceptional durability. All MS25098 and MS25100 have case-to-terminal seals and silicone rubber bushing seal to meet sand and dust and toggle seal requirements.

DESIGN IMPROVEMENTS AND NOMINAL RATINGS. Significant internal improvements over earlier designs of MS25098 and MS25100 give faster break, wider gap, and increased insulation values, resulting in a longer useful life. Typical uses are: instruments, data processing, and communications circuits.

Although MIL and J-B-T general-purpose switches are substantially similar in materials and construction, differences in test procedures and test conditions cause nominal ratings for military types to differ considerably from the ratings for UL or other non-military models. (Typical ratings are shown on next page.) For instance, under MIL Specifications, switches are tested at pressures corresponding to altitudes of 65,000 ft., while non-military switches are tested to NEMA and UL procedures at sea level pressures.

SIZE AND TERMINALS — Whether MS series to latest MIL-S-3950C or ST series to Specification JAN-S-23 and MIL-S-21195A (Ships), all have solder terminals. Medium-duty types use 11/16" long, toggle lever, bushing 15/32" 32NS-2A by 15/32" (or ¼"). Bodies including terminals are: 1¼" long, 11/16" wide, 29/32" deep, except ST16A, -16B, -16C, -17A, and -27K are 1¾" long by 21/32" deep, while ST16D, -17D, -26N are 1¾" long by 29/32" deep.

Not included in this specification. ** AN3021-6 same as AN3021-5 with jumper. § Same dimensions as MS35059-27.

NOTE A: MS and AN types use internal sand and dust toggle seal and other high performance features involving extra cost over ST types. MS types to MIL-S-3950C have a silicone rubber bushing seal to meet sand and dust, and toggle seal tests. MIL-S-3950 models are superseded by MIL-S-3950C models.
NOTE B: For heavy duty switches in the MS25068, MS35058, and MS35059 Series, MIL-S-3950C calls for SCREW TERMINALS ONLY. These terminals have SOLDERABLE FINISH and may be soldered after removal of screw.

Prices shown are NET, F.O.B., Factory, domestic packing, November 1, 1970, subject to change. Quantity prices on request.

TOGGLE SWITCHES—4-POLE & SP & DP UL TABLES

J-B-T INSTRUMENTS, INC.

32nd Year

Group III

OUTSTANDING 4-POLE SWITCHES TO MS25068 REQUIREMENTS

• There is no mistaking the light brown color and silver printing of these distinctive J-B-T 4-pole heavy-duty switches. The superior molded body, chosen after extensive tests, features high arc resistance and low shrinkage. As a result the switches exceed the rigorous electrical endurance requirements of MS25068.

Equally important, J-B-T uses generous proportions of selected silver alloys in integral construction for contact surface areas—to add overload protection, dissipate heat, and keep contact resistance under .005 ohms. The 8 models listed here have silicone rubber bushing seals and solderable 6-32 screw terminals, the same as other heavy-duty J-B-T MS switches. Dimensions same as MS35059 except bodies including terminals: $1\frac{11}{32}$" long, $1\frac{7}{16}$" wide, $1\frac{9}{32}$" deep.

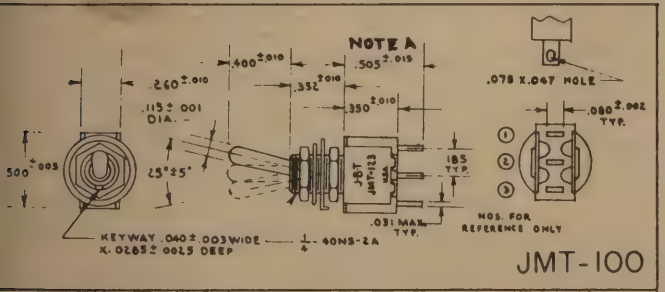
Other MS25068 Numbers: Models with suffix -1 through -13 as set forth in MIL-S-3950 are superseded by MIL-S-3950 Revision C Types. The latter are interchangeable electrically and mechanically but meet additional performance standards above the former types. Specifically, **MS25068-1** has become MS25068-21; **-3** now -23; **-5** now -31; **-7** now -27; **-10** now -26; **-11** now -24; **-12** now -28; **13** now -25.

UL IDENTIFICATION AND RATINGS*: SINGLE AND DOUBLE-POLE; HEAVY DUTY AND MEDIUM DUTY



Underwriters' Laboratories, Inc. lists under "Switches, Special Use" (File E26557) models marked with the J-B-T part number shown below. In some instances, there are minor construction differences from ST switches, but the ratings and external dimensions are the same. UL-marked types are not regularly stocked but only are manufactured in substantial production runs.

SUB-MINIATURE TOGGLE SWITCHES

J-B-T INSTRUMENTS, INC.

Group IV

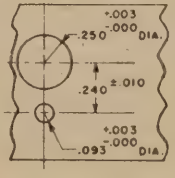
Series JMT Toggle Switches
1-, 2-, 3-, and 4-pole DT.

SERIES JMT, SUB-MINIATURE TOGGLE SWITCHES. A BROAD LINE MANUFACTURED IN CONNECTICUT BY J-B-T.

MANUFACTURED IN J-B-T's new plant, the subminiature types illustrated on this page make up the firm's fourth and newest group of toggle switches. Series JMT combines drastic reduction in size and weight with the trouble-free construction built into standard-size J-B-T switches. Widely used in manually controlled, low-current, solid-state devices and miniaturized circuitry of computers, instruments, space, geophysical, and test apparatus, these tiny switches also have application in aircraft, communications, peripherals and bio-medical systems as well as remote control and reservation systems.

Made with a distinctive GREEN BODY, single-pole types are ¼" thin, double-pole types less than ½" square, 3-pole and 4-pole types correspondingly small. All use single-hole mounting with ¼" threaded bushing which will not turn or work loose in the J-B-T surface plate. Stringent in-plant controls assure terminals that are firmly staked and will withstand repeated soldering. Terminal holes on JMT Series accept up to three #22 wires. Dimensions are shown on the other side of this page.

SPECIFICATIONS



Nominal Rating: 5 Amp. resistive load, 125 VAC and 24 VDC. **Initial Contact Resistance:** 5 Milliohms max. 3 VDC, 100 Milliamps. **Insulation Resistance:** 20,000 Megohms, min. **Dielectric Strength:** 1,000 volts rms at sea level. **Life Under Load:** 100,000 make-and-break cycles minimum for all suffix-23 models; 60,000 for others. **Weight, Including Hardware:** SP, 0.19 oz.; DP, 0.23 oz.; 3-pole, 0.28 oz.; 4-pole, 0.32 oz.

MATERIALS: Switching contacts and rockers are coin silver; center terminals silver-plated. Bat handle is bright chrome-plated brass. Switch bodies are molded of plastic selected for high strength and arc resistance. Bushing, locking ring, and hex nuts are brass nickel-plated. Lockwashers are made of steel (cadmium plated) with chromate treatment. Clamps are of stainless steel.

HARDWARE AND MOUNTING

(For dimensions, see drawings on preceding page.)

Mounting hardware supplied consists of one locking ring **W-RI-12,** two hex nuts, **W-NU-11,** one internal tooth lockwasher, **W-WA-16** Knurled nut, **W-NU-12** and tapered panel dress nut, **W-NU-14,** are also available.

DIRECTION OF MOVEMENT — All JMT switches make continuity to terminal OPPOSITE throw of lever.

MOUNTING INFORMATION — When mounting switch with locking ring, use drill procedure illustrated. For push button types, see next page.

COLOR CAPS — Switches are normally supplied with bat handles. For color coding, tight-grip insulator caps are available for easy attachment before or after switches are mounted. Price, $10.00 per thousand in bulk; 2c per switch if attached. Specify color and part number:

White — **W-CAP-10A** Black — **W-CAP-10D** Yellow — **W-CAP-10G** Gray — **W-CAP-10J**
Blue — **W-CAP-10B** Brown — **W-CAP-10E** Green — **W-CAP-10H**
Red — **W-CAP-10C** Orange — **W-CAP-10F** Violet — **W-CAP-10I**

SERIES MPC, PC1 and PC2 Sub-miniature toggle switches are made with terminals for insertion in printed circuit boards; MPC for direct insertion, and PC1 and PC2 for right angle insertion. Terminals are gold plated for ease of solderability. MPC Series includes the same models as the standard JMT Series as well as such modifications as FH (Flat Handle), LL (Lever lock), 15-Series (Large Bushing) and other variations. (Illustrations approximately actual size.)

For complete technical data, request Catalog MT-40

PB SERIES					
SPDT — SERIES PB-100					
Maintained Action Switch PB-123 Push to Make Contact, and Push Again to Reverse Action.			1.95	1.47	1.30
Momentary Action Switch PB-126 Normally Open, or Normally Closed. (Determined by how wired.) See Drawing for Circuitry.			1.95	1.47	1.30

† These DT switches may also be used as ST by wiring only to applicable terminals. Example: JMT-123 can be connected as an "on and off" switch by using center terminal and terminal on one end only.
‡ On orders for single switches, add 50c.
* Momentary position.
§ Also available 3- and 4-pole.

Prices shown are NET, F.O.B., Factory, domestic packing, November 1, 1970, subject to change. Quantity prices on request.

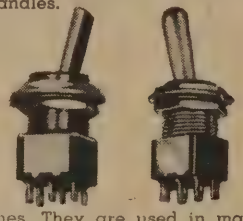
ADDITIONAL SUB-MINIATURE TOGGLE SWITCHES

J-B-T INSTRUMENTS, INC.

32nd Year



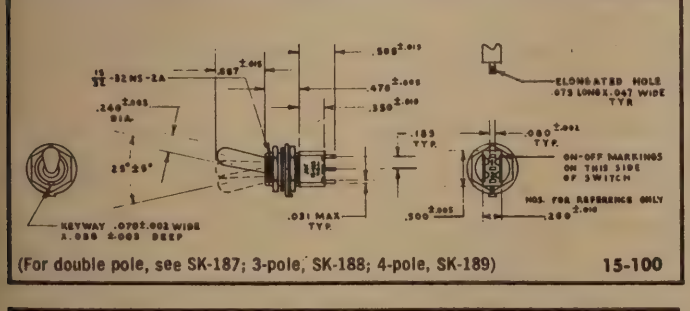
LFH SERIES with Flat Handles

SERIES LFH — provides a human engineering factor, with flat handles (paddle levers) that are easy to grasp, give good sensing of the direction of throw, and orderly panel appearance. Flatted on two sides, each lever is permanently aligned by a patented construction in its operating plane perpendicular to the flat. Standard finish is satin chrome, with bright nickel and other finishes available on special order.

The LFH Series, with .437" bushing and 22° throw is now cataloged and stocked. The earlier models, known as the FH Series, with flat handles, .352" bushing and 25° throw, are now available on special order. Both LFH and FH Series can be made in configurations corresponding to those in the JMT Series; some models are available with MPC terminals for printed circuits; some with UL listing. Also the 15 Series switches are available with flat handles.

15 SERIES with 15/32" Bushings to Match Standard Size J-B-T Toggle Switches

SERIES 15 — Sub-miniature toggle switches combine the behind-the-panel space saving feature of the standard JMT Series with the front-of-panel appearance of standard size switches. They are used in many applications where circuitry requires switches of different capacities, but good panel design calls for uniformity. Electrical and mechanical characteristics of Series 15 switches are the same as for JMT switches given in Catalog 449, except for the larger (15/32") bushing and slightly greater weight. Mounting and hardware are the same as for standard size J-B-T toggle switches. Circuit identification caps are available in red, white, and black.

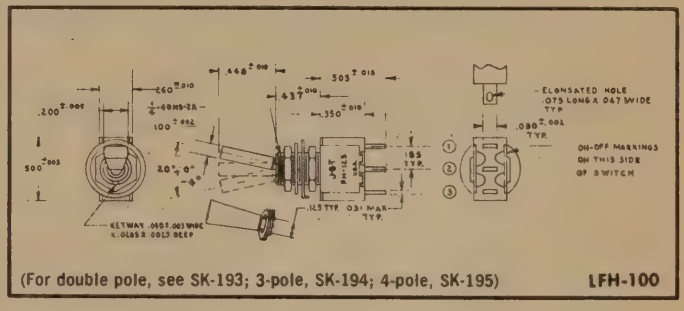


PB SERIES Push Button Switches

SPECIFICATIONS

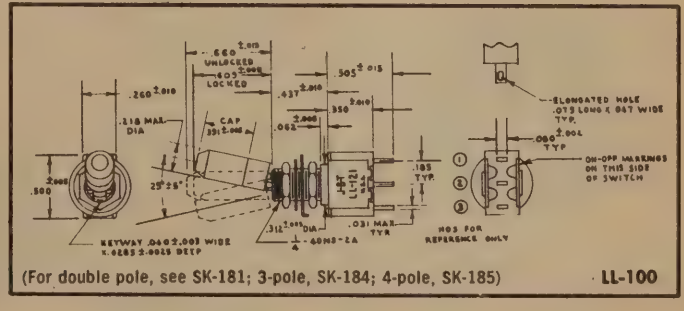
Nominal Rating: 5 Amp. resistive-load, 125 VAC and 24 VDC. **Initial Contact Resistance:** 5 Milliohms max., measured at 3 VDC, 100 Milliamps. **Insulation Resistance:** 10,000 Megohms, min. **Dielectric Strength:** 1,000 Volts rms at sea level. **Life Under Load:** 100,000 cycles make-and-break, min. **Force Required To Operate:** Less than 2 lbs. Rapid break generates audible click. **Weight, Including Hardware:** Single-pole 0.4 oz.

Materials And Construction: Switching contacts and rocker are coin silver; center terminal silver plated, standard. Available with gold plated current carrying parts where required for dry circuit applications. Bushing and plunger are nickel plated brass; bushing has shoulder for greater strength. Clamp is stainless steel. Body is high-strength plastic, J-B-T green and black. Standard knob (W-KN-10) is anodized natural aluminum. Anodized colors, green, blue, red, black and gold are also available at slight extra cost. Buttons of other shapes, colors, materials or with imprints are also available on substantial production runs at extra cost. **Mounting Hardware** consists of 2 hex nuts, W-NU-11 nickel plated brass, and an internal tooth lockwasher, W-WA-16. A knurled face nickel plated nut (W-NU-12) is also available. Mounting in panel is in 1/4" D-shaped hole. (See drawing below.)

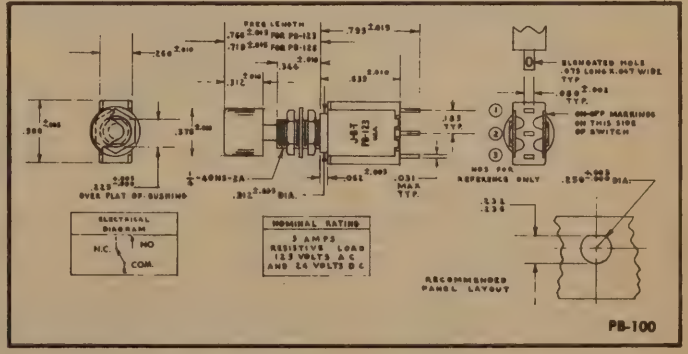


(For double pole, see SK-187; 3-pole, SK-188; 4-pole, SK-189) **15-100**

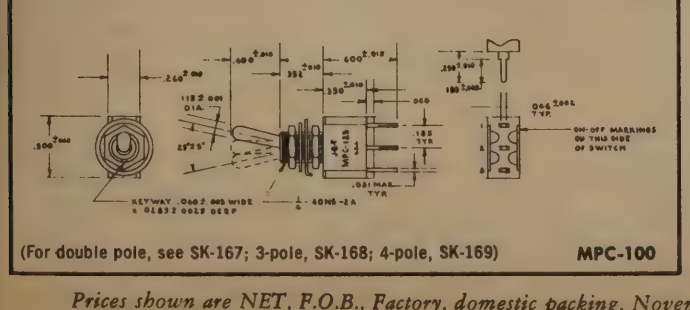
LL SERIES with Locking Levers



SERIES LL — Made with spring-loaded locking mechanism to prevent accidental shifting of the lever — a definite advantage on planes, ships, trains, or other vehicles where sudden motion might cause switching errors. Also, for test equipment other instrumentation or computer circuits where accumulated data might be lost through unintentional switching. As a human engineering factor, the operator must **think** about the switching operation before he can complete it.



LL Series switches are normally stocked with natural aluminum caps, but for circuit identification caps can be supplied with anodized colors: red (danger), black, blue, gold or green.



(For double pole, see SK-193; 3-pole, SK-194; 4-pole, SK-195) **LFH-100**

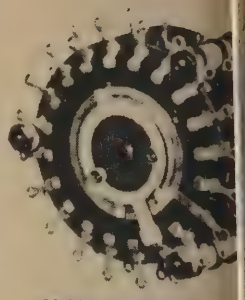
ROTARY SWITCHES — LAMINATED AND MOLDED

J-B-T INSTRUMENTS, INC.



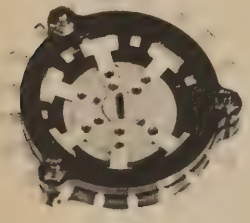
MS-14-1 Molded

- **INSTRUMENT AND TESTER TYPE**
- **14- AND 20-POSITION**
- **SINGLE AND MULTI-DECK**
- **MILITARY OR COMMERCIAL**

USES - J-B-T Rotary Selector Switches are extensively used in quality test equipment, portable instruments, inspection setups, and other military aerospace and commercial applications where trouble-free, dependable performance is of major importance.

FEATURES **Extra Contacts** - 14- and 20-position designs provide extra switching capability. **Dependability** - Sturdy rotors and decks with rigid 3-post deck suspension; current-carrying parts heavily silverplated to meet 100 hour salt spray test; sharp detent mechanism to assure positive indexing; insulation resistance above 50,000 megohms. **Low Contact Loss** - Double-grip collector arms, and large area contacts, silver to silver; average contact resistance, .007 ohms or less. **Ample Dielectric** Conservatively rated at 1 amp., 125 VAC, inductive load; maximum momentary capacity (not make-and-break), 5 amp. AC or DC; maximum voltage between contacts, 1500 VAC, R.M.S.; between decks and ground, 2000 VAC, R.M.S.

SS-20-2 Laminated



Enclosed - Molded models have all moving contacts enclosed to minimize dirt and corrosion.

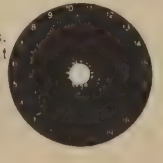
Basic 14-Position: 13 circuits and "off" per deck in 2" circle **(SS-14)** or 2-3/32" circle **(MS-14)** with 25° 43' angular indexing. Supplied individually boxed with **1-1/4" Bar Knob, (KN-14),** not on bulk orders unless specified. For details, **SS-14,** 1 to 6 decks, see Print SK-42 Rev. B. **MS-14** 1 to 6 decks, Print SK-111 Rev. D, 7 decks and over, Print SK-112 Rev. C.

Basic 20-Position: 19 circuits and "off" per deck in 2-23/32" circle **(SS-20)** or 2⅝" circle **(MS-20)** with 18° angular indexing. Supplied individually boxed with 2" **Bar Knob (KN-16),** not on bulk orders unless specified. For details, **SS-20** 1 to 6 decks, see Print SK-116 Rev. A. **MS-20,** 1 to 6 decks, Print SK-113 Rev. D, 7 decks and over, Print SK-114 Rev. C.

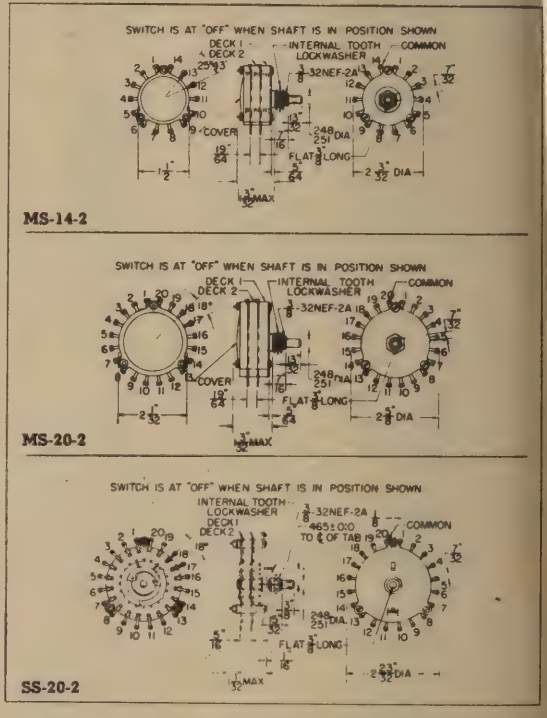
Military or Commercial Variations: Special switches too numerous to list now are being made. Typical are: laminated models with 14 or 20 live positions, no off, designated by suffix F as in SS-14-2F or SS-20-1F*. Inquiries are invited.

***BONDED RUGGEDIZED TYPES** As indicated in the table, all molded rotary switches may be ordered with bonded construction as **MS-14B** or **MS-20B** types using cured laminations for ruggedization, shockproofing and further enclosure. This additional dependability factor adds only approx. 1/64" and 35c catalog price per deck.

MS-20-1-6DT
Double-throw Switching of 6 circuits per deck



6-POLE DOUBLE-THROW PER DECK —



1 or 2 DECKS (DT Series). Widely used for simultaneous double-throw switching of 6 circuits per deck (18° throw). Fully enclosed - - illustration shows protective cover cut-away. Circuit arrangement printed on switch front. If DTS Shorting Type, 1500 VAC R.M.S. between contacts and ground, 1000 VAC R.M.S. between contacts. See **MS-20-1-6DT, MS-20-1-6DTS,** and **MS-20-2-6DT** in table.

ETCHED DIAL PLATES

For switches below, also 20M Series. Dull black finish, raised bright numerals, 2¾" dia.

NOTES TO TABLES

* Standard Items, but not regularly stocked; check with your electronic parts distributor.
(a) 5 positions include 4 "live" and 1 "off."
(b) 6 positions include 5 "live" and 1 "off."
(c) Complete shorting—all contacts shorted except one use.
(d) Dimensions given are for continuous rotation switche On Standard SS-14 Models only, adjustable stops a also furnished, and when used, increase depth behi panel 3/32" and decrease effective bushing length 3/

Non-Shorting — Break before make **Shorting** — Make before break

*"F" type decks (14 full live or 20 full live positions, no "off") available on SS-14 and SS-20 Series only. Add 35c per deck to catalog price.

Prices shown are NET, F.O.B., Factory, domestic packing, November 1, 1970, subject to change. Quantity prices on request.

MULTI-POLE AND LEVER TYPE SWITCHES

J-B-T INSTRUMENTS, INC.

32nd Year

IMPROVED MULTI-POLE MOLDED ROTARY SWITCHES, SERIES 20M.

• Superior Molded Material • All Models Bonded & Ruggedized • Panel Seal Available

Front View Showing Panel Locator which is Normally at 3 o'clock Position.

Rear View with Back Cover Cut Away to Show 4-Pole Construction with 4 Live Switching Contacts.

Although the new 20M- Series is 1/4" longer behind the panel than the 20-position molded switches described on the preceding page, the two styles are otherwise interchangeable in dimensions. Providing 19 live positions and off, the 20M- offers these additional features:

1. **Increased Versatility of Circuitry** — up to and including four poles per deck;
2. **Upgraded Insulation Resistance and Dielectric Qualities** — by use of melamine stators and rotors (or other MIL-M-14 molded materials when specially ordered);
3. **Built-in Panel Locator or Non-Turn Device;**
4. **Extended Switch Life** — new contact design with rotor brushes of phosphor bronze heavily silver-plated;
5. **All 20M- Models are Bonded and Ruggedized Construction;**
6. **Radial Alignment of Multi-Pole Contact Surfaces** — by means of newly-designed double-ball detent with diaphragm-type springs.

VARIATIONS OF 20M- — Please request SK-142, Revision of March, 1967, or later for full dimensions and circuit diagrams. Besides the condensed listing in the accompanying table, various combinations of **shorting and non-shorting contacts for each deck** may be made. **Fixed stops** are built-in but may be altered for single-pole switches when specially ordered. **Over six decks** can be supplied for a reasonable number of poles; extra decks add 5/16" per deck and 5/16" per switch for rear support SU-3. **Ring-contact** (suffix R) may be specially ordered.

PANEL SEAL PS20M- SERIES — Sealed shaft and bushing meet the requirements of MIL-S-3786C for sealing. For details ask for SK-143, Revision of March, 1967, or later. The seal (prefix PS) adds $1.75 per switch to catalog price.

SPECIFICATIONS AND TEST DATA — Available on request.

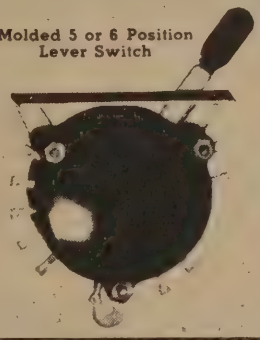
* See MS-20 drawing on following page for location of positions.

Notes: (1) For standard switches, knob pointer (active position) is 180° opposite flat on shaft, and off is at position 20.
(2) **NON**-shorting (N) type — (break-before-make) — is shown. For shorting type (S), add $.05 per pole per deck to catalog price. Example: 3 pole, 3 deck 20M-3053S is $9.45.
(3) All models have 18° angular indexing.
(4) Maximum **LIVE** positions per single pole, 19; per 2-pole, 9; per 3- and 4-pole, 4.
(5) Switches (such as 15 or 18 position) with all live or less than maximum live positions can be provided by fixed stops.
(6) Maximum of 9 decks for 1 pole per deck
6 decks for 2 poles per deck
4 decks for 4 poles per deck.
(7) †Suffix-F denotes all rotation positions shown are **live** with no off.

LEVER ACTION SWITCHES — 6, 5, 4, 3, and 2-Position — LAMINATED, MOLDED, & SUB-MINIATURE

LAMINATED 3- AND 4-POSITION, POSITIVE INDEXING. These lever switches are derived from the J-B-T SS-14 instrument-type rotaries. Specified for tube checkers, inspection equipment, communications systems, control consoles, and other uses where quality is important. 4-position types are interchangeable with 3-position except in length of throw (1" slot for 3-position, 1 3/8" for 4-position) — mounting holes for boxed switches come with mounting hardware and KN-17 knob as illustrated; bulk shipments, without knobs. **SINGLE DECK-** spacing between centers: recommended, 3/4"; minimum, 9/16". **TWO DECK-** spacing: recommended, 15/16"; minimum, 13/16". 3/8" between decks matches TV twinlead wires. **SPRING RETURN TYPE-** single deck, 3-position switches may be ordered with spring return. Lever returns to position 11*, giving momentary action at positions 9* and 10*. For dimensions on all SS-14-IL series switches, ask for drawing SK-138.



Two-Deck Lever-Action Switch

SS-14-1L4F-2

Positions Per Circuit	Circ. (Poles) Per Deck	Decks or Gangs	Short. Non-Short	Stand.* Contact Pos.	Model	Boxed Incl. Knob
3, no "off"	1	1	N-S	A	**SS-14-1L3**	**$1.10**
3, no "off"	2	1	N-S	B	**SS-14-1L3A**	**1.25**
3, no "off"	1	2	N-S	A	**SS-14-1L3-2**	**1.80**
3, & "off"	1	1	N-S	C	**SS-14-1L4**	**1.20**
4, no "off"	1	1	N-S	D	**SS-14-1L4F**	**1.20**
4, no "off"	1	2	N-S	D	**SS-14-1L4F-2**	**2.10**

* Numbers correspond to contact positions in MS-14-2 drawing on prior page. A—common at 12, contacts at 9, 10, 11; B—common at 9, 10, contacts at 6, 7, 8, 12, 13, 14; C—common and off at 12, contacts at 9, 10, 11; D—common at 12, contacts at 8, 9, 10, 11.

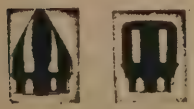
Molded 5 or 6 Position Lever Switch

MOLDED 5- and 6-POSITION, POSITIVE-INDEXING. 5 or 6 live positions, two circuits per deck, in enclosed lustrous black molded construction; adapted from the MS-20 series with electrical characteristics as shown on the next page. These models can simplify circuitry for sound systems, control, inspection, test, experimental, and hobby purposes. Individually-boxed switches come with KN-20 threaded black molded knob; bulk shipments, without knobs. For mounting data see SK-64, Rev. H on 5-position and SK-119, Rev. B on 6-position.

MS-20-1L5A-1, 5-position, 2-circuit (1 deck) **$3.45**

MS-20-1L6A-1, 6-position, 2-circuits (1 deck) **3.70**

Sub-Miniature 1 Dual Duty Deck



2 AND 3 POSITION, 1 TO 4 DECKS, 2 TO 8 POLES PER DECK.

SUB-MINIATURE LEVER SWITCHES — Derived from the high-performance sub-miniature switches described on another page, the VL-7000 and the VL-5000 positive indexing series and the VSRL-7000 and VSRL-5000 spring return types provide excellence in lever switches. MIL materials throughout; crisp 30° indexing. Max. depth behind panel 1.250"; panel slot .962" x .062"; other details to SK-139, Rev. A and Catalog SM-33. Typical switches are:

VL-71031N, single-pole, 3-position, one-deck, non-shorting **$4.80**

VSRL-71031N, same as above, with spring return to center position from either side **5.80**

VL-71032N, single-pole, 3-position, two-deck, non-shorting **7.05**

LEVER KNOBS

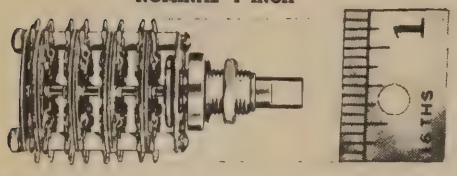
KN-17, black pointed with metal insert **$0.19**
KN-18, walnut, same as KN-19 **0.08**
KN-19, black, round, flat-type, push-on **0.08**
KN-20, black, threaded, for MS-20-IL **0.20**

TYPE SR31 LEVER-ACTUATED SWITCHES TO MIL-S-3786C, MEDIUM AND HIGH SHOCK

Sub-miniature open construction, lever-actuated switches, similar to the one illustrated above, recently have been added to MIL-S-3786C as SR31 types. This category covers shorting and non-shorting; 1 to 4 poles per section; 1 to 4 sections per switch; Medium Shock M, as in Model VL-71031N-SR31N30C3MGC (M3786/31-034), will normally be supplied, but High Shock H is available. Typical models are priced on next page.

Prices shown are NET, F.O.B., Factory, domestic packing, November 1, 1970, subject to change. Quantity prices on request.

J-B-T
32nd Year



SUB-MINIATURE ROTARY AND LEVER SWITCHES

J-B-T INSTRUMENTS, INC.

SUB-MINIATURE SWITCHES MADE TO MANY PERFORMANCE LEVELS OF MIL-S-3786C, TYPE SRO5; ALSO NON-MILITARY X AND V VERSIONS.

SERIES 7000, FULL 12 LIVE SWITCHING CONTACTS PER DECK: SERIES 5000, UP TO 8 POLES PER DUAL-DUTY DECK.

NOMINAL 1 INCH

4 DECKS Series 5000

Model Number V-52114N-SRO5S30C3MGC. Terminals have hole to accept two 0.032" dia. wires, and supersede solid "T" terminals formerly supplied.

- **Precision built for Low-Current Usage where Size, Weight, Reliability are Important**
- **Unusual Versatility — More Contacts per Deck**
- **Accelerated Snap-Action Detent**
- **MIL Materials Throughout for Military & Non-Military Applications**

CAUTION—MIL-S-3786C, a sophisticated specification, spells out more than one performance level in each of several categories such as Temperature-Life, Vibration, Shock, and Altitude, J-B-T SRO5 models meet many levels.

- **USES — For test equipment, airborne and transistorized equipment, geophysical apparatus, and other miniaturized electrical and electronic devices.**

TWO BASIC SERIES — Full 12 live switching contacts per deck are available in **Series 7000** using a patented wafer design feature where rotor contacts are on the front, and switching contacts are on the rear of the same deck. 1 to 4 poles per deck 1 to 6 decks, standard.

Up to 8 poles per dual-duty deck are available in **Series 5000** which has up to 12 contacts including common on the front, and up to 12 contacts including common on the rear of the same deck. 1 to 4 poles on each side of dual-duty decks; 1 to 4 decks, standard.

THREE ROTARY TYPES — Both Basic Series are made in 3 types: **MILITARY STYLE SR05,** numbered for specific performance levels of MIL-3786C; **V TYPE,** of similar construction to SR05, but not ordinarily subjected to full military test procedures; and **X TYPE,** using the same materials as V type switches, but intended as replacements for previous models or as original components for non-military devices where requirements are similarly exacting.

LEVER SERIES (L and SR31 Types) — Outstanding design known as VL-7000 or VL-5000 Series, 1 to 4 decks. Illustrated on a preceding page.

KNOBS — Supplied with individually boxed switches on V and X types; not supplied on SR05 because separate military specification applies.

SEALED **SRO5 SHAFT AND BUSHING SEAL NOW AVAILABLE ON 1" OPEN CONSTRUCTION ROTARY SWITCHES TO MIL-S-3786C**

- The versatility of J-B-T 1" open construction sub-miniature rotary switches described in Catalog SM-33 is increased by the addition of shaft and bushing seals to meet the requirements of SRO5S Type to MIL-S-3786C.

Principal differences:	SRO5N	SRO5S
Sealed Shaft-to-bushing	No	Yes
Sealed Panel Bushing	No	Yes
Bushing Size	Round 3/8-32	Flatted (D-Shape)
Depth behind panel	See Table Preceding Page	.100" longer
Non-Turn Device	Yes (unless otherwise ordered)	Provided by flatted bushing
Other Details	Print SK-135 (E)	Print SK-179

DIFFERENCES BETWEEN SR05 MILITARY, V, and X — Switches other than X types use extra rugged index mechanisms and rotor construction.

	NON-MILITARY		MIL-S-3786C
ITEM	X-7000 X-5000	V-7000 V-5000	V-7000-SR05 V-5000-SR05

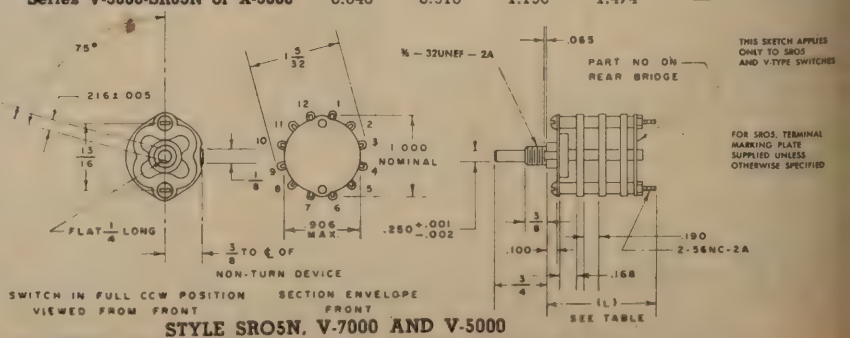
	1	12	N-S				V-71123N-SR05S	11.45	10.51



* Complete model number for a typical MIL-S-3786C rotary switch is: V-71121N-SRO5N30C3MGC, which designates specific performance levels. Likewise, for a typical lever-actuated switch; M3786/31-040. Unless otherwise ordered, switches will be furnished to this suffix (N30C3MGC). On certain models, sealed shaft and bushing are available at $2.00 extra cost; or shock type H (high impact), also at $2.00 extra, when so ordered.

SPECIFICATIONS & TEST DATA ON SR05 MILITARY STYLE

NOTE: Most of the values shown here are given in the Specification and do not indicate the extent to which the test results of J-B-T switches were more favorable.
Current-carrying capacity: 5 amps at standard ambient conditions.
Current-breaking capacity: 750 MA at 30 VDC; 300 MA at 120 VDC; 1 AMP at 115 VAC Non-Inductive.
Initial Contact Resistance: 005. ohms max.
Contact Resistance: To MIL-STD-202D, Method 307, which requires Initial — 20 milliohms; After Moisture Resistance Test — 30 milliohms; After Life Test — 40 milliohms.
Materials: Terminals (double-wiping): gold-plated 90% silver alloy. **Rotor Contact:** J-B-T #1800 Silver Alloy. **Shaft & Frame:** Stainless steel, passivated.
Insulation: Wafer, glass epoxy laminate to MIL-P-18177C Type GEB, NEMA G-11; Rotor, ceramic to MIL-I-10A, Grade L-623.
Life Rotational; Temperature-Life Characteristic C, 25,000 rotational cycles at 10 cpm, Temperature —65°C to +125°C; 25,000 cycles at 70,000', room ambient temperature.
Vibration: Grade 3 of Table III MIL-S-3786C, 10 to 2000 cps. Tested in accordance with MIL-STD-202D, Method 204. Test Condition B.
SHOCK: Shock Type M, Medium Impact per Table IV, MIL-S-3786C. Tested in accordance with MIL-STD-202D, Method 205. Mating contacts did not open for more than 10 microseconds. Shock Type H, High Impact, Method 207, specifies not more than 5 milliseconds and does not automatically cover Type M Impact.

REMARKABLE NEW 12 POSITION ROTARY SWITCHES

J-B-T INSTRUMENTS, INC.

J-B-T

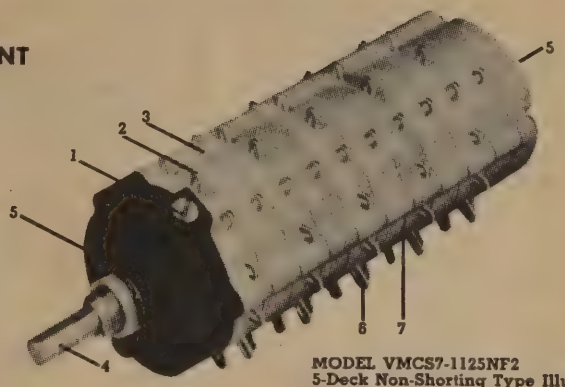
32nd Year

V/M SERIES 12-POSITION ROTARY SWITCHES

ULTRA-HIGH QUALITY WITH ADJUSTABLE TORQUE DETENT

This unusually fine family of fully enclosed rotary switches is being produced in J-B-T's thoroughly modern new plant. Used in precise laboratory test apparatus, test set-ups, telemetering, meter switching, calibration operations, and similar applications where circuit stability is essential to accuracy and repeatability. The V/M Series virtually eliminates the influence of extraneous factors to the circuitry, and the initial electrical and mechanical characteristics remain substantially unchanged throughout the long useful life of the switch.

SPECIFICATIONS (apply only to VMCS7 Models with coin silver contacts and rotor blades.): **Initial Contact Resistance,** .002 ohms; **Maximum Inductance,** less than .03 microhenry; **Capacitance between Segments,** less than 2 PFD; **Thermal EMF,** less than 1 microvolt; **Current Carrying Capacity,** 5 amp.; **Dielectric Strength,** 1000 volts, rms, 60 cy. — terminals tc ground and terminals to terminals; **Insulation Resistance,** greater than 500,000 megohms; **Life Cycling** (make and break), 100,000 cycles at 1 amp., 120 VAC, res. and ind., and 28 VDC res. and ind.



DIMENSIONS: diameter over terminals 1⅞"; bushing ⅜-32 x ⅜" long; non-turn device ⅛" diam., 17/32" from shaft centerline.

NOTES:

*Model Number shown is for VMCS7, with coin silver contacts and rotor blades. For nickel silver, model number would be VMNS7; for silver plated brass contacts and nickel silver rotor blades, VMSB7.

**Unlike other J-B-T rotary switches, VM series is normally shorting type; for non-shorting construction add 50¢ per deck per switch, Net. Made only on special order.

† Includes knob and mounting hardware. Quantity prices on request.

MODEL VMCS7-1125NF2
5-Deck Non-Shorting Type Illustrated
(Shorting Type Has Common Deck Adjacent to Front of Switch)

FEATURES:

(1) Adjustable detent action for variable torque (or factory set for 4 inch-lbs. max.) (2) Unusually sturdy molded-in terminals, .032" thick; accomodate two #18 wires. (3) Distinctive color-coded glass alkyd or diallyl phthalate decks — **gray** for coin silver alloy contacts and rotor blades; **blue** for nickel silver; and **green** for silverplated brass. (4) Husky ¼" stainless steel shaft. (5) Permanent identification of positions 0 through 11, cast in detent housing and molded in rear deck. (6) Integral connections between contacts and terminals — no mechanical joints. (7) Enclosed decks may be stacked for explosion-proof switch, per methods 3 and 4 of MIL-E-5272.

RESONANT REED RELAYS AND OSCILLATOR CONTROLS

Applications: selective-calling mobile communication equipment, remote data transmission, and simultaneous or sequential coding and decoding.

For further data, ask for Bulletins 162-R and D664A. Inquiries are invited on combination relay-oscillator types.

Dual-Reed Oscillator Control RO-B10B-188.0

Single-Reed Oscillator Control RO-D62E-250.3 (Vibration-Isolated in All Planes)

Relay RR-DO2E-250.3 (Vibration-Isolated in All Planes)

J-B-T frequency-sensitive electro-mechanical relays (decoders) are highly stable control devices. They intermittently make and break contacts when a signal of the same frequency as the tuned reed is received. Although the reed has a high Q, the bandwidth at which the relay responds will be proportional to the input signal level.

RO-B Oscillator Controls (sometimes known as tone generators or encoders) are dual-reed units internally shock mounted and of sealed construction. These units control the frequency of oscillation in vacuum tube or transistor oscillator circuits. The RO-B type oscillator control is recommended where accurate and stable AC signals are required.

RR-D types are internally shock-mounted resonant reed relays, which are square, sealed units with 7-pin miniature plug. They now are the most widely used J-B-T relays.

RO-D types are single-reed, internally shock mounted oscillator controls for applications where space saving is of importance. Dimensionally they are identical to RR-D relays.

TYPICAL REED RELAY AND OSCILLATOR CONTROL SPECIFICATIONS

Model	Enclosure	Mounting & Connections	Frequency Range CPS	DC Coil Resistance (Standard)	Accuracy to	Change per °C —40° to + 100°C	Individually Boxed

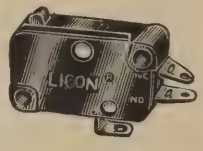
Prices shown are NET, F.O.B., Factory, domestic packing, November 1, 1970, subject to change. Quantity prices on request.

LICON Switches

TYPE 10 BASIC SWITCHES



Type 10—Highly sensitive switch utilizes one-piece mechanism. Assures long life with excellent repeatability and positive snap action. Wide choice of actuators. Rated 15 amps, 125, 250, 460 VAC; ½ amp, 125 VDC. ⅓ hp, 125 VAC; ½ hp, 250 VAC. Size, 2″ x 1″ x 1 1/16″; 1″ mtg. centers. UL Listed; CSA Approved.

Licon Number	Description	Microswitch Equivalent	List Price*
10-122	Pin plunger, .020″ gap	BZ-2RT	$2.00

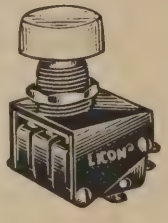
Also available in Type 08 heavy duty 22.5 amp version. Write for information and prices.

TYPE 23 HIGH CAPACITY SWITCHES



Type 23—High capacity, single-break switch provides excellent mechanical and electrical life. "Heat dam" slot eliminates flow of solder and flux into switch body. Available with screw or taper tab terminals also. Integral type roller and straight lever actuators offered. Rated 15 amps, 125/250 VAC; 8 amps resistive, 6 amps inductive, 30 VDC. Size, 1.344″ x .625″ x .410″; .875″ mounting centers. UL Listed and CSA Approved.

TYPE 25 MINIATURE THIN SWITCHES

Type 25—Miniature, snap action thin switch employs coil spring mechanism similar to that of the exclusive Licon Butterfly® double break switches. Provides extremely long life with 12.0-amp rating. Excellent contact wiping action, low contact resistance, high shock and vibration resistance are additional features of this Form C switch. Designed for commercial applications which require reliability at low cost. Ideal for coin and vending machines, timers and counters. Off-center plunger versions allow for extremely light operating force to 25 grams max. Rated 6 amps resistive, 3 amps inductive, 125/250 VAC. Tested to 20 million operations. Size, 1½″ x .825″ x .283″, on center version; 1½″ x 5 3/4″ x 9/32″, off-center version. 1″ mtg. centers. Solder terminals. UL Listed.

TYPE 26 DOUBLE POLE SUBMINIATURE SWITCHES

Type 26—Subminiature double pole switch utilizes two Licon Butterfly® double-break mechanisms. Simultaneity of operation of both poles insured by special linkage between mechanisms. Switch eliminates need for dual components and actuating mechanism; requires less space than two single pole miniature switches. Type 76 actuators fit type 26 switches. Pushbutton and toggle actuators fit 26-800 switch series only. Rated 8 amps, 125/250 VAC; 10 amps resistive, 5 amps inductive, 28 VDC. Size, 2 3/32" x .761" x 1/4". UL Listed.

LICON Switches

TYPE 01 LIGHTED PUSHBUTTON SWITCH WITH SINGLE LAMP INDICATOR

(DISCOUNT SCHEDULE "B")

Type 01 pushbutton switch combines single bulb panel indicator with multi-pole pushbutton switch. For original equipment or replacement of toggles with color-lit or legend-coded button. Provides a visual reminder that a circuit is on or off at a glance. Available in red, white, yellow, green, or blue pushbutton, ⅝" and ¾" round or square, and 1⅛" diameter round lens caps; solid or projected color illumination. **Order lens cap separately.** Available in one and two-pole form C or form Z contact arrangement. Switch rated at 10 amps, 250 VAC or 30 VDC. Momentary, maintained, solenoid held and indicator models. One hole mounting with choice of 15/32" or ⅝" bushing. Uses T-1¾ lamp with screw or flange base (not included in price). Overall size: 1 29/32" x ⅝" x 2 5/32". UL Listed.

TYPE 01-800 SNAP-IN ILLUMINATED MATRIX MOUNTING SWITCH—WITH SINGLE LAMP INDICATOR

(DISCOUNT SCHEDULE "B")

Type 01-800 single-lamp lighted pushbutton switch offers time-saving snap-in front mounting on panels. Combination bezel-barrier eliminates misguided actuation. Choice of screen colors with solid or projected illumination. Choice of momentary or maintained contact types in Form C (SPDT) and Form Z (SPDT, double break); or, indicator-only units. Switch rated 10 amps, 125/250 VAC; UL Listed. Uses T-1¾ flange bulbs (not included in price); simple front-panel lamp servicing without tools. Compact 1⅛" x ⅞" lens cap gives ample space for engraving or hot stamping.

TYPE 02-800 TWO-LIGHT SWITCH

(DISCOUNT SCHEDULE "B")

Economical two-light version of the 01-800 with efficient snap-in mounting and attractive bezel barrier appearance. Size, 1⅛" x ⅞". Employs 76-27XX series snap-on switch module. To order complete unit, select a lens cap, housing, and switch module (76-27XX, as shown in 04 section).

LENS CAPS

LICON Switches

TYPE 04 LIGHTED PUSHBUTTON SWITCH—WITH FOUR-LAMP INDICATOR

Type 04 illuminated pushbutton switches combine four-bulb panel indicator ⅞″ square with multipole switching. Choice of full or split screens: Projected or solid color illumination. Four different styles: Momentary or maintained contact; solenoid held switch models, with form C or form Z contact arrangements; and indicator-only units. Switch rated at 10 amps, 250 VAC or 30 VDC. Uses T-1¾ flange bulbs (not included in price). Simple front of panel lamp servicing without tools. Choice of flange, barrier, bezel or bezel barrier mounts. **Order each module individually.** A light module, a housing module and a switch module make a complete assembly. A light module and a housing only makes an indicator only.

Type 04 Indicator/Switch

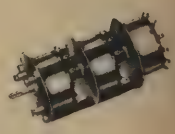
OHMITE power tap switches, high current, non-shorting type



Introducing

MODEL 711
Smallest Switch for Its Rating

Ohmite single pole, rotary, multi-position switches have proven their durability over many years in demanding applications. Such applications are found in switchboards, arc welders, spot welders, battery chargers, motor controls, tapped transformers, X-ray equipment, diathermy equipment, radio transmitters, electrical machine tools and many other products. Six sizes, including the new, miniature Model 711, provide a choice of ratings from 7 amperes at 125 volts to 100 amperes at 300 volts AC. A choice of the number of taps is provided up to the maximums indicated. All switches are enclosed except for the Models 711 and 111. All switches feature the slow-break, quick-make action deemed so desirable for switching of AC current.

The five sizes offering ratings from 15 amperes to 100 amperes (Models 111, 212, 312, 412 and 608) feature all ceramic, arc-proof bodies and solid silver alloy, fixed and movable contacts. The large, thick, silver-alloy fixed contact disks are permanently welded to copper studs. These, in turn, are riveted and soldered to sturdy terminal lugs, assuring a permanent mechanical and electrical joint. The rotor (moving) contact, also of solid silver-alloy, is riveted and soldered to the contact arm. Face of the rotor contact is slightly rounded assuring a perfect seating of the contacts with a slight rubbing, self-cleaning motion on every operation.

The new Model 711 tap switch was designed to achieve high current capability with small size. It is actually smaller than many low current instrument switches. It interrupts 7 amperes at 125 VAC and can carry 15 amperes AC or DC. The Model 711 features a melamine phenolic body with solid silver alloy fixed and movable contacts. Dual-purpose terminals allow connection by soldering or by means of 3/16" quick-connectors. This switch is stocked as a single, unenclosed unit, but is available made-to-order in enclosed tandem assemblies up to 10 units or as a single enclosed unit.

The following Ohmite Tap Switches are listed by the Underwriters' Laboratories, Inc., Reexamination Service for use where the acceptability of combination (with other apparatus) has been determined by them: Models 111, 212, 312 and 412. Variations from the basic switch design, identified by suffixes A, B, C, or X are also Underwriters' approved. When the switches are not factory installed, screw terminals are specified by the Underwriters' Laboratories for Model 312 and soldering lugs for Model 412. Further information on terminal fittings is available on request. When an Underwriters' approved unit is required, specify this on the order.

MODEL 711 TAP SWITCH

Alternating Current Rating **7 Amps. 125 Volts** — Diameter 1 1/8" — Shaft Diameter 1/4" — Standard Mounting: For 1/8" panel maximum, by means of 3/8"-32 threaded bushing and hex. nut. See mounting illustration "A." Weight, single unit: .047 lb. approximately. Dual-purpose terminals accept 3/16" quick-connectors as well as soldering. Non-turn lug can be positioned at "12, 3, 6, and 9 o'clock."

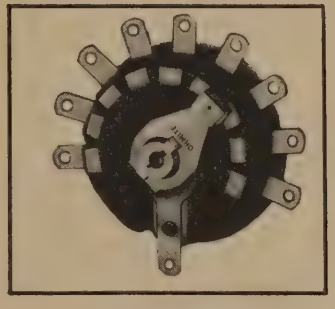
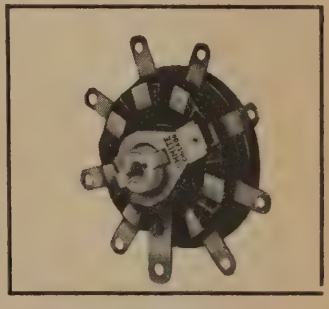
LL CERAMIC OPEN TYPE TAP SWITCHES



esigned to transfer currents of several amperes in circuits requiring high oltage insulation. Ceramic body construction is the same as employed in odels J and K rheostats (see page 21). Monel metal taps; silver-graphite rush.



SHORTING TYPE SWITCH: Moving contact bridges closely spaced taps ompleting a new circuit before breaking the previous one. Switch arm is ot indexed and can be left in any position.

NON-SHORTING SWITCH: Positively indexed, moving contact completely sconnects from one tap before contacting succeeding tap.

Switches up to 8 taps are approximately 3¼" diameter including lugs; to 12 tap switches are approximately 4¼" diameter. Switches can be rdered assembled 2 to 3 in tandem. Single hole mounting by means of ⅜" diameter bushing and hexagon nut accommodates panels up to ¼" ick (maximum). The "non-turn" lug requires a 3/16" panel hole ½" below e center of the shaft. Shaft diameter is ¼". Recommended knob, tock No. 5150, see Rheostat Knobs in Section 4750.

Maximum current capacity is 7 amperes but only 3 amperes at 120 A.C. should be interrupted. Current ratings are less for all direct current rcuits above 20 volts, for inductive circuits and high voltages.

AP SWITCH DIALS

Dials for Ohmite tap switches are made of aluminum, etched and enameled black. Dial markings are bright aluminum. The number of dial calibrations or position markings agree with the actual number of positions on the switch. Note, in the table, that dials for switches Models 212 and 312 are available in two diameters to suit the recommended knob.

Catalog No.[1]	For Model	For Knob †	Dial Dia.

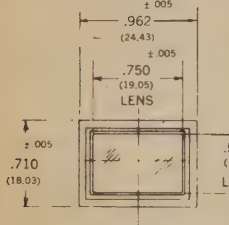
SUBMINIATURE PUSHBUTTON SWITCHES—MOMENTARY

SPEEMCO Subminiature Switches are 1/10 the volume of the standard switch. Photo is actual size of switch.
U.L. approved, 2 Amp, 29 V, DC, 1 Amp, 115 V, AC butt type contacts, combination solder, quick connect terminals supplied with standard .215" white buttons. When colored buttons are required, add 10 cents to cost of switch. Colors: black, red, yellow, green and brown.

LIGHTED PUSHBUTTON SWITCHES

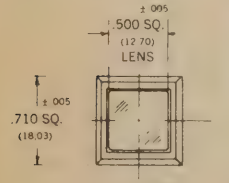


These Push Button Switches, both lighted and non-illuminated as well as indicators only, offer the maximum in design flexibility. From 31 standard components, 25,344 different switches may be built. The "Building Block" concept means you can construct your own Pushbuttons through easy fingertip assembly. No tools are required. Lenses come in three shapes: round, square and rectangular; each in seven colors. Actuators are either momentary or alternate action. Snap-on contact blocks can build up to 4-pole momentary or 3-pole alternate action pushbutton switches.

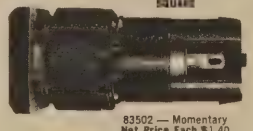
The component parts have been U.L. listed for both standard duty and dry circuit or logic load applications:

Standard Duty — Silver Contacts
5 Amps. 125 VAC
2 Amps. 250 VAC
5 Amps. 28 VDC

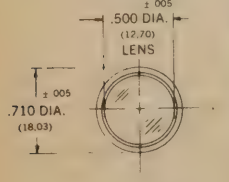
Low Energy — Gold Plated Contacts
For applications under 100 Milliwatts
Minimum rating — 10 Micro Amps. 50 MV



At these ratings the switches minimum mechanical and electrical life has been tested to exceed 100,000 cycles.

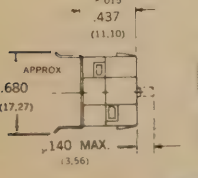


83501 — Momentary
Net Price Each $1.40



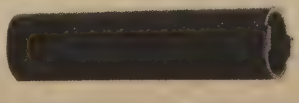
83504 — Alternate Action
Net Price Each $2.20

83502 — Momentary
Net Price Each $1.40

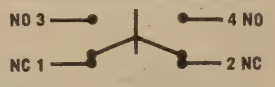


83505 — Alternate Action
Net Price Each $2.20

83503 — Momentary
Net Price Each $1.40



83506 — Alternate Action
Net Price Each $2.20



Standard Duty 83500-30
Net Price Each $1.50

Low Energy 83600-30
Net Price Each $2.50

MOUNTING WRENCH
83500-45 — Net Price Each $1.00

Contact Block Circuit Diagram

Type of Circuit	Wire to Terminals
Form A	3-4
Form B	1-2
Form C	1-3 Common
	2-4
Form Z	1-2-3-4

Contacts are momentary or alternate action depending on which Actuator-Indicator is used. Each contact block is 2 circuit and contact mechanism is of positive snap-acting design. Each contact block must be used on same polarity.

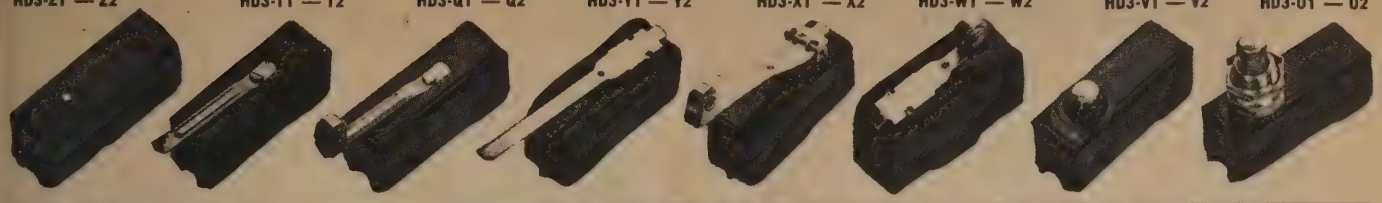
LAMPS

Use standard incandescent midget grove base lamp size T-1¾ 6 Volt (#337), 14 Volt (#336), 28 Volt (#334).

OPTIONAL FEATURES



Snap-on clip to convert any actuator to indicator — 83500-51
Snap-on chrome bezel (round only) — 83500-46
Mounting wrench — 83500-45

HOW TO ORDER:

a) Determine lens shape and color — specify catalog number.
b) Determine shape and action of actuator-indicator required — specify catalog number.
c) Determine number poles required, standard duty or low energy — specify catalog number.
d) Determine optional features.

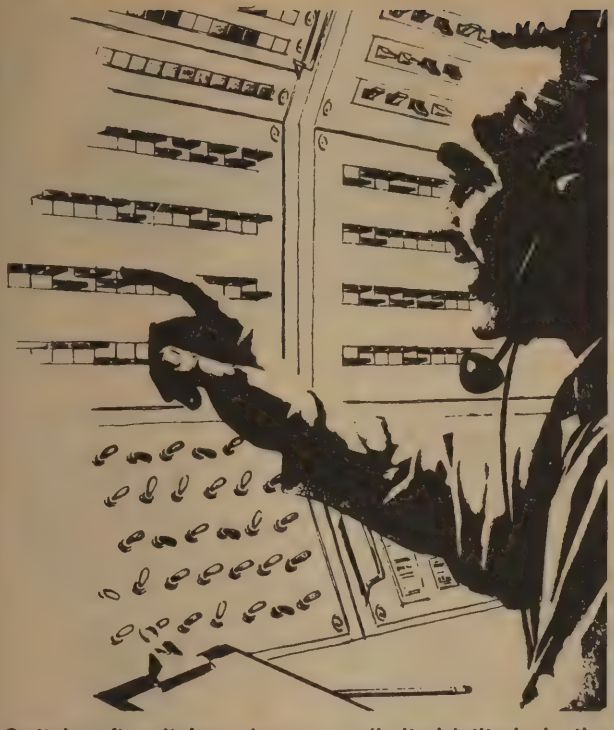
PRICES

Prices in this MASTER should not be considered as final. They were submitted for publication before the government price freeze of August 14th, 1971, and may not reflect any possible roll-backs or increases which are effective when this MASTER is distributed. Inquire about latest prices and delivery.

INVENTORY

While most distributors maintain a large and varied stock, they do not represent that they stock all manufacturers' products shown in this MASTER catalog.

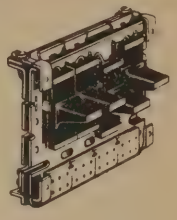
ORDERING



It is important, when ordering, to mention specifically the edition and page number, also the catalog number of each item. This will avoid possible confusion and delay.

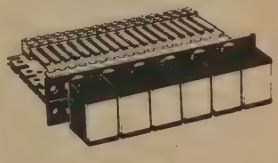
DISCOUNTS

Trade discounts apply in most cases where LIST PRICES are shown.

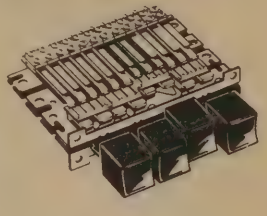


Switches

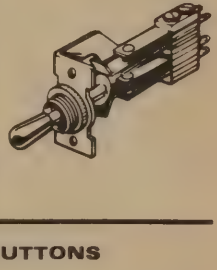
SWITCHCRAFT INC.



Switchcraft switches give you unlimited latitude in the selection of switching functions and actuation for customizing your equipment designs. Whether you choose pushbutton, slide or lever actuated switches, Switchcraft Authorized Industrial Distributors can aid you in the selection and specification of the proper switch to fill your particular requirements. All "Multi-Switch"® switches are factory-assembled to your specifications or select one from the standard listing shown in this catalog. Factory assembly, plus rigorous inspection and testing, is your assurance of optimum performance and dependability.

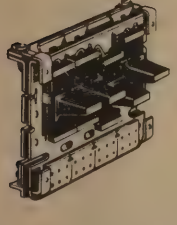


Only Switchcraft offers 3 complete lines of slide, multiple station pushbutton, and lever switches . . . 3 proven solutions to man-machine interface problems.



SLIDE ACTION . . . Series 39000 "Multi-Slide" switches provide design engineers with an entirely new switching method to solve man-machine system problems. "Multi-Slide" switches help eliminate operating confusion inherent in constant manipulation of pushbutton matrixes by providing slide-switch variety. Series 39000 Switches offer 3 types of actuation: interlock, all-lock, non-lock.

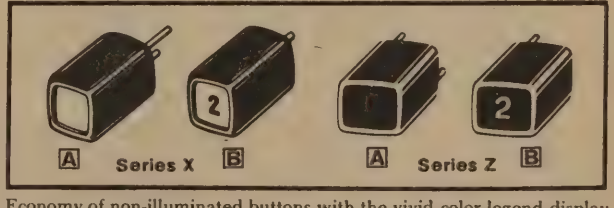
PUSHBUTTON ACTION . . . Whatever your requirements for switching, you will find Switchcraft "Multi-Switch"® switches enable you to design a cybernetically correct, error-reducing panel. Both illuminated and non-illuminated types are available with non-lock, all-lock, interlock, push-to-lock, push-to-release functions. Illuminated types offer single or multiple lighting effects. Series 7000 and 21000 frames are available from 1 to 37 stations in a row. littel "Multi-Switch"® switches Series 35000, 36000, 37000, are compact switching units offering 1 to 18 stations in a row. Series 65000, 66000, 67000, 70000 and 71000 are low cost switches, in all functions, up to 18 stations in a row.



LEVER ACTION . . . Switchcraft offers the largest selection of illuminated and non-illuminated lever-type switches in the industry. They come in a wide choice of sizes, 2 or 3 position, locking and non-locking types. They range in size and style from miniaturized "Feather Lever", featuring changeable push-on color knobs to "Lever-Lite", a 3-color illuminated type lever switch; to the industry standard "Telever", a telephone type switch featuring field changeable functions.

"MULTI-SLIDE" SWITCHES

SERIES 39000



Revolutionary compact switching method provides versatile multiple station slide switching. Allows 1 to 18 stations per row standard on all but all-lock function which is limited to 12 stations. Requires only $^{3}/_{4}$" depth behind panel. Narrow frame design permits mounting on compact electronic equipment without sacrificing versatility or function. Three standard functions available: **Interlock:** actuating slidebutton automatically restores previously actuated station to normal. Only one slidebutton can be actuated at a time with standard interlock function. **Non-Lock:** each station has momentary action with no interaction between stations. **All-Lock:** all stations, except release, lock when depressed – restore to normal when release button is actuated. Special slide-to-release cancelling feature in interlock and all-lock switches permits immediate correction of switching error without cancelling actuated switches. Slidebuttons are on $^{5}/_{8}$" centers. Up to 3 miniature switch stacks, rated at 3 amps; 300 watts max., AC non-inductive load, can be mounted at each station for a minimum of 1-A (SPDT) to a max. of 3-C (3PDT) per station. For power switching, snap switch modules can be mounted to each station on special order. Refer to "PIGGY BACK" SNAP-SWITCH MODULES, Series SA, SC and SD under littel "Multi-Switch" listing. Switches mount on panels up to $^{1}/_{8}$" thick. End brackets have four 6-32 tapped mtg. holes. A black slidebutton is furnished for each station and a red slidebutton is supplied when switch requires a release. A kit of chromatic legend tabs, Part No. K-120, is available for positive color coding of an actuated station. Kit consists of 10 tabs each of 6 colors: Red, black, green, blue, white and yellow. Pressure sensitive tabs mount easily in recess of slidebutton; can be hot-stamped for identification. The following part numbers cover a completely assembled switch, in various functions, with 2-C switch stacks at each station. Only the most commonly used switches are listed here.

Part Numbers			No. of Stations	U.S.A. List Price
Interlock with Lock-Out	Non-Lock	All-Lock		
39021-206	39022-206	39023-206	2	$13.70
39041-206	39042-206	39043-206	4	22.90

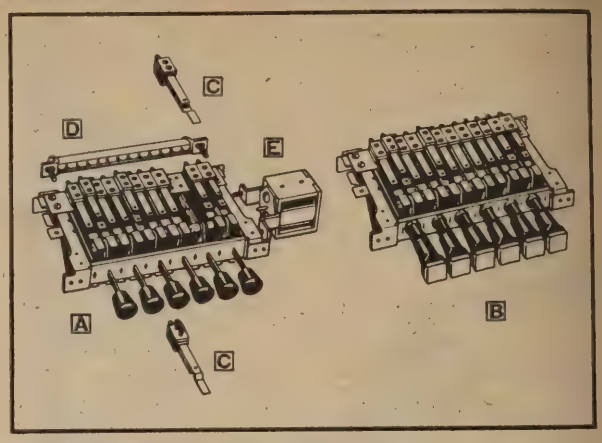
Switchcraft Part No. K-120 . . . . . **U.S.A. List Price $1.20**

"GLO-BUTTON" PUSHBUTTONS

SERIES X, Y, Z



Economy of non-illuminated buttons with the vivid color-legend display of illuminated buttons. "Glo-Button" pushbuttons look and function like an illuminated button, but require no lamp or power. Mount on all pushbutton switches with standard .050" x .187" plungers, as Switchcraft Series 7000, 8000, 35000, 70000 and 71000 "Multi-Switch" ® switches, and other switches having maintained plunger action with a maximum of $^{1}/_{16}$" fallback. "Glo-Button" pushbuttons have a translucent front screen on which a legend is marked in an opaque color. The opaque color provides a background for the legend while the legend itself remains clear (Figs. A). An internal fluorescent illuminator is carried on a pusher which has two legs extending from the rear. When the button is depressed, the rear legs of the pusher bring the fluorescent illuminator flush with the screen which then lights up due to reflected ambient light, and projects a clearly visible legend, see Figs. B. All "Glo-Button" pushbuttons have black button housings and are available with standard legends: "A" thru "Z", "0" thru "50", and "ON", "OFF". Eight basic types of buttons are offered: To order, specify part number and add suffix letter or numeral to part number which describes desired legend. Example: To order $^{1}/_{2}$" sq. "Glo-Button" pushbutton with black screen, orange-red illuminator and numeral "7" part number would read X21248-7.

Series No.	Size	Screen Color	Illuminator Color	U.S.A. List Price
X21248	½" square	Black	Orange-Red	$1.25

Z28248	⅜" h. x ¾" w.	Black	Chartreuse	1.50
Z51248	⅜" h. x ¾" w.	White	Orange-Red	1.50

"Multi-Switch"® Switches

Basic design simplicity provides a unique multiple station pushbutton switch that's rugged, compact, versatile and completely flexible in switching functions. Hundreds of circuit and function combinations are possible as **all switching components**—frame, switch stacks, lamps and other accessories **are changeable.** Order the "Multi-Switch"® you now require, from stock, and later change circuits and/or functions in the field by simple positioning adjustments of stop plate, latch bar spring, and/or interchanging or adding-on switch stacks. Standard "Multi-Switch"® switches are available with these functions: **Interlock,** restores to normal any previously actuated station when another station is actuated. D **Lock-out** feature when combined with interlock prevents the operation of more than one pushbutton at a time. (Standard on all assembled interlock switches.) **Non-Lock,** momentary action of each station. **All-Lock,** accumulative locking of all stations with restoration of all stations to normal when release station is depressed. **Push-Lock/Push-Release**—pushbutton locks when depressed and is released when again depressed.

SERIES 7000 NON-ILLUMINATED SWITCHES

A Heavy gauge steel switch frames mount on panels up to $\frac{3}{8}$" thick, with $\frac{35}{16}$" depth behind panel. Rugged, welded end-mounting brackets have four 8-32 tapped holes for ease of panel mounting. Attractive, round brown push-on-buttons supplied for each station, plus extra red button for use when switch requires a release station. Center-to-center distance between buttons is $\frac{5}{8}$". Steel plunger .050" x .187" accepts standard push-on-buttons and "Glo-Button" pushbuttons. Standard plunger is $1\frac{1}{8}$" long, but can be supplied up to $5\frac{3}{4}$" long on special order. Switch frames with buttons on $\frac{3}{4}$" centers are available in Series 8000 which has all the same features as Series 7000. Switches feature switch stacks with welded-crossbar palladium contacts rated at 3 amps, 300 watts, max., A.C. non-inductive load. Series 7000 "Multi-Switch"® switches are available with from 1 to 37 stations; Series 8000 from 1 to 31 stations. When ordering Series 8000 add 10% to prices. All switches are completely assembled and tested at the factory. All assemblies listed in the Part No. table have 2-C or 4-C switch stacks at each station. Additional switching and other options are available on special order. Only the most commonly used switch assemblies are listed below.

SERIES 21000 ILLUMINATED SWITCHES

B Similar in switching functions and characteristics to non-illuminated "Multi-Switch"® switch but, with these outstanding features: modern square button design with bright uniform front and side illumination provided by lamp diffusers; knurled retaining collar for quick easy front-of-panel lamp replacement. Two lamp voltages: 6V and 28V. Buttons with white jewels and white diffusers are furnished for switching and release stations. Standard switches listed below provide "L" type lighting (pushbuttons light in "IN" position). To have pushbutton light in "OUT" position, prefix Part No. with M (e.g. M21100). To have them light in both the "IN" and "OUT" positions, prefix with N. All switches include switch stacks at each station incorporating welded-crossbar palladium contacts rated at 3 amps, 300 watts, A.C., non-inductive load. Center-to-center distance between buttons is $\frac{5}{8}$" on Series 21000, available with up to 37 stations in a row. Series 22000, buttons on $\frac{3}{4}$" centers, available up to 31 stations only. Add 10% to price of Series 21000 when ordering Series 22000. Series 21000 and 22000 switches are completely assembled and inspected at the factory. All assemblies listed in the Part No. table have 2-C or 4-C switch stacks at each station and provides "L" type lighting. Additional switching and/or other types of lighting available on special order. Only the most commonly used switch assemblies are listed.

SWITCH STACKS

C Interchangeable switch stacks for installation on "Multi-Switch"® switches to increase switching circuitry. Series 70P, utilizes welded-crossbar palladium contacts rated at 3 amps, 300 watts, max., A.C., non-inductive load. Use where the switching circuits of a released station will return to normal before contacts of a newly operated station are actuated. Series 700P, same as Series 70P, except to be used on push-lock/push-release functions or on other functions where contacts of a newly operated station must be actuated before contacts of a released station return to normal. Select from switch stack listing below and specify Part No. with your order for a completed switch assembly.

Part No.	Part No.	Circuit	U.S.A. List Price
71P	701P	1-A	$0.80
72P	702P	1-B	.80
73P	703P	1-C	1.05
73PD	703PD	1-D	1.20
76P	706P	2-C	1.65

LOCK-OUT BAR "K" SERIES

D Prevents operation of more than one switching station at a time. Mounts on back of standard "Multi-Switch" Series 7000, 8000, 21000 and 22000 frames with two screws (furnished). Available from 2 to 37 stations for a single frame. Lock-Out Bars listed are for $\frac{5}{8}$" center plunger only; for $\frac{3}{4}$" centers, order special.

Part No.	No. of Stations	U.S.A. List Price	Part No.	No. of Stations	U.S.A. List Price

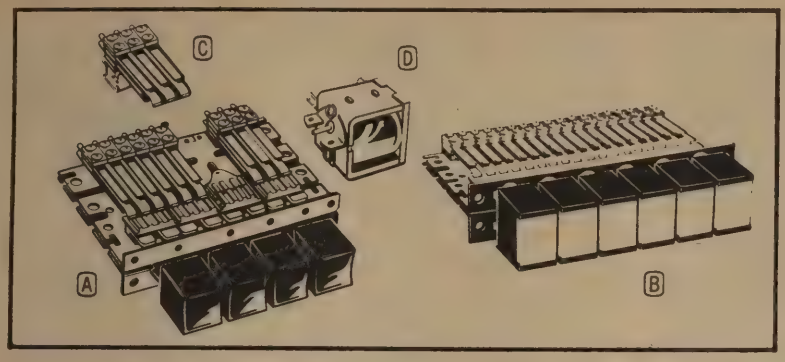
K-06	6	3.85	K-12	12	5.25



SOLENOID RELEASE—"J" SERIES

E A simple solenoid assembly which can be easily assembled on the end of a standard switch. Part No. J-1, is for use on interlocked switches; Part No. J-2, for use on all-lock switches with up to 12 stations. Both are for use in 115 volt, 60 cycle, A.C. circuits. Specify type of solenoid with your order for a standard "Multi-Switch"® switch.

Switchcraft Part No. J-1 ..... U.S.A. List Price $ 9.50
Switchcraft Part No. J-3 ..... U.S.A. List Price 10.00

littel "Multi-Switch"® Switches

Compact, versatile high-quality, multiple station pushbutton switches. Four standard functions available: **Interlock**—actuating a pushbutton automatically restores to normal the pushbutton previously actuated. **Lock-Out**—prevents operation of more than one pushbutton at a time. This feature is included on all interlock frames. **Non-Lock**—each pushbutton has momentary action. **All-Lock**—all pushbuttons, except release, lock when depressed. All pushbuttons restored to normal by actuating release pushbutton. **Push-Lock/Push-Release**—pushbutton locks when depressed and is released when again depressed. Buttons on 5/8" centers. **Switches available from 1 to 18 stations.**

SERIES 35000 NON-ILLUMINATED SWITCHES

A Switches mount on panels up to $^1/_8$" thick. Provides 6PDT switching in .6 sq. in. Narrow rectangular silhouette permits stacking in parallel rows on $^3/_4$" centers. Only $2^5/_{16}$" depth behind panel. End brackets have four 6-32 tapped mounting holes. A square black pushbutton is furnished for each station and an extra red pushbutton is supplied for use when switch has momentary release station (All-Lock function). Plungers made from .050" x .187" steel will accept std. push-on pushbuttons as well as Switchcraft pushbuttons, Series 590, A-590, C-590, D-590, E-590, 600 and "Glo-Button" pushbuttons Series X, Y, and Z. Refer to listings in this catalog. On 2-C PER STATION switches, each station includes two No. 83P switch stacks. On 4-C PER STATION switches, each station includes four No. 83P switch stacks. The following part numbers cover completely assembled and factory tested switches. Should you require additional switching or optional accessories as power switching, different pushbuttons, solenoid release, etc., make your selection from these product listings and add them to the switch part number of your choice shown below. Only the most commonly used switches are listed here.

SERIES 37000 SINGLE LAMP ILLUMINATED SWITCHES

B Identical in switching functions and characteristics as non-illuminated Series 35000, but features large rectangular shaped pushbuttons which serve as a color or legend coded panel indicator light which actuates up to 6PDT switching. Switches mount in parallel rows from 1" centers and up. Depth behind panel $2^5/_{16}$". Pushbuttons with large transparent clear display screen and white legend insert, can be hot stamped or engraved, are furnished for switching and release stations. On 2-C PER STATION switches, each station includes two Nos. 83P switch stacks, one No. H-83P lighting stack and one No. H (convenience) lighting spring. On 4-C PER STATION switches, each station includes four No. 83 switch stacks, one No. H-83P lighting stack and one No. H (convenience) spring. Lighting arrangements such as "L"—pushbuttons light in "IN" position; "M"—pushbuttons light in "OUT" position; and "N"—pushbuttons light in both "IN" and "OUT" positions, can be effected by wiring direct to the No. H-83 and No. H lighting stacks. A single 6V or 28V lamp can be used at each station, not furnished with switch. Refer to Lamp listing on page 11. The following part numbers cover completely assembled and factory tested switches. Should you require additional switching, power switch, solenoid, etc., make your selection from the various listings on page 11 and add to the switch part number you have chosen from listing below. Only the most commonly used switches are listed here.

SERIES 38000 TWIN LAMP ILLUMINATED SWITCHES

B Same compact assembly and versatility as Series 37000, except features twin lamp illumination at each station for redundant or two color, split-face (alternate) lighting. On 2-C PER STATION switches, each station includes three No. H-83P lighting switch stacks and one No. H lighting spring. This arrangement provides up to 3PDT circuitry. One pole is needed for lighting lamps. On 4-C PER STATION switches, each station includes three No. H-83P lighting switch stacks, two No. 83P switch stacks and one No. H lighting spring. This combination offers 5PDT circuitry; of which, one pole is required for lighting lamps. Series 38000 accepts standard industry No. 718 flange base lamp. Two at each station. Lamps are not furnished with switch. See lamp listing. The following part numbers cover completely assembled and factory tested switches. Should you require additional switching or optional accessories such as power switching modules, solenoid release, etc., make your selection from product listings shown on this page and add them to the switch part number of your choice shown below.

LAMP ADAPTER

Lamp Adapter. Part No. T-1, converts T-1 lamp base to a T-1 $^3/_4$ lamp base. For Series 21000, 22000, 37000. Adapter permits use of T-1 (P-1890) midget flange base in sockets designed for T-1 $^3/_4$ lamps.
Switchcraft Part No. T-1 . . . . . U.S.A. List Price **$0.75**

Accessories for littel "Multi-Switch"® Switches

"PIGGY-BACK" SNAP-SWITCH MODULES

Increases the switching load capacity of littel "Multi-Switch"® switches from 3 amps to 15 amps. Module consists of a snap-action switch, actuator and mounting bracket. Two types available: Miniature types 83SA, for all switching functions except push-lock/push-release; No. 803SA, for push-lock/push-release function. Both rated at 15 amps, ½ HP, 125/250 V.A.C. Subminiature types Nos. 83SC and 83SD, are similar to No. 83SA in function, and Nos. 803SC, 803SD are similar to No. 803SA in function. Subminiature types are rated at 10 amps, ¼ HP, 125 V.A.C. Solder terminals.

Part No.	SPDT Circuits	U.S.A. List Price	Part No.	SPDT Circuits	U.S.A. List Price
83SA	1	$3.55	83SD	2	$10.00

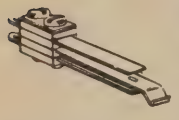
83SC	1	5.55	803SD	2	10.00



LIGHTING SWITCH STACKS

Lighting switch stacks provide convenient rear-of-frame lamp circuit wiring on Series 37000, 38000. Part No. H consists of "convenience" spring only which effectively extends lamp socket terminal to rear-of-switch. Part Nos. H-83P, H-803P consist of standard Series 80P and 800P switch stacks with a Part No. H "convenience" spring added. Use No. H for lighting only—has no switching capability. Use No. H-83P for all functions except push-lock/push-release; No. H-803P for push-lock/push-release.

Part No.	Circuit	U.S.A. List Price
H	—	$0.55
H-83P	1-C	1.45
H-803P	1-C	1.45

SWITCH STACKS

[C] Interchangeable switch stacks for littel "Multi-Switch"® switches, Series 35000, 37000, 38000, 39000. Series 80P, constructed with cross-bar welded palladium contacts. For use where switch contacts of a released station will return to normal before contacts of a newly operated station are actuated. Series 800P, same as 80P, except designed to be used on push-lock/push-release function. Both Series rated 3 amps, 300 watts max., A.C., non-inductive load. Switch stacks fasten direct to removable switch mounting brackets. Should you require more switching than a standard assembly can provide, select appropriate switch stack from listing and add to the standard switch you have selected.

Part Numbers Series 80P	Part Numbers Series 800P	Circuit	U.S.A. List Price
81P	801P	1-A	$0.80
82P	802P	1-B	.80
83P	803P	1-C	1.05
83PD	803PD	1-D	1.20

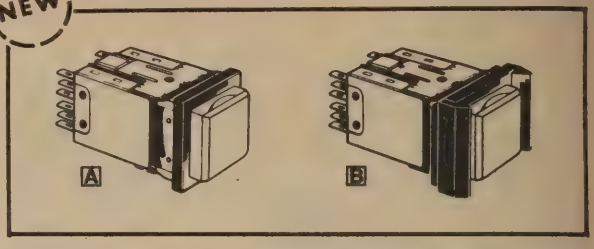
LAMPS FOR littel "MULTI-SWITCH"® SWITCHES

Lamps are not furnished with Series 37000, 38000 switches. Series 37000 will accept No. P-1593-2 (6V) and P-1593-1 (28V) lamps. Also, No. P-1890 (6V) lamp when used with *No. T-1 lamp adapter. Series 38000 accepts only No. P-1890. Specify lamps when ordering "Multi-Switch"® switches.

Part No.	Description	U.S.A. List Price
P-1593-1	28 V, 40 ma., Ind. No. 327, Flange Base.	$1.50
P-1593-2	6 V, 200 ma., Ind. No. 328, Flange Base.	1.20
*P-1890	6 V, 115 ma., Ind. No. 718, Flange Base.	3.50

SERIES NJ SOLENOID RELEASE

[D] A simple solenoid assembly which can be added to the end of a standard Series 35000, 37000, or 38000, littel "Multi-Switch"® switch to provide electrical release of activated stations. No. NJ-1 designed for use with up to 18 interlock stations; No. NJ-3 will handle up to 12 all-lock stations. Both are for use in 115 V. 60 cycle, A.C. circuits.



Part No.	Function Used On	Voltage	Max. Duty Cycle	U.S.A. List Price
NJ-1	Interlock	115 V.A.C.	25%	$10.00
NJ-3	All-Lock	115 V.A.C.	10%	10.00

BASIC SCHEMATIC CIRCUITS

Switch circuitry can be described as combinations of basic schematic circuits as shown below. N.O. means normally open; N.C. means normally closed.

NEW SERIES PL "PUSH-LITE" SWITCHES

"Push-Lite" switch is the first completely enclosed, lighted pushbutton switch which features long-life, highly-reliable leaf-spring switching. Available in **momentary** or **push-lock/push-release** functions; single or twin lamps; with or without barriers; full or split-face display; 1-C to 4-C switching; black or grey switch housing. Standard pushbutton color is white, other colors available on special order. Molded crossbar palladium contacts rated at 2 amps, 200 watts, max., A.C., non-inductive load are standard. Power switching up to 5 amps available on special order. Mount with clamp-type bracket, no screws, washers or nuts needed. [A] Flange mounting requires 1"x.875" panel cutout; [B] barrier mounting requires 1 3/16"x.875" panel cutout. Can be mounted in vertical or horizontal rows and in matrixes. Depth behind panel only 1¾". "Push-Lite" switch accepts standard T-1¾ flange base lamps (not furnished with switch) in either 6V, 28V or neon-115V. See listing below. Specify one lamp for single lamp type or two lamps of twin-lamp type when redundant or split-face lighting is required. Barriers and colored filter snap-inserts optional.

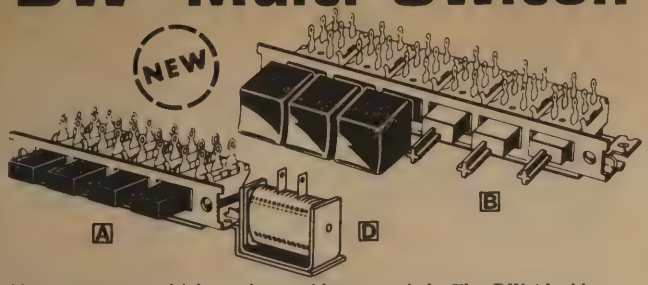
LIGHT DIVIDER

Light divider for use in standard "Push-Lite" switch pushbutton to separate lighting from twin-lamps. Order a light divider for each Series PL-2000 or PL-5000 switch specified where split-face lighting is desired.
Switchcraft Part No. PL-551 ..... U.S.A. List Price **$2.50** per package of 25

OPTIONAL MOUNTING BARRIERS



Barriers, molded of plastic, can be used to separate "Push-Lite" switches and prevent accidental operation of adjacent switches. Series PL-100 is an end barrier. One is required when switches are adjacently mounted; two are required when switches are individually mounted. Series PL-200 is a center barrier. Two are required between switches when adjacently mounted.

DW "Multi-Switch"® Switches

New, economy multiple station pushbutton switch. The DW (double-wipe) "Multi-Switch"® switch is available up to 18 stations in a single row; or on special order, ganged assemblies with interaction between rows. Max. switching per station is 4-C (D.P.D.T.). Each station utilizes specially designed switching modules with U-shaped, high reliable bifurcated contactors rated at 3 amps, A.C.; 0.5 amp, D.C., 125 V, non-inductive load. DW "Multi-Switch"® switches are available in 5 series: 65000, 66000, 67000, 70000, and 71000. All provide four standard functions: **Interlock**—actuating a pushbutton automatically restores to normal the pushbutton previously actuated. **Lock-Out**—prevents operation of more than one pushbutton at a time. This feature is included on all interlock switches. **Non-Lock**—each pushbutton has momentary action. **All-Lock**—all pushbuttons, except release, lock when depressed. All pushbuttons restored to normal by actuating (momentary) release pushbutton. **Push-Lock/Push-Release**—push-buttons lock when depressed and release when again depressed. **All Series**—pushbuttons on ⅝" centers. DW "Multi-Switch"® switches are available in single row assemblies with interlock and all-lock functions from one to twelve stations; with non-lock and push-lock/push-release functions up to eighteen stations.

SERIES 65000

A Series 65000 switches are completely assembled and tested at the factory. All standard assemblies have 2-C and/or 4-C switch modules with solder-lug terminals. Integral black pushbutton-actuators at each station. Eliminates possible pushbutton loss. Assemblies, from 1 to 18 stations mount with only two No. 6 screws (not furnished). Depth behind panel—2-C assemblies—1 1/16"; 4-C assemblies—1 15/16". Overall switch height is 2 7/32". The following part numbers cover a completed switch assembly. Only the most commonly used switch assemblies are listed here:

SOLENOID RELEASE—DW SERIES

D Two simple, pull-type, solenoid assemblies are available that can be added on the end of a Series 65000, 66000, 67000, 70000, 71000 DW "Multi-Switch"® switch. Solenoid assembly, mounting hardware, screws and instruction sheet furnished. Specify separately.

Part No.	Description	U.S.A. List Price
DW-1	Used with interlock function in switches having 1 to 12 stations. Operates from 115 V AC, 60 Hz source. Coil resistance is 361Ω. Duty cycle is 20%.	$6.50
DW-3	Used with all-lock function in switches having 1 to 12 stations. Operates from 115 V AC, 60 Hz source. Coil resistance is 130Ω. Duty cycle is 10%.	6.50

LAMPS FOR SERIES 67000

Lamps are not furnished with Series 67000 switches. Specify one of the flange base lamps for each station.

Part No.	Description	U.S.A. List Price
P-1593-1	28 V, 40 ma., Ind. No. 327, Flange Base.	$1.50
P-1593-2	6 V, 200 ma., Ind. No. 328, Flange Base.	1.20
P-1593-5	6 V, 200 ma., Ind. No. 377, Flange Base.	1.50
*P-1890	6 V, 115 ma., Ind. No. 718, Flange Base.	3.50

*T-1 subminiature flange base lamp. Must be used with No. T-1 Lamp Adapter.

SERIES 70000, 71000

B New, versatile DW "Multi-Switch"® switches. Series 70000, 71000 retain all features of Series 65000, but feature "Cross-Rib" actuators which accept 7 different Switchcraft pushbuttons, plus many other types and styles. Series 70000 switches have a 15/16" long "Cross-Rib" actuator to accept Series 590, A-590, C-590, D-590, E-590 and "Glo-Button" X, Y, Z. Series 71000 switches have a ¾" long "Cross-Rib" actuator to accept all the same pushbuttons as Series 70000 except Series A-590, E-590. Pushbuttons must be ordered separately as they are not supplied with switches. Only the most commonly used switch assemblies are listed here:

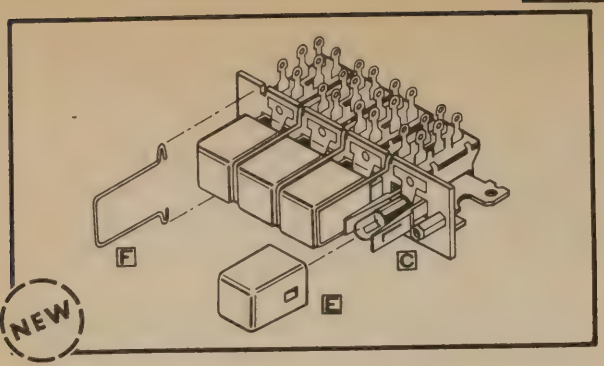
(*) Series 71000 switches are the same as 70000 part numbers in table except first two digits are 71, i.e.



PUSHBUTTONS FOR "MULTI-SWITCH"® SWITCHES

Non-illuminated pushbuttons for Switchcraft Series 7000, 8000, 35000, 70000 and 71000 "Multi-Switch"® switches; and all other pushbutton switches with a standard .050" x .187" plunger. Also fit on Series 5000 "Push-Push" switch. Series 590, A, small pushbutton with concave face. Series A-590, B, square with lateral concave face. Series C-590, C, and D-590, D, rectangular pushbuttons with recessed face. Push-buttons have black housing with white face. Legend on face is black. Available legends are "A" thru "Z", "0" thru "60", and "ON", "OFF". Series C-590 mounts on multiple station pushbutton switches with plungers on ⅝" centers; Series D-590—plungers on ¾" centers. To order: specify Series number and add suffix letter or numeral to part number which describes desired legend. **Example:** To order C-590 with letter "A" part number would read C-590-A. Series E-590, E dual pushbutton simultaneously actuates two pushbutton stations (⅝" plunger centers) or individual switches mounted on 1¼" centers or more. Concave face. Series 600, F, similar to Series 590, except has 19/32" square shoulder.

SERIES 66000, 67000

C New non-illuminated (Series 66000) and illuminated (Series 67000) DW "Multi-Switch"® switches retain all quality construction and reliable switching of Series 65000. Series 67000 has large square pushbutton, E providing brilliant, evenly-diffused lighting. Standard white pushbuttons (other colors available on special order) easily snap-off actuators for simple front-of-panel relamping. Lamp sockets, at each station, accept a single 6V, and/or 28V lamp. Lamp socket terminals separate from switching terminals. Series 66000, 67000 mount with only two #6-32 machine screws (not furnished). Two #6-32 tapped studs ("stand offs") are integral with the frame and are used to provide proper positioning of the switches. Depth behind panel 1 1/2" (2-C switching); 2 3/8" (4-C switching). Series 66000 is 2 7/32" high; Series 67000 is 1 1/16" high. Series 66000 is a non-illumination companion to the Series 67000. Utilizes same large square white pushbutton, but less lamp socket terminal board and lamp sockets. Only the most commonly used switch assemblies are listed here:

METAL BARRIERS FOR SERIES 67000

F Sturdy wire barriers fit between pushbuttons and prevent accidental simultaneous actuation of adjacent pushbuttons. Can be installed on Series 67000 only.

Switchcraft Part No. P-2359 ..... U.S.A. List Price **$1.25** per pkg. of 25

"PUSH-PUSH" SWITCHES

Push-to-lock, push-to-release or momentary action pushbutton switches. Welded cross-bar palladium contacts rated at 3 amps, 300 watts, max., non-inductive load. Mount with two 3-48 screws (not supplied) on 5/8" centers. Depth behind panel, 2 7/8". Series 5000, Fig. C, non-illuminated, supplied with square brown button. Series 15000, Fig. D, illuminated; available in three lighting arrangements. "L" button lights in "IN" position; "M" button lights in "OUT" position; "N" button lights in "IN" and "OUT" positions. Series 15000 part numbers listed below provide "L" type lighting. For "M" type prefix part no. with "M"; for "N" type prefix part no. with "N". Series 15000 supplied less lamp. 6V or 28V lamps can be used.

*Add suffix letter "L" to part number to indicate locking type.

NON-ILLUMINATED SERIES 5000

Part Number Non-Locking*	Action	Schematic Circuit	U.S.A. List Price

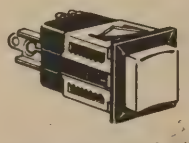
15012	4 P.D.T.	4-C	12.20



ILLUMINATED "LITTEL-LITE" SWITCHES

Series 210 "Littel-Lite" Switches are unusually small, momentary contact, illuminated pushbutton types. Requires minimum panel space; ideal for limited space applications and press-to-test circuits. One-piece, clear plastic button and shaft is illuminated by a single miniature lamp, 6V or 28V. Lamps are not furnished, see lamp listing below. Includes kit of 4 color chips (red, amber, green, and yellow), can be inserted in switch at any time. Nickel silver spring contacts are recommended for low lever circuits where contact resistance is not important. Also available, fine silver contacts (Part No. suffix "S") rated at 3 amps, 300 watts, max., A.C. non-inductive load. Lighting circuit is independent of switching circuit. Mounts in single 3/8" hole in panels up to 1/4" thick; depth behind panel 1 3/16".

Part Number	Action	Schematic Circuit	U.S.A. List Price
211	S.P.S.T. n.o.	1-A	$1.95

211S	S.P.S.T. n.o.	1-A	2.25
213S	S.P.D.T.	1-C	2.65

"UNISWITCH" SWITCH

New, low cost, momentary action pushbutton switches. Only 1 1/16" sq. and mount in a single panel cutout. .615" sq. from front of panel. Contacts rated at 250 ma., 30 watts max., A.C. non-inductive load. Series US non-illuminated, Series LUS illuminated. Use one 6V, 1/2 watt, T-1 3/4 bi-pin lamp. (Not supplied with switch.) Lamps replaced from front of panel. Both switches incorporate a special "Adjusto-Clip", which allows simple, "snap-lock" mounting. The "Uniswitch" switches mount in panels 13/16" min. to 1 7/64" max. thick in .615" sq. holes. Depth behind panel only 1 5/16" max. "Uniswitch" switches available in 1-A circuit (SPST n.o.).

Pushbutton Switches

SWITCHCRAFT INC.

"T-SWITCH" SWITCHES

Rugged, long frame switches for quality communication equipment. Welded cross-bar palladium contacts rated at 3 amps, 300 watts max., A.C., non-inductive load. Requires minimum of panel space, only 9/16"x13/16"; 2 7/8" depth behind panel. Series 11000, Fig. A, pushbutton T-Switch. Available in momentary action and push-to-lock, pull-to-release action. Series 11200, Fig. B, two position turn button "T-Switch". Available in non-locking and locking action. Black button with white arrow to indicate switching position.

*Add Suffix "L" to Part Numbers to Indicate Locking Type.

MINIATURE "TF" BUTTON SWITCHES

"Tiny Frame" switches. Small, sturdily constructed, provides simple, direct acting pushbutton switching for use where space is at a premium. Available in Series 970L push-to-lock, pull-to-release; or Series 970, momentary action. Nickel silver springs, integral contacts, recommended for low level circuits where contact resistance is unimportant. Requires only 1 19/32" depth behind panel; mounts in single 1/4" hole in panels up to 3/32" thick.

"CordMASTER" PENDANT SWITCH

Extremely versatile pendant (cord) switch with top or edge operated pushbutton operation, illuminated and non-illuminated. Attractively patterned stainless steel sheath fits over white shock resistant thermoplastic switch housing to provide greater strength. Series 42000, Fig. A, has top operated pushbutton action. Three standard functions available: Non-Lock—momentary action; Locking—button locks when depressed, releases when side button is depressed; Push-to-Lock, Push-to-Release—button locks when depressed and is released when depressed again. Series 42000E, Fig. B, has edge operation; supplied with "L" type illumination (top jewel lights when button is depressed). Illumination supplied by Ind. No. 377, 6 V miniature, T-1 3/4 flange base lamp (not supplied with switch). Part No. listed has locking function with front button release. Both Series have spring tempered nickel silver contact springs with cross-bar welded palladium contacts rated at 2 amps, 200 watts, max., A.C., non-inductive load. This switch is not recommended for 120 V A.C. line switching. Switches accept cables up to .270" dia. Overall dimensions: 1 3/4" W. x 3 1/16" L. x 5/8" H.

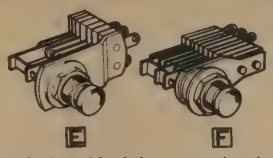
42306E	Locking	D.P.D.T.	2-C	11.05



"CORD-SWITCH" SWITCHES

Attractive cord mounted switch for remote control applications. Momentary action. Rated at 250 mils, A.C., non-inductive load, 30 watts max. Part Nos. E-903 and E-913 have bright nickel plated brass housing. Part Nos. EP-903 and EP-913 feature a molded black plastic housing. Housing dia. 1 1/16", length 2 3/16".

Part Nos. Red Button	Part Nos. Black Button	Action	Schematic Circuit	U.S.A. List Price
E-903	E-913	S.P.D.T. "Break-Make"	1-C	$2.50
EP-903	EP-913	S.P.D.T. "Break-Make"	1-C	2.25

NON-LOCKING FLAT FRAME SWITCHES

FF Switches. Fig. E, Series 1000. Flat frame construction provides multiple pole switching with minimum depth behind panel. Fine silver contacts rated at 3 amps, 300 watts max., A.C., non-inductive load. One piece black button and shaft. 3/8" diameter threaded shank; mounts in panels up to 1/4" thick.

NF Switches. Fig. F, Series 4000, same as FF Switches, except smaller spring design, ideal for mounting in ultra-compact equipment. Only 1/2" W.; 1 5/8" L.; mounts in 3/8" hole in panels up to 5/32" thick.

Part Numbers Series 1000	Part Numbers Series 4000	Action	Schematic Circuit	U.S.A. List Price
1001	4001	S.P.S.T. n.o	1-A	$1.40
1003	4003	S.P.D.T.	1-C	1.55

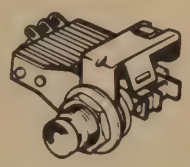
1009	4009	3 P.D.T.	3-C	2.80



"TINY-SWITCH" PUSHBUTTON SWITCHES

Series 950, red button, and Series 960, black button, subminiature pushbutton switches for limited space applications. Integral contacts suitable for low level circuits where contact resistance is not important. Mounts in 1/4" hole in panels up to 3/32" thick; depth behind panel 3/8".

Part Number Red Button	Part Number Black Button	Action	Schematic Circuit	U.S.A. List Price
951	961	S.P.S.T. n.o.	1-A	$1.05
952	962	S.P.S.T. n.c.	1-B	1.05
953	963	S.P.D.T.	1-C	1.25

ILLUMINATED "NF-LITE" SWITCHES

Series 4100 and 4200 "NF-LITE" illuminated switches indicate switching and circuit functions at a glance. Flat frame construction provides multiple pole momentary action switching. Lighting circuit is independent of switching circuit. Ideal for control panel or press-to-test applications. Contacts are fine silver rated at 3 amps, 300 watts max., A.C., non-inductive load.

Series 4100, Fig. A, uses single miniature lamp, 6V or 28V. Light from lamp is filtered through color chip to clear plastic pushbutton. Various colored chips can be inserted at any time. Series 4200, Fig. B, same as Series 4100, except utilizes two lamps for greater illumination or color coding of two circuit conditions. Both series require 11/16" min., 1 5/16" max., depth behind panel depending on size of stack; mounts in 3/8" hole in panels up to 1/4" thick. Series 4100 furnished with one kit of 4 color chips (red, amber, green, and yellow). Series 4200 furnished with two kits. Lamps must be purchased separately. See lamp listing on page 9.

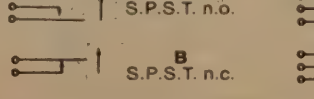
"BOX SWITCH"



Series BX. Miniature, momentary action, pushbutton switch offers broad switching capabilities in minimum panel space. 11/16" square switch requires 55/64" min. to 1 9/64" max. depth behind panel. Molded plastic body protects against damaging dust and dirt and prevents bending or disfiguring of contacts caused by excessive handling. Attractive bezel frames pushbutton and acts as built-in escutcheon plate. Unique "Adjusto-Clips" provide snap-in, front of panel, mounting in panels from 3/64" to 17/64" thick in .615" sq. holes. Red, black, green, or white pushbuttons. 7/64" button stroke. Integral slide contacts of special spring tempered phosphor bronze, silver plated, rated at: 250 ma., 30 watts max., A.C., non-inductive load. Evenly spaced solder lug terminals are clearly identifed for ease of wiring.

BASIC SCHEMATIC CIRCUITS

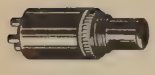
Switch circuitry can be described as combinations of basic schematic circuits as shown below. N.O. means normally open; N.C. means normally closed.

Lever and Pushbutton Switches

"CORDETTE" PENDANT SWITCHES

Small lightweight pendant, momentary action (cord) switches provide remote switching of industrial and commercial instrumentation and control devices. Attractive one-piece grey molded body protects switching controls from dirt and dust. Switch has 1-A (S.P.S.T.) circuit. Integral brass, hard gold contacts rated at 500 MA., 50 watts max., A.C. non-inductive load. Not recommended for use in high voltage circuits. Part No. 921 has phono jax termination molded to body. Mates with Switchcraft molded cable assemblies with phono plug terminations such as 3501, 3501MC, etc. or industry standard phono plugs. Part No. 921K same as 921 except 6′ of 2-cond. unshielded cable molded to switch body. Stripped and tinned cable termination. Overall dimensions $1\frac{3}{16}$″ wide by $2\frac{15}{16}$″ long (not including cable).

Switchcraft Part No. 921 ..... U.S.A. List Price **$4.50**
Switchcraft Part No. 921K ..... U.S.A. List Price **5.25**



"HI-D SWITCH" SWITCHES

Series H-100, H-200—compact momentary action switches. Molded box body protects contact springs. Low electrical leakage, low capacity. Integral fine-silver plated contacts for use in circuits where contact resistance is not critical. One piece plastic button and shaft in Red—Series H-100, and Black—Series H-200. Mounts on $\frac{5}{8}$″ centers in either of two planes; in a single $\frac{3}{8}$″ hole in panels up to $\frac{5}{32}$″ thick. Depth behind panel $1\frac{3}{32}$″.

Part Nos. Red Button	Part Nos. Black Button	Action	Schematic Circuit	U.S.A. List Price
H-101	H-201	S.P.S.T. n.o.	1-A	$1.20

H-103	H-203	S.P.D.T.	1-C	1.35

SERIES "DA-SWITCH"

Series DA. Completely enclosed, momentary action pushbutton switch. Anodized aluminum body protects switch contacts from dirt, dust and from being bent. A-B contact arrangement provides a 1-A, 1-B or 1-C circuit when externally wired. Integral hard gold plated contacts rated at 500 MA., 50 watts max., A.C., non-inductive load. Terminals accept AMP Series 53 taper pins. Mount in $\frac{3}{8}$″ hole on $\frac{17}{32}$″ centers. Depth behind panel $\frac{15}{16}$″.

Part No.	Button Color	Part No.	Button Color	U.S.A. List Price

DA-03-3	Green	DA-08-3	Yellow	2.65

"BUTTON-SWITCH" SWITCHES

Series 903, 923. Unusually small, momentary action pushbutton switches. Enclosed in metal housing; black or red plastic button. Series 903, Fig. G. back panel mounting; $\frac{15}{32}$″ hole, mounts in panels up to $\frac{19}{64}$″ thick. Series 923, Fig. H. front panel mounting; $\frac{1}{4}$″ hole, mounts in panels up to $\frac{5}{32}$″ thick. Both rated at 250 mils, A.C., non-inductive load, 30 watts max.

Part Nos. Red Button	Part Nos. Black Button	Action	Schematic Circuit	U.S.A. List Price

"LITTEL-SWITCH" SWITCHES

Series 100, 200, tiny momentary contact push-button switches. Rugged, dependable action. All contacts insulated from panel bushing with interlocking phenolic washers. Series 100 and 200, springs are of nickel silver, recommended only for low level circuits where contact resistance is unimportant. Series 100S and 200S have fine silver contacts rated at 3 amps or 300 watts max., A.C., non-inductive load. One-piece plastic button and shaft in red or black. Mounts in $\frac{3}{8}$″ hole in panels up to $\frac{1}{4}$″.

Part Nos. Red Button	Part Nos. Black Button	Action	Schematic Circuit	U.S.A. List Price

103S	203S	S.P.D.T.	1-C	1.55

"LEV-R" SWITCHES

Small lever action switches in two and three position types, locking and non-locking action. Requires half the space usually needed for a lever switch; frame bushing and shaft nickel plated brass. Supplied with locknut and screw-on black knob. Fine silver contacts rated at 3 amps, 300 watts, max., A.C., non-inductive load. Non-locking types have spring return. Series 3000 mounts in panels up to $\frac{3}{32}$″ thick; Series 13000 mounts in panels up to $\frac{1}{4}$″ thick. Both Series are $\frac{5}{8}$″ wide; requires $2\frac{1}{4}$″ behind panel; mounts in single $\frac{1}{2}$″ dia. hole. †n.o. center position off. ‡Inter-communications "Talk-Listen" switches, lever locks on one side of neutral and operates non-locking on the other side. *Add suffix letter "L" to Part No. to indicate locking type.

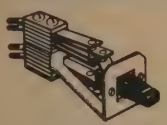
Lever Switches

SWITCHCRAFT INC.

"LT SWITCH"



Series 41000. Smallest, high-quality, telephone type lever switch available. Two or three position types with positive locking and/or non-locking action. Special damping block guards against transient leaf bounce. "Can't-Cheat" detent guide prevents accidental actuator by-pass of switching positions. Switch has rigid "U"-shaped, twin girder frame. Its parallel steel members terminate in an interlocked box where spring combinations are mounted. The special long life, nickel-silver springs can be individually fastened to any one of the frame's four switch stacks mounting positions. Welded cross bar palladium contacts rated at 3 amps, 200 watts max., A.C., non-inductive load are standard. Series 41000 mounts on $^{23}/_{32}$" centers in a $^{15}/_{32}$" dia. hole in panels up to $^{1}/_{4}$" thick. Requires only $2^{1}/_{8}$" depth behind panel. The bushing includes a keyway to accept the non-turn ring which prevents switch turning or twisting in panel. *Add suffix "L" to Part No. to indicate locking type.

"LK" LITTEL-KEY SWITCHES

Series 23000. Short frame lever-type switches available in 2 or 3 positions, locking or non-locking types. Ideal for applications where panel mounting space and depth behind panel is at a premium. Fine silver contacts, rated at 3 amps, 300 watts max., A.C., non-inductive load. Frame has 2 tapped No. 3-48 holes for easy mounting. Mounts in panels up to $^{1}/_{8}$" thick. Depth behind panel only $2^{3}/_{32}$". Series 23000 switches are available in circuit combinations from 1-A up to 4-A. We invite your inquiries. Samples and/or quotations will be handled promptly.

STACK SWITCHES

General purpose stack switch assemblies made from a pile-up of various actuator springs, contact springs and lifters. These stack switch assemblies can be used on manually operated devices where switching is operated by cams, levers, pushbuttons and other mechanical devices. General purpose stack switches are available with a "Flat" or "V" actuator spring. Fine silver or palladium cross bar welded contacts are standard, rated at 3 amps, 300 watts max., A.C., non-inductive load. Supplied with pressure plate and two No. 5-40 screws; mount on $^{3}/_{8}$" centers. Height of stack depends on switching circuit; 1-B circuit $^{21}/_{64}$" H., min.; 2-C circuit $^{45}/_{64}$" H., max. Only the most commonly used "Flat" actuator stack switches are listed below. Contact Switchcraft for price and delivery information on "V" actuator spring stack switches.

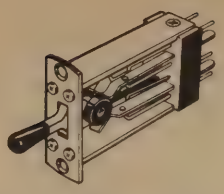
STACK SWITCH KITS



Experimental kits of component parts for assembling switch stacks. Designed to speed the assembly of engineering samples in the lab, aid maintenance men in the field and save time in general replacement. Ideal for mechanical engineers and coin machine servicing; used in relays, electronic organs, etc. Each kit consists of 136 springs in different thicknesses, over 152 phenolic spacers and insulators in various sizes, hard-rubber insulating tubing, two sets of stack assembling pins, two roller assemblies, assorted contacts, etc. Kit No. K-119, consisting of "Tini-Stack" components are miniature variations of standard switch stack springs, spacers, etc. All in compartmented plastic box.

"LO-CAP" SWITCHES

Series 10000. Low-capacity lever actuated switches, previously referred to as **Federal Anti-Capacity switches.** Specially designed flat actuator springs and round contact springs are wide spaced in a large molded insulating block. This construction eliminates the build-up of induced alternating current between springs. Rugged "U" shaped aluminum frame. Roller actuation for easy lever operation. Available in 2 and 3 position models, locking and non-locking types. Actuator springs have fine silver contacts rated at 1 amp, 100 watts, max., A.C., non-inductive load. Supplied with polished chrome escutcheon plate. Mounts with two No. 6-32 flat head screws (not supplied). Mounting centers $1^{15}/_{16}$". Depth behind panel $^{37}/_{16}$". †n.o. center position off.
*Add suffix letter "L" to Part No. to indicate locking type.

"FEATHER-LEVER" SWITCHES

Miniature lever switches, lightweight, compact, mount on $^{7}/_{16}$" centers. Available in 2 and 3 position, locking and non-locking types. Actuator designed with nylon roller for smoother, easy lever operation over entire life of switch. Rugged steel frame withstands rough usage, shock and vibration. Nickel silver springs with fine silver contacts, rated at 2 amperes, 200 watts, max., A.C., non-inductive load. Supplied with black plastic push-on knob. Other push-on knobs, available in 10 colors. See listing below. Series 29000, with bushing, mounts in $^{5}/_{16}$" O.D. panel hole. Supplied with locknut. Series 31000, is available on "SPECIAL" order in all circuit combinations offered in Series 29000. Contact Switchcraft for price and delivery information. Series 31000, mounts with 2 No. 2-56 machine screws. Both Series supplied with black push-on knob. Require only $1^{9}/_{32}$" depth behind panel, mount in panels up to $^{1}/_{8}$" thick. †n.o., center position off. ‡Inter-communications "Talk-Listen" switches, lever locks on one side of neutral and operates non-locking on the other side.

SWITCHCRAFT INC.

Lever Switches

6000

16000

"TELEVER" SWITCHES

Series 6000 and 16000. Rugged telephone type lever switches featuring "T-Beam" frame construction which results in a relatively light construction with sturdiness of a structural "T-Beam". Available in two and three positions, locking and non-locking types. Nylon rollers on the lever actuate the special nickel silver springs, providing smooth action; assures long dependable spring life. Welded crossbar palladium contacts are standard, rated at 3 amps, 300 watts max., A.C., non-inductive load. Series 6000 mounts with four No. 3-48 machine screws. Mounting centers $1^{7}/_{32}$" x $1^{3}/_{16}$", mounts in panels up to $^{1}/_{4}$" thick. Series 16000 features single hole mounting; $^{15}/_{32}$"-32 threaded bushing. Mounts in $^{1}/_{2}$" dia. hole in panels up to $^{1}/_{4}$" thick. Part No. 545, "Stop Plate" provides positive "stops" for two position action. Part No. 540, "Stop Plate" provides non-locking or momentary action. The "Stop Plates" can be changed in the field. Both Series switches supplied with black insulated knob. All have tinned solder lug terminals. *Add suffix letter "L" to Part No. to indicate locking type. Series 16000 non-locking type can be converted to locking type by removing "Stop Plate".

"LEV-R" SWITCHES

"LEV-R" Switches. Series 28000. Compact, lever action switch in two and three position, locking and non-locking types. Smooth, easier lever action assured with special nylon roller. Supplied with locknut, non-turn ring (slips over slotted bushing to prevent switch from turning in mounting hole), and a black knob which is molded directly to the lever. Eliminates loose or lost knobs. Fine silver contacts rated at 3 amps, 300 watts, max., A.C., non-inductive load. Mounts on $^{5}/_{8}$" centers in panels up to $^{3}/_{32}$" thick. Requires only one $^{15}/_{32}$" dia. mounting hole for bushing and one $^{1}/_{8}$" dia. hole for non-turn device; depth behind panel, $2^{1}/_{4}$". *Add suffix letter "L" to Part No. to indicate locking type. †Center position open (OFF).

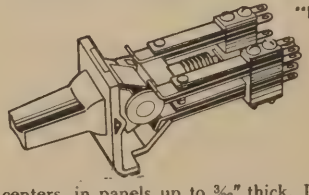
3-COLOR ILLUMINATED LEVER SWITCHES

"LEVER-LITE" SWITCHES SERIES 25000

"Lever-Lite", Series 25000. Illuminated switches indicate positions at a glance. Individual color chips can be inserted in each switch position. Available in 2 or 3 position, locking and non-locking types. Reduces panel space; minimizes costly wiring. Supplied with 6V miniature screw base lamp and six color chips, Red, Green, Amber, Yellow, Blue and White; 28V lamp also available. See lamp listing below. Nickel-silver springs, silver contacts rated 3 amps, 300 watts max., A.C., non-inductive load. Requires only $2^{1}/_{4}$" depth behind panel, can be mounted on $^{5}/_{8}$" centers in panels up to $^{3}/_{32}$" thick.



Size: $2^{1}/_{4}$" L. x $^{39}/_{64}$" W. x $1^{7}/_{32}$" H. *Add suffix letter "L" to Part No. to indicate locking type.

"LEVER-LITE" SWITCHES SERIES 27000

"Lever-Lite", Series 27000 illuminated lever switch, three color lighting identical to Series 25000, but utilizes a larger, contoured lever and larger, factory installed color filters. Available in 2 or 3 position, locking and non-locking types. Mounts on $^{3}/_{4}$" centers, in panels up to $^{3}/_{32}$" thick. Depth behind panel $2^{3}/_{16}$". Nickel silver springs with fine silver contacts rated at 3 amps, 300 watts, max., A.C., non-inductive load. On standard 2 position type AMBER lights in the "NEUTRAL" position; GREEN lights in the "DOWN" position. On 3 position types, RED lights in the "UP" position, AMBER in "NEUTRAL" position and GREEN in the "DOWN" position. Supplied with a 6V lamp. †n.o. center position off. *Add suffix "L" to part number to indicate locking type.

LAMPS FOR "LEVER-LITE" SWITCHES

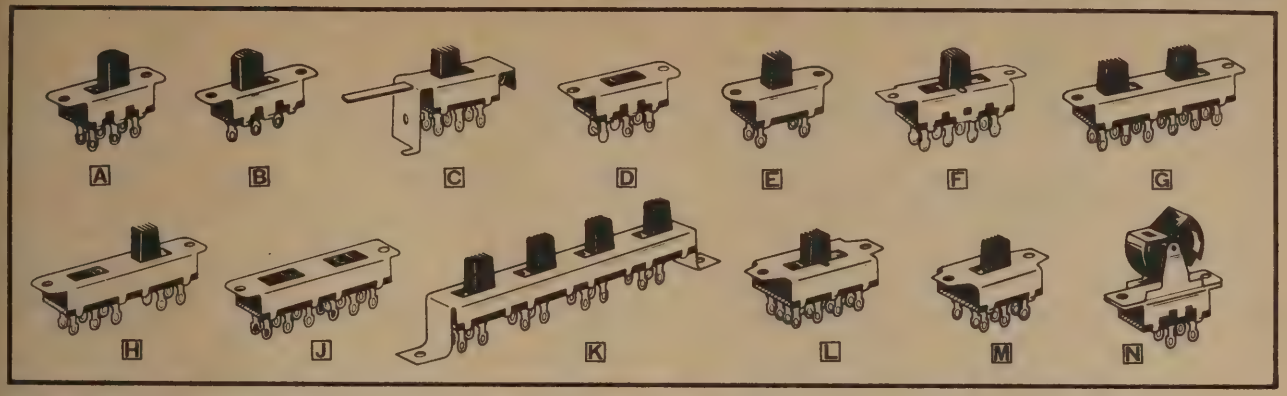
Lamps are mounted in a "snap-out" frame assembly. A 6V lamp is furnished with each of the above listed switches. Specify the following part numbers when ordering replacement lamps:

Part No.	Voltage	Base	Ind. No.	U.S.A. List Price
P-1217	6V	Screw	1768	$1.35
P-1218	28V	Screw	Hudson 369	2.00

ESCUTCHEON PLATES FOR "LEVER-LITE" SWITCHES

For easy and convenient mounting of Series 25000 and 27000 Switches. Satin black finish. Eliminates punching rectangular hole in mounting panel. Part No. 531 for Series 25000, complete with two No. 3-48 black machine screws. Part No. 532 for Series 27000, complete with two No. 2-56 machine screws.

Switchcraft Part No. 531 ..... U.S.A. List Price **$0.25**
Switchcraft Part No. 532 ..... U.S.A. List Price **0.35**



AMBIENT LIGHT SHIELD

For use where "LEVER-LITE" Series 27000 switches are mounted on minimum centers. Shield gives positive separation of lighting between switches. Shield is placed between panel and switch, held in place by mounting screws. Two shields can be used per switch if desired.

Switchcraft Part No. P-1864 ..... U.S.A. List Price **$0.20**

"double-wipe" Slide Switches

New low-cost, precision "double-wipe" slide switches. Switches use special U-shaped, bifurcated sliders to assure continuous wiping action. Contacts rated at 0.5 amp, D.C., 3 amps, A.C., 125 volts non-inductive load. Standard solder lug terminals have a $^{5}/_{64}$" dia. center hole and wrap-around notch for wiring ease. Most switches furnished with black $^{11}/_{32}$" knob and .140" ($^{9}/_{64}$") dia. mounting holes. Nos. 46206LFR, 46256LFR and 47227LF flush screwdriver actuated knob. All slide and rocker switches are U.L. approved unless otherwise noted. See next page for slide switch contact arrangement.

SERIES 46000R
2 AND 3 POSITION GENERAL PURPOSE TYPE

Series 46000R rated at 3 amps, A.C., 0.5 amp, D.C. 125 volts, non-inductive load; except shorting types 46203LRS and 46206LRS, rated at 0.5 amp, 125 volts, D.C. only. No. 46206MP, 2 position momentary switch with $^{11}/_{16}$" plunger and extruded and tapped 6-32 mounting holes. Nos. 46206LFR and 46256LFR feature a flush screwdriver slotted knob. No. 46204MBR pushbutton switch with $^{5}/_{16}$" knob. Series 46000R U.L. listed as approval.

"DW" SLIDE SWITCH CONTACT ARRANGEMENT

Standard "break" before "make" (non-shorting). "Make" before "break" (shorting) switches are available in some models, refer to Series 46000, 49000, 50000 and 52000.

BASIC SCHEMATIC CHART

"LEV-R" SWITCHES, SERIES 12000

Small right-angle action switches requiring minimum of depth behind panel. Available in two and three position, locking and non-locking types. Long leaf-type springs insure long switch life. Fine silver contacts rated at 3 amps, 300 watts max., A.C., non-inductive load. Requires only $\frac{7}{8}$" depth behind panel, single $\frac{1}{2}$" dia. mounting hole; mounts in panels up to $\frac{3}{32}$" thick. Supplied with nickel plated locknut and removable black pastic knob. †n.o. center position off. *Add suffix letter "L" to Part No. to indicate locking type.

"RS" SWITCHES

Rugged rotary switches, available in various multiple, circuits, two and three position types, locking or non-locking action. Ideal for communication, musical and test equipment applications. Fibre cam actuates long, leaf-type springs resulting in easy action; good wiping action of contacts. Fine silver contacts rated at 3 amps, 300 watts max., A.C., non-inductive load. Requires only $\frac{7}{8}$" depth behind panel, mounts in single $\frac{3}{8}$" hole in panels up to $\frac{1}{4}$" thick.
*Add suffix letter "L" to part number to indicate locking type.

"double-wipe"

SLIDE SWITCH SAMPLER

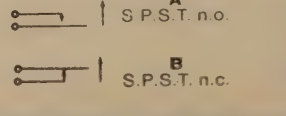
Kit consisting of 15 of the most popular and frequently used "double-wipe" slide switches in a handy reusable plastic case. Offers the engineer or technician a complete line of switches for immediate use or evaluation. All types of slide switches represented—locking and non-locking action; 2 and 3 position types; one and two knobs; knob, rocker, plunger and screwdriver actuated switches; circuitry from SPDT to 4 PTT. Kit No. K-122A contains one each of the following: 46203LSR, 46203MR, 46206LR, 46256LFR, 46313LDR, 46313MDR, 46313TDR, 47206L, 47227LF, 49331L, 50212L, 51206LR, 52212L, 53212L, and 53212MP.
Switchcraft Part No. K-122A . . . . . U.S.A. List Price **$12.25**

"CRADLE-SWITCH"

High quality "Cradle Switch" holds W.E. and other standard telephone industry handsets. Housing is sturdy, yet flexible enough to withstand shocks and vibrations. Housing includes specially designed Hook Switch with a 4-C (4 P.D.T.) contact arrangement. Switch has long silver springs with gold alloy contacts rated at 1 amp., 100 watts max., A.C., non-inductive load. Ideal for use in critical low level audio circuits such as in communication and instrumentation applications.

Part No.	Description	U.S.A. List Price
14412G	Handset Cradle Switch. Black housing. 4-C (4 P.D.T.) circuit.	$8.40
14512G	As above, except beige.	8.40
14612G	As above, except white.	8.40

SERIES 14000



"HOOK SWITCH" SWITCHES

Quality constructed leaf-type switches actuated by a hook (or hanger) such as designed in Series 14000; or by a nylon actuator as in Series 14100G. Ideal for equipment where it is necessary to actuate a circuit by hanging an accessory on a "hook", as a headset, telephone handset or microphone. Series 14000 utilizes fine silver contacts rated at 3 amps, 300 watts max., A.C., non-inductive load. Series 14100G features welded cross-bar gold alloy contacts rated at 1 amp, 100 watts max., A.C., non-inductive load.

Part No.	Action	Schematic Circuit	U.S.A. List Price
14006	D.P.D.T.	2-C	$3.50
14106G	D.P.D.T.	2-C	3.85

BASIC SCHEMATIC CIRCUITS

Switch circuitry can be described as combinations of basic schematic circuits as shown below. N.O. means normally open; N.C. means normally closed.

waldom / molex

LIGHTED PUSH-BUTTON SWITCHES

BE SWITCHED — to WALDOM/MOLEX lighted push button switches. These highly versatile and reliable switches may be used for a wide variety of applications. WALDOM/MOLEX switches are built to take most any environment . . . geared for dependability. Two popular models are now available — 1175 and 1820.

The WALDOM/MOLEX 1175 model is a high quality lighted push button switch that's sturdy, well designed and offers a wide choice of features. Bezels are high quality chrome plated. Housings are precision molded of durable phenolic, and the buttons are mar-resistant nylon.

Designed exclusively for panel mounting, all units come supplied with mounting clips for friction lock into .031 minimum panel thickness. Terminals are standard ¼" male tab for acceptance of WALDOM Type SS-1090 ¼" female quick disconnects, which are furnished with each switch. Tab also has solder hole for installing wire lead, if soldering is desirable. This single pole, single throw, lighted push button switch provides simplicity of design and flexibility.

The WALDOM/MOLEX 1820 Model lighted push button switch proves that a switch can be extremely attractive yet meet rigid extraordinary versatility and limitless design possibilities. You can use one switch or gang them together . . . depending on installation requirements. Its housing is made from highest quality nylon, ultrasonically welded for a secure, quality assembly. No rivets or screw heads protrude from the housing.

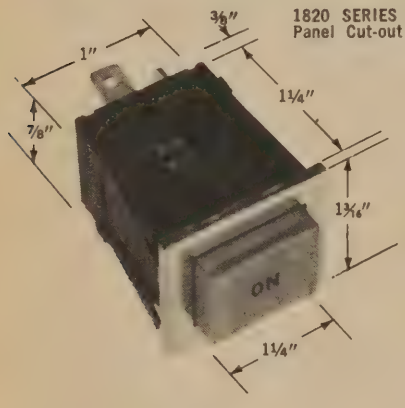
It has integrally molded ears allowing the unit to snap mount into place. Like the 1175, it is a single pole, single throw lighted push button switch for a positive mounting in panels to a maximum thickness of .09" and up to 1" for a friction fit. The buttons are made of mar-resistant nylon. The terminals are standard ⅜" male tabs for acceptance of WALDOM SS-1187 female quick disconnects which are furnished with each switch. Tab also has solder hole for installing wire lead, if soldering is desirable.

INDICATOR LIGHTS — Both the 1175 and 1820 series are available as pilot lights (without switch action). The bulb remains lit as long as the circuit is closed.

WALDOM/MOLEX Models 1175 and 1820

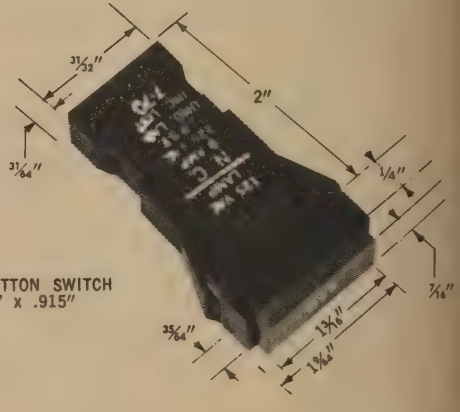
LIGHTED PUSH BUTTON SWITCHES have helped produce sizeable savings for companies in the:

1. appliance
2. business machine
3. instrumentation
4. medical electronics
5. pollution control
6. vending
7. computer
8. home entertainment
9. studio broadcast equipment
10. test equipment
11. and alarm systems fields



Their success is built upon design simplicity, flexibility and economy. This stems from the ability to create, engineer and modify switching devices that meet application requirements without unnecessary costs due to over-engineering. Tested minimum mechanical life of 25,000 cycles . . . many tests have run considerably higher. Both models are available in over 500 variations. Included are standard hot-stamped "ON" and "OFF" legends; in three actions — PP (PUSH ON: PUSH OFF), MNO (MOMENTARY - NORMALLY OPEN): and MNC (MOMENTARY - NORMALLY CLOSED): 6, 14, 28 and 125 volts. (All 125 volt units are UL and CSA recognized): 2 thru 9 Amps; and standard button colors — white, red, green and amber. The light is dependent upon the switch action. Indicator lights are also available.

The long mechanical life, low unit cost, and ease of replacing the entire switch make it more practical to replace the entire unit, if, or when, the bulb should fail.



WALDOM/MOLEX has created a series of attractive packages, color coded to the model type and variation. Each switch is individually packaged in a specially molded bubble which keeps it totally visible . . . no mistake about the switch you are buying . . . and dust free.

AVAILABLE ON SPECIAL ORDER — The number of switch variations available on special order is practically unlimited. While the 1175 series is available in single pole, single throw — with the bulb action dependent upon the switch action, the 1820 series is also available in single pole, double throw with an isolated bulb circuit, if desired. Both series are available with yellow or blue buttons — and the number of various legends capable of being imprinted on the button is only limited to the imagination. Both can be furnished with wire leads instead of male tab terminals.

For specifications other than those shown, contact your distributor — or WALDOM direct.

1820 SERIES LIGHTED PUSH BUTTON SWITCH
Panel Cut-out Dimensions 1.215" x .500"

1175 SERIES LIGHTED PUSH BUTTON SWITCH
Panel Cut-out Dimensions 1.115" x .915"

Determine your exact switch requirements from the following specifications. Order by part number shown under Button Color desired, on next page.
For specifications other than shown, contact your distributor — or WALDOM direct.

Engineering Part Nos. are to be used as a Reference No. only. Order by proper 8 digit Part No. shown.

Manufactured by Molex Products, these items are made available from electronic distributors through Waldom Electronics, Inc.

TOOLS BY CHANNELLOCK®

Specially Designed ELECTRONICS PLIERS

Four matched, long-reach pliers with precision matched jaws, hand honed cutting edges. Drop forged of special analysis steel, properly heat treated. Polished finish. Smooth, dipped plastic, blue grips.

No.	Size	Net
718G	8″	$311
728G	7½″	3.32
738G	8″	3.11
748G	8″	3.11

NO. 718G FLAT NOSE PLIERS

Precision-matched jaws give firm grip in hard-to-reach places.

NO. 728G DIAGONAL CUTTER

Patented wire-stripping notch that **really works!**

NO. 738G ROUND NOSE PLIERS

You can pick up a hair with these precision machined points.

NO. 748G END CUTTER

Fine enough to cut a human hair, sturdy enough to cut 12 gauge copper wire.

TONGUE AND GROOVE PLIERS

The **original, genuine** tongue and groove plier. Patented, non-slip undercut channels. Patented reinforcing rib for extra strength. Dipped plastic grips optional at slight extra cost.

No.	Size	Adjust	Capacity	Net
420	9½″	5	1½″	$2.97
422	9½″	5	1½″	2.97
424	4½″	4	½″	2.40
426	6½″	5	⅞″	2.33
430	10″	7	2″	3.11
440	12″	7	2¼″	3.25
442	12″	7	2¼″	3.25
460G	16″	8	4¼″	4.52

LINEMEN'S PLIER—Bevel Nose

Polished steel finish. Knurled grips. Side cutter. Dipped plastic grips optional at slight extra cost.

No.	Size	Net
3046	6″	$3.32
3047	7″	3.71
3048½	8½″	4.24

LINEMEN'S PLIER—Rounded Nose

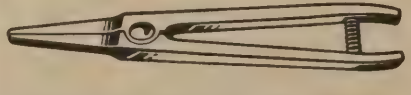
Polished steel finish. Knurled grips. Side cutter. Dipped plastic grips optional at slight extra cost.

No.	Size	Net
346	6″	$3.32
347	7″	3.71
348½	8½″	4.24

WIREMASTER PLIER

Finest wire-cutting plier ever made. Joint rivet closer to cutting edge provides 40% more cutting power than standard design pliers. Special enclosed-joint construction holds cutter edges in perfect alignment for life of plier. Dipped plastic grips optional at slight extra cost.

No.	Size	Net
349	9″	$5.23



ELECTRICIAN'S WIRING PLIER

Triple-use wiring plier: Cuts, strips insulation, loops wire. Patented wire stripping notches strip insulation from 14 and 12 gauge copper wire quickly, cleanly. Dipped plastic grips optional at slight extra cost.

No.	Size	Net
337-W	7″	$3.32

HEATSORB CLAMP

Specially designed "heat sink" that prevents heat damage to electronic components during soldering. Also a handy, self-gripping "third hand" that holds and retrieves small parts in close work.

No.	Size	Net
46	5″	$1.00

LONG NOSE PLIER

Point 3/32″ round. Polish steel finish. Knurled grips. Dipped plastic grips optional at slight extra cost.

No.	Size	Side Cutter	Net
317½	7½″	With	$3.47
3017½	7½″	Without	2.76
326	6″	With	3.04
3026	6″	Without	2.55

DIAGONAL CUTTER—Box Joint

Precision honed cutting edges. Polished steel finish. Knurled grips. Dipped plastic grips optional at slight extra cost.

No.	Size	Net
435	5″	$2.76
436	6″	3.04
437	7″	3.60

SLIP JOINT PLIERS

Thin Nose. Polished steel. Wire cutting shear.

No.	Size	Net
516	6″	$1.93

With Side Cutter. Polished steel. Precision tool with fine cutting edge.

No.	Size	Net
537	7″	$3.32

Heavy Duty With Cutter. Finest quality. Polished steel.

No.	Size	Net
546	6″	$2.19
548	8″	2.55
5410	10″	2.89

NOTES: (*) Can be Switched to Half Wattage Rating. (**) With 3-Step Switch. (†) Non-Indicating Thermostat Bimetal Control. (‡) For Partlow Indicating Control add $165.00 to Base Price. Otherwise non-indicating thermostat supplied, control knob. Stem thermometer may be attached to some baths - add $18.00.

SOLDER BATH TEMPERATURE CONTROLLER

TC-25 Temperature Controller. Solid State Time Proportioning, for use with all Solder Pots requiring temp. control as close as ±5°F. Ranges 100 to 800°F, or, 100 to 2000°F. I/C or C/A Thermocouple (3 ft.) plug in provided. Null-Meter, temp. set point control knob, magnetic contactor (25 Amp/3/240-115), red light, fused, on/off switch, line cord, grounded. Price.....$225.00

PRINTED CIRCUIT SOLDERING MACHINE T-2800

Soldering Machine Model T2800 — Manual dip soldering of printed circuit boards up to 3.5" x 5.1". Contains unique funnel cleaner of solder dross to allow clean solder surface to Touch P.C. Board. 2800 watts/220 volts, on/off switch, Solid State Thermocouple Temp. Control, red light. Range 50 to 450°C (842°F). Bath contents — 55 lbs. Dim. overall 17¾" long x 12⅝" wide x 20½" high. Weight empty 70 lbs. One P.C. Frame Holder included. Price $952.00

TM-28811 extra P.C. Frame Holder. Price 26.45

Soldering Machine Model T3300 — similar to above, except handles P.C. boards up to 4.7" x 7.1". Price $1349.00

TM-3311 extra P.C. Frame Holder. Price 48.60

Model FM-3380 — Wave Flow Fluxing Machine for use in-line with all above, guide rails, pump. Price $366.00

Model DR-3370 — Infra-Red Dryer for use in-line with all above, guide rails. Price..$121.50
(Description Data available on all above.)

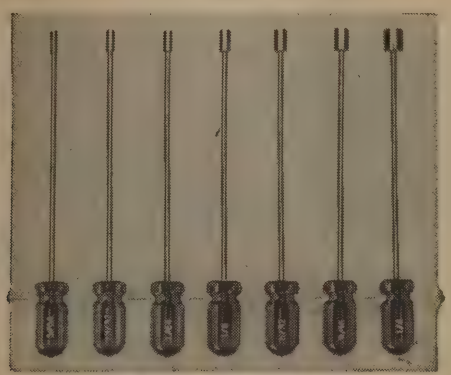
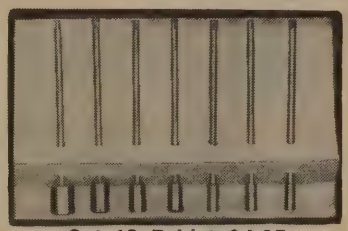
DESCO *



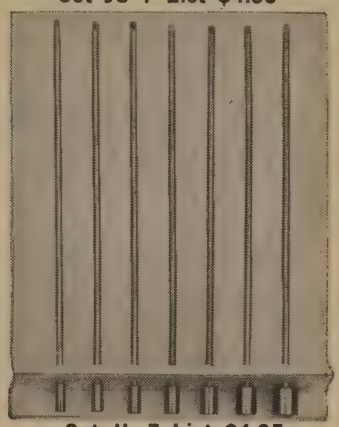
PROPERLY PROPORTIONED MINIATURE TOOLS

For precision instrument and model work use Desco "7" Miniature Nut Drivers. Available with Tenite handles, or for use with jewelers' screw driver handles. Also made with 5½" long shanks for those hard-to-get-to places.

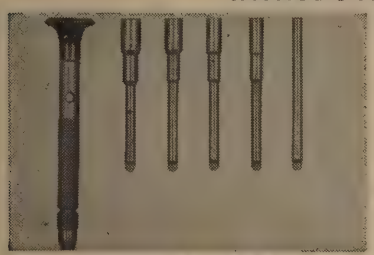
DESCO "7" Sizes across flats
5/64 3/32 7/64 1/8 5/32 3/16 1/4



Set HS 7 List $5.95



Set HL 7 List $5.95



Set JS 7 List $4.95

Set JL 7 List $4.95

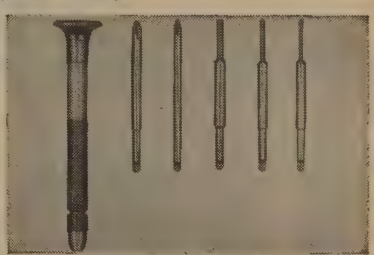
NON-MAGNETIC NUT DRIVERS available in HL7 and HS 7 series only.
Specify "No-Mag" with the code number — same prices.

INTRODUCING THE DESCO "5" Series of Miniature Tools

Set JD 5 List $4.50

Set HD 5 List $5.00

Deeper and more rugged than the "7" Series. Made only in 5/64, 3/32, 7/64, 1/8 and 5/32.



Set EW 5 Steel List $3.50
Set EWN 5 Non-Magnetic List $4.50

A practical miniature end wrench to fit the smallest nuts made 5/64 3/32 7/64 1/8 5/32.

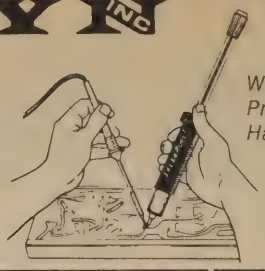
Set SS 5 List $2.50

Contains four screw driver blades and a fine scriber.

Set PA 5 List $4.50

Set PAH 5 List $4.75

Includes the two smallest Phillips drivers and the three smallest Allen wrenches.



* T. M.

All of the DESCO "5" and "7" Series are complete as shown.

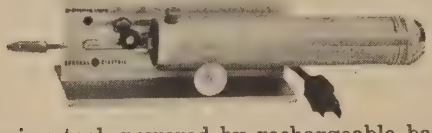
SOLDERING IRONS



TEMPERATURE CONTROLLED SOLDERING IRON — 120 VOLTS; UP TO 135 WATTS

2½-ounce temperature controlled soldering iron maintains selected temperature which can be varied for wide range of work without changing irons or tips. The iron's 135-watt capacity enables it to handle high-mass joints, yet its precision temperature control makes it suitable for the smallest of microminiature jobs without exceeding temperature limitations. Ideal for high production and high quality work, laboratory use, service shops, and wherever temperature limits are specified.

Description	Cat. No.
Complete Iron — Includes Control Box, Handle and 5-foot Cordset, and ⅛-inch and 5/16-inch Chisel Tip and Heater Units	6A490

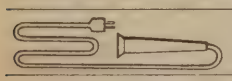
CORDLESS SOLDERING IRON

New soldering tool, powered by rechargeable batteries, is cordless — making it easy to use in remote and inaccessible areas. 18-watt tip unit attains 800°F in 15 seconds. Battery charging stand, with 6-foot 3-wire cordset, restores batteries to peak power; operates from 120 VAC. Optional knife edge tool is available for cutting plastic and synthetic fibres.

Handle and Battery Holder, including Tip Unit	6A298G2
Charging Stand	6A299
Battery Stack	6A672
Knife Edge Tool	6A297

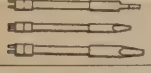
DESOLDERING TOOL

The most advanced design now in production in a desolder tool • Facilitates safe and easy removal of electronic components from printed circuit boards • Operates from 120V power supply — 3-wire cord • Pressure source — self-contained freon supply—15-ounce size canister • Adapter available for connection to air hose — max. 150 PSI • Offers both suction and blowing action.



Complete tool — Includes Canister of Gas, Tip with .060" Hole Dia. and Tip with .032" Hole Dia.	6A680
Adapter for Air Hose	6A686P10

PENLINE-120 SOLDERING IRONS — 120 VOLTS; 25, 30, 40 AND 45 WATTS



Lowest cost GE iron; ideally suited for light to medium production in electronics, communications, and allied industries, for repair and maintenance operations, and by the "do-it-yourself" electronics kit builder.

Handle and 6-foot Cordset

Two-conductor	6D400*
Three-conductor, with NEMA standard plug	6D400G2

Tip and Heater Units — Ironclad

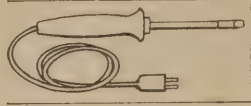
3/16" Chisel Tip	30 watts	6D410*
5/32" Chisel Tip	30 watts	6D411*
3/8" Chisel Tip	45 watts	6D412*

Heater for Threaded Tips

25 watts	6D415
30 watts	6D414
40 watts	6D413*

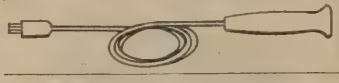
Use interchangeable threaded tips listed on next page.

* UL Listed.



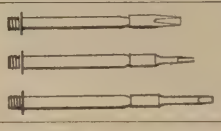
LIGHTWEIGHT SOLDERING IRONS — 120 VOLTS; 40 AND 60 WATTS

Ideal for light and medium production-line soldering and maintenance and repair operations in electronics and communications industries. Tip and heater units can be changed in seconds.



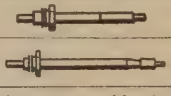
Description	Cat. No.

Complete Iron — Includes handle and 6-foot cordset, and tip and heater unit — 60 watts



¼" Ironclad Chisel Tip	6A273*
3/16" Ironclad Pyramid Tip	6A283*
3/16" Ironclad Chisel Tip	6A283G23

Handle and 6-foot Cordset



Two-conductor	6A273G62
Three-conductor with NEMA standard plug	6A273G63

Tip and Heater Units — 60 watts

¼" Ironclad Chisel Tip	6A300 ←

MIDGET SOLDERING IRONS — 6 VOLTS; 18 to 45 WATTS (with transformers)

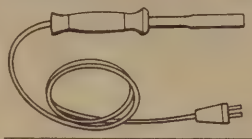
A versatile iron for light production in electronics, and communication industries — handles like a pencil, weighs but 1¾ oz. Tip renewal is easy and fast — complete tip and heater unit can be changed in a few seconds. Heat output can be varied from 18 to 45 watts with standard GE transformers.

Description		Cat. No.
Handle and 6-foot cordset		
	For single- and 4-tap transformers	6A203
	For transformer with 3-heat switch	6A203G2
Tip and Heater Units — All ironclad tips		
	¼" Chisel Tip 25 watts	6A211
	⅛" Cone Tip 25 watts	6A213
	3/16" Pyramid Tip 25 watts	6A215
	3/16" Chisel Tip 25 watts	6A217
	⅜" Chisel Tip 45 watts	6A211G31
Heater for Threaded Tips		
	25 watts	6A221
Transformers for Midget Iron — 115-volt Primary‡		
	Single Tap 6.3-volt secondary	6A362G2
	Four Tap 5.4/5.7/6.0/6.3-volt secondary	6A364G2
	With Three-heat Switch 4.9/6.3/6.9-volt secondary For use only with Handle and Cordset 6A203G2.	6A434

Single- and four-tap transformers are available with 240-volt primary in quantities of 36 or more, specify catalog number desired and note on order, "except with 240-volt primary." Use interchangeable threaded tips.

MIGHTY MIDGET SOLDERING IRON — 12 VOLTS; 100 WATTS

A lightweight iron with high heat capacity for heavy soldering where larger irons, up to 200 watts, prove unwieldy for rapid repetitive soldering, such as production soldering of tuner chassis, tinware, can seams, etc.



Handle and Cordset — Two-conductor		
		6A210G61
Tip and Heater Unit — Ironclad		
	½" Chisel Tip 60 watts	6A211G54

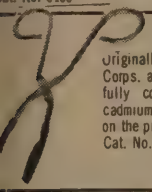
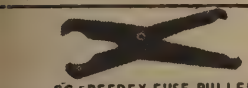
GC 7-PIN MINIATURE TEST SOCKET ADAPTER
Cat. No. 9247 Net 1.65

GC 9-PIN MINIATURE TEST SOCKET ADAPTER
Cat. No. 9249 Net 1.87



GC 8-PIN OCTAL TEST SOCKET ADAPTER
Cat. No. 9248 Net 1.57

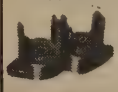
GC NE-O-LITE
Electrical circuit tester...easy to use with a Neon Glow lamp which varies in light intensity according to voltages. Traces all types of trouble, such as grounded lines, open circuits, short circuits, etc.
Cat. No. 5100 Net .50



GC MINIATURE TUBE PIN STRAIGHTENER
Precision-constructed steel die, for straightening pins on fragile miniature tubes of the 1S5, 6AK5, 9002 variety.
For 7-pin Min. Tubes (red base)
Cat. No. 5191 Net 1.00
For 9-pin Jumbo Tubes (blue base)
Cat. No. 8105 Net 1.00

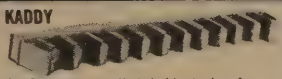
GC TUBE & PARTS EXTRACTOR
Originally designed by the U.S. Signal Corps. as standard equipment. Skillfully constructed of spring steel, cadmium plated. Has rubber cushion on the prongs.
Cat. No. 5092 Net .98

SOLDERLESS TERMINAL TOOL
Handy, heavy duty solderless terminal crimping tool and wire stripper. Crimps all sizes of terminals, strips No. 10 to No. 22 wire.
Cat. No. 8176-S Terminal Tool and Wire Stripper ..... Net 5.20

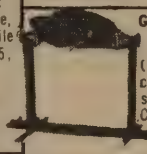


GC SPEEDEX FUSE PULLERS
Inexpensive...non-slip, fuse puller. Safe and handy for cartridge fuses.
Cat. No. 5525 Midget size for fuses 1/4" to 1/2" diameter Net .68
Cat. No. 5526 Pocket size for fuses 1/2" to 1-1/2" dia. Voltages to 200 amps at 250 volts and 100 amps at 600 volts. Net 1.30

GC AMO MINIATURE TUBE PULLER
AMO makes it possible to easily remove or insert miniature tubes such as 6AG5, 50B5, etc. It works on the suction and vacuum principle.
Cat. No. 5093 For 7-pin tubes Net 2.50
Cat. No. 8106 For 9-pin tubes Net 2.50



GC PHONO TURNTABLE STAND
Stand raises the turntable about 15" above the bench for repairs. Easily adjusted to all sizes and types of phono turntables. Sturdily made of steel.
Cat. No. 5205 Net 5.45



GC DUPLEX TUBE PIN STRAIGHTENER
The handiest tubepin straightener for both miniature and jumbo miniature tubes of the 7- and 9-pin types.
Cat. No. 8655 Net 2.00

GC 4-IN-1 TUBE GADGET
Four tools in one. Pure rubber, will not break.
Cat. No. 9130 Net 1.65

TOOL KADDY
The rack of many uses that holds tools of any shape and size from the largest to the smallest. This handy all-metal rack installs easily with many uses in the TV service shop, garages, home workshop, etc.
Cat. No. 9525 ..... Net 1.60

GC "QUICK-RIG" RADIO-PHONO CHASSIS REPAIR CRADLE
Complete 360 degree rotation to lock chassis at best working angle. Clamps security, makeshift setups, all metal.
Cat. No. 5212 Net 8.11

GC NO-JOLT TOOL GRIPS
Modernizes old tools with new safety grip handles. Grease and oil resistant.
Cat. No 5647 GC Small (1 pair) Net .23
Cat. No. 5648 GC Med. (1 pair) Net .27

GC HANDY PICK-UP TOOL
One of the handiest tools you can have in your home, shop, office or farm. Tool is 15 inches long.
Cat. No. 5089 GC Net 1.23
2563 Walsco

New SUPER DELUXE UNBREAKABLE PLEXIGLASS SERVICEMANS MIRROR
Unbreakable plexiglass mirror with special swivel mount. Can be adjusted to old set height and to low boy height.
Dimensions: 10" x 12"

No.	Std.Pkg.	Net
8381 Mirror & Stand	1	11.56

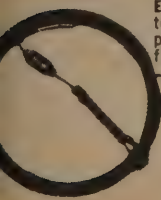
GC HEX-KEY AND SPLINE WRENCH KIT
For both hex and spline type screws. 12 wrenches in leatherette case
Cat. No. 5028 GC Net 1.59

GC POCKET HEX KEY WRENCH SET
7 popular size wrenches. .050 to 3/16" fitted in a steel case-like pocket knife blades.
Cat. No. 9124 GC Net 1.83

GC TWEEZERS
Self-closing tweezer opens when squeezed; blunt points.
Cat. No 7946 GC Net .99

6½" heavy duty type, with slide lock feature; blunt points.
Cat. No. 7947 GC Net 1.10

4½" tweezer, narrow pointed ends for delicate work.
Cat. No. 7948 GC Net .75



COLOR TV SERVICE MIRROR
High quality polished glass mirror in metal frame, nickel plated. 10" x 12". Complete with adjustable, collapsible stand for easy storage.
Cat. No. 8390 Net 6.95

DESOLDERETTE
DESOLDERING TIPS FOR SOLDERING GUNS

The new Desolderette* tip for soldering guns simplifies printed circuit and standard wiring desoldering procedures by allowing gun to draw and hold solder in the tip by capillary action. Tip draws solder from those small connections which usually cool between the application of heat and use of normal suction-type solder removing devices. Desolderette is easily emptied of solder pickup by a flick of the wrist. Fits most gun type irons. *PAT. 3316384
Cat. No. 9066 ..... Net 1.30

GC TV 3-WAY ANTENNA KLIP
Buy them by the bag and have clips ready to sell and ready to install on TV sets.
Cat No. 9015-X bag of 10 Net 1.80

GC TUBE PIN STRAIGHTENER
Plastic 6" ruler tube pin straightener for Compactrons, large 7-pin, 9 and 10 pin, and 7-pin tubes. Drilled holes for bench mounting.
Cat. No. 9135 Net .59

"QUICK SNAP" ANTENNA CLIP
New side clip allows fast connecting with antenna lines;ideal for the service bench. Accepts A-N-P, Pin, and flat terminal type lines.
Cat. No. 9030 bag of 2 clips Net .49

REACH-ALL PEN OILER
Precision instrument oiler. Features extending and retracting tube. Disposes a drop or fraction of a drop of high quality oil.
Cat.No. 984 Net .99

GC 3-STEP TAP
Three-in-1 tool for tapping or rethreading holes. 3 most popular tap sizes: 6 32, 8 32 and 10 32. Heavy plastic handle.

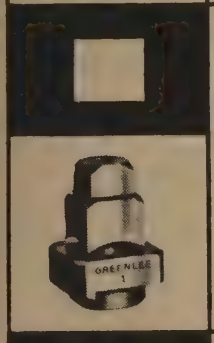
GREENLEE TOOL CO

A Unit of Ex-Cell-O Corporation XLO



CHASSIS PUNCHES

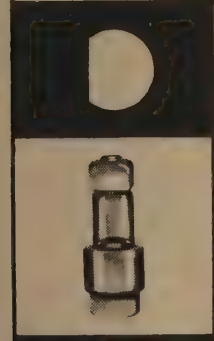
ROUND, SQUARE, "KEY," AND "D" TYPES

NO. 730 ROUND PUNCH

Swiftly cuts clean, accurate holes in radio chassis for sockets, switches, controls and other equipment. Operates simply with an ordinary wrench for drive power . . . just insert in a small drilled hole and turn drive screw. No reaming or filing . . . hole is smooth, perfect. 29 sizes from ½" to 3⅛" diameter. New Ball-Bearing Drive available for even easier, speedier operation.

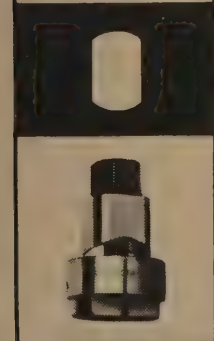
NO. 731 SQUARE PUNCH

Cuts square or oblong openings as desired. Available in five sizes for making ½", ⅝", ¾", ⅞", and 1" square holes. Drive screw fits into ½" hole, which can be drilled or made with ½" No. 730 GREENLEE Round Punch. Operates with an ordinary wrench for drive power. Individually packed.



NO. 731-R KHP RELAY PUNCH

Makes clean, accurate, *finished* holes in up to 16-gauge metal for Potter & Brumfield KHP miniature relay sockets. Makes 1.018" x .861" hole.



NO. 732 "KEY" PUNCH

Quickly, easily cuts holes for keyed radio sockets. Operates on same principle as other GREENLEE Radio Chassis Punches . . . an ordinary wrench supplies the drive power. In five sizes to make openings of 15/32", 15/16", 1 11/64", 1 17/64", 1 21/64". Drive screw fits into ½" hole. Individually packed.

NO. 733 "D" PUNCH

Simplifies and speeds the work of making "D"-shaped openings for high-frequency, miniature tube sockets and other equipment using this type opening. Available in ½" and ⅝" sizes. Operates on same principle as other GREENLEE Radio Chassis Punches with an ordinary wrench supplying the drive power. Drive screw fits into ⅜" drilled hole. Individually packed.

NO. 734 DOUBLE "D" PUNCH

Quickly makes standard electrical receptacle openings. Cuts standard hole 1⅛" dia. across parallel sides, 1⅜" dia. across rounded ends. Simply insert into a ½" hole and turn with an ordinary wrench. Does the work in less than five minutes . . . eliminates all tedious hand filing . . . gives a smooth, perfect opening.

TOOL KITS

MASTER 15-PIECE RELAY TOOL KIT

Precision-made and professionally-designed group of new tools for adjusting and maintaining relays, contactors, switches, controls, and other components for the telecommunication and electronic industries.

Packed in Deluxe zippered leather case for protection of tools.

Kit contains: 2 spring adjusters, tension & thickness gauges, Duck Bill plier, Screw Driver, Tweezer, Mirror, 4-way Tool, Brush, Armature & Stop Benders, Contact Spray. Contact Burnisher. **KIT K-55 $44.00**

Kit KR-6 Compact Relay Kit, leather case (not illustrated) **$26.00**

MASTER 20-PIECE ELECTRONIC TOOL SET

Designed for assembly, service and repair. High quality tools were specially produced for serving, adjusting, trouble-shooting, of complex equipment and assembly work. Kit comes in durable leather zippered case for easy portability. Set contains Chain Nose, Groove Grip and Diagonal cutting pliers. Standard and Phillips screwdrivers, Magnifier, Solderingiron, Straight and Bent Nose tweezers, Solder aid, Alignment tool, 2 Needle files, Pin vise, Solder Core, 3/16" and 1/4" Nut drivers, 2 jewelers screwdrivers, Pen Burnisher with 12 blades. **KIT K-600 ..... Price $37.00**

Kit KE-7 Compact Electronic Set, vinyl case (not illustrated) **$12.90**

RELAY & CONTACT BURNISHERS

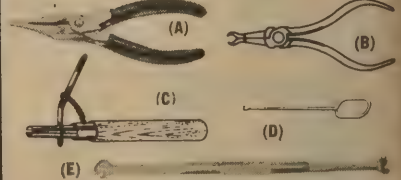
DIAMOND BURNISHERS

Exclusive Features:
- Strong abrasive power
- Long lasting

Consists of abrasive Diamond particles - Developed for any type contacts: Silver, Platinum, Gold, Palladium, Tungsten, Molybdenum - Length 5⅜" - Diamond coated face 1" x ¼" - Nylon Shaft - Three types to meet every application: Type 200 (coarse) for Industrial Relays - Type 300 (medium) for Intermediate and Telephone relays - Type 400 (fine) for Sensitive Relays.

K-234 Set of 3 ..... **$17.00**
Individual spatulas and Kits packaged in rigid plastic boxes.

D-200	Coarse	$5.80
D-300	Medium	$5.80
D-400	Fine	$5.80



POCKET-TYPE BURNISHERS

Handy, lightweight tool with replaceable blades, adjustable for length and rigidity. For any type contacts, of any precious metal. Contact burnisher leaves no grit or dust on contact. Hard-tempered steel blades for minimum contact wear. Rust proof, with chrome plated barrel and pocket clip, aluminum chuck. Clear plastic cap for use with "live" contacts. Overall length, 5½". dia. ⅜".

P-4 Pen—With 12 RB4 Blades. Net Each..... **$4.50**
P-6 Pen—With 12 RB6 Blades. Net Each..... **$4.50**
RB4 (¼" w. 1¼" l.) or **RB6** (3/16" w. x 1¾" l.)
Replacement Blades — .007" thick. Net, Pkg. 25 **$4.50**

SPECIALIZED TOOLS

(A) PLS-7	Parallel Duck bill plier, 6" long	$7.98
(B) S-42	Plier, lamp cap extractor, 5" long	$5.46
(C) S-339	Switchboard lamp extractor	$2.68
(D) M-120	Hook spring pull, 6"	$1.60
M-125	Hook spring push, 6"	$1.60

(E) Open end wrenches, 8" long, DW-4 ¼" DW-16 3/16", DW-32 7/32" ..... **$3.48 ea.**

PRECISION TOOLS

FOR PRODUCTION, SERVICE & MAINTENANCE

PRECISION DYNAMOMETER TENSION GAUGES

LARGE — Round Tip

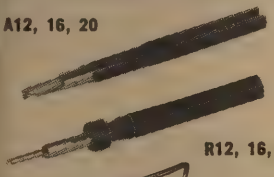
SMALL — Flat Tip

Accurately measure forces required to actuate all sensitive mechanisms . . .

Available in two sizes and a total of thirteen ranges. Measure in both directions. Equipped with maximum reading pointer that retains reading.

LARGE GAUGES

Type	Range In Grams	Conversion In Ounces
GD-50	60-500	18 $32.70
GD-100	100-1000	32 $32.70
GD-200	200-2000	70 $32.70
GD-400	400-4000	140 $36.60



SMALL GAUGES

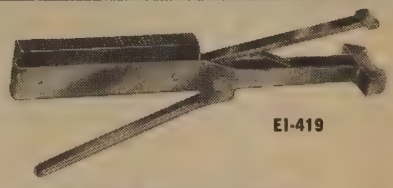
Type	Range In Grams	Conversion In Ounces
GD-1	0-10	3/8 $14.20
GD-2	2-20	3/4 $14.20
GD-3	4-35	1 5/16 $14.20
GD-5	6-50	1 3/4 $14.20
GD-10	10-100	3 1/2 $14.20
GD-15	15-150	5 1/4 $14.20
GD-20	20-200	7 $14.20
GD-25	30-250	9 $14.20
GD-30	40-350	12 $16.00

CONTACT INSERTION / REMOVAL TOOLS AND KITS

Just 2 tools insert and remove contacts on all types of connectors . . .

A12, 16, 20

R12, 16, 20



AMPHENOL, CINCH, BENDIX, CANNON, PYLE, etc. . . .

INSERTION				REMOVAL			
Type	Color	Size	Price Ea.	Type	Color	Size	Price Ea.
A-12	Yellow	12	$12.50	R-12	Yellow	12	$16.00
A-16	Blue	16	12.50	R-16	Blue	16	16.00

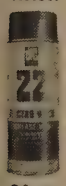
KITS

KA-260 — 3 PIECE CONTACT INSERTION TOOL KIT
Consists of one each A-12, A-16, A-20 .....Price **$36.00**

KR-260 — 3 PIECE CONTACT REMOVAL TOOL KIT
Consists of one each R-12, R-16, R-20 .....Price **$45.00**

EI-419



EI-419 INSERTING AND EXTRACTING TOOL

For printed circuit boards, connector assemblies, telephone-cord stoppers, flat-packs, IC's and many other applications.

Precision made, with leaf spring to remain in open position. Made of special alloy, molded finger-grip type handle for easy gripping. Fully nickel-chrome plated. Overall length 6½". .....Price **$8.90**

INNOVATIONS IN SERVICE, PRODUCTION & LAB TOOLS

WASH AND LUBE SPRAYS

24 oz.

8 oz.

JIC-22 ELECTRO-WASH
Degrease, eliminate grease, dirt, oil. No carbon-tet, safe, no residue, non-flammable. Std. pkg: 12 pcs. $3.25 ea. 6 pcs. $3.50 ea. Sample order $4.00 ea.

JIC-33 ELECTRO LUBRI-FOAM
Cleans, lubricates, protects, polishes. Exclusive foam action. Eliminates noise, non-flammable. Std. pkg: 24 pcs. $2.25 ea. 12 pcs. $2.50 ea. Sample order $3.00 ea.

(A) **PL-4** — MIDGET "GROOVE-GRIP" PLIERS. 5" **$3.00**

(B) **PLS-1** — DUCK BILL, PARALLEL, BENT NOSE PLIER. 5".. **$5.82**

(C) **PLS-2** — DIAGONAL ANGLE, FLUSH CUTTING AND STRIPPING PLIER. 5" **$6.46**

(D) **PLS-5** — HEAT COIL PLIER. 6" **$6.24**

(E) **PLS-9** — DUCK BILL, BENT NOSE, 90°, PLIER. **$6.60**

ECONOMY AND POCKET TYPE BURNISHERS

OB TYPE

PB TYPE

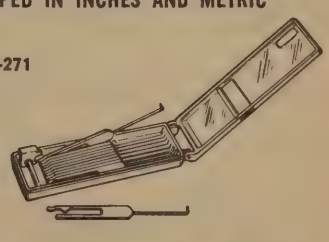
ECONOMY BURNISHERS — Leave no grit or dust and will not affect contact points. Plastic handles for working on live contacts.

OB-1 — For fine contacts. Abrasive coated, 3½" long, 3/16" wide, .007" thick.
Pkg. 12 pcs. Price **$5.20** Pkg. 48 pcs. Price **$18.80**

OB-2 — For extra-fine contacts. 3½" long, ¼" wide, .010" thick.
Pkg. 12 pcs. Price **$7.20** Pkg. 48 pcs. Price **$25.80**

OB-3 — General purpose type. Abrasive-coated. Hard molded handle. 3½" long, ¼" wide, .010" thick.
Pkg. 12 pcs. Price **$9.80** Pkg. 24 pcs. Price **$17.60**

OB-4 — For industrial use. Abrasive-coated. Hard molded handle. 3½" long, ¼" wide, .020" thick.
Pkg. 12 pcs. Price **$12.00** Pkg. 24 pcs. Price **$21.60**



POCKET-TYPE BURNISHERS — Used for cleaning general type contacts. Supplied with 6 non-residual abrasive replaceable blades and/or 6 rods stored in pen barrel, as noted. Pen made of sturdy plastic for dielectric work. Length 4½". Diameter 3/8". Blades 3/16" wide, 1¾" long, .007" or .0035" thick.

		Price
PB-3	Pen with 6 blades .0035" thick	$4.90
PB-3R	Same as PB-3 plus 6 abrasive rods	5.80
PB-7	Pen with 6 blades .007" thick	4.80
B-3	Pkg. 25 Repl. blades for PB-3 (.0035")	4.80
B-3R	Pkg. 50 Repl. rods for PB-3	12.50
B-7	Pkg. 25 Repl. blades for PB-7 (.007")	4.50

UNIQUE GAUGE SET

STAMPED IN INCHES AND METRIC

T-271

T-271 — WIRE THICKNESS GAUGE SET. Extremely versatile. Designed for use in restricted places. Gauges can be used in or out of case. 9 round blades, .006", .008", .016", .020", .028", .031", .039", .046", .059" and one flat blade .004" thick. Blades 3" long, tips bent 90° x 3/16" high. Overall case size: 1¼" wide x ½" high x 4" long. .....Price **$19.40**

SPECIALIZED TOOLS

C-356

M-117

E-421

S-391

S-340

C-356 — CONNECTOR TOOL. Serves as terminal winding device, pull strength tester and spring hook. Insulated, 7" long. .....Price **$7.90**

S-391 — SPRING REMOVER. Adjusts, inserts and removes relay springs in tight spaces or hard to reach places. 6½" long. Tips bent 90° angle with .042" slots each end.....Price **$3.46**

M-117 — SPIN-TYPE SPANNER WRENCH. For use on odd shaped or extremely thin nuts and where regular nut driver cannot be used. Swivel head. 4" long. .....Price **$4.20**

S-340 — EXTRACTOR, TWEEZER TYPE. Extracts miniature, lamps, caps, readouts, flatpacks, IC's, p.c. components, etc. ½" normal opening closes to 1/16" with stop guide. 3½" long. Price **$3.20**

E-421 — EXTRACTOR, TERMINAL. Will extract terminals of most types. Finger-grip "T" type handle. Tip bent to 90° angle and tapered to fine point with center notch. Overall length 3". Price **$3.60**

NOTE: Available in other sizes ranging from .005 to .250.

NOTE: Above also available for Fed. Spec. QQ-S-571d.

NOTE: Kester "44" Resin Core Solder, designed for electronic and electrical work, replaces Kester "Resin-Five" Core Solder and Kester Plastic Rosin Core Solder. This important innovation now allows you to reduce shelf inventory. Kester "44" Resin Core Solder actually outperforms "Resin-Five" and Plastic Rosin Core Solders. This important innovation is a result of Kester's continuing research connected with the Electronic Industry. Kester "44" Resin Core Solder is unsurpassed in Flux activity without danger of Flux residue corrosion or conductivity.

Plastic Rosin Core Solder still available to meet Federal Specification QQ-S-571d, Type R.

KESTER TV-RADIO SOLDER

New and improved product. The small package of Kester "44" Resin Core Solder in the practical (round) wire-size of .062" (1/16"). Ideal for the Serviceman's Kit . . . or for those sales to the occasional user for soldering TV, Radio components . . . everything electrical or electronic.

MASTER HEAT TOOLS

FLAMELESS HEAT GUNS

200–1000°F of heat that travels right to the job. Ideal for shrink tubing, soldering and de-soldering, setting pre-coated rivets, softening, molding, welding and forming plastics; also quick-dries paint, plastic finishes, or parts. Speeds plastic and epoxy curing, invaluable in vinyl repair. Hundreds of other uses.

Adjustable air intake controls output temperature; double-jacketed heater; housing made of rugged die-cast aluminum. 8-foot, 3-wire, oil-resistant cord with molded plug safety keyed to element amperage. 400 cycle models available.

Attachments: a. exclusive cone has ¼″ orifice that focuses heat on a concentrated area and a patented adjustable air diffuser that eliminates back pressure and heat loss. Part No. A-206-HG. **$12.95. b. Nozzle adapter** — required for baffles A-145-HG and A-150-HG. Part No. A-100-HG. **$2.95. c. Baffle** — for tubing to ¾″ OD, requires A-100-G adapter. Part No. A-145-HG. **$2.75. d. Baffle** — for tubing to 1¼″ OD, requires A-100-HG nozzle adapter. Part No. A-150-HG. **$2.95. e. Extra wide baffle** — for long tubing to ¾″ OD. Part No. A-203-HG. **$17.95. f. Baffle** — for tubing to 1¾″ OD. Part No. A-205-HP. **$16.95.**

FLAMELESS HEAT TORCHES

Pinpoints heat precisely where you want it. Ideal for shrink-tubing, plastic welding, heating micro-parts or constricted areas. Your choice of predetermined temperatures from 200°–1000°F. Uses shop air or inert gas; weighs one pound. Furnished with 10-ft. hose, 3-wire cord and stand.

Torch elements — an element of your choice is included with each torch (see chart). Specify model number and wattage. If no element is specified, a 550 watt, 120V element will be supplied. 230V elements are available.

Accessories and attachments: a. Universal multipurpose tip; supplied with each torch. Part No. SS-1. **$5.00. b. Combination welding and tacking tip;** eliminates need for two tips during welding. Part No. SS-2. **$8.50. c. Universal high-speed welding tips;** for ⅛″ and 5/32″ plastic welding rod. Part No. SS-3. For 3/16″ plastic welding rod, Part No. SS-4. Either size **$27.50. d. Air gauge and regulator;** Part No. A-207-FT. **$12.95. e. Steel carrying case;** Part No. A-201-FT. **$8.95. Stand** (not shown); holds torch when not in use; supplied with torch. Part No. A-202-FT. **$1.50.**

MICROFLAME, INC. GAS WELDERS

DEALER PRICE SCHEDULE

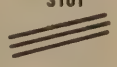
MICROFLAME DELUXE TORCH KIT NO. 4000

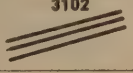
The Deluxe Microflame Torch Kit contains the Microflame Torch, 6 oxygen cylinders, 3 LP gas cylinders, spark igniter, 3 welding tips, 4 six inch gold/silver alloy brazing rods, a two-way bench bracket for mounting on bench or pegboard PLUS booklet on "HOW TO WELD."

MICROFLAME INDUSTRIAL TORCH NO. 1000

The Industrial Torch is comprised of the basic Microflame Torch plus large capacity oxygen and LP tanks, valves, regulator and accessories. Oxygen capacity is 75 liters; LP gas capacity is 26.7 fluid ounces. The Industrial Torch set is packaged in a heavy-duty carton.

MICROFLAME GAS WELDING TORCH BLISTER PACK





New display blister package features the Microflame torch plus oxygen and LP Gas Cylinders Package. Ideal for rack or pegboard and is set off in bright red with large immediate identification of product name and application. Card back features helpful information on the Microflame plus list of accessory products to use with unit. $12.97

MICROFLAME TORCH NO. 5000

The Microflame Torch is a self contained, miniature gas welding tool which produces over 5000° pin-point flame using miniature gas cylinders. It is designed for welding, brazing and soldering of small parts, and is basically applied like standard gas welding equipment. Supplied complete with cylinders.

Part No. & Illustration	Name, Description & Unit Quantity	Sugg. Dealer
4000 	**DELUXE Miniature Torch-Set** Deluxe set includes torch, flame tips, bench bracket, spark lighter, brazing rods, 6 oxygen, 3 butane, welding book and instructions. (1)	$19.47
1000 	**Miniature Torch Set** Contains torch, flame tips, torch tube, gaskets, butane and oxygen cylinders, and instructions. (1)	12.97
1001 	**Oxygen Cylinder** Fits all Torches (10)	.53
1002 	**Butane Cylinder** Fits all Torches (6)	.33
1003, 1004, 1005 	**Flame Tips** Fits all Torches (1 Set)	1.00
	Cylinder Gaskets Fits all Torches (1 Set)	.40
	Torch Taper Tip Tube Fits all Torches (1)	1.32
4300 	**Cylinder Kit** Contains 4 oxygen, 2 butane cylinders in Blister Pack	$2.78
1006, 1007 	**Oxygen Piercing Knob** Fits all Torches (1)	1.00
	Butane Piercing Knob Fits all Torches (1)	1.00
1008 	**Spark Lighter** (1)	.33
5000 	**Industrial Torch Set** Contains a complete Model 1000 Miniature Torch Set — plus Industrial capacity oxygen and propane gas tanks, valves, hoses, adapters, bracket, spark lighter & instructions. (1)	65.00
5001 	**Industrial Adapter Kit and Bracket** Hoses & valves to convert a miniature torch for Industrial application contains Hose Set, Oxygen & Propane valves & bracket. (1)	35.31
5002 	**Hose Set** Set of 2 hoses & adapter cartridges for Model 2000 & 5000 Tocrh Set (1)	8.00
5003 	**Industrial Bracket** Holds oxygen & propane tanks — for Industrial Torch Set (1)	8.00

MICROFLAME, INC.

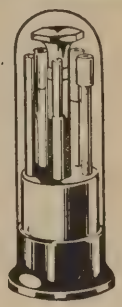
Moody® PRECISION HAND TOOLS

Screw Driver & Awl Set

Contains four interchangeable screw driver blades and an awl. Complete with swivel top, knurled chuck type handle.

Sizes .055", .070", .080", .100", awl

Cat. No. SC-5 **List $2.50**

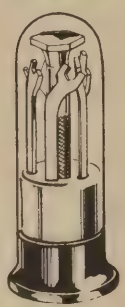


Socket Wrench Set

Five interchangeable box or socket wrenches that fit the same magnetic handle. Thread sizes #00, #0, #1.

Sizes (all hex) 5/64", 3/32", 7/64", 1/8", 5/32"

Cat. No. BW-5 **List $5.50**



Offset Open End Wrench Set

Contains five offset open end wrenches, interchangeable in the chuck handle.

Sizes 5/64", 3/32", 7/64", 1/8", 5/32"

Cat. No. OE-5 **List $3.50**

Tap Drill Set

Contains five tap drills. Handle has a solid-locking chuck-nose and swivel-top. A companion piece to the Moody TS-5 Tap Set.

Drill Sizes 3/64", #53, #50, #47, #43

Cat. No. 70 **List $5.50**

Cross Recessed Driver & Allen Type Wrench Set

Contains five interchangeable tools with chuck-type, swivel top handle. A torque hole in the handle enables fastenings to be set up tight.

Cross recessed drivers #0, #1
Allen type wrenches #4, #6, #8

Cat. No. PA-5 **List $3.50**

Tap Set

Contains five interchangeable taps and handle for cutting inside threads. Torque hole in handle enables you to maintain a steady firm leverage.

Tap Sizes 0-80, 1-72, 2-56 3-48, 4-40

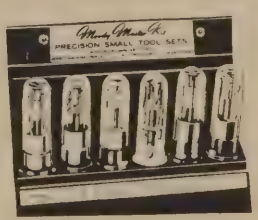
Cat. No. TS-5 **List $10.00**

Utility Screw Driver Set

Consists of a precision screw driver and six interchangeable blades. The screw driver handle is knurled for positive gripping.

Sizes .025", .040", .055", .070", .080", .100"

Cat. No. 52 List $3.25



Machinist Scriber

Approximately 8½" overall with a right angle point and a straight point, both properly tapered and swaged into a knurled aluminum finger grip handle.

Cat. No. MS-2 **List $1.10**

Moody Master Kit

A popular compact kit of six tool sets, stored in a leatherette case. Contains Screw Driver & Awl Set, Cross Recessed Driver & Allen Type Wrench Set, Socket Wrench Set, Offset Open End Wrench Set, Tap Drill Set, Tap Set.

Cat. No. MMK-6 **List $35.00**

ERSIN Multicore

5-core solder

Available in 1-lb. and 7-lb. reels

TECHNICAL ADVANTAGES:

Ersin Flux is exclusive to Multicore and will not be found in any other solder. It is a high-grade, water-white rosin, homogeneously activated.

Ersin Flux has a vigorous fluxing action and possesses the non-corrosive and protective features of the original rosin. Soldered joints made with Ersin Flux do not corrode even after prolonged exposure to any degree of humidity. Ersin Flux reduces the surface tension of molten solder, causing it to wet metals rapidly, increasing speed of operation with resultant production economies.

Free from objectionable odor. Non-toxic in use.

Leaves nothing but pure rosin on the work after soldering, and may be used wherever plain rosin is specified.

Conforms with all pertinent federal specifications.

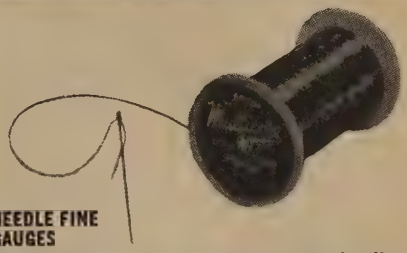
Multicore construction: Five separate cores of flux eliminate possibility of no flux in a portion of the wire, which may occur in single cored solder. Guaranteed continuity of the flux stream prevents "dry" joints, i.e., those having high electrical resistance.

Although there are five cores of flux in Multicore, the total percentage of flux to solder is less than many single cored solders.

Very rapid melting results from the multiple core construction which provides thinner walls of solder than are found in same gauge single cored solder. Multicore's unique properties make perfect joints possible on difficult metals and alloys, even if oxidized.

Ability to tin rapidly produces perfect joints with less solder. Greater coverage per pound.

ERSIN Multicore's national network of industrial distributors, in 50 states, facilitates prompt off-the-shelf delivery at factory-low prices.



Free Evaluation Test Samples and "Modern Solders" technical booklet available. Address requests on company letterhead to: Multicore Sales

STANDARD TIN/LEAD ALLOYS AND GAUGES

Available from stock: 63/37; 60/40, 50/50; 45/55; 40/60; Savbit; Special Alloys—H.M.P. (High melting point, 565° F); L.M.P. (low melting point, 354° F). Other alloys upon request.

Gauges: 14 s.w.g. (.080") through 34 s.w.g. (.009").

NOTE: Soldering iron tips should always be 108° F above melting point of alloy.

NEEDLE FINE GAUGES

For microminiaturization, integrated circuits and other similar requirements. Off-the-shelf delivery in alloys 63/37 and 60/40, in even gauges from 24 s.w.g. (.022") through 34 s.w.g. (.009").

COPPER-LOADED SAVBIT ALLOY

Copper-loaded SAVBIT stops the wear and erosion of copper soldering iron tips . . . increases tip life by 1,000%.

Characteristics and specifications: Savbit Alloy is available in Ersin Multicore 5-core solder containing non-corrosive extra-fast Ersin Flux in 14, 16, 18, 20 and 22 gauge. Melting point: Virtually the same as standard tin/lead alloys. Excellent conductivity, tensile and shear strength.

Available in new 1-lb. and 7-lb. reels, skin wrapped and foam packaged.

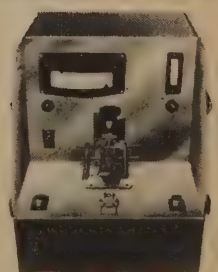
NEW MULTICORE HIGH PURITY EXTRUDED SOLID BAR SOLDER

Offers higher purity achieved through greater quality control, only possible with extrusions. Available in 1 or 2 lb. bars—either individually skin packed or bulk. Standard stock alloys 63/37 and 60/40. Other alloys on request. Meets all federal and military specifications.

NEW ERSIN LIQUID FLUXES

Meet the same high quality standards as Ersin Multicore Solder. Three new Fluxes: Formula No. 5380 and Formula No. 0360 meet Government MIL specifications for active and non-activated liquid fluxes, respectively. Formula No. 4370 is an activated liquid flux which is the external counterpart of the flux contained in Ersin Multicore 5-Core Solder. Conforms to the latest Federal Specification QQ-S-571d.

PC (PRINTED CIRCUIT) PAK
60/40—22 s.w.g. (.028")



NEW EASY DISPENSER PAK
60/40—18 s.w.g. (.048")

NEW SERVICEMAN'S PAK
60/40—19 s.w.g. (.040")

Ideal for servicemen, hobbyists, lab technicians. Paks are flameproof—can be used close to the heat.

NEW SOLDERABILITY TEST MACHINE

Designed and built by Multicore Solders Ltd., this precision machine accurately measures the degree of solderability of terminal component wires and affords positive and totally reliable results. Complies with International Specification I.E.C. Publication 68-2 Test T.; developed in association with the International Electrotechnical Commission.

Imported from England
Conforms to all applicable Federal Specifications QQS-571

Multicore Sales
Div. British Industries, Corp.

ORYX PRECISION SOLDERING INSTRUMENTS

WHY PRODUCTION MANAGERS CHOOSE ORYX SOLDERING IRONS

1. MINIATURE SIZE

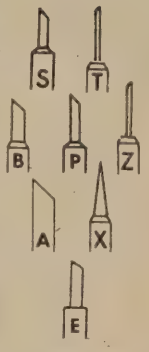
ORYX soldering irons are small and easy to handle as pencils. Their miniature size helps to speed any precision soldering operation. Damage to adjacent components is eliminated. If you can see it, you can solder it with ORYX!

2. FEATHER WEIGHT

A standard, utility-type 100 watt soldering iron weighs about 2 lbs. The so-called pencil-type irons typically weigh between 2 and 6 ounces. ORYX soldering irons, by contrast, weigh as little as ¼ ounce. This true feather weight virtually eliminates hand fatigue. Workers can turn out many more joints per hour with fewer rejects.

3. HIGH EFFICIENCY

All ORYX soldering irons utilize a unique element-in-the-tip design principle. By generating the heat **within** the tip, far fewer watts are needed to achieve results comparable to much larger irons. This principle also provides quicker heat recovery because the heat path between element and joint is so very short. The need for large insulating handles is eliminated.



LOW-VOLTAGE SOLDERING IRONS

MODEL 5-S—(As shown in photograph). Eyepiece model less than 5″ long, for precise finger control. Weighs 7 grams. Nominal temperature 575°F. Furnished with 1/16″ S tip. Also takes T tip. 4.5-volts, 4.5-watts (Use 54204-T tapped transformer for 4.5 volts) .....Net **$6.95**

MODEL 6A—The most popular Oryx soldering iron. Designed for printed circuit soldering. Weighs only ¼ oz. Nominal temperature 690°F. Furnished with 3/32″ removable B tip. Also takes other tips listed below. 6-volts, 6-watts. Net **$6.95**

MODEL 9-6—Similar to model 6A, but greater heat capacity. Weighs ¼ ounce. Nominal temperature 750°F. Furnished with 3/32″ A tip. Also takes B tip. 6-volts. 8.3 watts **$6.95**

MODEL 11-6—Special model for high-temperature solders. Temperature 835°F. Weighs ¼ oz. Furnished with 3/32″ solid nickel E tip. Nickel tip provides long life at high temperatures. 6-volts, 10-watts .....Net **$8.95**

REPLACEMENT TIPS for low-voltage soldering irons.

Type	Material	Plating	Diameter	For Model	Net Ea.
A	Copper alloy	Nickel	5/32″	9-6	$ .68
B	Copper alloy	Nickel	3/32″	6A, 9-6	.68
E	Solid Nickel	—	3/32″	11-6	2.10
P	Copper alloy	Nickel	1/16″	6A	.68
S	Copper alloy	Nickel	1/16″ (short)	5-S	.70
T	Gold and copper	Nickel	1/25″	5-S, 6A	3.35
V-PL	Copper alloy	Iron	3/32″	6A, 9-6	1.80
X	Copper alloy	Nickel	1/25″ (pointed)	6A	.99
X-PL	Copper alloy	Iron	1/25″ (pointed)	6A, 9-6	1.85
Z	Copper alloy	Nickel	1/25″	6A	.99
Z-PL	Copper alloy	Iron	1/25″	6A	1.80

TRANSFORMER

TAPPED TRANSFORMER—Output 4½ to 6-volts in ½ v. steps. For exact temperature control on all ORYX 6-volt tools. Operates on 115 V. AC—ready to plug in. Model 54204-T .....Net **$7.80** ea.

PLUG-IN 115 V. MINIATURE IRON

NO TRANSFORMER. Standard model furnished with U/L approved 4½′ cord set. Ready to plug in! Three-wire model (less plug) also available.

COMPACT DESIGN for light production, laboratory, and service use. Irons weigh only 1 oz., plus cord.

HEATS QUICKLY (about 1 minute) to 725°F. (15 W.)

REPLACEABLE TIPS. Furnished with 3/32″ J tip

MODEL 115-15J .....Net **$8.95** ea.

NEW!

ORYX-50

TEMPERATURE-CONTROLLED SOLDERING IRON

Now you can use one soldering iron for a wide variety of soldering assignments — from delicate semiconductors to heavy lugs and terminals. A simple set-screw adjustment programs the iron to any operating temperature between 400 and 750°F. — while the iron is running! Built-in thermostatic control holds the temperature constant to ±4°F., regardless of speed of soldering or line voltage variations. The husky 50-watt element provides fast heating and almost instant recovery from heavy joint loads. A unique indicator light serves as a visual guide to the control system and as a safety feature by indicating clearly when the iron is left on. The handle remains cool at all times. A long-life iron-coated tip is furnished as standard. Furnished with U/L-approved cordset (2-wire or 3-wire) ready to plug in. For 115 volts AC.

MODEL 50 — (2-wire) .....Net **$16.95** ea.
MODEL 50-3 — (3-wire) .....Net **16.95 ea.**
MODEL S-50 — stand .....Net **5.95** ea.
MODEL SP-55 — extra sponge .....Net **.49** ea.

Iron-plated Tips .....Net **$2.25** ea.
(Specify size 1/16, 3/32, 1/8, or 3/16″. Also specify single flat or double flat.)
Nickel-plated Tips .....Net **.69** ea.
(Specify size 1/16, 3/32, 1/8, or 3/16″. Also specify single flat or double flat.)

Ungar / Princess® SOLDERING TOOLS, ACCESSORIES

6902 Handle

6910, 6915, 6918 Heat Capsules

Nib

6950, 6960

6951, 6961

6952, 6962

6953, 6963

Miniature soldering iron designed to meet requirements for precision micro-electronic circuitry and high density assembly. Offer thermo-efficiency and work capacity never before achieved in small feather-weight irons. Slim design, turquoise handle assures deft soldering. Choice of easy-to-assemble units thread together for versatility in tip shapes and temperature capabilities.

Low initial investment, economical maintenance and inexpensive parts replacement.

PRINCESS HANDLES

Slim, cool design is molded of heat-resistant nylon pastel turquoise color. Midget thread-in socket accepts any Princess heat capsule. Choice of 2-conductor and 3-conductor (NEMA) vinyl-covered cords. For 120 VAC/DC operation. Weight: .05 oz., less cord; 3.0 oz., with cord.

Ungar No.	Cord Type	Net Each, Lots of 1-9	10-49	50 Up
6902	2-conductor with plug	$4.09	$3.55	$3.15
6903	3-conductor with NEMA plug	5.45	4.75	4.19
6911	Cool-grip fits all Princess handles	1.05	.86	.79

HEAT CAPSULES

Threaded to accept the special thread-in Princess soldering nibs and mating to the Princess handles with finger-tip ease. Also accept "Standard Line" ⅛" tiplets if desired (will not accept Imperial tips). Choice of three wattages and temperature ranges to suit most production requirements. For 120 VAC/DC operation. Size, 2¾" long; extends 1½" from handle. Wt., 0.2 oz.

Ungar No.	Watts	Temperature Range	Net Each, Lots of 1-9	10-49	50 Up
6910	10	550° F to 650° F	$5.00	$4.35	$3.85

6963	Precis. point	.61	.095" x .010"	1.52	1.32	1.17

*Cadmium copper tips; all others, gold-plated iron-clad.

PRE-ASSEMBLED PRINCESS COMBINATIONS

MODEL 6975 SOLDERING IRON

All-in-one package provides a complete Princess soldering iron with three interchangeable copper nibs. Includes one 6902 handle with 2-conductor cord and plug, one 6910 Heat Capsule rated 10 watts, one 6950 pencil nib, one 6951 screwdriver nib and one 6952 spade nib.

Ungar No. 6975 Princess Assembly—Net Each, 1-9.....**$9.98**
Net Each, 10-49.....**$8.65** 50 Up..... **7.69**

MODEL 6900 SOLDERING STATION

Fully assembled iron with three interchangeable copper nibs, plus Princess holder with cleaning sponge. Includes: 6902 handle with 2-conductor cord and plug, 6910 heat capsule rated 10 watts, 6950 pencil nib, 6951 screwdriver nib, 6952 spade nib, and 6990 soldering iron holder complete with cleaning sponge.

Ungar No. 6900 Soldering Station—Net Each, 1-9.....**$13.69**
Net Each, 10-49.....**$11.89** 50 Up..... **10.49**

PRINCESS ISOLATED, LOW VOLTAGE SOLDERING SYSTEM

Complete soldering system includes transformer, handle, heat capsule, plus three tips. Isolation protects semiconductor components from damage on voltage pulse or current leakage. **Transformer:** Completely isolated 12-volt system provides maximum thermal recovery for production soldering. Case is grounded with 3-wire cord and NEMA plug. UL Listed. Input, 120 VAC, 60 Hz. Output, 1.3 amps, 10 VAC, 60 Hz. Bayonet 3-amp fuse and pilot light. **Soldering Pencil:** Heat resistant nylon handle with flexible vinyl cord and 4-pin connector. Heat capsule provides tip temperatures 400° F to 900° F with fast recovery since heating unit located in tip for maximum transfer: rated 18 watts at 12 VAC. **Tips:** "Standard Line" Ungar ⅛" tiplets and Princess soldering nibs may be used; cadmium copper or iron-clad.

Ungar Number	Description	Net Each, Lots of 1-3	4-11	12 Up
6970	Complete station with transformer, handle, heat capsule and 6961, 6950 and 6952 soldering nibs	$35.00	$29.95	$26.95
6971	Replacement, low voltage heat capsule only (12 V, 18 W)	5.85	5.09	4.49
6972	Low voltage transformer	22.50	19.50	17.29
6973	Replacement handle only (2-wire)	5.85	5.09	4.49

PRINCESS IC DE-SOLDER KIT

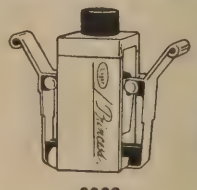
Ideally suited for PC boards 1/32" or less, using low-density circuitry, unplated eyelets or mounting holes. Includes 3-wire grounded Princess handle, 18-watt heat capsule and three (No. 6945, 6947, 6948) de-solder tips. (Not Illustrated.)

Ungar No. 6939 De-Solder Kit—Net Each, 1-3.....**$16.12**
Net Each, 4-11.....**$14.01** 12 Up..... **12.40**

DE-SOLDER TIPS

6940 6941 6944 6945 6947 6948

Iron-clad, nickel-plated and pre-tinned tips may be used with Ungar "Standard" line heating units No. 535, 1235 and 4035 or Princess heat capsules (for lower or higher tip temperatures).



Ungar No.	Tip Temp., at 18 W	Description	Net Each, Lots of 1-9	10-49	50 Up

Net Each, 50 Up.....**46c**

NEW PRINCESS HEAT GUN

Hot air tool offers a unique combination of features and benefits to users of heat shrinkable products as well as many other lab and industry uses. Its light weight of only 18 oz. insures firm, positive control wherever precise hot air direction is required. Reduces operator fatigue. Air stream width at nozzle is ⅜"; two baffle reflectors, ¾" and 1½" long, included for solder sleeves and shrink tubing applications. Reflectors are designed to decrease shrinking time by directing hot air flow around all tubing surfaces simultaneously. Delivers an air flow temperature at the nozzle of approximately 750° F to 800° F in seconds. Designed for either hand-held use, or may be placed on table or workbench without need for holder. With 2 switches: On-off switch at trigger position and a hot or cold air selector switch. Allows cooling or drying as well as heat applications. For solder sleeves and all polyvinyl, olefins, silicone rubber and TFE heat shrink materials; also ideal for shrink film packaging, epoxy curing, and encapsulation. UL Listed. Rated 250 watts, 120 VAC.

Ungar No. 6955 Princess Heat Gun—Net Each.....**$39.95**

Interchangeable cord sets, tips and heat cartridges ideal for critical micro-miniature components. Reliable, low wattage, high temperature performance. Perma-Cool handle has double cushion of air combined to 5 heat-transition surfaces for continuous cooling. Components individually packaged on cards; assemble to suit your needs. **Not interchangeable with "Standard Line".**

PERMA-COOL COLORED HANDLE

Cool, pastel turquoise handle has been proven to reduce operator fatigue. Virtually indestructable, handle is made of high strength plastic resin. Diecast heat sink built-in. Pencil type design for easy handling. UL Listed. Size, 0.8" O.D. at grip; 4.7" lg. Weight, 1 oz.
Ungar No. 6100-1—Handle only. Net Each, 1–9....**$1.87**; 10–99....**$1.51**; 100 Up....**$1.40**

INTERCHANGEABLE CORD SETS

Instantly adapts your iron to any 2 or 3 wire outlet. Molded female connector plugs onto the Perma-Cool handle without tools. Vinyl-covered cord, 18 gauge, 65 strands extra-flexible copper; terminals and connectors molded polyvinyl chloride. Center conductor (3-wire type) is insulated with green polyvinyl. Weight: 2½ oz., 2-wire; 4 oz., 3-wire. Supplied in turquoise color only.

Ungar No.	Description	Net Each, Lots of 1-9	10-99	100 Up

INTERCHANGEABLE LONG-LIFE HEAT CARTRIDGES

Stainless steel, sealed cartridge with element at tip and threaded end for quick tip changes; keeps heat at tip where it belongs. Six ratings available: **6200:** 40 watts for 750-950° F; accepts all tip Nos. 6304 through 6482. Size, 7½" l. x .363" dia. (2½" l. from flange). Wt., 1.1 oz. **6201:** Same, but 30 watts for 650–850° F. **6202:** Same, but 25 watts for 600–800° F. **6203:** 60 watts for heat range, 850° to 1150° F. Accepts all iron clad gold-plated tips plus No. 6526 beryllium oxide tip, 750°–800° F; 7⅛" long; Wt., 1.2 oz.

KIT NO. ZA-70 This useful snap driver kit consists of 6 Allen type hexagon blades plus handle and bag. Services screw numbers 4, 5, 6, 8, 10, ¼", 5/16", and ⅜". Size, 6½" x 7". Price...$5.19

KIT NO. RT-14 Handy 14-piece snap driver kit for radio and TV service men. Contains nut drivers, Phillips and regular drivers, heavy duty handle, and 5" blade extension which doubles the usefulness of each blade. Size, 10½" x 8". Price... $12.15

KIT NO. ZS-60 A most versatile and complete hexagon nut driver kit for radio, TV or any other work requiring speedy nut setting. All sockets are super hard. Size, 6½" x 7". Price.. $5.43

KIT NO. ZSX-61 Same as Vaco Kit No. ZS-60 except includes 5" blade extension. Price.. $6.39

KIT NO. ZC-80 Specially designed snap driver kit includes socket head (Robertson), Phillips, and regular blades; particularly suited for Canadian use. Size, 6½" x 7". Price...$5.65

KIT NO. ZF-40 Here is a special snap driver kit designed to take care of all popular sizes of fluted spline or Bristol type recess head screws used on electronic and electrical equipment, air conditioning, refrigeration, and office machines. Size, 6½", x 7". Price...$4.89

RATCHET DRIVERS QUALITY FASTENERS

VACO POW'RIVETS . . . the blind rivet for foolproof fastening every time

Step 1 Step 2 Step 3

THERE IS A DIFFERENCE! Only Vaco Pow'-Rivets adapt to hole size variance, and pull up snug regardless of material thickness. That's why 4 sizes do the job of 11 ordinary rivets. Three step illustration at left shows unique "bubble action" sequence which assures positive, goof-proof fastening every time.

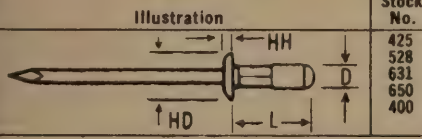

Illustration	Stock No.	Dia. "D"	Length "L"	Grip Range	Head Dia. "HD"	Head Ht. "HH"	Hole Size	Drill
	425	1/8	.400	To .250	.215	.044	.136	#29
	528	5/32	.470	To .280	.255	.057	.166	#19

PRICES

Prices in this MASTER should not be considered as final. They were submitted for publication before the government price freeze of August 14th, 1971, and may not reflect any possible roll-backs or increases which are effective when this MASTER is distributed. Inquire about latest prices and delivery.

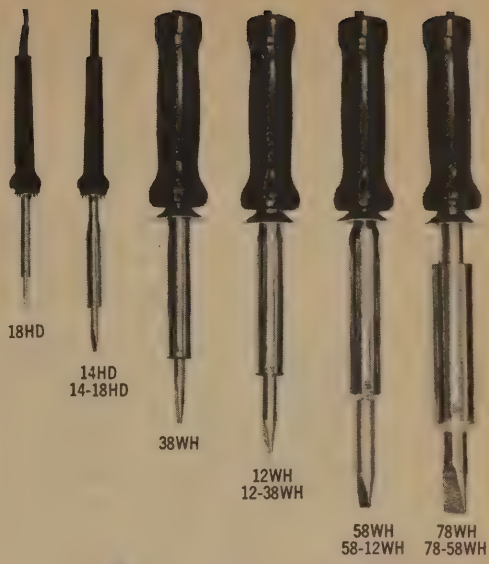
INVENTORY

While most distributors maintain a large and varied stock, they do not represent that they stock all manufacturers' products shown in this MASTER catalog.

ORDERING

It is important, when ordering, to mention specifically the edition and page number, also the catalog number of each item. This will avoid possible confusion and delay.

DISCOUNTS



Trade discounts apply in most cases where LIST PRICES are shown.

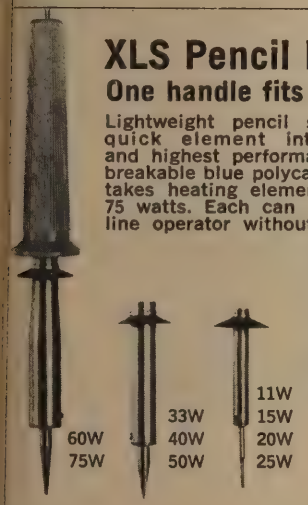
WALL BRAND SOLDERING PRODUCTS

SINCE 1864

MADE IN USA

HOT AIR GUNS AND TIPS

HD Type and WH Type Heavy-duty Irons



Wallbrand heavy-duty irons are engineered for highest efficiency performance. Rugged construction assures long-life for demanding production line needs. No radionic interference. Triple-life resistance wire wound on pure mica and constant tip temperature with extra fast recovery permits continuous heavy-duty use. 120 volts AC or DC. Other voltages available on request. Handles remain cool after long hours of operation. Tips are easily changed. Special irons customized to particular requirements.

Model	Watt Input	Tip Dia.	Length W/O Tip	Thermo/ Gram Value
18HD	25	1/8″	6⅝″	300
14HD	40	1/4″	7½″	900
38WH	80	3/8″	10¼″	1500

58-12WH	200	3/8″	12¼″	3500
78WH	300	7/8″	12⅜″	5400
78-58WH	300	5/8″	12⅜″	5400

XLS Pencil Iron

One handle fits 9 elements

Lightweight pencil series features quick element interchangeability and highest performance. Cool, unbreakable blue polycarbonate handle takes heating elements from 11 to 75 watts. Each can be changed by line operator without special tools. Available with either 2 or 3 wire cord. Uses regular or iron plated tips. Elements encased in long-life stainless steel jackets.

DH (DUO HEAT) Pencil

Pat. Pending

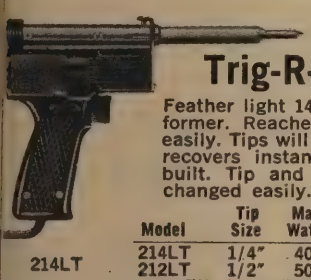
Developed for use in intermittent soldering operations

Revolutionary lightweight pencil operates continuously at low heat, but has higher heat available when needed. Constant low heat is adequate for light to medium jobs, get high heat instantly by pressing handle switch; tip and element life infinitely increased. Indestructible molded handle stays cool and comfortable. Wide variety of plug-in tips easily interchangeable.

Model	Continuous Low Heat	High Heat
DH-1	15W 520°F	47W 920°F
DH-2	20W 630°F	53W 975°F

IDL INSTANT DEPENDABLE LASTING IRON

Pat. Pending

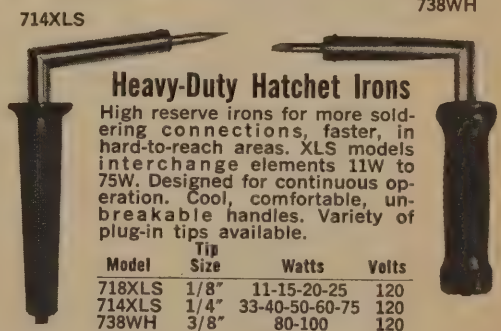


3 oz. pencil controlled by thermal time delay relay

Heats in seconds. No transformer. When handle button is depressed 180W element heats initially until soldering temperature is reached. Thermal time delay relay then cuts in 40W element automatically. Pencil cannot overheat. Interchangeable plug-in 1/8″ tips need no special tools to change. Unbreakable handle stays cool. Especially good for diversified light to medium jobs.

Trig-R-Heat Gun

Feather light 14 oz. gun has no transformer. Reaches hard-to-get at spots easily. Tips will not deform. Heats and recovers instantly. Rugged, precision built. Tip and element assemblies changed easily.



Model	Tip Size	Max. Watts	Min. Watts	AC/DC Volts	Weight W/O Cord
214LT	1/4″	400	150	120	14 oz.
212LT	1/2″	500	300	120	24 oz.
TIP AND ELEMENT ASSEMBLY					
214TE	1/4″	400	150	120	6 oz.
212TE	1/2″	500	300	120	16 oz.

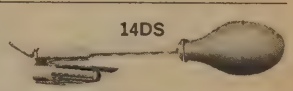
864 Commercial Duty Iron

Pencil iron has cool, molded plastic handle, balanced for comfort. Triple-life resistance wound. Copper tip maintains constant temperature.

Tip Size	Watts	Volts
3/16″	30	120
3/16″	40	120

Heavy-Duty Hatchet Irons

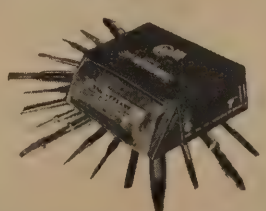
High reserve irons for more soldering connections, faster, in hard-to-reach areas. XLS models interchange elements 11W to 75W. Designed for continuous operation. Cool, comfortable, unbreakable handles. Variety of plug-in tips available.



Model	Tip Size	Watts	Volts
718XLS	1/8″	11-15-20-25	120
714XLS	1/4″	33-40-50-60-75	120
738WH	3/8″	80-100	120

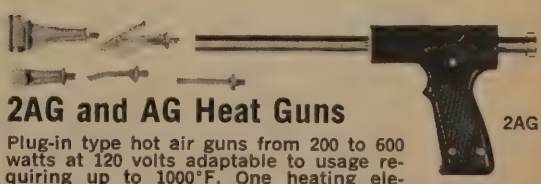
Soldering Pencil Holder

Can be mounted on top, in front or below bench. Adjusts to any angle. Bench model includes tip cleaning sponge and tray. SPH for up to 5/8″ shaft. Model SIH for up to 1″ shafts.



(SIH not shown)

Desoldering Tool



Keeps solder in molten state in reservoir. Operated with one hand. Tip replaceable with two openings — .080″ dia. and .064″ dia. Fits 614, 14HD, 714XLS and XLS 33W to 75W series.

Tips and Tip Dispenser

Tip sizes from 1/8″ through 7/8″ in wide variety of configurations for specific industrial and commercial needs. Three grades — **Anniversary type:** Super finished, iron and chrome plated. **Wallklad:** Iron coated and chrome plated. For production and critical lab use. **Wallbrand:** Commercial, copper, nickel plated. Wall's own iron plating facilities produce high quality long-life tips. 1/8″ through 3/8″ iron plated or copper tips available in handy tip dispenser. Tips individually sealed in color-coded continuous belting, plastic envelope.

2AG and AG Heat Guns

Plug-in type hot air guns from 200 to 600 watts at 120 volts adaptable to usage requiring up to 1000°F. One heating element fits both models. Pistol grip available with trigger (extra cost), opens air and heat at same time. Five tip styles interchangeable. Special tips on request. 3-wire cord assembly. Guns include neoprene air hose, hose fittings, pressure regulator and gauge. Send for Bulletin HG-1265.

WALL MANUFACTURING CO.

Industrial soldering irons and pencils are built to exceed Federal specification W-S-570. Wallbrand soldering products are UL and CSA listed.

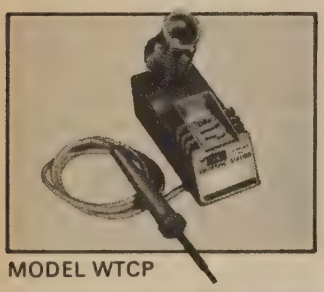
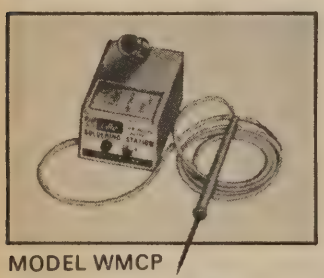
Weller industrial soldering tools

for greater efficiency . . . lower operating costs and maximum safety



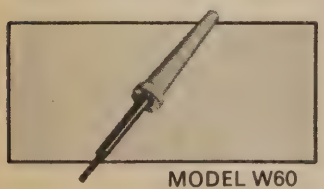
CONTROLLED OUTPUT SOLDERING TOOLS . . .

Automatically controls output and temperature independent of line voltage.



MODEL WTCPL

MODEL WTCPL. Controlled output low voltage soldering with power unit isolated for protection of sensitive devices.Temperatures of 500°F., 600°F. and 700°F. are predetermined by tip selection. Cord set will not burn. Stand will not heat sink. Built-in on/off switch and pilot light. 60W, 120V, 3 wire cord. Comes with 3/16", 700°F. screwdriver tip. New cool blue color. Also available without built-in on/off switch and pilot light as MODEL WTCP.

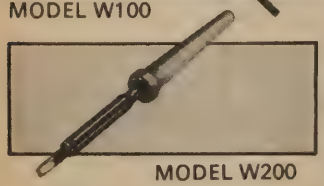


MODEL WTCP

MODEL WMCP. Weller's new miniature tool for micro-soldering, automatically controls output and temperature with power unit isolated and shielded for protection of sensitive devices. Has fixed temperature, interchangeable tips, low voltage operation, built-in on/off switch and pilot light. Available in 3 temperature ranges: 550°F.,. . . 650°F., and 750°F. control 20W, 120V, 50/400 Hz. 3 wire cord. Comes with 5/64" chisel tip. New cool blue color.

MODEL WMCP

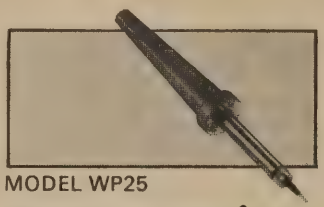
MODEL W60. Low cost, portable, line voltage operation. Automatic control of output and temperature 60W, 2 wire cord. Comes with 700°F., 1/4" screwdriver tip. Model W60-3, 3 wire cord set. New cool blue color. For complete station order PH60 stand.



MODEL W60

MODEL W100. Low cost, portable, line voltage operation. Automatic control of output and temperature. 100W, 2 wire cord. Comes with 700°F., 3/8" screwdriver tip. Model W100-3, 3 wire cord set. New cool blue color. For complete station order PH100 stand.

MODEL W100



MODEL W200. Low cost, portable, line voltage operation. Automatic control of output and temperature. 200W, 2 wire cord. Comes with 700°F., 1/2" chisel tip. Model W200-3, 3 wire cord set. New cool blue color.

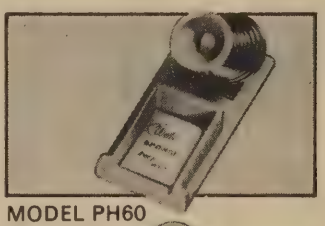
MODEL W200

UNCONTROLLED SOLDERING TOOLS . . .

For lowest cost soldering operations not requiring high efficiency tool.

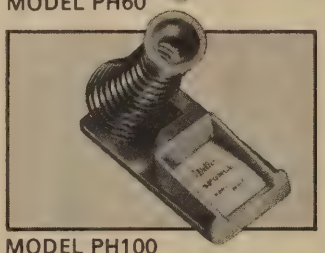
MODEL WP25

MODEL WP25. Uncontrolled line voltage soldering tool. All stainless steel construction, 25W, 120V, 2 wire cord, with 1/16" screwdriver tip. New cool blue color. Model WP25-3, 3 wire cord set.



MODEL WP40

MODEL WP40. Uncontrolled line voltage soldering tool. All stainless steel construction. 40W. 120V, 2 wire cord, with 1/8" screwdriver tip. New cool blue color. Model WP40-3, 3 wire cord set.



SOLDERING TOOLS STANDS . . .

Have heavy cast iron bases and built-in sponge holders. Design precludes any possible heat sinking of Weller controlled tools. New cool blue color.

MODEL PH60

MODEL PH60. Accommodates Weller Models WP25, WP40, W60, and any soldering tool with a barrel diameter up to 15/32".

MODEL PH100

MODEL PH100. Accommodates Weller Model W100 and any soldering tool with a barrel diameter up to 19/32"

TIPS AND ACCESSORIES

All Weller Industrial Soldering Tips have unique heavy iron plating with anti-oxidation coating thereby eliminating freezing . . . No other tip offers these features!

A complete line of Weller Accessories is available to greatly extend the effectiveness of Weller Soldering Tools.

FOR COMPLETE INFORMATION, WRITE OR CALL FOR WELLER'S LATEST INDUSTRIAL SOLDERING TOOLS CATALOG.

All Weller products are available in Canada.

Weller professional-quality tools and accessories.

8 piece kit for homecrafters

Includes Weller 100/140 watt dual heat Homecrafter soldering gun, three soldering tips, tip-changing wrench, soldering aid, flux brush and solder—all in a rugged plastic utility case.

Model 8200PK

6 piece Heavy-duty kit

Features a Weller 240/325 watt heavy-duty gun; tips for soldering, cutting and smoothing; tip wrench; solder; rugged plastic case.

Model D-550PK

New Weller Automatic Glue Gun Kit

New automatic electric glue and caulk gun features rapid heat up, indicator and work light, automatic glue feed, drip proof with automatic flow control valve.
150W., 120V., 2 wire cord. Kit includes:

Model 2400 Automatic Glue Gun
7 Weller Glue Sticks — Reversible Storage Tray
7 Weller Caulk Sticks — Carrying Case
Portable Bench Stand — Instruction Booklet
Complete Kit, Model 2400K

Weller Dual Heat Soldering Guns

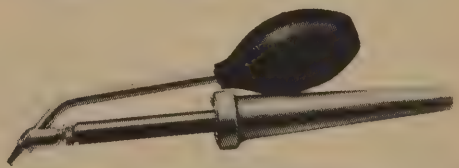
The original and still unmatched. Weller guns reach full soldering temperature up to 40% faster than other soldering guns. Deliver more heat per rated watt and up to 28% greater soldering efficiency. Exclusive two-position trigger permits instant switching to high or low heat. Long-life tip provides maximum heat transfer. Pre-focused spotlight goes on when trigger is pulled.

100/140 watts. Homecrafter Model 8200.
145/210 watts. Medium Duty Model D-440.
240/325 watts. Heavy Duty Model D-550.

Marksman Soldering Irons

Weller's fast-selling economy line. Outperforms bigger irons that cost more. There are 5 models, from a small pencil iron for light duty soldering to an extra heavy duty iron for metal mending. Each model has stainless steel barrel and replaceable tip.

Value Leading Kit includes 25-watt iron, 3 soldering tips, soldering aid, solder. Model SP-23K.



25-Watt Iron 1¾-oz. ⅛" tip. Model SP-23.
40-Watt Iron 2-oz. ¼" tip. Model SP-40.
80-Watt Iron 4-oz. ⅜" tip. Model SP-80.
120-Watt Iron 10-oz. ½" tip. Model SP-120.
175-Watt Iron 1-lb. ⅝" tip. Model SP-175.

New Professional Irons

Industrial-rated pencil types. Weigh only 1¾ ounces. Do work of bigger irons. Long life, double coated tips. 120 volts.

Model WP25 (25 watts)
Model WP40 (40 watts)

New Professional Vacuum Desoldering/Resoldering Tool

Invaluable repair tool. A must for servicing modern printed circuit boards and solid state electronics. Remove and replace components quickly, with less chance of heat damage.

Complete tool includes power handle, vacuum bulb and desoldering head assembly with .063 tip opening. 40W. 120V. 2 wire cord. Model DS40.

Replacement Tips For DS40 Desoldering Tool

TLN11 — Complete set of Tee Handle Allens in a roll-up case. **List $16.50**

SCREWDRIVER ASSORTMENTS

Selected popular sizes in compact plastic cases.

No. SDR11 — **List $7.10**
Contains R182, R5324, R3166, R144, R5166 round blade screwdrivers.

No. SDX-22 — **List $8.10**
Contains X100, X101, X102, X103, SX102 Phillips screwdrivers.

No. SRX33 — **List $9.20**
Contains R184, R3166, R144, R5166 round blade and X101, X102 Phillips screwdrivers.

No. SDS44 — **List $9.70**
Contains S141, S3164, S144, S5166, S388 square blade screwdrivers.

No. SD-3 — **List $2.10**
Contains 1 each R181, R3322 and P12S on a card.

COMBINATION-REVERSIBLE BLADE SCREWDRIVERS AND KITS

AISI 6150 chrome vanadium steel blades, plastic (UL) handles.
Patented spring holds blades securely. 7/16" hex opening doubles as a nutdriver.

XCELITE® QUALITY PROFESSIONAL TOOLS

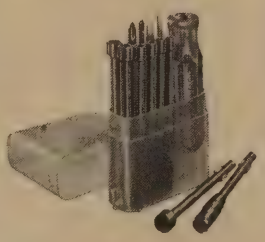
COMPACT SETS

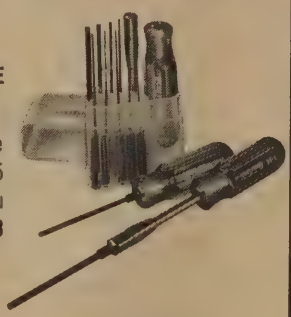
Series "99" Sets



Each set contains a Series "99" regular handle and various Series "99" interchangeable blades and extension. See-thru plastic case is pocket size, has flat base that permits its use as a bench stand.

No. 99PS-40 ALLEN HEX TYPE SCREWDRIVER SET

Includes nine Allen Hex type screwdriver blades (99-20 thru 99-26), 99-X5 extension blade, 99-1 handle, and see-thru case.



List $12.38

No. 99-PS50 NUTDRIVER/SCREWDRIVER SET

Includes seven regular nutdriver blades (99-6 thru 99-12), two slot tip screwdriver blades (99-811 and 99-250), two Phillips screwdriver blades (99-821 and 99-822), 99-X5 extension blade, 99-1 handle, and see-thru case.

List $15.25

No. 99PS-60 BRISTOL MULTIPLE-SPLINE TYPE SCREWDRIVER SET

Includes nine Bristol Multiple-Spline type screwdriver blades (99-61 thru 99-69), 99-X5 extension blade, 99-1 handle, and see-thru case.

List $12.38

PLASTIC VIEW KITS

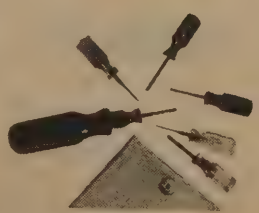
No. 99SL **List $6.50**

Contains four Scrulox® screwdriver blades for square recess screws (99 SL 0, 1, 2, 3), 1 slotted blade (99-250), 99-1 handle (Regular).

No. 99PV4 **List $4.60**

Contains three slotted screwdriver blades (99-811, 99-250, 99-312), 99-1 handle (Regular).

No. 99PV6 **List $6.40**



Contains three slotted screwdriver blades (99-811, 99-250, 99-312), two Phillips screwdriver blades (99-821, 99-822), 99-1 handle (Regular).

MINI SCREWDRIVER SETS

No. M-50 MINI SCREWDRIVER SET List $2.50

Contains 5 slotted screwdrivers (.040", .055", .070", .080", .100").

No. M-60 MINI SCREWDRIVER SET List $3.50

Contains 1 Phillips screwdriver (#00), 5 slotted screwdrivers (.040", .055", .070", .080", .100"), torque handle and case

COMPACT CONVERTIBLE NUTDRIVER AND SCREWDRIVER SETS

Black plastic torque amplifier handle (1" x 3⅛") slips over handles of pocket size (3½") nutdrivers and screwdrivers . . . provides larger grip, extends reach and increases driving power to that of standard size tools. See-thru plastic case fits pocket, stands upright on bench.

No. PS7 NUTDRIVER/SCREWDRIVER SET

Contains two nutdrivers (¼" and 5/16"), two slot tip screwdrivers (3/16" and 3/32"), two Phillips screwdrivers (#0 and #1), "Torque" handle and case. **List $7.13**

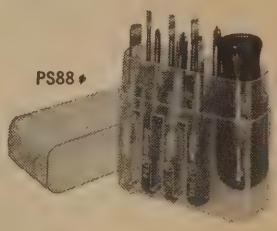
No. PS-130 SCREWDRIVER/ NUTDRIVER SET

Contains 2 Phillips screwdrivers (#1 and #2), 3 slotted screwdrivers (⅛", 3/16" and ¼"), 5 nutdrivers (3/16", ¼", 5/16", 11/32" & ⅜"), torque handle and case. (3/32", ⅛", 5/32"), torque handle and case.

List $9.75

No. PS-140 NUTDRIVER/SCREWDRIVER SET **List $9.50**

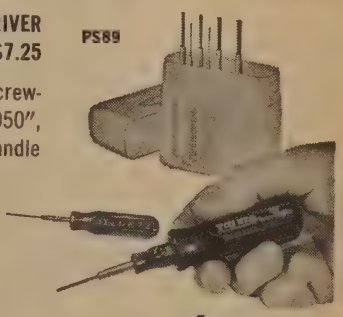
Contains 3 Phillips Screwdrivers (#0, #1, #2) 4 slotted screwdrivers 3/32", ⅛", 3/16" and ¼"), 3 nutdrivers (¼", 5/16", ⅜"), torque handle and case.



COMPACT CONVERTIBLE SCREWDRIVER SETS

No. PS-6 SCREWDRIVER COMPACT SET **List $5.75**

Contains 3 Phillips screwdrivers (#00, #0, #1) 3 slotted screwdrivers (3/32", ⅛", 5/32") torque handle and case.



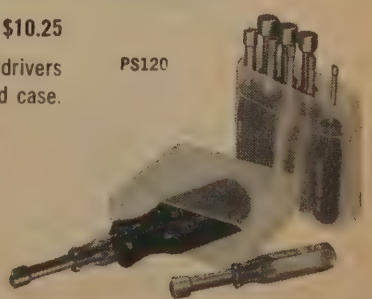
No. PS88 SCREWDRIVER SET List $7.45

Contains five slot tip screwdrivers (3/32", ⅛", 5/32", 3/16", ¼"), three Phillips screwdrivers (#0, #1, #2), torque handle and case.

No. PS89 ALLEN HEX TYPE SCREWDRIVER SET **List $7.25**

Contains eight Allen hex type screwdrivers (hex sizes .028", .035", .050", 1/16", 5/64", 3/32", 7/64", ⅛"), torque handle and case.

No. PS44 SCRULOX "SQUARE RECESS" SCREWDRIVER SET **List $7.25**

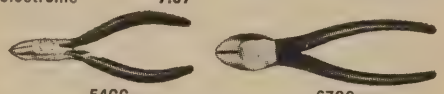


Includes 4 Scrulox screwdrivers, 1 slotted screwdriver (3/16"), one nutdriver (¼"), torque handle and case.

COMPACT CONVERTIBLE NUTDRIVER SET

No. PS120 NUTDRIVER SET List $10.25

Contains ten color coded nutdrivers (3/32" thru ⅜"), torque handle and case.



XCELITE® QUALITY PROFESSIONAL TOOLS

PLIERS

Xcelite pliers and cutters are of forged alloy steel construction, precision machined and scientifically proportioned. Clean-milled and perfectly aligned jaws grip tightly and surely. All models have permanent, plastic-coated "Cushion Grip" handles.

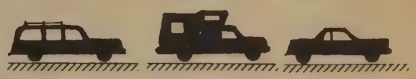
No. 3-17MM — **List $34.25**

18-piece complete Metric Nutdriver Set containing all of above, packaged in cardboard carton.

No. 4-13MM — **List $17.45**

10-piece set of popular size Metric Nutdrivers: 4MM thru 8MM, 10MM, 11MM, 13MM, packaged in cardboard carton.



No. 99PS-41MM METRIC ALLEN HEX TYPE SCREWDRIVER SET — **List $12.38**

Includes seven metric Allen Hex type blades (99-71 thru 99-77 in mm sizes 1.27, 1.5, 2, 2.5, 3, 4, 5), 99-X5 extension blade, 99-1 handle and see-thru case.

No. 99PS-51MM METRIC NUTDRIVER SET — **List $14.90**

Includes ten metric nutdriver blades (99-4 thru 99-11 in mm sizes 4, 4.5, 5, 5.5, 6, 7, 8, 9, 10, 11) 99-X5 extension blade, 99-1 handle, and see-thru case.

R/V SERVICE TOOLS

No. PS-TR-1 — **List $9.80**

Compact convertible set contains 2 drivers for Scrulox® square recess head screws, 5/32" clutch head screwdriver, 1/4" hex head driver, No. 1 and No. 2 Phillips drivers and two popular sizes of slotted drivers, and torque handle.

No. 99-TR-5 — **List $6.50**

Maintenance kit contains patented handle and three interchangeable tools, 1/4" hex socket driver, double end No. 1 and No. 2 Scrulox blade and double end 5/32" and 3/16" clutch head screwdriver blade in plastic kit.

No. 99-TR-6 — **$14.25**

Contains unique new reversible ratcheting handle complete with basic maintenance tools, 1/4" hex socket driver, No. 2 Scrulox® blade, 5/32" clutch blade plus No. 2 Phillips and 1/4" slotted blade, all in plastic case.

No. 99-TR-7 — **List $9.75**

Complete maintenance kit includes handle and 6 interchangeable tools, 1/4 hex socket driver, double end Scrulox and clutch driver blades, Phillips blade, slotted blade and handy awl/scriber in plastic case.

No. TR-4—MAINTENANCE TOOL KIT — **List $6.85**

Contains 1/4" hex socket driver, 5/32" clutch head screwdriver, No. 1 and No. 2 Scrulox drivers in clear front plastic kit.

AUTOMOTIVE SERVICE TOOLS

No. 110 DISTRIBUTOR TOOL — **List $1.75**

A 2-in-1 tool for adjustment and replacement of Delco Remy distributor points.

No. 112 CARBURETOR AND BISTRIBUTOR TOOL — **List $5.15**

Flexible shaft 2-way tool with hooded screwdriver bit for carburetor idle adjustment and Allen hex type bit for adjusting distributors.

No. TC-100 ATTACHE STYLE TOOL CASE
Without Tools — List $74.82

Sturdy, spacious tool case available with selection of tools or empty for field service work. Unique design provides space for 60 individual screwdrivers, nutdrivers, pliers and wrenches plus pockets for service manuals and ample room in the case bottom for additional tools, parts and test equipment. Case only.

Stancor transformers

LARGER QUANTITY REQUIREMENTS

Need transformers in a hurry for that rush job — (what other kind is there)? The probability is that STANCOR has the type you need — in stock and available for Immediate Delivery through Your Distributor. Here is the best, fastest and most economical way to solve your problem:

- Make your selections from this catalog. Chances are you will find just the ratings you need.
- Order samples from your STANCOR distributor. He has them in stock or, if momentarily out, can get them for you quickly from one of our six conveniently located warehouses.
- Try the samples in your prototype.
- If satisfactory in all respects, your STANCOR distributor can get production quantities, bulk-packed, from STANCOR's inventory At OEM Prices.
- Quantities of 100 to 499 will be quoted and invoiced by your STANCOR distributor but with drop-shipment to you from STANCOR. One shipment (no scheduling).
- Prices are f.o.b. Chicago **under $500** and f.o.b. Destination **over $500.**
- Requirements of 500 pieces or more per item will be quoted by your STANCOR distributor but shipped and invoiced by STANCOR. Therefore your purchase order should be issued in the STANCOR name, care of your STANCOR distributor who will relay it to us. This seemingly devious routing has been carefully planned to result in the fastest delivery and lowest cost to you.
- Quantities of 500-999 — one shipment.
- Quantities of 1000 and over per type may be released in up to four increments of 25% each over a maximum of one year. Each release **prepaid if over $500,** otherwise **f.o.b. Chicago.**
- Orders for standard catalog items with modifications (as shown below) will be accepted in minimum quantities of 500 pieces for shipment at one time to one destination. The modifications are:

A. Variation of lead length of standard lead wire.

B. Omission of end bells and/or magnetic shielding — or addition of same if practical.

C. Variation of standard bracket locations; that is, horizontal versus vertical mounting.

D. Nonhermetic-sealed enclosure within standard catalog parts structure. (Omission of/or added to open transformers, where practical.)

E. Where customer part numbers and/or special marking are required or special gray painting is involved.

F. Center tap secondary converted to four isolated leads or terminals.

G. Omission of one or more taps in multi-tap winding. Additional taps cannot be added.

- TERMS ARE NET 30 DAYS.

If you don't find exactly what you need in the STANCOR catalog, send your specifications to STANCOR, Chicago for quotation — or contact your local STANCOR representative for assistance. See the listing inside back cover.

NEED TV REPLACEMENT TRANSFORMERS
(Yokes — Flybacks — Vertical Outputs — etc.)?

STANCOR is the largest independent supplier of TV replacement transformers in America. More TV service technicians rely on STANCOR replacement components than any other brand. See your local STANCOR distributor or write to STANCOR-Chicago (complete address elsewhere in this catalog) for a complimentary copy of the latest TV replacement guide and catalog.

ESSEX Stancor transformers | STANCOR

AUDIO TRANSFORMERS TECHNICAL NOTES

Audio Transformers operate on the same electro-magnetic induction principle as Power Transformers but generally over a fairly broad range of frequencies; instead of at a single power frequency, such as 60 Hertz. In common applications they may carry D.C. in one or more windings, transform Voltage and Current levels, act as an Impedance matching and coupling device or as a form of filter; passing only a limited range of frequencies (voice communication). Usually they perform more than just one of these functions simultaneously in a specific type of usage.

In some applications the frequency response, amount of magnetic shielding, maximum operating level, percentage of waveform distortion and insertion loss of the transformer are important.

The most commonly required electrical information pertaining to Audio Transformers is listed in this catalog wherever it applies, along with the physical mounting style, weight and dimensions. Information not shown is often available upon request if it pertains to the normal intended type of usage for a specific item.

The Impedance values listed for each Audio Transformer are the Reflected Impedance (Primary) for the rated value of Load Impedance (Secondary), into which the transformer is designed to operate. The Impedance Ratio between Primary and Secondary is fixed; since it is equal to the square of the turns ratio, which remains the same for different operating conditions. Turns Ratios listed are for Total Primary to Secondary, with the exception of the Driver Transformers for use with tubes. These are listed for Primary to ½ Secondary operation and are typically used in Class "B" Amplifier applications.

Accuracy of turns ratios are maintained within plus or minus 3 percent. Center taps are accurate within plus or minus 1 percent. Values of Primary D.C. listed are maximum and in the case of push-pull operation with a center-tapped winding, are the maximum amount for each half of the winding, unless otherwise indicated.

HANDY METHOD FOR APPROXIMATING THE PRIMARY TO SECONDARY RATIO REQUIRED OF A DRIVER TRANSFORMER IN CLASS B OR AB_2 SERVICE

Transformer ratio, primary: ½ secondary $= \dfrac{\sqrt{PZ_L}}{0.35E_s}$.

Where: P = Driving power in watts required for tubes to be driven.

Z_L = Plate load impedance of driver tube(s) selected.

E_s = Peak grid-to-grid signal voltage required for tubes to be driven.

Factor values for this formula are data commonly found in tube manuals. Select driver tubes capable under typical operation of delivering 1.5 times the grid driving power requirements of the stage to be driven. Pentode or tetrode drivers should be operated with inverse feedback.

TURNS/IMPEDANCE RATIOS

Turns Ratio "NR" may be expressed as the ratio of turns between the Primary and Secondary windings. It is also the Voltage Ratio between them and may be expressed as:

$$NR = \frac{N\ sec.}{N\ pri.} = \frac{E\ sec.}{E\ pri.}.$$

Since the Impedance Ratio is equal to the square of the Turns Ratio:

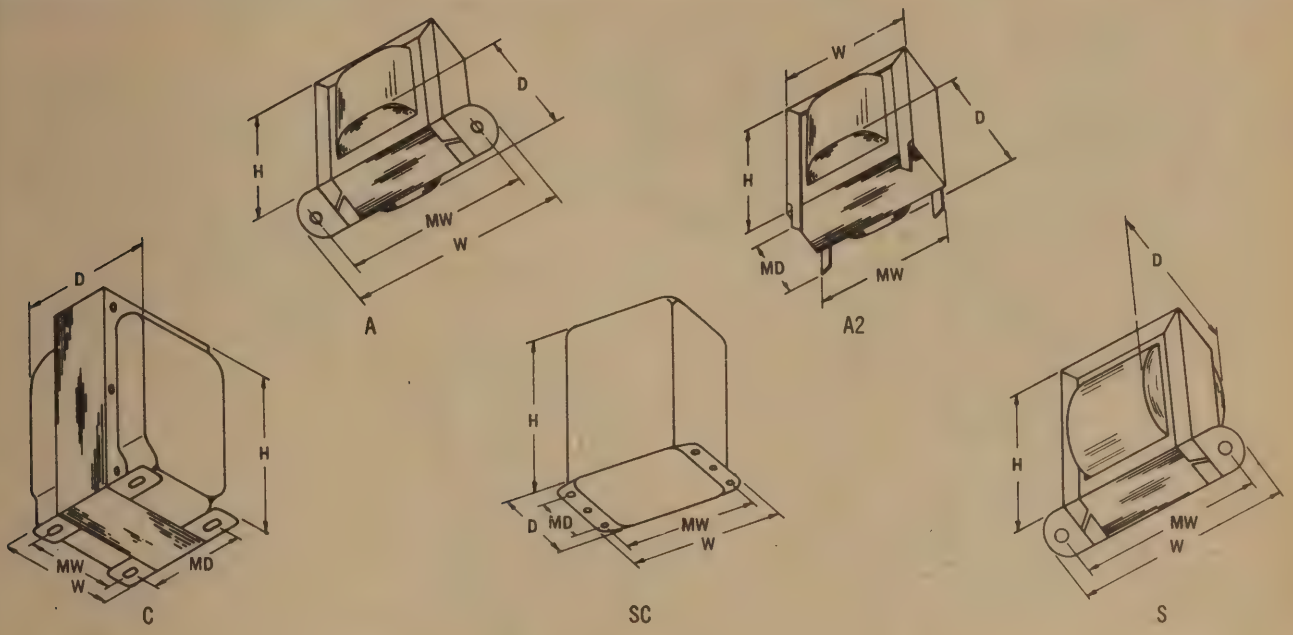
$$(NR)^2 = ZR \text{ or } NR = \sqrt{\frac{Z\ sec.}{Z\ pri.}}.$$

Where: N sec. = Number of Secondary Turns.
N pri. = Number of Primary Turns.
E sec. = Secondary Voltage.
E pri. = Primary Voltage.
NR = Turns Ratio between windings.
Z = Impedance in Ohms.
ZR = Impedance Ratio between windings.

INSERTION LOSS

Insertion loss is expressed in Decibels (db) as a measure of efficiency, thusly:

$$\text{Insertion loss in db} = 10 \log \frac{P\ input}{P\ output}.$$



Where P = power (in Watts).

If it is measured at mid-band Frequency it is a simple expression of the transformer efficiency. At other frequencies it includes the Frequency Response characteristics of the transformer for specific conditions.

OUTPUT TRANSFORMERS

TECHNICAL DATA FOR CONSTANT VOLTAGE TYPES

The Constant Voltage Line Sound Distribution Systems have become the most widely accepted systems in use today. They offer the Sound Engineer an easy means of establishing the volume level of each speaker in a system without the use of potentiometers or similar devices. The proven simplicity and versatility of these systems minimize the problem of speaker impedance mismatching thereby insuring high quality sound reproduction and minimum power losses. The use of higher power driving the constant voltage lines also helps to lower power losses over longer distances.

Most of the newer P. A. amplifiers have a designated 25 volt, 70.7 volt or 140 volt outlet on the output transformer, but almost any older amplifier has an impedance tap which may be used for the desired voltage output.

To insure a steady maintenance of the desired line voltage, it is recommended that the amplifier should be capable of producing 1½ times the total power of the various speakers connected. Hence, if the sum of the speakers equals 25 watts, the driving amplifier should be capable of producing 37½ watts. The power and impedance figures shown here with the formulas are based on the total power actually supplied to the speakers and not on the maximum capability of the amplifier.

The following table lists various amplifier power ouputs with the corresponding impedance tap on the output transformer which will supply these three basic line voltages:

Power Output	Impedance For 140 Volt Line	Impedance For 70.7 Volt Line	Impedance For 25 Volt Line
5	4,000	1,000	125
10	2,000	500	62.5
15	3,333	333	41.7
20	1,000	250	31.2
25	800	200	25
30	666	166	21
40	500	125	15.6
50	400	100	12.5
60	333	83	10.5
80	250	62.5	7.8
100	200	50	6.3

For power ratings not shown in this table, use the following formul:

Z = E²/W
Z = Ohms
E = Volts
W = Watts Output

Impedance Tap for: 140 volt line = 20,000/W
70.7 volt line = 5,000/W
25 volt line = 625/W

To establish the volume level of the various speakers in the system it is necessary to know the power output of the amplifier and th power desired at each speaker. To choose the correct line transformers match the power to be delivered to each speaker with the power ta on the line transformer. Then connect the primaries of the line transformers in parallel to the proper voltage tap on the output transforme of the amplifier. When the sum of the power ratings shown on each line transformer is equal to the power rating of the amplifier, an the speakers are connected to the appropriate secondary taps, th system is correctly matched.

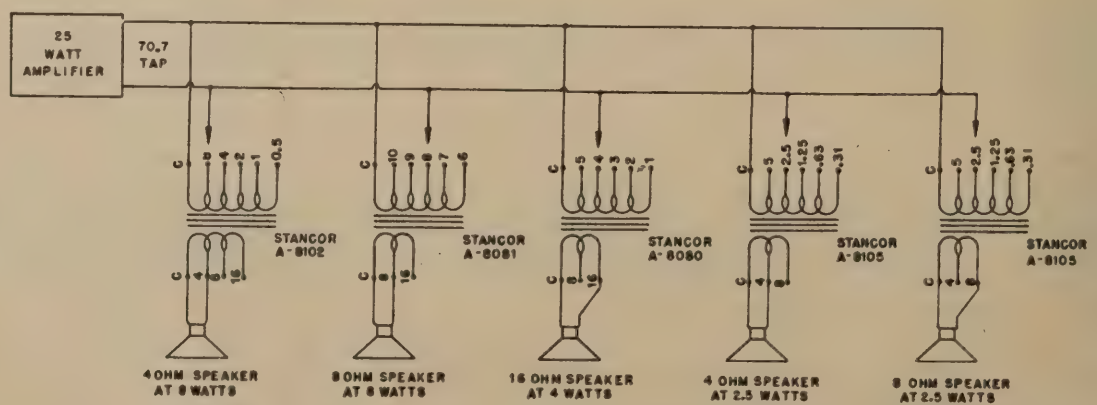
To determine the proper tap on the primary of the line transforme for a given wattage input to the speaker, use the formula:

Z = E²/W

EXAMPLE: In a 70.7 volt system assume that the speaker requires 5 watts What is the impedance of the tap required to produce this wattage?

Z = E²/W = 70.7 x 70.7/5 = 5,000/5 = 1,000 ohms

To determine the wattage input to the speaker when the tap is already connected, use the formula:

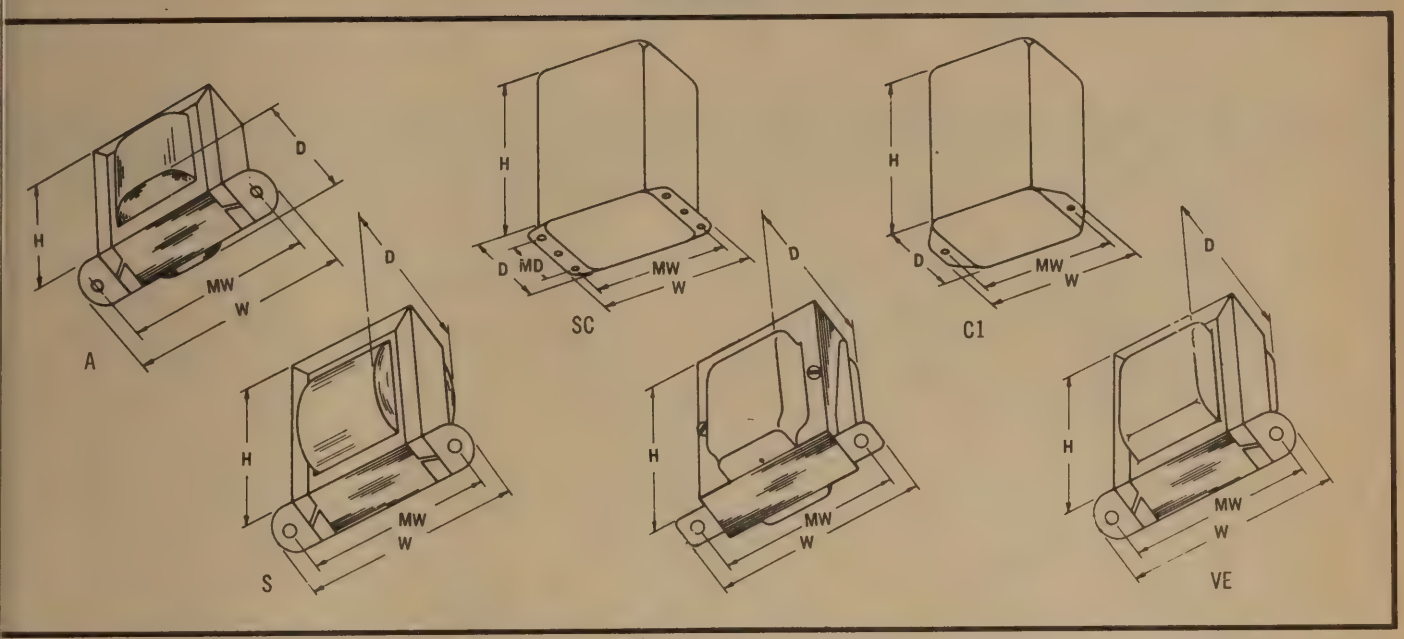


W = E²/Z

EXAMPLE: In a 70.7 volt system, assume a speaker connected to the 500 Ohm tap of the primary of the line transformer. What wattage is produced by the use of this tap?

W = E²/Z = 70.7 x 70.7/500 = 5,000/500 = 10 Watts

REMEMBER: Each speaker must have its own line-matching transformer and all of the line-matching transformers are connected in parallel to the proper voltage tap on the output transformer of the amplifier.



A TYPICAL 70.7 VOLT LINE DISTRIBUTION SYSTEM SHOWING THE PROPER STANCOR UNIT

ESSEX Stancor transformers | STANCOR

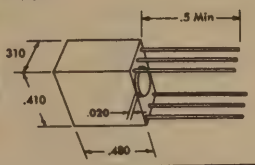
MINIATURE TRANSISTOR TRANSFORMERS

FOR PC BOARD APPLICATIONS

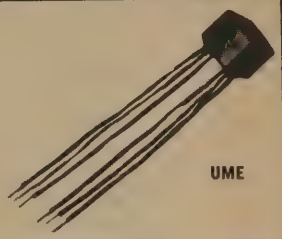
COLOR CODING by application to assure immediate and positive transformer identification.

RECTANGULAR SHAPE allows the utmost utilization of space and stacking in limited area.

PROTECTIVE STAND-OFF prevents solder flow-back and maximum lead exit protection.



SPACED LEADS of fatigue resistant gold plated nickel-iron alloy are .020" in diameter, ¾" long and have multiples of 0.1" grid spacing for printed circuit application.



Magnetic Shielding Available*

ESSEX Stancor transformers | STANCOR

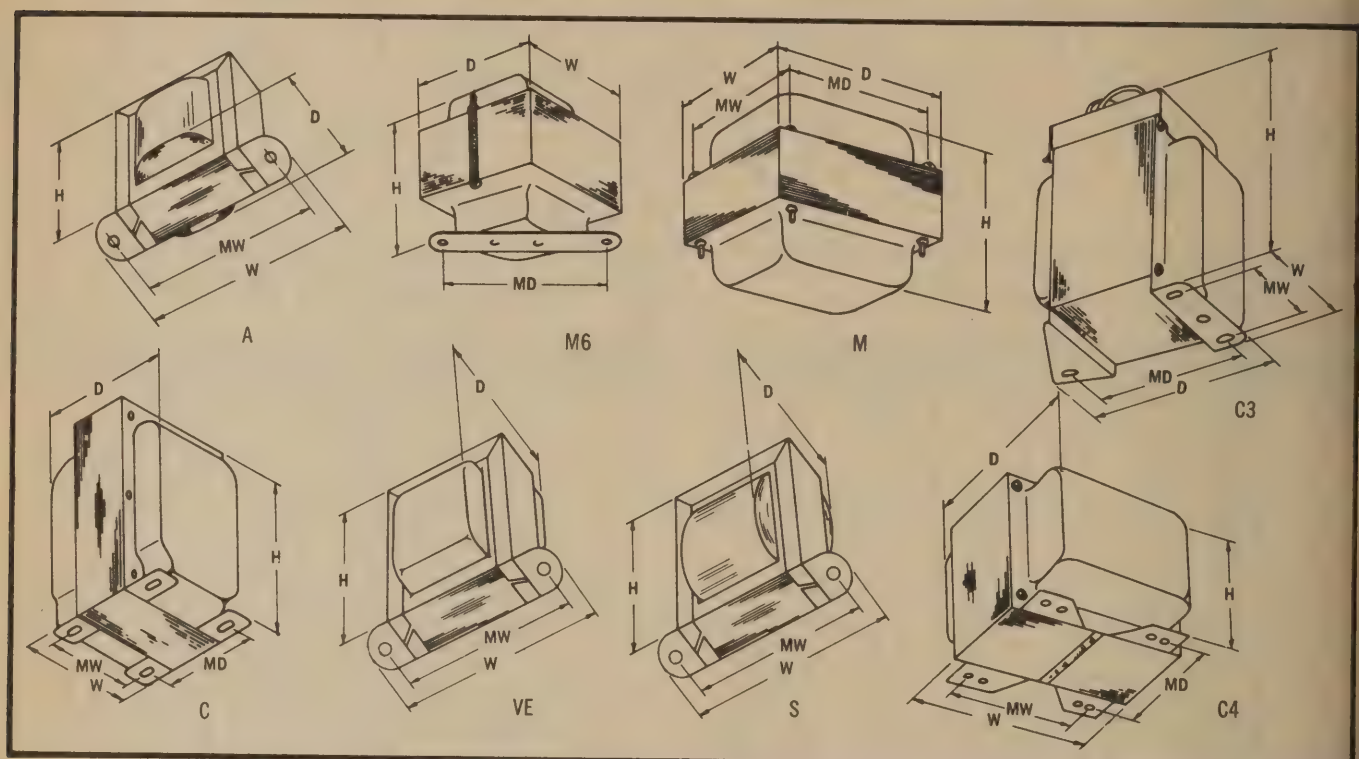
POWER TRANSFORMERS
PLATE AND FILAMENT TYPE



Stancor's broad line of commercial grade power transformers offers a choice of standard mounting styles. Listings are in ascending order of plate-supply voltage for ease of selection.

All units are designed and built to meet the exacting requirements of EIA for electrical tolerances, dielectric strength, temperature rise and construction. All are insulated with class A materials; (105°C max. operating temperature).

Transformers designed for full-wave C.T. rectification with capacitor input filte may be used with choke input filter allowing an increase in D.C. current of 30%

Transformers designed for full-wave C.T. rectification with choke input filter ma be used with capacitor input filter requiring a decrease in D.C. current of 25%

CONSULT FACTORY for detailed information concerning electrical rating and/o mechanical characteristics.

ESSEX Stancor transformers | STANCOR

POWER TRANSFORMERS
PLATE AND FILAMENT TYPE

SELECTING THE CORRECT POWER TRANSFORMER FOR CAPACITOR INPUT SYSTEMS

STEP 1. Check rectifier tube and all other tube filament voltage and current requirements.

STEP 2. Add together total current drawn by:
- A. Plates and screen grids
- B. Resistor networks

Select a power transformer which will supply maximum required D.C. voltage at total current before filter.

STEP 3. Check type of rectifier circuit and load to obtain required secondary A.C. voltage from transformer.

EXAMPLE: Power transformer for typical 10 watt audio amplifier.

Quality of Tubes	Type No. of Tubes	Filament Voltage	Filament Current
1	5Y3-GT	5.0 V	2.0A
1	12AX7	6.3 V	0.3 A
2	12AU7	6.3 V	0.3 A (each)
2	6AQ5	6.3 V	0.45 A (each)

Total filament and heater requirements are: 5.0 V 2.0 A
6.3 V @ 1.8 A

Maximum D.C. voltage after filter: 285 volts.
At input capacitor of filter it will be approximately 325 volts D.C.

Current ratings for various amplifier stages (approximate):

12AX7	RC Coupled	2 ma. (total both sections)
12AU7	RC Coupled	10 ma. (total both sections)
6AQ5	(thru output transformer)	74 ma.*
		86 ma.

Tube characteristic data for the 5Y3-GT rectifier tube with capacitor input filter indicates an A.C. voltage requirement of approximately 335 volts R.M.S. per plate.

Selection based on total requirements: PC-8410 or PM-8410 depending on physical mounting style used.

* Includes screen grid current for each tube in the output stage.

FOR REACTOR INPUT SYSTEMS: PRIMARIES 117 VOLTS 50/60 Hz.

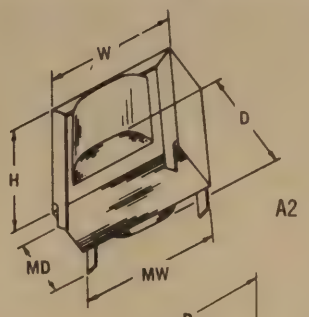
The Stancor line of "Smoothing" and "Swinging" types of Filter Chokes has been designed for use with the various Power and Plate Transformers listed in this catalog. The range of electrical ratings available covers requirements for practically all of the Filter Chokes used in Home Radio and Television Receivers, Audio Amplifiers and low power Radio Transmitters. In addition, a myriad of other electronic apparatus applications for these items exists.



Inductance values shown are measured at the full amount of D.C. listed and at the specified values of RMS Voltage and Frequency. All of these items are made with Class "A" insulating materials and will withstand operation up to a limit of 105°C., continuously.

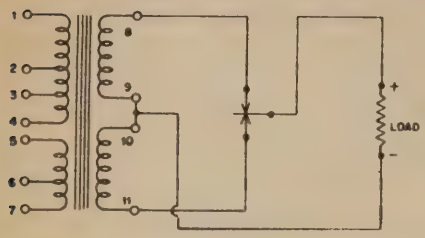
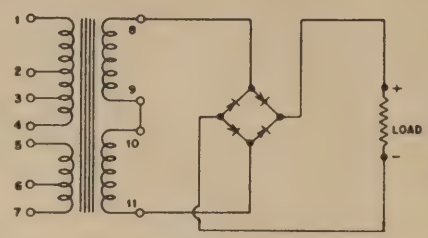
* Insulation Test Voltage: Twice Allowable RMS Working Voltage plus 1000 Volts. • New Part Number.

The above listed "HIGH CURRENT CHOKES" are normally used in low voltage, high current D.C. power supply filter applications, where low voltage drop across the filter and good voltage regulation is required, without any type of voltage regulator.



The "MINIATURIZED HIGH CURRENT CHOKES" are primarily for use with the "Miniaturized Control / Rectifier Transformers" listed elsewhere in this catalog. When used in small D.C. power supplies with these transformers, a combination of small physical size and adequate voltage regulation for many applications is possible, without a solid state voltage regulator.



These chokes are made with Class "A" insulating materials and may be operated up to a maximum limit of 105°C., continuously.

* MFD Filter Capacitor: 1-1000, 2-5000, 3-2000, 4-4000, 5-6000, 6-3000, 7-7500, 8-12000, 9-1500, 10-600, 11-2500. • New Part Number

Each transformer has the winding arrangement and terminal numbering shown in the schematic diagrams above. The primary winding is connected to terminals 1, 2, 3 & 4. A separate winding is connected to terminals 5, 6 & 7 that may be used in series with the primary to raise or lower the secondary voltage output. A variety of combinations is possible using the taps on both windings, plus the "Aiding" or "Bucking" action of the extra winding.

Designed for 117 V. 50/60 cycle operation; may also be satisfactorily operated at 400 cycles.

The secondary winding of each transformer consists of two identical windings connected to terminals 8 & 9 and to 10 & 11 respectively. Use the tables showing the various output voltages for specific terminal connections as your guide. Many combinations are possible other than those listed in the tables. All ratings shown are for normal convection air cooled applications. Select only rectifiers capable of handling the output voltages and currents described.

RECTIFIER CIRCUIT POWER TRANSFORMERS

When operating these transformers continuously at maximum rated output voltage and current and because of certain other conditions, it is sometimes necessary to derate the rectified output current (DC) as much as 20%; in order to stay within the recommended operating temperature limit of 105 degrees Centigrade. The type of rectifier circuit and load (capacitive, inductive or resistive) determines the relative amount of current (RMS) in the transformer secondary winding. The relationship of AC to DC (secondary RMS current to rectified DC output) for typical circuits and loads is given in the Technical Data on Page 46 of this catalog. Operating duty cycle, type of cooling (natural convection in free air or otherwise) and the power line input voltage and frequency also have an effect on the transformer temperature. These things should all be properly related to the results in any specific application.

The "RT-Series" of transformers may also be used in other rectifier circuits than the Full-wave C.T. and Full-wave Bridge shown above. In circuits such as the Half-wave or Full-wave Voltage Doubler (symmetrical) and Full-wave Bridge, where a C.T. connection is not required, both secondary windings may be connected in parallel, to double the RMS current that is available from each secondary separately. The RMS voltage will, of course, be half of the amount available than that obtained with the secondaries connected in series. Please refer to the adjacent data to obtain the secondary RMS current as related to each rectifier circuit and type of load.

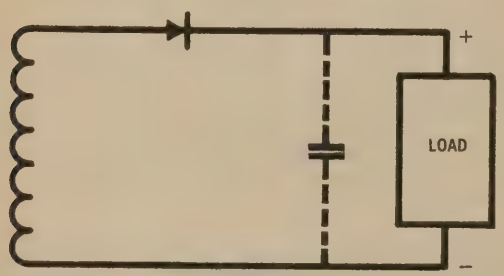
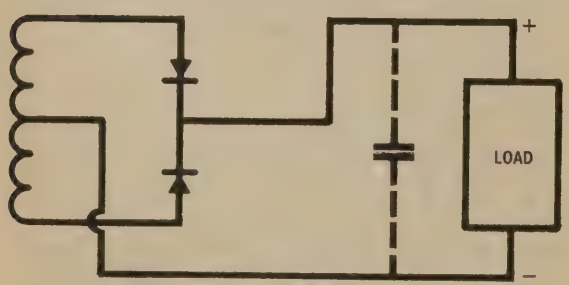
CONTROL AND RECTIFIER TRANSFORMERS



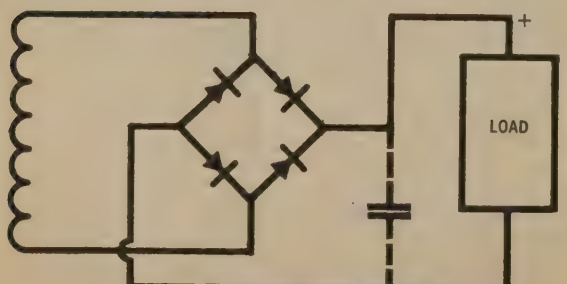
TECHNICAL NOTES

The tabular data for the Control and Rectifier transformers listed in this Catalog shows RMS secondary current ratings plus some D.C. output ratings. The items listed as Filament, Isolation and Dual Winding Control Transformers have only the RMS AC ratings given.



When used in various rectifier circuits, with the possibility of different types of loads, the RMS secondary current will be different for each specific condition. To assist the user, the following information is given so that the proper transformer may be selected.

The rectifier circuits as related to these transformers are:



HW = Half-Wave
FWCT = Full-Wave Center Tap
FWB = Full-Wave Bridge
FWD = Full-Wave Doubler

HW

FWCT

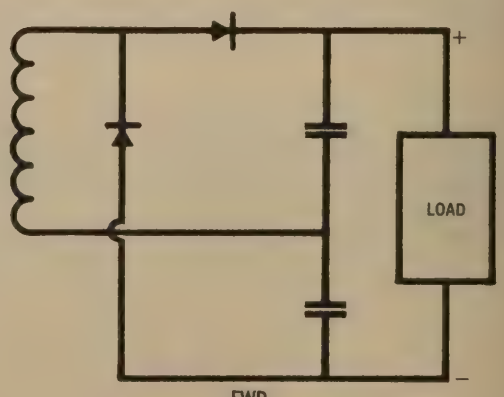
FWB

The formula for the relation between secondary RMS current (I_{AC}) which the transformer has to deliver and the D.C. output current taken from the rectifier (I_{DC}) is:

$$I_{AC} = K_{FF} \times I_{DC}$$

Where K_{FF} is the form factor. The factor for each circuit and type of load is as follows:

REACTOR OR RESISTOR LOAD



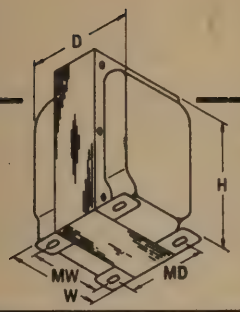
Rectifier Circuit	Form Factor
HW	1.25
FWCT	0.7
FWB	1.0

CAPACITOR LOAD

Rectifier Circuit	Form Factor
HW	2.3
FWCT	1.2
FWB	1.8
FWD	4.0 (approx.)

Only transformers with a CT connection are usable in the FWCT circuit and the FWD circuit will have only a capacity load. The size and type of capacitors used in the FWD circuit will affect the form factor. The factor shown is an approximate maximum for the full-wave symmetrical voltage doubler circuit using two similar electrolytic capacitors.

The transformer selected for a specific D.C. output voltage and current rating, with known type of load after the rectifier, should deliver sufficient RMS voltage to make up for the voltage drop in each rectifier junction plus any drop in a filter or regulator that is used.



FWD

ESSEX Stancor transformers | STANCOR

CONTROL TRANSFORMERS

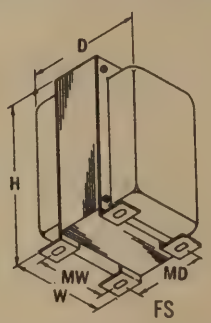
PRIMARIES 115/230 VOLTS 50/60 Hz. — SOLDER LUG TERMINATION — WITH DUAL SECONDARY WINDINGS



Typical Applications: Automatic Assembly equipment. Relays, Solenoids, Small Motors, Speed Changers, Recording Devices, Pumps, Electronic Tubes, Heating Elements, Elevators, Door Openers, Automatic Musical Instruments, Low Voltage Lighting Signal Lamps, Spark Plug Testers, Control Valves for Fluids and Gases, Fans and Blowers, Mechanical and Electrical Signs and similar applications.

By connecting primaries in series (for 230 Volts) but using only 115 Volts input, a series of half voltage output ratings becomes available at the full rated current from each secondary. (Refer to Schematic Diagram on opposite page.)

• New Part Number. May be operated from a 400 Hz. source with no change in output ratings.

ESSEX Stancor transformers

ISOLATION/AUTO TRANSFORMERS

GSD SERIES

Available in 9 sizes to handle continuous duty power requirements from 75 VA. to 1.5 KVA., 230 volts 50/60 Hz. to 115 volts, single phase.
All units built in type "C" mounting style semi-shielded construction. Case and core are connected internally to third wire in line cord and output receptacle, to comply with modern safety standards.

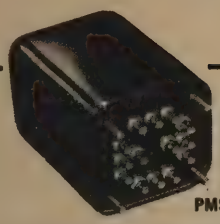
All "C" style have Leads; "SC" style have lugs; "FS" and "FS1" have Terminals. Maximum output current rating will be reduced according to form factor for rectifier cicuit and type of load used. ‡Secondary C.T. must be grounded.
† Both Secondaries may be Loaded Simultaneously.
May be operated from a 400 Hz. source with no change in output ratings. **All Secondary AC Voltages ±3%.**



NOTE

The following pages contain listings of hermetically sealed and military type items which we no longer manufacture. They will be available from stock as commercial items until the supply is depleted.

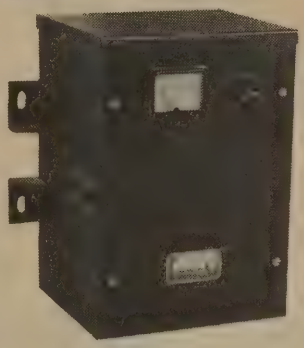
VOLTAGE REGULATORS (manually controlled)

LINE VOLTAGE ADJUSTMENT 65 to 145V, or 145 to 245V. OUTPUTS 115V or 230V.

STYLE "EB"



Easy Line Voltage Adjustment: Switch provided for 65 to 145V or 145 to 245V inputs, 50/60 cycle.

Built-In Meter: Output continuously monitored with Red Line at 115V or 230V output, as required.

Simple Installation:

Up to 2KVA (Style EB): Receptacle and Line Cord with Plug.

Over 2KVA (Style JB): Enclosed Junction Box, Panel Mounted with Leads. Knock-outs provided on all sides.

STYLE "JB"

FLEISHMAN ELECTRIC

DIVISION OF
SIGNAL TRANSFORMER CO., INC.

© United Technical Publications

DRY TYPE POWER TRANSFORMERS—50/60 CYCLE

STYLE "JB"

- Enclosed with Junction Box (Style JB)
  Knockouts provided on all sides of Junction Box.

ISOLATION TWO WINDING — SINGLE PHASE
AVAILABLE IN 2 STYLES

STYLE "OF"

- Open Frame with 8" leads (Style OF)
  Inexpensive version for use in equipment.

FREED TRANSFORMER CO., INC.

SUB–MINIATURE TRANSISTOR AUDIO TRANSFORMERS

These high quality miniature transformers are high efficiency audio components featuring hermetic sealing for maximum protection against electrolysis and subsequent corrosion of fine wires caused by moisture penetration. The units are constructed in accordance with MIL-T-27 Specifications. Transistor transformers can also be supplied in an open or encapsulated type of construction.

MINIATURE AUDIO TRANSFORMERS

These high quality, miniature transformers feature hermetically sealed for maximum protection from moisture penetration with subsequent electrolysis and corrosion of fine wires. While primarily intended for non-military equipment, these units are constructed in accordance with MIL-T-27 Specifications.

Frequency response:
±2DB 30-20,000 Hz
* ±2DB 200-10,000 Hz
All units supplied in DM-20 cases

FREED TRANSFORMER CO., INC.

MIL-T-27 COMPONENTS

TRANSISTOR SUPPLY TRANSFORMERS
TST SERIES

Manufactured and Guaranteed to Specifications MIL-T-27

TST-6 — Frequency 57 Hz to 63 Hz — Primary 115 volts units with * primary 115 and/or 230 volts

TST-4 — Frequency 380 Hz to 1000 Hz — Primary 115 volts

TST units can be supplied in commercial type construction (channel or shell type with leads).

**When ordering specify (6) for 57 to 63 Hz and (4) for 380 to 1000 H-

D.C. to RMS Conversion Chart

Resistive or Inductive Loads		Capacitive Loads	
Full Wave Center Tapped	Full Wave Bridge	Full Wave Center Tapped	Full Wave Bridge
E_{RMS} = 2.22 Edc	E_{RMS} = 1.11 Edc	E_{RMS} = 1.6 Edc	E_{RMS} = .8 Edc
I_{RMS} = .75 Idc	I_{RMS} = 1.05 Idc	I_{RMS} = 1.1 Idc	I_{RMS} = 1.55 Idc

Edc – should include voltage drop across reactor and voltage drop across one diode for F.W.C.T. and voltage drop across two diodes for F.W. Bridge

FREED TRANSFORMER CO., INC.

HERMETICALLY SEALED PULSE TRANSFORMERS

Hermetically sealed Pulse Transformers for use in blocking oscillator, low level interstage coupling, and modulator output circuits. These components meet MIL-T-27 specifications. The pulse transformers are designed for maximum power, efficiency, and optimum pulse performance. Balanced coil structures permit series or parallel connection of windings for turn ratios other than unity. Pulse characteristics, voltages and impedance levels will depend upon the interconnections made.

TRANSISTORIZED CONVERTERS—TDC LINE

For DC/DC conversion from low voltage DC sources to high voltage DC output. Stock units are available in power capabilities to 45 watts, with input voltages of 6, 12, 24, 28, and 48 volts.

All TDC converters are hermetically sealed and oil filled. Outputs are filtered with ripple less than .1%. Operating temperatures from −55°C to +70°C. They are ruggedly built to withstand shock and vibration.

CAT. #	NOM. VDC INPUT	VDC OUT	MAX 1 OUT MA	CASE SIZE
TDC 6-15-05	6	150	50	
TDC 12-30-15	12	300	150	2⅝ x 2½ x 3½
TDC 12-25-12	12	250	120	2⅝ x 2¼ x 3½
TDC 12-30-05	12	300	50	2 x 2¼ x 3½
TDC 12-20-05	12	200	50	2 x 2¼ x 3⅛
TDC 12-12-12	12	120	120	2 x 2¼ x 3
TDC 12-2.4-100	12	24	1000	2¼ x 2⅝ x 3½
TDC 28-30-15	28	300	150	2⅝ x 2¼ x 3½
TDC 28-25-12	28	250	120	2⅝ x 2¼ x 3½
TDC 28-30-05	28	300	50	2 x 2¼ x 3⅛
TDC 28-30-05	28	200	50	2 x 2¼ x 3⅛
TDC 48-20-15	48	200	150	2⅝ x 2¼ x 3½
TDC 48-30-15	48	300	150	2⅝ x 2¼ x 3½

DC TO AC TRANSISTOR INVERTERS—TAC LINE

115 volt outputs at 60 Hz at powers ranging from 50 VA to 350 VA.

Output wave form-square wave; Output frequency – 60 Hz ±1 Hz;

Hermetically sealed-oil filled; Maximum operating temperature – 70°C.

AVAILABLE TYPES:

CAT. #	NOM. VDC IN	OUTPUT VA	SIZE
TAC 6-50	6	50	4⅛ x 3½ x 4½
TAC 12-50	12	50	4⅛ x 3½ x 4½
TAC 12-90	12	90	4⅛ x 3½ x 4⅞
TAC 12-175	12	175	5 x 4⅛ x 6
TAC 28-50	28	50	4⅛ x 3½ x 4½
TAC 28-100	28	100	4⅛ x 3½ x 4⅞
TAC 28-175	28	175	5 x 4⅛ x 6
TAC 28-250	28	250	5½ x 5 x 6¾
TAC 28-350	28	350	5½ x 5 x 6¾
TAC converters are also available with 400 Hz outputs in three models:			
TAC 12-100-4	12	100	4½ x 3½ x 4½
TAC 28-150-4	28	150	4⅛ x 3½ x 4½
TAC 28-250-4	28	250	5 x 4⅛ x 6

DC TO AC TRANSISTOR INVERTERS—PTC LINE

A new line of DC/AC inverters for operation from a 12 volt D.C. source. Output is square wave, 115 volts RMS at 60 Hz. Regulated to ±2 Hz over an input voltage range of 10.5 to 13.5 VDC.

Efficiency on all units is 80% min. at full load. Ambient temperature to 55°C.

Available models listed below:

CAT. #	VA OUT	SIZE	MTG.
PTC 12-15	15	3 x 2½ x 4	1⁹⁄₁₆ x 1¹³⁄₁₆
PTC 12-50	50	3½ x 3 x 4¹³⁄₁₆	2 x 2¾
PTC 12-100	100	5⅞ x 4 x 5¼ HI	3¼ x 3⅛
PTC 12-175	175	7⅝ x 4¹³⁄₁₆ x 5¼ HI	6 x 3½

PTC 12-15 and PTC 12-50 are supplied with 4-terminal headers for input and output connections.

PTC 12-100 and PTC 12-175 use barrier strip terminals and in addition have an auxiliary output receptacle.

DC TO AC TRANSISTOR INVERTERS — VC LINE

A low priced efficient transistor inverter for applications not requiring frequency regulation closer than ±5 Hz is available in 15 VA and 100 VA output capabilities. Input nominal 12 V.D.C. Output square wave 115 volt.

Cat. #	Power	Freq.	Size
VC 12-15	15 watt	55-65 Hz	3 x 3⅛ x 3¾ Hi.
VC 12-100	100 watt	55-65 Hz	4½ x 3½ x 4½ Hi.

MCV – CONSTANT VOLTAGE TRANSFORMERS – MCV
(FERRO-RESONANT TRANSFORMERS)

The MCV line of constant voltage transformers provides accurate regulation against line and/or load variations, without the use of tubes or moving parts.

Input Voltage Range
95 to 130

Rated output within ±2% of nominal value. Regulation automatically maintained within ± 1%. Regulation from 25% to full load ± 2%.

- MILITARY SPECIFICATIONS
- NO TUBES
- COMMERCIAL
- NO MOVING PARTS
- ACCURATE REGULATIONS
- FAST RESPONSE
- FULLY AUTOMATIC
- SUPPLIED WITH CONDENSERS

HERMETICALLY SEALED MINIATURE AND SUB-MINIATURE FILTERS TO MIL-F-18327

Freed Standard Filters are **Hermetically Sealed Miniature and Sub-Miniature** high performance components designed for both production and laboratory applications in the Communications and Electronic industry. In order to achieve attenuation requirements not obtainable with one single filter, one can combine several standard filters of different transmission characteristics. Wide Band Pass characteristics are obtainable by combining low and high Pass Units. The astatic construction of inductive components together with special shielding reduces the hum pick-up of the standard filters.

Low Pass Filters: The attenuation characteristics of Low Pass Filters are 6db or less at cut-off frequency • **ILP-ILM Interstage Low Pass Filter.** Characteristic impedance 10,000 ohms, in and out • **LLP-LLM Line Low Pass Filter.** Characteristic Impedance 500 to 600 ohms, in and out • **High Pass Filters:** The attenuation characteristics of High Pass Filters are 6db or less at cut-off frequency • **IHP-IHM Interstage High Pass Filter.** Characteristic Impedance 10,000 ohms, in and out. • **LHP-LHM Line High Pass Filter.** Characteristic Impedance 500 to 600 ohms, in and out • **Band Pass Filters:** The attenuation characteristics of Band Pass Filters are 2db or less at plus or minus 3% of center frequency • **IBP-IBM Interstage Band Pass Filter.** Normal input impedance — 10,000 ohms. Output impedance .5 megohms. Effective voltage step-up 2:1. (Output voltage to source voltage.) • **LBP-LBM Line Band Pass Filter.** Nominal input impedance 500 to 600 ohms. Output impedance .5 megohms. Effective voltage step-up 5:1. (Output voltage to source voltage.)

Special filters in all six types are available upon request.

NULL "T" FILTERS SERIES 1950

Standard models are available for 30, 60 and 120 cycles in a wide range of impedances. Each network will give a minimum of 50 db attenuation at the null frequency.

The null frequency is adjusted to a tolerance of ±2%.

All Null T Filters are hermetically sealed. Prices on request.

Catalog No.	Frequency
NTF- 30	30 Hz
NTF- 60	60 Hz
NTF-120	120 Hz

FREED TRANSFORMER CO., INC.

TOROIDAL INDUCTORS

Using the latest developments in the field of magnetic materials and new impregnation and molding techniques the Freed Transformer Co. makes available to the industry the most extensive line of toroidal inductors.

Freed toroids are available in three types of constructions. Open units coated with a special high temperature extremely low loss compound, hermetically sealed in metal cases or molded in special **Freed Epoxy Resin.** Both hermetically sealed and molded units meet the latest military specification MIL-T-27A(graded 1 or 4 and 2 or 5 respectively.)Freed toroidal inductors are supplied with either molypermalloy or carbonyl iron powder cores

1. Temperature Stabilization:

The molypermalloy and carbonyl iron powder cores have a temperature coefficient of inductance. Depending on the degree of temperature stabilization the cores have different temperature coefficients. The degree of stabilization is denoted by a two-letter code.

SF Non-stabilized cores, ±2½% inductance variations from —55°C to +85°C.
SN Non-stabilized cores, +2% inductance variations from —55°C to +85°C.
SE Temperature stabilized cores, +0.1% to —0.4% inductance variations from —1.5°C to +54°C.
SB Temperature stabilized cores, ±0.1% inductance variations from +13°C to +35°C.
SD Temperature stabilized cores, ±0.1% inductance variations from —1.5°C to +54°C.
SW Temperature stabilized cores, ±0.25% inductance variations from —54°C to +85°C.
SM Temperature stabilized cores, ±.25% —65°C to +125°C.
SP Temperature stable carbonyl iron cores, ±0.3% inductance variations from —55°C to +85°C.

The temperature (stabilization) coefficient of an inductor will depend upon the nominal inductance value, operating frequency and A.C. voltage across the coil. Under some unfavorable working conditions the temperature coefficient of inductance corresponding to a given stability characteristic may be exceeded.

Toroids with special requirements such as tapped toroids, toroidal transformers, molded and cased units with dimensions other than standard sizes and high temperature toroids can be supplied on request. Our engineering and laboratory facilities are available for consultation, research and development.

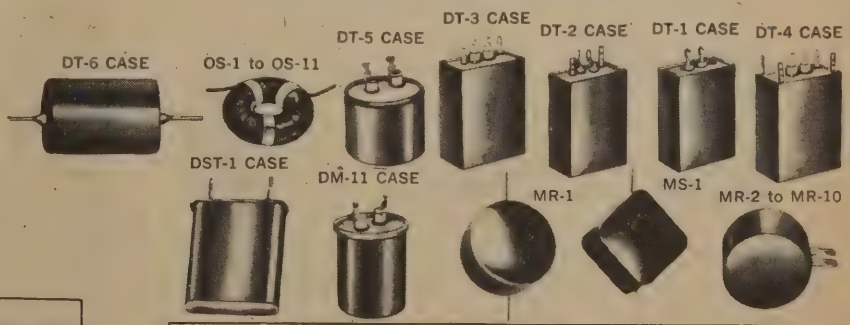
*TI-20 through TI-23 have a very low voltage coefficient and inductance will change very little with voltage. Because of high frequency application, the maximum voltage is limited rather by breakdown than by saturation.



$$\text{Normalized } V_{AC} = \frac{V}{F}\,\frac{1}{\sqrt{L_H}}$$

$$\text{Normalized } I_{AC} = I_{AC}\sqrt{L_H}$$

$$\text{Normalized } I_{DC} = I_{DC}\sqrt{L_H}$$

where F —operating frequency in Hz
L_H —inductance in henries
Iac—A.C. current in MA
Idc—D.C. current in MA
V —A.C. voltage across the core

QGC–HIGH "Q" REACTORS

QGC—are hermetically sealed, MIL-T-27, Grade 4, Class R, High Q Reactors for low audio frequency application with an excellent inductance stability with variations of A.C. and D.C. currents, frequencies and temperatures.

SPECIAL REACTORS:
(1) with a center tap
(2) with a split winding
(3) with inductances other than those listed can be supplied.

DC-2A CASE
Height: 3"
Width: 2 5/16"
Depth: 2 1/4"
Mtg. Cen.: 2" x 1 3/4"
Studs: 4 8-32
Knockout: 1 1/2" x 1 3/4"

AJ CASE
Height: 2 3/4"

FREED TRANSFORMER CO., INC.

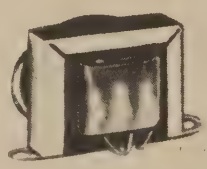
COMMERCIAL GRADE COMPONENTS

These components are designed to meet the demand for low-cost replacement parts for commercial electronic equipment.

The best commercially available materials have been utilized in the design of these units, to insure reliability and excellent performance characteristics. Vacuum impregnation with a non-hygroscopic varnish to prevent penetration of humidity are employed to give these units long life and trouble-free performance.

230-115 V, 50-60 C.P.S. Stepdown Transformers rated from 25 V A up to 5,000 V A Rating and line booster transformers are included in this series.



All units, with only a few exceptions, are uncased or of shell-type construction.

Isolation transformers and Stepdown transformers are equipped with line cord and receptacle.

TF 3, 4, 10 & 18 supplied with terminals. All others with leads.

AUTO TRANSFORMERS

To be used as step-down transformer. Equipped with standard receptacle and line cord.

Catalog No.	Transformation	VA Rating	Weight (lbs.)	Case Size

TERMINAL ENCLOSURE KITS

Economical modification kits convert exposed-terminal models to enclosed ones. To order determine frame size and number of cores of selected transformer, determine appropriate Terminal Kit Model Number based on frame size from table at right, and order for each transformer the same quantity of Terminal Kits as there are cores.

For Frame Size	Model No.	Sugg'd Net Price[2]
30	None Available	.....
40	None Available	.....
50	9T92A903	$1.00
60	9T92A903G2	1.00
75	9T92Y903G3	2.00
85	9T92Y903G4	4.00
95	9T92Y903G5	7.00

[1] Also overvoltage connection amp. When overvoltage connection is used, rated current should not be exceeded. Output kva for overvoltage connection is maximum output voltage times rated current.

[2] OEM quantity prices are available on request.

[3] Output at overvoltage connection is 0.264 volts or 0-132 volts.

[4] No overvoltage protection provided.

[5] When using extended tap connections, operation is for 60 hertz only.

[6] 60 hertz only.

[7] When operated with this input voltage, rated current must be reduced when output voltage exceeds 140 percent of input voltage.

[8] For 240-volt input, 0-240-volt output, application only.

[9] For 480-volt input, 0-480-volt output application only.

PLUG-IN SETS

Bench or wall-mounted single-phase units for laboratory or shop source of adjustable a-c voltage. Provides output voltage of 0-117% of input voltage, but is easily reconnectible for 0-100%.

AUTOMATIC LOW LINE VOLTAGE BOOSTERS

NEW AUTO-BOOST®

- **Auto-Boost® automatically and economically protects electrical and electronic equipment in critical applications from malfunction or damage due to low line voltage.**
- **Automatically boosts line voltage 10% whenever the line voltage drops approximately 7% or more below its nominal value. When line voltage returns to nominal range, Auto-Boost® automatically returns to "standby" operation.**
- **Negligible power interruption as switchover time to "boost" position is almost instantaneous.**
- **Designed for use with air conditioners, computers, control equipment, food freezers, pumps, fans, blowers, etc.**
- **Easily installed in the field, by electrical or air-conditioning contractors, between the equipment power line and the equipment to be protected.**

An Auto-Boost® rated for a given motor, can handle peak starting current of that motor.

Operating efficiency is approximately 95%. Standby current drain under 5 watts.

Standard models available for 208, 230 and 460 volts, 1 and 3 phase, 60 cps. Available in capacity ratings of 3-40 HP; 10-60 Amps; 5-45 KVA and 2-40 Ton Air Conditioners.

Send for Brochure F226 for Specifications and Pricing.

PRECISION HI-FI ACCESSORIES

STEREO CENTER CHANNEL
OUTPUT MATCHING TRANSFORMER
FOR MONAURAL EXTENSION SPEAKERS

Designed for the Audiophile who wishes to convert a Stereo system to Monaural or wishes to modify or enlarge his Stereo system. Permits "hole-in-the-middle" fill in with 3rd channel speaker. Matches impedance, polarity and power level. 30 watts. Response 40 to 20,000 cps.

HM-90 — **User net $10.95**

HUM-BUCKING TELEPHONE PICK-UP COIL

Hum free transcription, no connection to phone. Perfect for high impedance tape recorders and dictating machines. Rugged construction of high impact plastic.

HP-70 — **User net $6.95**

TAPE HEAD DEMAGNETIZER Model HD-40M

Removes permanent magnetism, protects tape from erasure, minimizes noise and distortion, reduces hum of tape head. Extended pole piece designed for easy access.

User net $7.49

MAGNETIC TAPE ERASER Model HD-15

A compact bulk tape demagnetizer. Erases recorded signals and noise instantly, when passed over tapes of sound film without rewinding. Removes background noise below level of new tapes or film. Universal unit for any size reel. ¼" and ½". Erases cassettes, cartridges.

User net $12.95

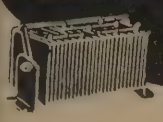
TELEPHONE PICK-UP COIL

For recorder or direct feed into amplifier — Use as probe for locating hum. Equalized pick-up level.

- Universal design with phone plug
- Black finish with 68" cable
- Size: ⅝"D x 2½"L. Wgt: 1½ oz.
- **Model HP-61** — **User net $6.15**

HEAVY DUTY MAGNETIC TAPE ERASER

Epoxy Molded Model HD-11M
Develops a high intensity magnetic field. Erases tapes without rewinding. Noise level reduced below standard demagnetizers. Restores tape up to ½" to like new condition. 117V AC—5 Amps.
Size: 7"L x 3½"W x 3¼"H.
Weight: 9 lbs.



Adapter hub for 10½ reels
Model HD-11-AD — **User net $3.15**
A MUST FOR STEREO RECORDING.
Ideal for cassette erasure.
Model HD-11M — **User net $31.00**

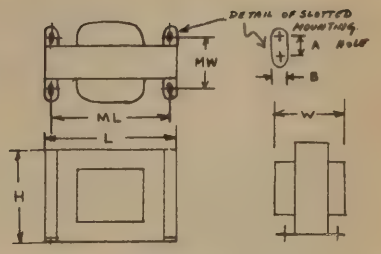
DIRECTRON



Industrial Transformers, Selenium and Silicon Rectifiers, Chokes and Power Supplies

RECTIFIER TRANSFORMERS

Transformers are with 2 — 18 volt center-tapped windings. Connected in series delivers 36 volts as rated. Connected in parallel — delivers 18 volts at twice rated current. (Taps 9, 18, 27, 36 V.)

Primary taps at 100, 105, 110 and 115 volts available on 12 amp, 24 amp, 30 amp and 50 amp transformers. No extra charge.

2-18 CENTER TAP WINDINGS

Connected in Series: Delivers 9v, 18v, 27v, 36v at rated current
IE: 18T1 — 9v @ 1a, 18v @ 1a, 27v @ 1a, 36v @ 1a

Connected in Parallel: Delivers 2 times rated current
IE: 18T1 — 9v @ 2a, 18v @ 2a

Part No.	Amp.	Users Net Price	L (MAX)	W (MAX)	H (MAX)	ML ±1/16	MW ±1/8	A ±1/64	B ±1/64	Weight

OHMITE variable transformers

OHMITRAN v.t.® VARIABLE TRANSFORMER

Unique for the design innovations they incorporate, Ohmite "OHMITRAN" v.t.® variable transformers include exclusive field-proven features. They offer long, low maintenance operation with excellent regulation at any voltage setting within the rated load plus an output free of waveform distortion. Six frame sizes offer a wide range of electrical ratings to meet most industrial applications. These include three new, compact, low-power models (VT1, VT02, VT3,) which permit a fine choice of six ratings from 1 to 3 amperes.

The VT1, rated 1 ampere, is the smallest commercial variable transformer available.

UL LISTING: A number of VT4, VT8 and VT20 transformers used for 120 volt line operation are underwriters' laboratories listed. See tables, page 26 for details.

POSITIVE CURRENT TRANSFER . . . achieved with specially designed brushes connected through high conductivity contact arms or pigtails to a large slip ring which contacts a wide area of the collector ring. The brush contact assembly on the VT1, VT02, and VT3 is instantly replaceable, when necessary, as a result of a slide-on, snap-in design. Brushes of the other models are easily replaced also.

ADJUSTABLE SHAFT: On all Ohmite transformers, except the VT2LN, the shaft may be extended out from either the brush or opposite side as desired. On the VT1, VT02 and VT3, both single and tandem assemblies, this is an **exclusive** Ohmite feature which affords greater versatility of mounting and application. For example, substitution of a longer shaft or extension of the standard shaft allows actuation of other devices, such as switches or potentiometers without special construction. The shaft is freed simply by loosening set screw in the hub assembly. A double flat on the shaft permits two knob positions.

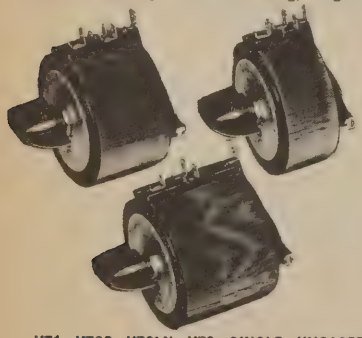
On the VT4, VT8, and VT20 types, the adjustable shaft feature permits **table or panel use.** "Ganged" or tandem VT4, VT8 and VT20 units employ a thru-shaft offering the same flexibility. On VT4 and VT8 units, shafts are fixed in the desired position by means of socket head screws located in the hub of each "brush-radiator" plate. The VT20 employs a unique collet-type shaft lock.

INTERCHANGEABLE WITH OTHER POPULAR TYPES: Basic "v.t." units have mounting provisions which match those of virtually all popular transformers of comparable current rating. Models VT4, VT8 and VT20 mount by means of bolts. Normally 3-hole mounting, single VT4 units can be "4-hole mounted" by means of adapter plate, see page 35. Individual Model VT1, VT02, VT2LN, or VT3 units mount by means of a standard ⅜-32 threaded bushing. All tandem assemblies mount by means of bolts or nuts. Knob, dial and mounting hardware are included with each transformer.

DIRECT READING, TWO SCALE DIAL . . . calibrated on one side for overvoltage connection; on the reverse side for line voltage connection. Dials normally included with transformer read clockwise for increasing voltage; counter-clockwise calibration available—see Ohmite page 35, this section.

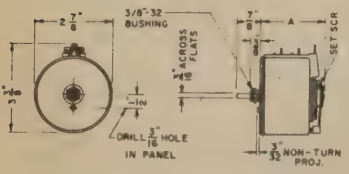
WIRING AND CONNECTIONS: Wiring instructions to arrange various modes of operation are enclosed with all OHMITE variable transformers. Terminal panels or adjacent nameplate carry convenient wiring diagram, coded terminals and input and output data. Three way terminals on VT1, VT2LN, VT02, VT3 will accept ¼" push-on connectors, screws and nuts, or conventional soldering.

ROTATION OPTION: On VT4, VT8 and VT20 transformers connected for overvoltage, either clockwise or counter-clockwise increase of voltage can be arranged easily by the user. Increasing voltage in either direction can be arranged on all units connected for no-overvoltage output. Dials for counter-clockwise operation are stocked. See "Accessories."



OVERVOLTAGE OPTION: On all transformers with overvoltage feature, no-overvoltage operation can be arranged on the terminal panel.

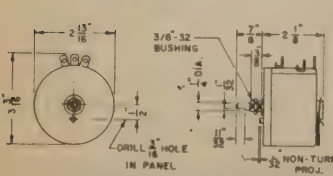
NO-OVERVOLTAGE TRANSFORMERS ("N" suffix): Provide considerably more current due to heavier gage winding.



240-VOLT INPUT ("H" suffix): On units which are wound for 240-volt input, a 120 volt input tap is also provided. With the use of this input, the maximum current rating applies up to 120 volts output but beyond this reduces proportionately to approximately 50% at maximum voltage output.

LOW VOLTAGE INPUT ("L" feature): Designed for a maximum input of approximately 40 volts, with high current output.

GROUNDED INPUT & OUTPUT ("C" feature): Units in type F or G cases can be provided with a three-conductor cord and outlet. One conductor is grounded to the case. This feature standard on all cased VT20 units and on all metered units.



VT1, VT02, VT2LN, VT3, SINGLE, UNCASED

OHMITE variable transformers

ENCLOSED OR CASED UNITS: In gray hammer tone finish. "Basic protective enclosures" (Type B) expose the transformer's terminal panel and mounting base and are supplied presently on VT20 models only. (See tandems in "B" enclosures below.) "Fixed mounting enclosures" (Type E) are intended for permanent mounting on table, panel or inconduit-line. Standard portable units (Type F) carry a line cord, outlet socket, and fuse except for VT20F which has a circuit breaker. Deluxe portable units (Type G) utilize a circuit breaker, can be switched to overvoltage or no-overvoltage as desired, have a handle which also serves as an easel.

METERED ENCLOSURES: VT8NFC, VT8GC, VT20NFC and VT20GC transformers are available with voltmeter (V), voltmeter and ammeter (A) or voltmeter and wattmeter (W). The metered transformer enclosures are larger than the non-metered types of comparable designation, (see dimensions below). All stock metered units have the three-conductor grounded cord and outlet and all, except the VT8NF group, are equipped with carrying handles.

120	50	w/voltmeter, gnd. conn.	15	0-120	10.0	(VT8NFCV)	14.8

Notes:
[1] Frequency shown is a minimum—units may be used up to 1000 cps.
[2] VT8H, VT8HN, VT20H, VT20HN also have taps for 120V input with 280V output for VT8H and VT20H and 240V output for VT8HN and VT20HN. With use of 120V input the max. current rating applies up to 120V output but reduces to approx. 50% at max. output voltage. In the case of tandem units use of the low voltage inputs would correspondingly derate the current at the higher output voltages.
[3] Connected at factory for overvoltage output—easily reconnected by user for no-overvoltage output. On VT8G and VT20G, switch selects overvoltage or no-overvoltage.
[4] User wires for desired output. Dial normally calibrated for overvoltage.
[5] 2-in-tandem normally wired for series connection: 3-in-tandem for Y connection.
[6] When transformers are series connected, load cannot be grounded.
[7] Includes knob, dial and mounting hardware.
[8] May be used at 50 Hz if connected for no-overvoltage output.

[12] Underwriters' Laboratories listed under apparatus program (File Number E10946).
[13] Some items are classified "non-stock standard" due to limited usage and therefore are not stocked. Consult latest issue of catalog 300 series for availability.
[14] CSA Listed for use only in equipment where the suitability of the combination is to be determined by the Testing Laboratories. (File No. 21309).
[15] CSA Listed as apparatus. (File No. 21309).

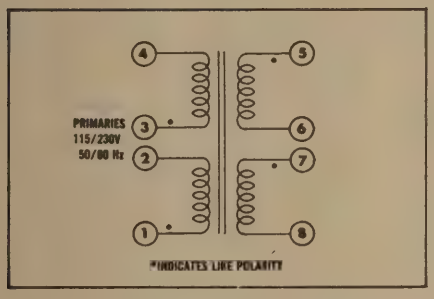
[1] **Popular items appear in BOLD print and are usually in stock at authorized Ohmite stocking distributors. Items appearing in LIGHT FACE print are available from stocking distributors but are not normally stocked in depth. Parentheses indicate non-stock standard items subject to a $25.00 per line item minimum charge.**

FLAT

EPOXY MOLDED PLUG-IN POWER TRANSFORMERS FOR PRINTED CIRCUIT APPLICATION

ALLOW ONE INCH CARD SPACING.

LESS THAN ONE INCH.



MAXIMUM HEIGHT OF 0.850 INCHES - Allows stacking with 1 inch space between PC cards.

6 VA @ 50/60 HZ - in 0.850 inch height, 7 oz weight - 40° C max. temperature rise.

EPOXY MOLDED - completely sealed - class S construction

HUM-BUCKING CONSTRUCTION - Reduced magnetic field - balanced windings.

DUAL PRIMARIES - 115/230V - 50/60HZ

*CORRESPONDS TO 30% REGULATION, I.E., NO LOAD SECONDARY VOLTAGE IS 30% HIGHER THAN FULL LOAD.

Signals "FP" series of epoxy molded PC plug-in power transformers offer the main advantage of 0.850 inch height with a 6VA rating at 50/60HZ. This allows its use in PC boards stacked with 1 inch centers.

Internal construction is semi-toroidal (hum bucking) which results in a reduced radiated magnetic field and balanced windings. All materials used are at least class S in rating. The transformer is completely molded and sealed in epoxy. Two 4-40 inserts are provided to assure secure mechanical mounting.

The dual primary and secondary windings offer a large diversity of output combinations with a 115/230V input. The voltages and currents are ideal for power applications in semi-conductor control and instrumentation such as single or dual output DC supplies and isolated control circuit and reference supplies.

- **We can quote on your specials up to 6 VA**
- **New sizes for ratings up to 25 VA are currently under development. Please check with us on your requirements.**

PARALLEL CONNECTED SECONDARIES

SERIES CONNECTED SECONDARIES

All transformers are designed conservatively for a max of 45°C rise above ambient, for use on 115V power line from 50-500 cps. Only prime raw materials are used. Units are thoroughly impregnated and baked with Signal's own high gloss black baking varnish. The transformers and chokes are rugged in construction, well-insulated, and have a consistently uniform appearance. All ratings are at full load current continuous operation.

Electrical ratings have been chosen to cover a wide range of applications. All transformers have two center-tapped secondary windings.

Special variations such as dual primaries, 230V primaries, electrostatic shields, etc. are available on special order.

HIGH & LOW CURRENT CHOKES 0.1 to 1000 AMPS

OPEN FRAME • EPOXY ENCAPSULATED (GRADE 5) • HERMETICALLY SEALED (GRADE 4)

Signal's line of High and Low Current Chokes is the most extensive available. It is designed to complement the selection of High and Low Current Transformers so that a set may be specified for power supplies using inductive filters.

The inductance ratings given are minimum values guaranteed at full DC current. All resistance ratings are maximum values.

Special variations or intermediate values of inductance, current, or resistance can be supplied promptly and accurately.

Signal's Dual Chokes are supplied with 2 windings which may be series or parallel connected with rating shown on chart. This line is basically designed for applications requiring lower inductance values at high currents, such as low voltage, DC supplies or SCR filters. Ideal for use to reduce ripple in our ferro-resonant (CDC) line.

MULTI-VOLT 1 to 54 VOLTS in 1 VOLT STEPS

"MV" LINE

MV (multi-voltage) secondaries may be series connected for any output from 1 to 54 volts, in 1 volt steps, at rated current. This is accomplished by using the small buck-boost secondary.

Part No.	Secondary Amps.	DIMENSIONS L	W	H	ML	MW	Appr. Wt.

As shown on the schematic diagram dual primaries are provided. This permits parallel connection for 104, 110, or 120 volts or series connection for 208, 214, 220, 230, and 240 volts. Frequency range is 50 to 500 cps.

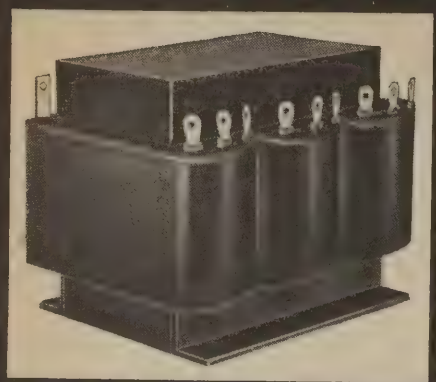
It is important to note that primary taps may be used to adjust the secondary voltages. Line voltages up to 125V (parallel) or 250V (series) may be used on the lowest primary tap. Nickel plated screw terminals are provided on a heavy phenolic board for easy primary connections.

WINDINGS OF HEAVY COPPER STRIP

STRIP-WOUND SECONDARIES

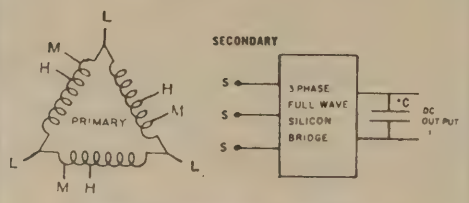
At the heavy current used in this line it becomes practical and desirable to use wide copper strip (as wide as the coil itself) for windings. Besides the obvious advantages of excellent winding space factor, the heat dissipation of the coil is improved. This improvement is due to the fact that the heat generated in the windings has a pure copper path to the coil ends, where it can be dissipated. In conventional windings of many turns per layer this heat flow is impeded by wire insulation and air spaces between turns. Therefore, the use of copper strip windings yields a dramatic reduction in size and weight.

GRAIN-ORIENTED STEEL CORE



These cores permit the use of higher peak flux densities for the same core loss. This results in a lower number of turns required and therefore, a smaller, more compact transformer.

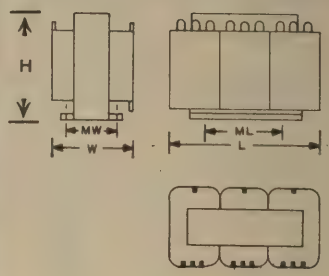
CLASS F INSULATION USED THROUGHOUT



Class F insulation is rated for unlimited life at a total temperature of 155°C (ambient plus temperature rise).

Class A insulation has a maximum temperature rating of 105°C. The "nominal" current ratings given to this series are for a temperature rise of 45°C above 55°C ambient (Class A). Since Class F insulation is used it is permissible to increase these ratings by 40% (700 and 1400 amperes) without reducing the reliability of the transformer. The temperature rise will be 100°C over a 55°C ambient. The only limitation is not the transformer, but the temperature rating of surrounding components which may be affected by the additional heat radiated by the transformer.

3 PHASE HIGH CURRENT RECTIFIER TRANSFORMERS



SCHEMATIC DIAGRAM

*C — Optional, no capacitor will give DC output shown at approx. 5% ripple.

At higher power loads (above 2-3 KVA) it becomes inefficient to use single phase 115 or 230 volt standard lines. With this in mind, our engineering staff has developed a line of 3 phase transformers for use off 208 or 220V 3 phase power lines. These offer the significantly higher conversion efficiency and lighter power line drain of 3 phase systems. Since the principal application of these items is in high power dc power supplies, output ratings are given in dc voltage and current assuming the use of a 3 phase full wave rectifier.

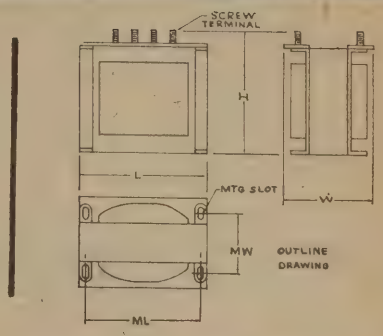
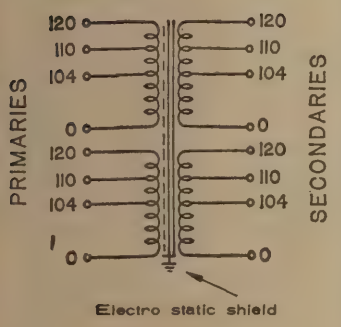
SIGNAL TRANSFORMER CO., INC

ENGINEERS • DESIGNERS • MANUFACTURERS



INDUSTRIAL GRADE
STEP-UP OR STEP-DOWN
POWER ISOLATION OR AUTO-TRANSFORMERS
HIGH DEGREE OF VERSATILITY OFFERS MANY POSSIBLE VOLTAGE RATINGS

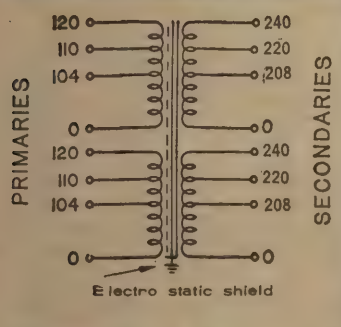


AVAILABLE FROM STOCK FOR IMMEDIATE SHIPMENT

The "DU", "SU", and "UP" lines are designed for a maximum of 55°C rise above ambient for use on standard power lines from 50 to 500 Cps. Only prime raw materials are used. Units are thoroughly impregnated and baked with Signal's own high gloss black baking varnish. The transformers are rugged in construction, well-insulated and have a consistently uniform appearance. All ratings are at full load current, continuous operation.

Heavy ¼ inch phenolic terminal boards are provided with plated brass screws and flat washers (10-32 on ¼ and ½ KVA, ¼-20 on larger sizes). Connections can be easily made with a nut driver. It is also simple to alter the inter-connections to change transformer ratings. **Electro static shields are provided grounded to the core.** The connection is made with a lug to ground and may be opened if an ungrounded shield is desired.

"DU SERIES" 110/220 Dual Primary To 110/220 Dual Sec. (Primary & Secondary may be reversed)



As shown on the schematic diagram the "DU" line is designed with dual primaries and secondaries. All four windings are identically rated at 0/104/110/120 volts. This permits series or parallel connections on either primary or secondary. Therefore, a nominal 110 to 110 volt, 220 to 220 volt, 110 to 220 volt, or 220 to 110 volt transformer can be set up. The winding taps permit intermediate series ratings such as 208, 214, or 230 volts.

It is also possible to make auto-transformer connections by connecting a primary group in series with a secondary group. Such nominal ratings as 440 to 220 volts or 220 to 440 volts can be set-up, in addition to the standard ratings described above. A further advantage to auto-transformer connection is the fact that the KVA rating of a particular type is **doubled.**

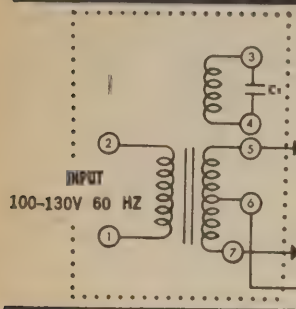
"UP SERIES" 110/220 Dual Primary To 0/130/135/140 V. Sec. (Primary & Secondary may be reversed)



The "UP" line utilizes the same dual primary as the "DU" line. It has, however, a single secondary rated at 0/130/135/140 volts.

This type is quite useful to boost low line voltages or raise line voltages to compensate for drops in series elements. It also finds application in bridge rectifiers for DC voltage outputs of approximately 115 to 130 volts.

Part No.	KVA	Secondary Volts	Max. Secondary Amps	L (Max.)	W (Max.)	H (Max.)	ML ± 1/32	MW ± 1/16	Mtg. & Term. Screw	Appr. Lbs.

CONSTANT VOLTAGE TRANSFORMERS

FOR USE IN DC POWER SUPPLIES (TYPE CDC)

Available with dual 115/230 50 Hz primaries. Add prefix "21-" to part no., e.g., 21-CV-24-11.

Signal's CDC Regulating Transformers are specifically manufactured for use in DC Power Supplies. They are designed and rated for use with a full wave center-tapped silicon rectifier. CDC transformers are operated in ferro-resonance and are used in conjunction with an AC **tuning capacitor** (Cr in schematic diagram), which is supplied with the transformer.

In order to construct a regulated power supply the only other parts necessary are two diodes (D_1 and D_2), an electrolytic computer grade capacitor (C_t) and a bleeder resistor (R_b). These are standard shelf items.

The specification chart lists specific outputs available and the recommended auxiliary components. Part numbers are coded in terms of DC outputs, e.g., CDC-15-2 will give an output of 15V DC at 2 amps DC.

Electrical performance is completely specified. The DC voltage is constant to ±1% over the line voltage range of 100 to 130V at 60 HZ. The nominal output is held to ±2%. Closer tolerance on nominal output (±1%) can be obtained on special order at slightly higher cost.

Load regulation is specified as the rise in dc voltage output (increase in E_{dc}) from full load to the no load, ¼ load, and ½ load points. The filter capacitor (C_t) specified should be used and will yield the values of ripple voltage shown.

A significant protection feature is the fact that the DC short circuit current is limited to a maximum of 2 times rated current (3 times in size "C-6" units). This protects the entire circuit against shorts.

CONSTANT VOLTAGE TRANSFORMERS
FOR USE IN DC POWER SUPPLIES (TYPE CDC)

CDC Transformers may also be used in complementary power supplies and will provide dual outputs at ± the rated voltage.

Each output voltage will be the same as in the single supply, **except that the DC current rating is ½ that in a single supply.**

It is also necessary to adjust the circuit parameters as follows:

C_F — ½ value in MFD, same DCWV.
R_B — 2 x value in ohms, ½ wattage rating.
DIODES — ½ P.I.V., ½ I/Cell.

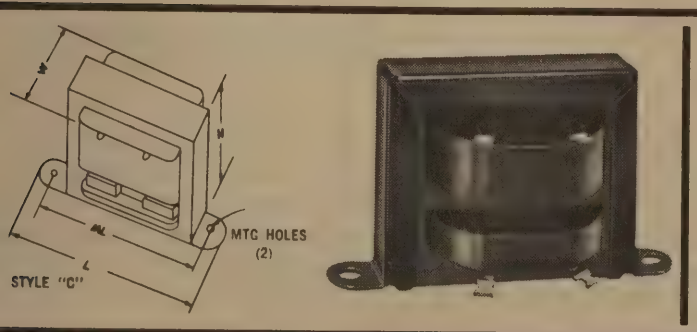
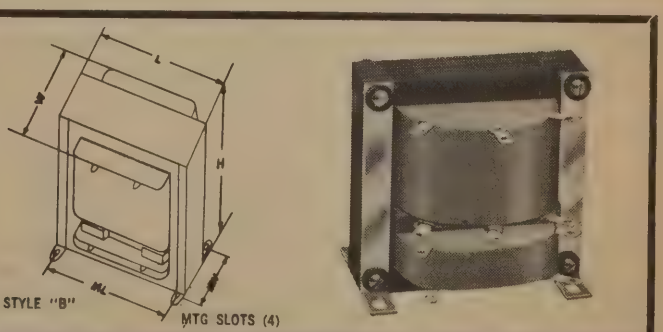
CONSTANT VOLTAGE TRANSFORMERS
FOR AC APPLICATIONS (TYPE ACV)



Signal ACV Transformers are manufactured for use with AC loads. They are simple, rugged designs and will regulate to ±1% for input variations from 95-130V at 60Hz **only.** 50Hz versions are available on special order. If regulation to ±½% or better is desired, special units can be made to your order.



Full regulation is maintained at any load from about 20 to 100%. Short circuit current is limited to a maximum of 200% of rated current (300% in size C-6 units). ACV Transformers are "normal" harmonic type with approximately a square wave output.

The 6.4 and 12.8V ratings are ideal for use with tube or lamp loads since the short circuit rating limits the inrush current to cold filaments. Stabilization of the voltage results in longer filament life.

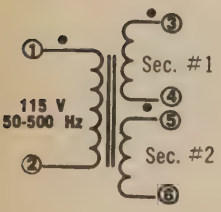
MINIATURE PLUG-IN POWER TRANSFORMERS

FOR PRINTED CIRCUIT APPLICATIONS



low profile • low regulation • 50-500 Hz

SHIPPED FROM STOCK IMMEDIATELY

FOR INDICATOR TUBE & I.C. APPLICATIONS

"PCN" transformers provide ideal outputs for use in indicator tube and I.C. applications. 175 or 130 V. can be used for DC supplies for "Nixies" and 6.3 or 12.6 V. can supply power for associated I.C. circuitry or supplies.

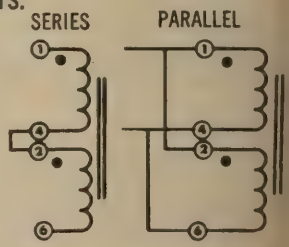
	PCN-62-2	20	500	62		PCN-62-4	27	500

* Size shown applies to both right and left hand units which are on same horizontal line.



† Use prefix "EN-" for epoxy molded units rather than "PCN-", e.g., PCN-37-1 becomes EN-37-1 when epoxy molded.

‡ Secondary current rating based on 20% regulation. Higher currents may be drawn without over-heating. Check with our Engineering Dept. on specific units.

DUAL INDUCTORS FOR SMOOTHING & SCR SURGE LIMITING

"PCC" dual filter chokes find use in DC supply filters or as inductive elements in switching circuits. Another application is to limit current surge (di/dt) in SCR circuits. These chokes may also be used as AC reactors.

Part** No.	Series Connected Ind. (MHY)	Series Connected Curr. (Amps)	Series Connected Resis. (Ohms)	Parallel Connected Ind. (MHY)	Parallel Connected Curr. (Amps)	Parallel Connected Resis (Ohms)	E-T* (Volt-Millisec)	Size
PCC-1-37	120	0.375	6.0	30	0.75	1.5	25	37
PCC-2-37	80	0.5	3.8	20	1.0	0.95	20	37

PCC-2-62	20	2.0	0.64	5	4.0	0.16	20	62

Note Pins 3 & 5 are Dummy Terminals

* Based on maximum flux density of 5,000 gauss. (approx. value series connection).

** Use prefix "EC"-, for epoxy molded units rather than "PCC-", e.g., PCC-1-37 becomes EC-1-37 when epoxy molded.

SPECIAL "PC" COMPONENTS

Signal maintains a unique department which specializes in the design and production of "PC" type transformers and chokes.

It is equipped with the most modern automated coil winding and lamination stacking machinery. Specialized production test equipment assures uniform, high quality transformers at the most economical price. This facility is being constantly improved and expanded to meet the growing demand for our designs.

The "PC" items shown here are stocked in depth at our factory for immediate delivery. However, they represent only a small fraction of our total shipments. The major portion consists of custom designs or variations for our customer's special requirements.

Please contact us for prompt quotations on any of your special requirements for "PC" or other bobbin wound components.

METHOD OF DETERMINING SECONDARY CURRENT RATINGS

RECTIFIER TYPE	FILTER TYPE	RMS SECONDARY CURRENT
Full Wave Center-Tap	Choke Input	.7 X DC amps
Full Wave Center-Tap	Capacitor Input	1.2 X DC amps
Full Wave Bridge	Choke Input	= to DC amps
Full Wave Bridge	Capacitor Input	1.8 X DC amps

Signal's PC Transformers are constructed of prime raw materials using Class S insulation and nylon bobbins with PC pins molded directly in the bobbin wall. They are black varnish impregnated and 100% tested for all parameters before shipment.

Units are available with either 115V or 230V primaries, 50-500HZ. Dual secondaries provide two outputs, or secondaries may be series or parallel connected. This results in a wide variety of output combinations. Load regulation is limited to a maximum of 20%.

SOLA ELECTRIC SB
DIVISION OF SOLA BASIC INDUSTRIES

CONSTANT VOLTAGE TRANSFORMERS

SOLA® CVS-HARMONIC NEUTRALIZED TYPE

Sola CVS type transformers contain less than 3% total rms harmonic content in the output. Recommended for all AC applications where harmonics can affect operation, CVS types are the only constant voltage transformers with built-in harmonic neutralizing circuits. CVS transformers use no filters and therefore do not need extra capacitors and noisy chokes. CVS transformers are smaller and more rugged than transformers employing filters for wave-shape improvement. Regulation is ±½% for an input range of ±15% of nominal voltage.

SOLA® CVN-NORMAL HARMONIC TYPE

Sola CVN type transformers provide the same ±½% regulation as the sinusoidal series. CVN transformers contain an average of 20% rms harmonic content and are recommended for electrical loads not affected by harmonics, such as solenoids, relays, filaments and where rectification is required.

SOLA® ELECTRONIC POWER TYPES

Sola constant voltage transformers are available in electronic-power component types providing a regulated source of plate and filament voltages. The filament type (CVF) provides 6.0 or 6.3 volts of output regulated within ±1% over line variations of ±15%. The combination plate-and-filament type (CVE) regulates within ±3%.

Both types provide filaments with stabilized voltage supply, thus contributing greatly to reliable operation, long component life, and considerably reduced service cost of the equipment.

CORD/RECEPTACLE ADAPTER KITS

Adapter kits may be used when the convenience of input plug and output receptacle is preferred to the standard arrangement of terminals in the transformer housing. See accompanying chart.

Adapter Kit code designates type of adapter required to convert standard internal wiring hook-up to line cord and plug input and plug receptacle output.

Adapter Code	Adapter Kit Catalog No.	Input Cord	Output Connections
a	999-005	2-wire	2-wire receptacle
	999-019	3-wire	3-wire receptacle
b	999-009	2-wire	2-wire receptacle
	999-020	3-wire	3-wire receptacle
c	999-104	2-wire	2-wire receptacle
	999-105	3-wire	3-wire receptacle

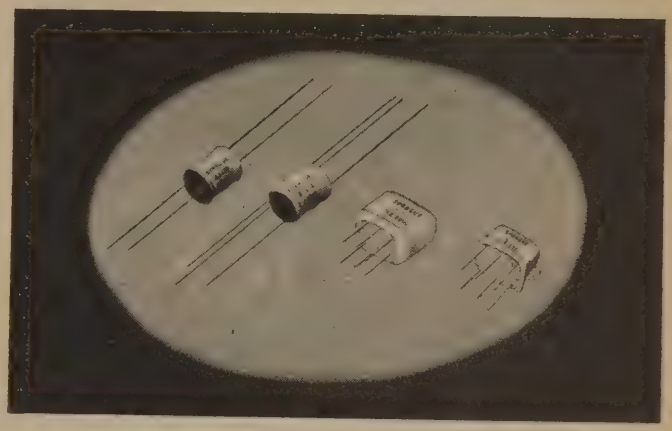
SPRAGUE PULSE TRANSFORMERS



Type 11Z

TRIGATE® PULSE TRANSFORMERS

FLEXIBLE LEAD AND PRINTED WIRING BOARD DESIGNS FOR LOW-COST SCR CIRCUIT APPLICATIONS

- Specifically Designed For Commercial and Industrial SCR Triggering Applications Where Low Cost and Excellent Performance Are Required
- Single-ended Pulse Transformers Are Designed With Leads Especially Intended For Mounting On Printed Wiring Boards; These Units are Self Supporting
- Balanced Pulse Characteristics and Energy Transfer Between Windings
- Minimum Saturation Effect To Allow Operation Where Increased Pulse Widths Are Required
- Fast Pulse Rise Time and Increased Current Capability To Prevent SCR di/dt Failure
- Operating Temperature Range of −10 C to +70 C
- For Complete Technical Data, See Latest Issue of Sprague Engineering Bulletin 40003

Note 1—SM series are two hole mounting with holes on center line. #4-40 Pem nuts are fastened to the bracket.

Note 2—#6-32 Pem nuts on bracket are standard.

Note 3—#8-32 Pem nuts on bracket are standard.

- All primaries 380-1000 cps
- Dielectric test voltages:
  PRIMARIES 1500 Volts RMS
  SECONDARIES 1500 Volts RMS
- Epoxy resin used as encapsulant
- Prices subject to change without notice

STERLING TRANSFORMER CORPORATION

transistor transformers

STERLING TRANSFORMER

UNIVERSAL DC POWER MODULE TRANSFORMERS

High reliability transformers having a tapped primary and single or dual secondary windings which may be connected F.W. bridge or F.W. center tap so as to obtain a wide range of DC voltages and current ratings.

INPUT PRIMARY 115 volts 50-500 cps

STERLING TRANSFORMER CORP.

STERLING TRANSFORMER

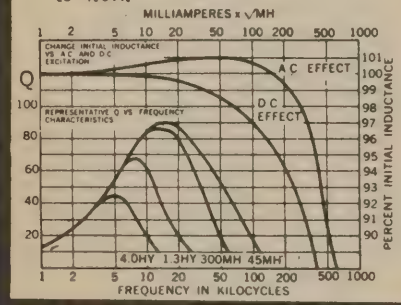
hi-Q toroidal inductors

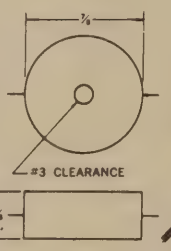
MANUFACTURED TO MIL-T-27A. ALL HERMETICALLY SEALED UNITS (STYLE H) ARE MIL TYPE TF4RX20YY

- ALL MOLDED UNITS STYLE M ARE MIL TYPE TF5RX20ZZ
- ALSO TOROIDAL INDUCTORS IN OTHER SIZES AND VALUES AVAILABLE ON SPECIAL ORDER.
- MOLYBDENUM PERMALLOY POWDER CORES USED IN ALL UNITS.

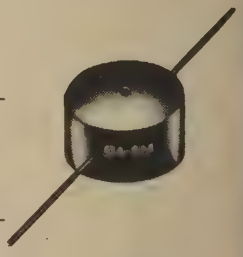


STYLE F
- ALL INDUCTORS SHOWN AVAILABLE IN OPEN STYLE F.

QA SERIES



FREQUENCY TO 20KC•ACCURACY ± 2%



The QA series is designed to optimize small size and high "Q" for miniaturized applications. These units are available on special order with stabilized cores and inductance from 1MH to 4.0H.

AVAILABLE ON SPECIAL ORDER
HERMETICALLY SEALED

Part No.	Inductance	Approx. DCR Ohms	Approx. Distributed Capacity PF	Net Price 1–9 pcs. Style F	Style M
QA-1	5MH	2.5	30	5.28	6.93
QA-2	10	5	33	5.28	6.93
QA-3	15	8	34	5.45	7.10

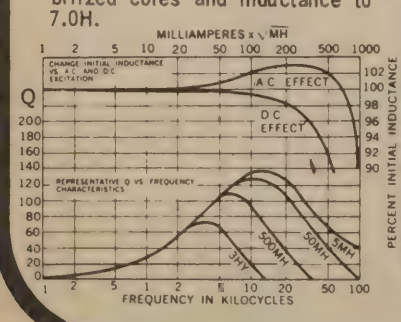
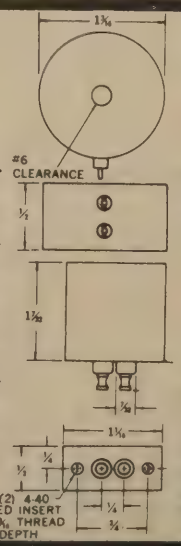
QA-7	100	50	42	6.00	7.81
QA-8	150	80	44	6.22	8.03
QA-9	200	120	45	6.33	8.14
QA-10	300	150	46	6.44	8.42
QA-11	500	290	48	6.55	8.75
QA-12	1.00H	530	51	7.48	9.63
QA-13	1.50	825	53	7.65	10.56



MOLDED STYLE M

Encapsulated in Epoxy Resin. Pigtail leads for printed circuit applications.



QB SERIES

FREQUENCY TO 20KC•ACCURACY ± 2%

The QB series is designed for airborne applications where stable high "Q" is needed with minimized size and weight. Available on special order with stabilized cores and inductance to 7.0H.

Part No.	Inductance	Approx. DCR Ohms	Approx. Distributed Capacity PF	Net Price 1–9 pcs. Style F	Style H	Style M
QB-1	5MH	1.1	38	4.73	8.20	5.80
QB-2	10	2.1	40	4.73	8.20	6.38
QB-3	15	3.3	42	4.73	8.20	6.55
QB-4	20	3.7	43	4.79	8.31	6.66

QB-6	50	11	47	4.95	8.42	6.88
QB-7	100	22	49	5.12	9.30	6.93
QB-8	150	34	50	5.28	9.46	7.10
QB-9	200	47	52	5.56	9.90	7.37
QB-10	300	60	53	5.67	10.18	5.83
QB-11	500	95	55	5.83	10.40	7.65
QB-12	1.00H	213	57	6.22	10.89	8.20
QB-13	1.50	335	59	7.10	11.44	8.91

MOLDED STYLE M

Encapsulated in Epoxy Resin. Silver plated turret lugs.

HERMETIC STYLE H

Hermetically sealed in metal case. Teflon terminals assure permanent seal at temperature extremes.

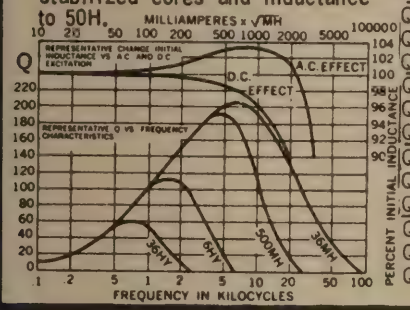
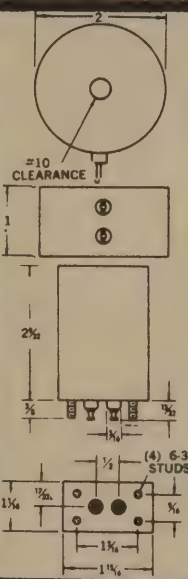
MOLDED STYLE M
Encapsulated in Epoxy Resin. Silver plated turret lugs.



HERMETIC STYLE H
Hermetically sealed in metal case. Teflon terminals assure permanent seal at temperature extremes.



QD SERIES

FREQUENCY TO 10KC•ACCURACY ± 2%

The QD series is designed for very high "Q" in the audio band allowing for application in sharp frequency filters with high power levels and low losses. They are excellent for tuned transformers and oscillators. Available on special order with stabilized cores and inductance to 50H.

Part No.	Inductance	Approx. DCR Ohms	Approx. Distributed Capacity PF	Net Price 1–9 pcs. Style F	Style H	Style M
QD-1	20MH	1.0	97	8.58	12.76	10.46

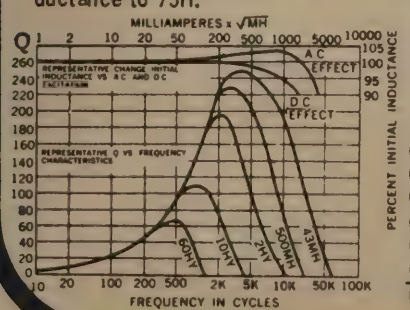
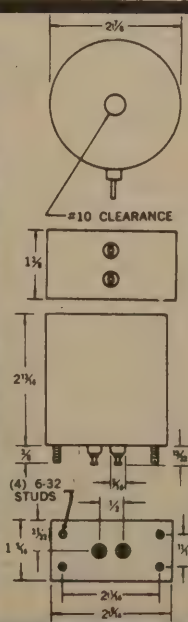
MOLDED STYLE M
Encapsulated in Epoxy Resin. Silver plated turret lugs.



HERMETIC STYLE H
Hermetically sealed in metal case. Teflon terminals assure permanent seal at temperature extremes.



QE SERIES

FREQUENCY TO 15KC
ACCURACY ± 2%

The QE series is most widely used in low audio frequency applications where high "Q" is essential. They are used where inductance stability over a wide voltage range is required. Available on special order with inductance to 75H.

Part No.	Inductance	Approx. DCR Ohms	Approx. Distributed Capacity PF	Net Price 1–9 pcs. Style F	Style H	Style M

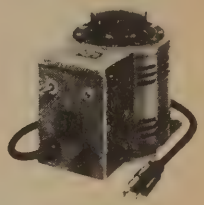
120 VOLT VARIABLE ISOLATION TRANSFORMERS

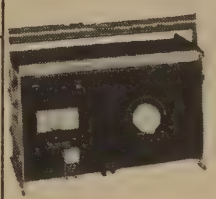
STACO isolated variable autotransformers provide a means for smooth control of an electrically isolated AC voltage output. Uncased models offer isolated, non-isolated voltage doubler, and series connections with proper external hook-up. Cased models feature circuit breaker, switch pilot light, output voltmeter 3-wire grounded cord, plug, and matching receptacles. Cased models available in isolated connection only. Ratings shown are for isolated connections.

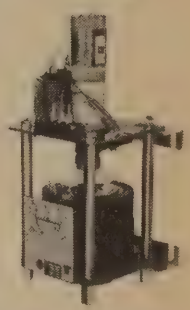
Mfr's Type No.	Volts	Output Amps	KVA	Size	Weight (Lbs.)	Price
J401	0-140	4.0	.56	$6^{1}/_{8} \times 6^{5}/_{8} \times 4^{7}/_{8}$	13.0	82.00
J901	0-140	9.0	1.26	$8^{9}/_{32} \times 7\frac{3}{4} \times 5^{1}/_{8}$	25.0	110.00
EJ401V	0-140	4.0	.56	$9\frac{1}{2} \times 12^{15}/_{16} \times 6^{3}/_{8}$	26.0	110.00
EJ901V	0-140	9.0	1.26	$11\frac{1}{4} \times 14^{9}/_{16} \times 6^{5}/_{8}$	36.0	155.00

EJ201V, EJ401V, EJ901V have a 0-140 VAC and 0-120 VDC at full rated current available at isolated banana receptacles.

DELUXE VARIABLE AUTOTRANSFORMERS







STACO offers a selected group of variable autotransformers with new style, broad applications, and a unique combination of practical features. Suitable for use in any industrial application, classroom or laboratory. All units provide continuous voltage control over a wide range, and all are protected against short circuit. Convenient controls provide error-free operation and distortionless adjustment of AC voltage.

E501V, E501VA, E501VAW, E1010V, E1010VA, E1010VAW have isolated AC and DC outputs of 10% of the output current rating of the unit. Outputs are available at isolated banana receptacles.
V = Voltmeter A = Ammeter W = Wattmeter

STACO Variable Autotransformers

STACO Variable Autotransformers are precision built to exacting tolerances from the finest materials available.

Staco's new improved design provides long life with negligible maintenance, high efficiency and regulation, greater power to size ratio. Staco designs permit replacement of competitive equipment or previous Staco models without modification.

Models are available in various configurations from 1.75 to 300 amperes output. Choose from panel mounted units, cord and plug types or deluxe fully enclosed portable models, with or without metering. Staco products represent 25 years experience in providing safe and dependable control of power.

Contact your local representative for full details or write the factory for our new Product Guide.

POWERSTAT® *Variable Transformers now*

New epoxy-coated POWERKOTE Coils make the POWERSTAT line the most outstanding value in variable transformers today. *Without increase in price, size or weight,* only POWERSTAT Variable Transformers give an average of 20% higher current ratings, 10:1 greater overload capability, longer life, greater resistance to fungus, salt spray and other contaminating atmospheres. POWERKOTE Coil commutator bars are embedded in place preventing steady-state operating temperature and severe overloads from distorting the commutator.

POWERSTAT Variable Transformers are designed to deliver continuously adjustable voltage from a-c power lines. They introduce no waveform distortion and feature rugged construction, precious metal plated commutators, excellent regulation, high efficiency and conservative ratings. All manually operated types listed in the charts except the 10B-12, EN116B-EN216B and EN117B-EN217B Series are available with motor drives if desired. Motor-driven speeds are 5, 15, 30 or 60 seconds for full range travel on all except types having -4, -5, or -6 suffixes which do not offer the 5-second speed. Single types in the 116B-216B, 117B-217B, 126-226 and 136B-236B Series are also offered with 2- or 3-wire cord-plug sets. 1156D-1256D Series types are available in ratings to 244 kva.

ADJUSTABLE SPEED DRIVES

All motor-driven units in the 116B-216B, 117B-217B, 126-226, 136B-236B and 146-246 Series are available with adjustable speed drives which permit the output voltage of the transformer to be controlled over the full range of zero to maximum output voltage at speeds ranging from 5 seconds to 200 seconds. All control circuitry is solid-state and adaptable for present speed systems. The Adjustable Speed Control Potentiometer BHP65455-G1 can be remotely located from the variable transformer.

VOLTBOX® A-C POWER SUPPLY

Contains POWERSTAT Variable Transformer, voltmeter, three output receptacles, two 5-WAY Binding Posts, "on-off" switch, line-load meter switch, fuse and six-foot cord-plug. Type UC1MB ratings are 120 volt, single phase 50/60 hertz input and 0-140 volt 10 ampere, 1.4 kva output.

IN SECTIONS 2100, 3500, AND 4000

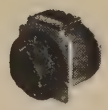
POWERSTAT® Variable Transformers



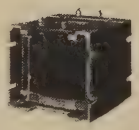
NOW WITH POWERKOTE® COILS

40-VOLT SERIES

Meet high current, low voltage requirements of low voltage power supplies and a wide range of transistor circuit applications. Manually-operated and motor-driven single, 2- and 3-gang single phase types available.

TYPE 10B-40

TYPE 21-40



40-VOLT SERIES

INPUT		OUTPUT						
			Const. Current Load		Const. Impedance Load			
Volts	Hertz	Volts	Max. Amps.	Max. KVA	Max Amps.	Max. KVA	TYPE	Ship. Wt. Lbs.
Single Phase								
40	60	0-40	7	0.28	9	0.36	10B40	3½
			18	0.72	22	0.88	21-40	6
			25	1.0	30	1.2	116BU40	11

LINE CORRECTORS

Used to correct line voltage variations to maintain a constant output voltage or to supply a limited range of output voltage from a stable a-c source. Manually operated and motor-driven types available.

TYPE LC2106D

TYPE 5MBLC2115E

LINE CORRECTOR SERIES

INPUT		OUTPUT				
Volts	Hertz	Volts	Max. Amps.	Max. KVA	TYPE	Ship. Wt. Lbs.
Used as Line Corectors — SINGLE PHASE						
95-135	50/60	115	52	6.0	LC2106D	80

205-250	50/60	230	120	27.5	LC2228E	205
400-520	50/60	460	40	18.4	LC2418E	205
Used as Line Correctors — THREE PHASE						
195-255	50/60	230	50	20.0	LC3220YD	241
195-255	50/60	230	113	45.0	LC3245YE	615
195-255	50/60	230	175	70.0	LC3270DE	795
400-520	50/60	460	33	26.3	LC3425YD	230
400-520	50/60	460	100	79.7	LC3475YE	630
470-500	50/60	460	131	104	LC34100YE	630

When units of the LC series are used as limited range adjustable transformers the input voltage is the output voltage shown in the above chart and the output voltage is the input voltage shown in the above chart

OIL-COOLED AND EXPLOSION-PROOF

Oil-cooled units substantially increase ratings above equivalent air-cooled types and provide a measure of safety. Explosion-proof models are Underwriters' Laboratories listed for Class 1, Group D service. Both are manually operated only.

OIL-COOLED
TYPE 0-116B

EXPLOSION-PROOF
TYPE X-116

OIL-COOLED

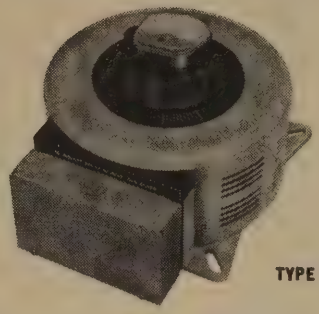
STATIONARY METERED KNOB
POWERSTAT® Variable Transformers



- FOR BACK-OF-PANEL OR GENERAL UTILITY MOUNTING
- ACCURATE VOLTMETER REMAINS STATIONARY INSIDE KNOB RIM. . . DOES NOT TURN WITH THE KNOB
- AVAILABLE IN TYPES TO 4 KVA
- MAXIMUM APPLICATION FLEXIBILITY
- SAVES PANEL SPACE, WIRING AND INSTALLATION COSTS

TYPE VS116B

TYPE VS3PN126

TYPE VS146T

TYPE VS150

GENERAL UTILITY MOUNTING – Single units (those listed in charts without -2 or -3 suffixes) in the 116B-216B, 117B-217B, 126-226, 136B-236B and 146-246 series are also available with knobs incorporating direct-reading voltmeters. Voltmeters remain stationary as the knob rim is turned, have an accuracy of ±3% of full scale and are insensitive to stray magnetic fields. When ordering, add VS prefix to the type number given in the charts.

BACK-OF-PANEL MOUNTING – Standard cataloged POWERSTAT Variable Transformers in the 21-22 through the 146-246 series designed or adaptable for back-of-panel mounting can be combined with Metered Knob Assemblies. Models for 120 volt service require Metered Knob Assembly VS150 having a 0-150 volt scale and units for 240 volt use require Metered Knob Assembly VS300 having a 0-300 volt scale. Existing models can be retrofitted also.

ENCLOSED LABORATORY
POWERSTAT® Variable Transformers

Portable, single phase units having grounded NEMA cord-plug assembly, on-off switch, output receptacle, pilot light and fuse. The handle is integrally designed and the panel controls are recessed. A slot is provided at the rear of each unit to accept wall hanger brackets supplied with the assembly. Types N21, N116B, N116BK, N116BL and N116BLK have POWERKOTE Coils.

METERED KNOB types N116BK and N116BLK have metered knobs to conveniently measure load voltage without the necessity of providing a separate voltmeter. The knob is designed so that the voltmeter remains stationary as the knob is turned to vary the voltage, assuring accurate readings and maximum meter visibility.

PARALLEL HOOKUP

TODD SYSTEMS "HIGH CURRENT TRANSFORMERS & CHOKES" are designed for use in high power rectifier circuits, and high current A.C. applications. "TODD ENGINEERED" designs feature a nominal temperature rise of 45°C., at full load, thus providing outstanding overload capacity. All designs utilize extremely low regulation, varying from 10% in the smallest to 1% in the larger units.
Four styles . . . select the type best suited for your lab, test rigs, OEM or production equipment

STYLE B: • "Open Frame" Bracket Mounted
• Double Vacuum Varnish Impregnated

STYLE BE: • Conforms to MIL-T-27B
• Epoxy Encapsulation added to Style B

STYLE V: • Fully Enclosed in Metal Shells
• Ease of "Wiring with Leads"
• Attractive Appearance
• Dbl Vacuum Varnish Impregnated

STYLE CM: • Hermetically Sealed to MIL-T-27B
• Environment Proof
• Attractive Gray Finish
• Permanent Name Plate

SCREW TERMINALS

HIGH CURRENT CHOKES — 50/500 HERTZ — DIMENSIONS REFER TO HIGH CURRENT XFMR SKETCHES

- **Matching styles complement high current transformers**
- **Wide variety of compatible current ratings**

INDUCTANCE VARIATION

Graph indicates typical variation of inductance (%) when used at D.C. currents (%) other than the rated values.

Chokes operated at D. C. currents higher than rated value must be run on an intermittent basis to avoid overheating.

Case A

Case A

Triad J Series offers flexibility enabling your amplifiers to exceed broadcast standards. Although economy in construction has cut costs, these transformers approach and closely approximate performance characteristics found in more costly hermetically sealed parts. Single hole mounting provides for rotation for maximum reduction of hum . . . alloy shielding gives you 40-60 db hum reduction (60-80 db in Types A-11J & A-12J) . . . you can obtain wide frequency ranges . . . flexible leads facilitate ease in mounting . . . input units are electrostatically and magnetically shielded . . . light weight and encased in Triad's satin smooth baked gray enamel cases, 1⅜" diameter, 1¾" above chassis . . . legible circuit diagrams are permanently affixed to every case.

Combined PLATE and FILAMENT Transformers "100" Series

Never have the outstanding features of Triad Combined Plate and Filament Power Transformers been available at such realistic costs. No quality or performance requirement has been overlooked ... specify Triad and be certain. Shielding, impregnation, chatter freedom ... to Triad's demanding quality control standards.

CHOPPER INPUT TRANSFORMERS

Triad Chopper Input Transformers provide exceedingly close balance between the two halves of the primary winding . . . minimum noise in microvolt ranges of input signals is assured with Triad's special core treatment techniques. For demanding transistor and tube applications, Triad's special design capabilities have an outstanding record. For special applications, consult Triad.

TOROIDS

Triad toroids may be ordered with standard leads in strong plastic coating, or epoxy molded encapsulated per Specification MIL-T-27A; TF5RX20ZZ. To specify molded toroids with gold-plated fixed terminals, an "A" should be added to the full type number; for example, EM-001A.

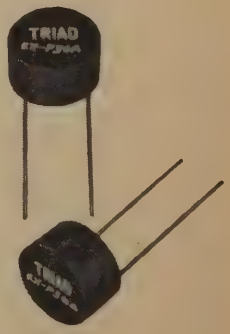
CT For Center Tap. †Split secondary.

Sub-miniature Encapsulated TOROIDAL INDUCTORS

Triad sub-miniature toroidal inductors, designed for quick, easy printed-circuit board mounting, are now stocked for immediate delivery in a range of standard ratings from 50 micro-henries to 400 milli-henries. Many uses, especially in airborne telemetering applications incorporating Triad's sub-miniature filters FL-384 through FL-388. Case size of units is 7/16 inch diameter by ¼ inch high. Providing an optimum combination of high Q and extremely small-size, this series is ideal for printed board, transistor or vacuum tube application.



Triad sub-miniature inductors are toroidally wound on permalloy powdered cores. Encapsulated in high temperature epoxy resin. Weldable or solderable leads of gold plated nickel alloy. Highly resistant to severe acceleration, shock or vibration. Manufactured to MIL-T-27B, Grade 5 Class S (MIL type TF5SX20ZZ).

NOTE: Ma. DC maximum is for approximately 5% drop in inductance. Those figures marked * will give less than 5% inductance drop but should not be exceeded under operating conditions.

Inductance tolerance of EX-P05A through EX-P60A is ±5%; EX-001A through EX-400A is ±2%.

Prices subject to change without notice. Net prices shown for 1-9 quantity. For 1 to 249 pieces, see your stocking Triad Distributor for quantity discount schedule. For 250 or more pieces, contact your Triad Representatives or call the factory.

SHIELDING

P-1—One nickel alloy high permeability shield — 45db. reduction in pickup.
P-3—Two nickel alloy shields interleaved with one heavy copper shading ring — 70db. reduction in pickup.
P-5—Three nickel alloy shields interleaved with two heavy copper shading rings— 95 db. reduction in pickup.

Prices subject to change without notice. Net prices shown for 1-9 quantity. For 1 to 249 pieces, see your stocking Triad Distributor for quantity discount schedule. For 250 or more pieces, contact your Triad Representative or call the factory.

NEW ULTRAMINIATURE TRANSFORMERS & HIGH Q COILS

BIT-250* A COMPLETELY NEW DEVELOPMENT IN TRANSFORMER TECHNOLOGY

WEIGHT 1.1 GM.

NOTES

- Frequency response: ±2 db, 300 Hz — 250,000 Hz @ 1 MW Ref. level
- Dielectric strength tested @ 200V RMS
- Designed and tested to full MIL-T-27C environmental requirements
- MIL Grade 4, metal-encased, ruggedized
- Lead Material: Gold-plated ribbon-style Kovar, solderable and weldable — MIL-STD 1276A Type K

PACKAGING

Size reduction without loss of performance is achieved by major reduction of air gaps in the magnetic circuit. Core permeability closely approaches the theoretical maximum for material and structure.

Materials, dimensions and surface finish are identical with IC Flat Pack standards. Removable support protects terminal alignment prior to final assembly. This insulated support allows testing in conventional jigs.

RELIABILITY

Cylindrical bobbin-winding techniques eliminate corner stress normally found in fine-wire windings of conventional rectangular structures.

Lead arrangements and terminations have been designed to maximum reliability under thermal shock and temperature cycling.

FLEXIBILITY

These units are designed to afford maximum flexibility of application.

Transformers are 7-terminal types, with center-tapped primaries and split secondaries. When connected in parallel, split-winding secondaries provide ¼ the impedance and twice the DC current capability as series connections.

Inductors in the stock line include both single-winding and split-winding types.

Leader may be bent for plug-in PC application.

AUDIO & POWER TRANSFORMERS AND MAG AMPS

DO-T200* SERIES, ULTRAMINIATURE PLUG-IN TRANSISTORS TRANSFORMERS

Manufactured and successfully tested to complete environmental requirements of MIL-T-27C. Most Ruggedized MIL Structure, Grade 4, Metal Encased. MIL types TF4RX13YY, TF4RX16YY. Immediate Delivery From Stock. Full Conformance to MIL Mounting Requirements. Solderable and Weldable Leads. Hermetically Sealed. Straight Pin Terminals. Excellent Response. High Efficiency. Low Distortion. Leads are ⅞" long, .016 Dumet wire, gold plated, and may be either welded or soldered. They are uninsulated and are spaced on a .1" radius circle. In pulse coupling impedance matching applications (when measured with a 30 microsecond input pulse voltage wave), typical values for these transformers are: 5% or less droop, zero overshoot, and less than 10% backswing. Also see **UTC page 9 for other DO-T family constructions.**

U. S. PAT. NO. 2,949,591; others pending.

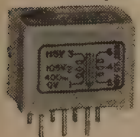
‡DCma shown is for single ended usage. For push pull, DCma can be any balanced value taken by .5W transistors. Where windings are listed as split, ¼ of the listed impedance is available by paralleling the winding.

NEW LINE OF SOLID STATE "MAS"* PUSH-PULL MAGNETIC AMPLIFIERS

For other Magamps see UTC page T-7.

The "MAS" magamps operate on an input of 115 V 400 Hz with an output of ±7.5 V DC, 1000 ohm load and have 2 isolated control inputs. These magnetic amplifiers afford a **power gain of approximately 30,000.** The power input and output are also completely and individually isolated. The "MAS" magamps are manufactured to MIL-T-27C standards. Units are housed in a hermetically sealed steel case with plug-in octal compressed glass terminals. The "MAS" magamps are 3 inches high with a 1½ inch diameter and weighs approximately ½ pound.



The "MAS" magamps have many advantages over other active circuit elements such as tubes, transistors: • Long life and years of maintenance free operation due to magnetic characteristics and solid state elements. • Ruggedness can withstand high shock, vibration, radiation, and moisture. • Reliability — can withstand 10 times overloads and operate into short without damage.

Possible applications include: • Control Amplifier • Photocell • SCR Controls • Strain Gauge Amplifier • Meter Preamps • Thermocouple • Differential Amplifier • Signal mixing, summing, integration • Hydraulic Servo Valve Driver • Servo Motor • Linear Amplifications of Transducer Signals.

NEW
DI-T200* SERIES TRANSISTOR TRANSFORMERS

(ALSO SEE UTC PAGE 8 FOR DO-T200)

These revolutionary transistor transformers embody the same rugged reliable construction afforded by the unique winding techniques and physical construction found in the DO-T & DI-T transformers. DI-T200 series differ by having straight pin, 1" long, .017 d. Dumet wire, gold plated leads.

PRECISION SCOTT-T REFERENCE TRANSFORMER NEW SRC-10*

Designed, Manufactured and Successfully Tested to Complete MIL-T-27C Specifications

Used in the precise conversion of three wire synchro information to equivalent resolver information. Two outputs 90° apart are obtained, which can be utilized in analog and digital computer application or coordinate transformation applications. Mil type TF4SX09AJ.

Special custom built units with other electrical values are available to your requirements

Input 90V 60/400 Hz 3 Phase high impedance suitable for synchro output.
Output 1) 3V @ .25 MA } 2 Phase Output.
2) 3V @ .25 MA }

a) Magnitudes of output voltage matched within 0.25%.
b) Phase angle of output voltages is 90° ± .225°.

AJ case see page 18

PIP* SERIES TRANSISTOR PULSE TRANSFORMERS

UTC's PIP series of subminiature transistor type pulse transformers is designed to give a maximum of component density in equipments, their configuration being especially compatible with transistors. The design is based on the UTC DO-T and DI-T series to impart exceptional reliability. PIP-1 through PIP-9 have a ratio of 4:4:1, PIP-10 through PIP-12 have a ratio of 5:3:1. All units are checked and adjusted in a transistor test circuit to give the required pulse width.

Hermetically sealed, manufactured and guaranteed to MIL-T-20138B by full environmental testing . . . all units, completely METAL CASED, MIL type TP6RX4410CZ. See UTC pages T-1, T-7 for other miniature pulse transformers.

All Units Individually Adjusted to Parameters Shown in Table

TRANSISTOR TRANSFORMERS

Designed, Manufactured and Successfully Tested to Complete MIL-T-27C Specifications.

TRANSISTOR SUPPLY TRANSFORMERS

Primary 115V. 50/60 Hz (tapped on H-143 thru H-146 for dual secondary voltages). DC ratings are approximate, based on silicon bridge rectifier (except H-141, H-142 also shown F.W.CT.). Choke input DCV is based on 10% voltage drop in choke. Condenser value, C, is in 1000 mfd. H-141, H-142, H-147 listing under "Secs in parallel" is single winding. All units MIL type TF4RX02.

AUDIO TRANSFORMERS

Frequency response 300-10,000 Hz ± 2 db. Split 600-ohm units provides for 600 ohms CT and 1000 ohms. Electrostatic shielding provided on W-784, W-785 and W-786. No. W-783 has center-tapped secondary for 90K CT or 22.5K CT. All units in AJ case (Pg. 18) Wt., 0.6 lb.

HERMETIC COMPONENTS

Designed, Manufactured and Successfully Tested to Complete MIL-T-27C Specifications.

HERMETIC AUDIO UNITS

RC-25 RC-50 FH SM

These extremely compact units are proved to specifications of MIL-T-27B. Response & level ratings: RC-25: Similar to Ouncers for case (1 13/32" x 6 1/64" x 1 1/16" h. 1.5 oz.). RC-50: Similar to ultra compact units for case (1 5/8" x 1 5/8" x 2 3/4" h. 8 oz.). SM: Similar to SSO units for case (1 1/4" x 1 1/2" x 2 3/32" h. 0.8 oz.). FH: 2 7/32" x 2 3/32" x 3/4", h. .8 oz.

HERMETIC SEALED POWER and PLATE TRANSFORMERS

H-114, H-115, H-117 have terminals opposite mounting.

Power transformers: primary 115V, 60 Hz suited to 50*-1000 Hz service. Plate transformers: primary 105/115/210/220 volts, 50/60 cycles. "L" ratings are choke input . . . "C" ratings are condenser input. H-80 thru H-197 MIL type TF4RX03, H-110 thru H-117 MIL type TF4RX02. The tapped high voltage winding provides either of two secondary voltages for greatest versatility. The power transformer listings indicate DC voltages and permissible currents for both choke and condenser input filters, as well as for military and industrial applications.

"W" suffix units designed for full wave center tap and full wave bridge application. Center tap of secondary may be disconnected from ground.

MAT* MAGNETIC AMPLIFIERS FOR SERVO MOTOR APPLICATIONS

For NEW Magamps See UTC Page 8

VACUUM TUBE TYPE

The MAT 1-4 Magnetic Amplifiers are exceptionally stable units designed for the control of 2 phase, 115V., 400 Hz servo motors. They are compact . . . hermetically sealed . . . magnetically shielded . . . and meet MIL-T-27C and MIL-E-5400 Specifications. The output is sinusoidal, amplitude variable, and phase reversible. Control is provided by a dual triode such as 12AU7 operating with a plate voltage of 115 volts, 400 Hz, or higher. The signal to the triode grids can be polarity reversible DC or phase reversible 400 Hz with or without suppressed carrier modulation. These units eliminate DC power requirements as well as temperature sensitive dry disc rectifiers. The high input impedance provides minimum loading on sensing elements and high power gain. Ringing at low load level has been reduced to a minimum through high internal damping factors. The power output figures are conservative . . . power gain of the *Magnetic Structure* is approximately 40 . . . response time approximately 7.5 milliseconds. The maximum null voltage is 3 volts RMS. For single phase supply voltage the load capacitor should effect 90° phase shift with motor load . . . for 3 phase, 30° phase shift.

MAT-11 115V.-400 Hz to two 28 Volt 2A windings for 56 VCT-.2A or 28V.-.4A RC-37 (UTC pg. T-9) case. MIL type TF4SY02YY

MAT-65 115V.-60 Hz to 8.5 VCT @ 500 ma & 63 VCT @ 300 ma. FA case (pg. T-12). MIL type TF4SX02FA.

ULTRASHIELDED POWER-LINE ISOLATION TRANSFORMERS

Simulates battery operation for critical circuits requiring extreme isolation from power line.

HIT*

Designed to give the ultimate in isolation, for line-powered equipment, which formerly could only be obtained from battery power. The effective capacity coupling between primary and secondary windings is less than 0.1 MMFD. For this purpose shields are individually terminated to allow maximum flexibility. Input and output terminals are brought out on opposite sides of a special housing in order to maintain the excellent isolation between line and load.

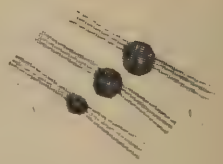
PRECISION MINIATURE WIDE APPLICATION PULSE TRANSFORMERS MANUFACTURED & GUARANTEED TO COMPLETE MIL-T-21038B

UTC miniature, wound core, pulse transformers are individually precision adjusted in standard test circuits to close tolerances. They are high reliability units, hermetically sealed by vacuum molding and suited for service from −70° C. to +130° C. Wound core structure provides excellent temperature stability (unlike ferrite). Designs are high inductance type to provide minimum of droop and assure true pulse width. H-45 thru H-57 ratio 1:1:1. H-60 thru H-69 ratio 4:4:1. Others ratio 5:3:1.



Also see pulse units on UTC pages 7 & 9.

HIPERMALLOY* TRANSFORMERS

Hipermalloy audio and power transformers are specifically designed for portable and compact service. High fidelity though light in weight and dependable. The frequency characteristic of the Hipermalloy audio units is uniform from 30 to 20,000 Hz. They incorporate a Hipermalloy nickel iron core and hum balanced coil structure. The rugged die cast case is of high conductivity alloy finished in grey, arranged for mounting with the terminals either up or down. DC in Primary shown is maximum unbalanced.

COMMERCIAL GRADE COMPONENTS

DIMENSIONS, COMMERCIAL GRADE "RC" CASE

Performance insured during constant usage due to the ruggedness of this vacuum impregnated component with special sealing compound. Case, finished in light gray enamel, is ready for mounting on chassis. (All audio components linear).

PLATE TRANSFORMERS

Primaries for 105, 115, 220, 230 volts; 50/60 Hz. For reduced power, secondary can be cut in half, using 220 v. primary on 110 volts; may be used on 25 to 43 Hz in this case. "W" suffix units designed for full wave center tap and full wave bridge application. Center tap may be disconnected from ground.

MINIATURE, OUNCER, SUBOUNCER & SUB-SUBOUNCER UNITS

SUBOUNCER*& SUB-SUBOUNCER*AUDIO TRANSFORMERS

TRANSISTOR & TUBE TYPES HERMETICALLY SEALED

Designed, Manufactured and Successfully Tested to complete MIL-T-27C Specifications.

UTC SSO-#P and SO-#P units are ideal miniaturized components having high efficiency and wide frequency response. Special nickel iron core materials and winding methods provide exceptional performance and reliability.

SO-#P UNIT Dim. ¾x1x²³⁄₃₂" Pin Length ¼" Wt. .....05 lb.

SSO-#P UNIT Dim. ¾x⅞x⅜" Pin Length ¼" Wt. .....04 lb.

SML-70 ¾x³¹⁄₆₄x⅜" Wt. .2 oz.

These units are vacuum molded to MIL Grade 5. They employ 50 mil deeply anchored pin terminals ideally suited for printed circuit and transistor application. Terminals are strong enough to support these light weight units.

The UTC SML-70 is an ultra miniature transformer providing high shielding, extremely low insertion loss with wide band response, 200 Hz to 20 kHz. These units are provided with pin terminals (.025 dia.) strong enough to support the unit and are ideal for printed circuits.

DIMENSIONS, SPECIAL SERIES TRANSFORMERS

G-1 thru G-4 G-5 thru G-12

UTC Special Series transformers are specifically designed for amateur and popular-priced PA service. These units are finished in a rich, commercial type medium gray enamel. A recessed terminal strip is provided, permitting above chassis or breadboard wiring in addition to standard chassis type.

PHOTOFLASH TRANSFORMERS

STANDARD 982

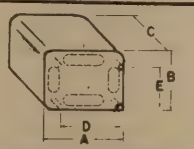
Can be used for either standard (Amglo type) or trigger (Sylvania type) multiple flash tubes. Circuit details included with transformer.

PF-1 Primary for 115 volts, 50/60 Hz. Secondaries for power supply delivering 2200 volts DC to condenser up to 100 Mfd. Compound sealed in G-3 (UTC page T-11) case 2⅛ x 2¾ (3¾ including flanges) x 2½ inches high. Wt. 2 lbs.

PF-3 Trigger Transformer 15 KV peak. ⅞ O.D.x3 long. Weight 2 oz.

PF-6

TRANSISTOR TYPE



These are miniaturized light weight units for transistor type photoflash supply.

PF-5 Primary for 115 volts, 50/60 Hz or for 4½ V. battery switched by PF-6 inverter transformer. Output delivers 400 V. DC when used in voltage doubler circuit to charge photoflash capacitor (typically 40 watt-Sec.). G-1 case (UTC page T-11)

PF-6 Inverter transformer transforms 4½ V. DC from battery to input for PF-5 stepup transformer. Ouncer case (UTC page T-11)

PF-7 Trigger transtormer. Shorting .25 mfd. capacitor (charged to approx. 225 V. DC) across terminals 1-2 produces 6 KV pulse at terminal 3 for triggering flash tube. ⅞" Dia. x ¹⁵⁄₁₆"; Wt. ½ oz.

LINE VOLTAGE ADJUSTERS WITH METERS (FIG. H SEE PG. 17)

The perfect answer to abnormal or fluctuating line voltage. Adjust switch so that meter reads at red line and you know that your equipment is working at correct voltage. These units combine a tapped auto-transformer with a switch and meter in a compact, rugged assembly. The nine-tap switch provides for line voltage of 60 to 140 volts on 115 volt output models and 160 to 240 volts on 230 volt output model. All units are designed for 50/60 Hz service and come complete with 6 foot input cord and plug and outlet receptacle.

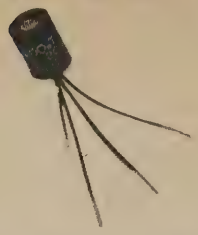
SIGNALLING & CONTROL TRANSORMERS (FIG. HSEE PG.17)

Primary 110-220 volts, 50/60 Hz — Secondary
4/8/12/16/20/24 volts



High power transformers suitable for operating relays, sirens horns, gongs, etc. from 115 V. 50/60 Hz line. These units have four secondary terminals providing 4, 8, 12, 16, 20 and 24 volt output. The volt ampere rating is based on the 24 volt secondary tap with corresponding reduction at the lower voltages. Underwriters' approved primary leads are employed, and screw-type binding posts.

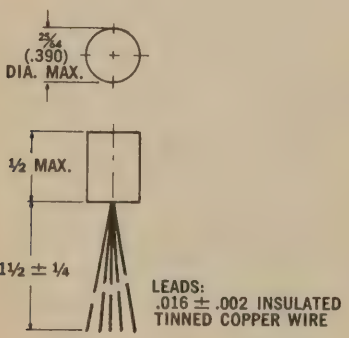
I-DO-T™ & I-DI-T™ TRANSFORMERS & INDUCTORS

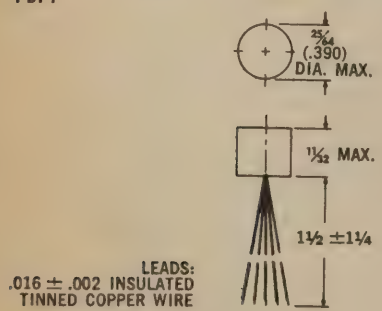
PACKAGING

UTC's plastic casing is designed for protection to 85°C. The bobbin is completely rigid and the wire turns are circular to reduce turn corner stress and assure uniform wire lay. External leads are rigidly anchored internally to withstand a 10 lb. pull. No tapes are used. Insulated leads are .016" diameter tinned copper. Units mount vertically or on side and can be wave soldered.



PERFORMANCE

In power handling capability and reliability coupled with small size, I-DO-T and I-DI-T transformers are unprecedented for industrial use. Electrical parameters and areas of application exceed conventional transformer capabilities.



The curves on this page show the performance of these units in comparison to those of similar size units offered by other manufacturers.

I-DO-T and I-DI-T transformers are industrial quality counterparts of UTC's DO-T and DI-T line of Mil-spec transformers. Environmental specifications, such as hermetic sealing, have been relaxed to reduce the cost. Electrical performance is identical.

POWER TUBES—TETRODES & PENTODES

TYPE NO.	FILAMENT Volts	FILAMENT Amps	MU GRID #1 TO GRID #2	MAX. DISS. WATTS	TYPICAL OPERATION PLATE Volts DC	PLATE Amps DC	PLATE Output Watts	GRID Volts DC	GRID mA DC	SCREEN Volts DC	MAX. FREQ. MHz Full Input	INTERELECTRODE CAPACITANCE—pF G.P.	G.F.	P.F.	DESCRIPTION
SD605	2	3.45		CCS=2x7.5 ICAS=2x10 PTTS=2x25	PTTS 580	PTTS 200 mA	PTTS 66	PTTS −88	PTTS 3.8	PTTS 176	175	0.15	Input 8.8 Output 4.1		Radiation cooled, beam power tetrode which provides full output power in less than ½ second. It is designed for use as an RF power amplifier, oscillator, and frequency multiplier in mobile transmitting equipment up to 175 MHz.
SD646	6.3	120	7.5	6k	5.5k	1.7	grounded grid 6.3	−115	25	600	250	Input 48 Output 15.8		0.16	Air cooled coaxial power tetrode designed for use as a linear RF power amplifier in VHF television service.
SD647	8	120	8.5	12k	7.5k	2.5	grounded grid 13k	−125	90	650	250	Input 53.5 Output 17.7		0.1	Air cooled coaxial power tetrode designed for use as a linear RF power amplifier in VHF television service.
SD648	4.2	53	16	1.5k	3k	700	930	−23	60	500	250	Input 30 Output 10		0.1	Air cooled coaxial power tetrode designed for use as a linear RF power amplifier in VHF television service.
SD652	6.3	120	9	6k	6k	1.5	5.7k	−75	70	500	110	0.3	Input 70 Output 16		Air cooled coaxial power tetrode of all metal-ceramic construction. It is designed for use in VHF transmitter final amplifiers with transistorized drivers. It incorporates a unique new design called inverted construction which utilizes the center contact as the control grid contact. This innovation precludes the need for crossover wiring when the tube is to be used as a grounded cathode amplifier in a cavity type circuit.
SD653	8	120	8	6k	7.5k	2.4	11.7k	−90	175	175	110	0.3	Input 85 Output 17		
RS1032C	4.1	130	6	10k	5k	3	11k		120		790	0.22	53	0.09	Forced-air cooled power tetrode designed especially for UHF television transmitters.

THYRATRONS-HYDROGEN

TYPE NO.	PEAK FORWARD ANODE VOLTAGE MAX.	PEAK ANODE CURRENT MAX. (AMPS)	AVG. ANODE CURRENT MAX. (mA)	PULSE WIDTH MAX.	DESCRIPTION
6268/4C35	8,000	90	100	2 μsec.	These tubes are used as drivers for pulsing magnetrons and other oscillators and as high speed switches. Hydrogen-filled, they have extremely low deionization time. They are zero bias tubes, triggered by a positive grid pulse. Maximum pulse repetition frequency (prf in pulses per second) will depend on the peak forward anode voltage (epy in volts) according to formula: $(epy)^2 \times (prf) = 2.6 \times 10^{11}$ max.
6279/5C22	16,000	325	200	2 μsec.	Completely interchangeable with 4C35 in every respect except that it has self-contained source of hydrogen providing life expectancy of minimum 1000 hours.
					Completely interchangeable with 5C22 in every respect except that it has self-contained source of hydrogen providing life expectancy of minimum 1000 hours.

THYRATRONS-MERCURY VAPOR & INERT GAS-TRIODES & TETRODES

TYPE NO.	FILAMENT		PLATE DISSIPATION WATTS	MU	TRANSCONDUCTANCE (MICROMHOS)	PLATE		POWER OUTPUT CHARACTERISTICS	MAX. FREQ. MHz	CAPACITANCES pF			DESCRIPTION
	Volts	Amps				Volts	mA			G-P	Input	Output	
6923/EA52	6.3	0.3	—	—	—	1000 V at <100 MHz fo[1] 1000 x f at >100 MHz	0.3	—	1000	—	0.5	—	Disc-seal, vacuum diode for UHF voltmeters and monitoring devices. Anode pin connection adaptable for use as probe contact.
EA53	6.3	0.3	—	—	—	Inverse 1000 V at <1000 MHz fo[1] 1000 x f at >100 MHz	0.3	—	1000	—	0.5	—	Disc seal, vacuum diode for UHF voltmeters and monitoring devices. Anode pin connection suitable for use as probe contact. Coaxial filament connection suited for use in coaxial probes.
EFP60	6.3	0.37	2	—	25,000	300	20	—	—	0.004	9.2	6	Secondary emission pentode for wide band amplifier application where stability and high ratio of transconductance to capacities is important. Used in high speed computer service and high quality TV applications.
6Q4/EC80	6.3	0.45	4	30	12,000	550	15	15 dB gain at 300 MHz (Bandwidth 4.5 MHz)	500	0.06	5.4	3.4	Radiation-cooled triode, button type base, indirectly heated cathode. For use as amplifier and mixer up to 500 MHz. Ideally suited for UHF television, balloon sondes, measuring equipment, etc.
6R4/EC81	6.3	0.24	5	16	5,500	300	27.7	Power output 1.1 W at 750 MHz	1200	1.5	1.7	0.5	Radiation-cooled triode, standard button base, indirectly heated cathode. Used as oscillator up to 1200 MHz. High efficiency at high frequencies.
7699	6.3	0.6	6	—	10,500	275	90	—	500	0.15	6.4	1.6	Wide band push-pull amplifier tube for use in test instruments, distributed amplifiers and computers. Push-pull construction offers high gain band width product coupled with low output capacitance.
8254	6.3	0.185	1.5	—	14,500	110	22	—	Z in= 450 Ω at 250 MHz	1.9	3.5	0.3	Special quality triode for use as an amplifier in probes.

[1]*fo = 100 MHz*

RECTIFIERS-DIODES

TYPE NO.	FILAMENT		FIL. HEATING TIME (SEC.)	TUBE DROP (VOLTS)	PEAK INVERSE ANODE VOLTS	ANODE CURRENT		SURGE CURRENT	TEMPERATURE	RANGE (°C)	DESCRIPTION
	Volts	Amps				Peak Amps	Average Amps	Amps	Ambient	Mercury	
3B28	2.5	5.0	5	10.0	10,000	1.0	0.250	—	—	—	Xenon gas filled half-wave rectifier with wider temperature ranges than mercury-vapor tubes. Used largely by armed services to replace 866-A's.
4B32	5.0	7.5	30	10.0	10,000	5.0	1.25	50.0	—	—	Xenon gas filled half-wave rectifier with wider temperature ranges than mercury-vapor tubes. Used largely by armed services to replace 872-A's.
249-B	2.5	7.5	15	15.0	7,500	2.5	0.640	—	—	+25 to +70°	Convection-cooled mercury-vapor half-wave rectifier. Used in most Western Electric r-f equipment.
575-A (SEE 7136)											
673	5.0	10.0	30	10.0	15,000	6.0	1.5	60.0	—	+20 to +50°	Convection-cooled mercury-vapor half-wave rectifier. Refer to 6693 for improved version.
857-B	5.0	30.0	60	10.0	22,000	40.0	10.0	400.0	—	+30 to +40°	Mercury-vapor half-wave rectifier with low voltage drop. Extremely popular in most high power broadcasting stations. Convection cooled.
866-A	2.5	5.0	20	10.0	10,000	1.0	0.250	—	—	+25 to +70°	Mercury-vapor half-wave rectifier of Amperex own design. More rugged trouble-free operation at only slight additional cost. Convection cooled.
869-B	5.0	18.0	60	10.0	20,000	10.0	2.50	—	—	+30 to +40°	Mercury-vapor half-wave rectifier. Refer to type 6508, economy version.
869-BL	5.0	18.0	60	10.0	20,000	10.0	2.50	—	—	+30 to +40°	Electrically same as 869-B. Base has flexible filament leads with spade lugs for better, low-resistance contact with socket.
872-A	5.0	7.5	30	10.0	10,000	5.0	1.25	50.0	—	+20 to +60°	Mercury-vapor half-wave rectifier. Universally used by almost every user and designer of H-V equipment. Convection cooled.
6339	6.3	1.5	30	—	WITH LIQUID COOLING: 16,000 10,000	0.250 0.400	0.065 0.100	—	−65 to 165°	—	High vacuum clipper diode and rectifier. Miniature version of 3B29 for liquid immersion cooling or air operation.
					WITHOUT COOLING — AIR OPERATION: 12,000	0.200	0.050	—	−55 to +85°	—	
6508	5.0	12.5	90	12.0	21,000	10.0	2.5	100.0	—	+25 to +45°	Mercury vapor rectifier for relatively high voltage and current. A high quality, long-life tube priced lower than any tube in its class on the market.

RECTIFIERS-DIODES (Continued)

TYPE NO.	FILAMENT Volts	FILAMENT Amps	FIL. HEATING TIME (SEC.)	TUBE DROP (VOLTS)	PEAK INVERSE ANODE VOLTS	ANODE CURRENT Peak Amps	ANODE CURRENT Average Amps	SURGE CURRENT Amps	TEMPERATURE Ambient	RANGE (°C) Mercury	DESCRIPTION
6693	5.0	11.5	60	12.0	2,500 15,000	10.0 12.0	5.0 3.0	200.0 120.0	+15 to +55° +15 to +35°	+25 to +75° +25 to +55°	Single-anode, mercury vapor rectifier with ratings, intermediate between standard types 575A and 869B. Delivers 9 amps up to 12 kV in a full wave, 3 phase power supply. Three tubes in a three phase half-wave power supply deliver 6 kV at 9 amps using only one filament transformer. Has large contact area, industrial base preventing base contact oxidation. Priced low for replacement market and original equipment.
7136	5.0	11.5	60	12.0	15,000	12.0	2.5	120.0	+15 to +35°	+25 to +55°	Single anode, mercury vapor, high voltage rectifier. Plate current ratings intermediate between types 575-A and 6693. Cathode and anode design similar to 6693 but with 575-A base. Recommended replacement for 575-A in older equipment. For new equipment design, the 6693 is recommended.
8008-AX	5.0	7.5	30	10.0	10,000	5.0	1.25	50.0	—	+20 to +60°	Mercury-vapor half-wave rectifier similar to 872-A characteristics; with heavy long pin industrial base. Used by armed services and in commercial applications. Convection cooled.
8020-AX	5.0	6.0	5	200V at 100 mA	40,000	0.750	0.100	—	—	—	Half-wave, high vacuum rectifier with high inverse voltage and low average current. Used in radar and precipitator power supplies.

COUNTING SELECTING and INDICATING TUBES

TYPE NO.	FILAMENT Volts	FILAMENT Amps	Maintaining Voltage (V)	Maximum Current (A)	Counting Rate per Sec. (Max)	Bias (V)	Minimum A-K Ignition Voltage (V)	K_c Reset Voltage (V)	DESCRIPTION
E37D/E1T	6.3	0.3	—	—	100K	—	—	—	Special beam deflecting decade counter with numerals 0 to 9 for scalers, computers, etc.
6977[1]	1.0	0.3	Anode: 50 DC	—	Zero light output at 3.5 grid volts. Maximum light output at 0 grid volts.			—	Subminiature vacuum triode with fluorescent anode particularly suited for transistorized circuits. 20,000 hour life.
Z303C	—	—	186 to 196	300	4K	+35 Guide −20 Cath.	—	−120	Cold cathode bi-directional visual indicating decade counter tube.
Z502S	—	—	186 to 196	300	4K	+35 Guide −20 Cath.	—	−120	Cold cathode bi-directional visual indicating decade selector tube.
Z503M	—	—	108	60	—	—	129	Ext'ing 150 V	Cold cathode decade indicator tube.
Z550M	—	—	82	3 mA	—	Fires on 5 V above starter common voltage.		—	Cold cathode decade numerical indicator tube especially designed for transistorized circuits.

[1]Available to Military Specifications.

COLD CATHODE GAS FILLED NUMERICAL INDICATOR TUBES

TYPE NO.	DISPLAY Characters	DISPLAY Character Size	DISPLAY Color	DISPLAY Arrangement	SUPPLY VOLTAGE (VOLTS)	EXTINGUISHING VOLTAGE VOLTS (MAX)	ANODE CURRENT (mA)	OPERATION
ZM1000 ZM1002	Digits 0 to 9 and decimal point	0.6" high	Bright Red	Vertical Numerals 14 pin T 5½ Envelope (Side Viewing)	170	118	2.5	Cold cathode numerical indicator. Can be driven by integrated circuit or discrete circuitry. ZM1002 is a red coated bulb.
ZM1001	Characters +, −, ~, x, y, z	0.6" high	Bright Red	Vertical Characters 14 pin T 5½ (Side Viewing)	170	118	2.5	Special character indicator for use with ZM1000 and ZM1002.
ZM1020 ZM1022	Digits 0 to 9	0.61" high	Bright Red	Vertical Characters End View	170	118	2	Numerical indicator in a round end-view envelope with a red lacquer coating to reduce glare. The ZM1022 has a clear bulb.
ZM1021 ZM1023	Special Characters A, V, Ω, %, ~, +, −	0.6" high	Bright Red	Vertical Characters End View	170	118	2	Special character indicator in a round end view envelope with a red lacquer coating to reduce glare. The ZM1023 has a clear bulb.
ZM1024 ZM1025	Special Characters c/s, kc/s, Mc/s, µs, ms, ns, s	0.61" high	Bright Red	Vertical Characters End View	170	118	2	Special character indicator in a round end view envelope with a red lacquer coating to reduce glare. The ZM1025 has a clear bulb.
ZM1030 ZM1032	Digits 0 to 9	0.6" x 0.4"	Bright Red	Vertical Numerals in 9-pin T 6½ Envelope (Side Viewing)	200	100	4	Two separate anodes and five interconnected cathode pairs provide for simplified drive circuitry. Expected tube life is 20,000 hours. The bulb of the ZM1030 is coated with red lacquer to reduce glare. Tube type ZM1032 has a clear bulb. These tubes are designed to be used with biquinary logic.
ZM1031 ZM1033	Signs + −	0.5" x 0.5"	Bright Red	− Sign, Rear + Sign, Front (side viewing)	170	110	5	Two anodes and two cathodes separated by a shield provide the circuitry. The bulb of the ZM1031 is covered by a red contrast Filter. Tube type ZM1033 has a clear bulb.

COLD CATHODE INDICATOR DIODES

TYPE NO.	BREAKDOWN VOLTAGE V_{IGN} Max. (V)	BREAKDOWN VOLTAGE V_{IGN} Min. (V)	MAINTAINING VOLTAGE V_M Max. (V)	MAINTAINING VOLTAGE V_M Min. (V)	CATHODE CURRENT I_K mA	DESCRIPTION
ZA1001	135	120	95	9	1.5	Shock and Vibration resistant cold cathode, gas filled subminiature diode, designed for switching and stable saw-tooth generator circuits. Operable thru audio frequency range. It may be used in frequency divider chains as in electronic organs.
ZA1002	175	165	109	103	2.0	Switching and light diode intended for logic functions both in sensing and programming circuits.
ZA1004	90	88	*	*	1.0	Shock and vibration resistant close tolerance cold cathode, gas filled subminiature diode with visible glow-discharge for read-out purposes. The tube contains two electrodes, a rod shaped molybdenum cathode and a concentric gauze anode. May be used with signal voltages as low as 3.0 volts depending upon readout circuit mode of operation.
ZA1005	138	108	86	70	5.0**	Cold cathode, gas filled subminiature diode with pure molybdenum cathode designed for firing of silicon controlled rectifiers. It is shock and vibration resistant, has high peak current capability and a minimum life of 4000 operating hours

* *Extinction Voltage $V_{EXT}(MIN) = 83.5$ Volts* ** *Peak Cathode Current = 250 mA*

Cathode Ray Tubes

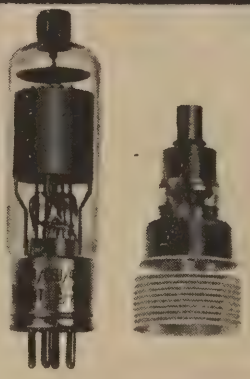
For Oscillographic, electrostatic and magnetic focus deflection (Laboratory, Industrial and Military Scopes). Radar and photographic recording and complete range of phosphors.

Industrial Electronic Tubes

These rugged, premium tube types are preferred wherever assured long term performance and reliability is needed. Offered in a complete range — from miniature versions to older glass construction.

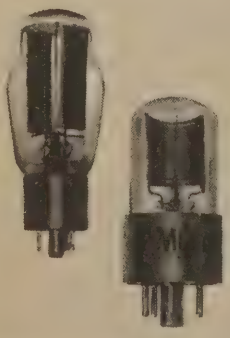
DUTREX INDUSTRIES INC.

the replacement tube specialists.



DU MONT

Dumont special purpose, industrial and receiving tubes . . . unusual types, older numbers and hard-to-get units . . . Dutrex delivers from the largest inventory in the country! And we've been doing this for nearly 14 years with just about any tube required in the maintenance, operation and replacement areas, conforming to E.I.A. specifications. As for price, we always give you a competitive edge. Service? We usually ship within 24 hours of receiving the order. We even have a Golden Label Service for super-rush delivery — at no extra charge! See the Dutrex sales specialists in your area. Find out why distributors and wholesalers have made us their prime source.



Photomultiplier

For use with low levels of radiation in the UV, Visible and near IR. Applications include Photometry, geophysics, scintillation counting, industrial control, medical instrumentation.

Power Tubes

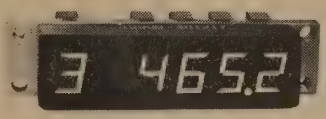
Beam power — air cooled, twin beam power; triodes, naturally cooled and forced air types.

Rectifiers and Thyratrons

High power-half wave and gas types. Mercury vapor-half-wave, low and intermediate power rectifier and detector diodes. Gas type thyratrons — mercury vapor, high and low intermediate power, including cold cathode, triode and tetrode types.

Communications Tubes

A complete group of performance rated types for two-way communications, 6 and 12 volt storage battery, and aircraft communication use.



DU MONT DUTREX INDUSTRIES INC.

ELECTRONS Industrial Components

ELECTRONS HI-CONTRAST DIGITAL READOUT

Electrons Digital Readouts features an easy to read, bright display with low voltage operation from inexpensive integrated circuit modules. Illuminated Segments emit an even distribution (no breaks in light pattern) at the viewing surface. High contrast and brilliance is extended to 150° in any plane, thus eliminating parallax problems. Readouts can be made with any number and combination of digits, spaces and special characters.

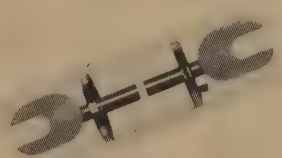
CERAMIC AND GLASS SURGE ARRESTERS

The ELECTRONS EL-2140, EL-2400R and EL-2600SL families of gas surge arresters are representative of the wide range of standard devices available to protect sensitive equipment against transient or lightning induced surges in signal circuits, power lines, radar equipment and antenna feeders.



These gas filled, single- and multiple-gap, fast acting surge arresters provide inexpensive protection unaffected by dust, humidity, or air pressure changes; and as compared with air-gap arresters, maintain a constant firing potential. Virtually open circuit before operation, these protectors do not exhibit the noise generating leakage path inherent in pellet type arresters.

ELECTRONS self healing, gas surge arresters are available with breakdown voltage up to 15,000 VDC.

Send us your requirements; if one of our standard units will not meet them, we can tailor a unit to fulfill them.

θ Rare earth phosphor. φ Sulfide phosphor.

ULTRACOLOR — These tubes are manufactured to all of the essential original equipment specification; will utilize rare earth or sulfide phosphors, new electron guns, and may or may not utilize used glass and other materials.

MONOCHROME — All materials and parts used in the manufacture of General Electric monochrome picture tubes are new except for the envelope which, prior to re-use, has been inspected and tested to meet our high-quality standards.

Industrial Receiving and Communication Tubes

GENERAL ELECTRIC

5654

FIVE STAR TUBES
In industrial and communication equipment — critical sockets where there can be no compromise with electronic tube performance — you can depend on the proven reliability of GE Five-Star tubes. Their high reliability is a result of special design features, special manufacturing processes, special tests, and stabilizing periods.

5670

6146A

INDUSTRIAL RECEIVING TUBES
For industrial and military applications involving electronic instrumentation and control, there is a G-E industrial receiving tube specifically designed to meet your particular requirement.

6661

6688A

ENTERTAINMENT TUBES
G. E. offers a full line of entertainment tubes encompassing the fields of radio, TV, and hi-fi. Featured as a a portion of this line are 26 types specifically designed for high-fidelity monaural and stereo applications.

5963

5965A

COMPUTER TUBES
Two complete tube lines, Computer and Five-STAR Computer, are designed to meet the specialized needs of the computer industry. Outstanding features include: high perveance, low heater power requirements, controlled cutoff characteristics, and long life.

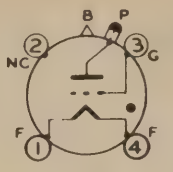
A_1(1) Single Tube Class A Audio Power Amplifier.
A_1(2) Push-Pull Class A Audio Power Amplifier.
AB_1(1) Single Tube Class AB_1 Audio Power Amplifier.
AB_1(2) Push-Pull Class AB_1 Audio Power Amplifier.
■ Absolute Maximum rating.
‡ AC (rms) Plate Voltage.
ç Applied for short interval (2 seconds, maximum) so as not to damage the tube.
* Approximate rating.
AB_2(2) Push-Pull Class AB_2 Audio Power Amplifier.
B(2) Push-Pull Class B Audio Power Amplifier.
B-P Single Tube Class RF Telephony Service.
CCS Continuous Commercial Service.
CF Coated filament (directly heated).
C-P Single Tube Class C Plate-Modulated Telephony Service.
C-T Single Tube Class C Telegraphy or FM Service.
CU Coated, Indirectly Heated Cathode (unipotential).
ICAS Intermittent Commercial and Amateur Service.
(R) Special ruggedized type for sever mechanical environment.



▲ Design-maximum Ratings
TF Thoriated-Tungsten Filament (directly heated).
Metal types are in boldface type.
σ Miniature types.
ρ Plate-to-Plate.
β Class C Amplifier with separate, rectified, unfiltered single phase, full-wave plate supply.
¶ Design-Center Value.
θ Five-Star type.
ε For Both Sections.
= Maximum Signal Value with Sine Wave Signal.
ϕ Peak Value during 15-microsecond pulse with Duty Factor of 0.0012.
§ Per Section.
ω Self-Rectifying Amplifier — Class C.
α Subminiature type.
♦ Supply Voltage.
τ Triode Connected; Grid No. 2 Tied to Plate.
† Zero Signal rating.

16 VALUE-ANALYZED benefits of G E 5-Star Tubes...

- Controlled inside diameter on bulbs reduces vibrational output and microphonics.
- Highly efficient getter performs throughout tube life and guides flash to avoid inter-element leakage.
- Two double mica spacers, with additional anti-leakage slots, brace internal parts, provide superior inter-element insulation and improve vibration characteristics. 12 or 16 contact points give firmer fit between bulb and mount.
- Short, sturdy cages increase rigidity of tube structure.
- Plate ears are embossed for added strength and improved mica fit.
- Smooth grid legs prevent a "sawing" action on the mica, reducing grid vibration and microphonic noise.
- Critical grids are plated with gold or silver to minimize grid emission.
- Passive cathode alloys assure reliability and long life in low-duty cycle circuits where interface tends to develop.
- Outside diameter and density of cathode coating are statistically controlled.
- Low thermo-conductivity cathode tab reduces heat loss.
- Cataphoretic coating of all heater bends after forming insures complete heater-cathode insulation.
- Folded heater design proved most reliable under shock, vibration and heater cycling conditions. Heater is temperature-controlled to further improve reliability and lengthen life.
- Rhenium-tungsten heater material increases tensile strength, reduces brittleness, and allows larger-diameter heater wire.
- Lead-glass stems help ward off glass electrolysis.
- Pins are annealed to prevent glass strain at socket insertion.
- Stem design minimizes welds — fewer points of possible failure — less change of short-causing particles from weld splash.

FOOTNOTES FOR TRANSMITTING TUBE LISTINGS

A Cathode to grid volts.
A_1(1) Single tube class A audio power amplifier.
AB_1(2) Push-pull class AB_1 audio power amplifier.
AB_2(2) Push-pull class AB_2 audio power amplifier.
B Referred to grid terminal.
B(2) push-pull class B audio power amplifier.
B-P Single tube class B RF telephone service.
C Driver power output.
C-P Single tube class C plate-modulated telephony service.
C-T Single tube class C telegraphy or FM service.
C-T (Pulsed) Single tube class C RF pulsed oscillator.
CF Coated filament (directly heated).
CV Thoriated tungsten cathode (indirectly heated)
CU Coated indirectly heated cathode (unipotential).
D Useful power output.
C-G-T Single tube class C grid-modulated video service.
PT Pure tungsten filament (directly heated).
TF Thoriated-tungsten filament (directly heated).
Broadcast tube type.
■ Intermittent Commercial and Amateur Service rating.
[a] Cathode to grid volts.
[b] Referred to grid terminal.
[c] Driver power output.
[d] Useful power output.

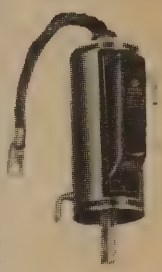
Ignitrons



GENERAL ELECTRIC

Ignitrons are gas-discharge tubes employing a mercury pool as the cathode. The mercury pool cathode provides extremely high emission capability. Initiation of conduction in the ignitron is accomplished by means of a starting electrode called the ignitor. The ignitor is a small rod of highly refractory material which dips into the mercury pool. The passage of ignition current through the ignitor causes a cathode spot to form at the junction of the ignitor and mercury pool. Ionization from the cathode spot spreads throughout the volume of the ignitron and when the anode is positive electrons flow to it. By control of the point in the A-C cycle at which the ignitor is fired the duration of current flow through the ignitron is controlled. The ignitron, therefore, is ideally suited for high current rectification and control service. The following charts present summarized rating information for General Electric ignitrons. All ratings are based on 25-60 CPS operation. For convenience to the user the ignitron types are grouped by typical application service. Many types are rated for more than one service and therefore appear in two or more rating charts. More detailed ratings are available upon request for all of the G E ignitrons listed.

The ignitron has long been recognized as a long life, highly reliable device. As the industry's leading ignitron manufacturer General Electric is pleased to present the information contained in this booklet and invites your inquiry for additional application assistance if required.

For above types, warranty is normally K-1000, however warranty information for specific applications will be supplied upon request.

IGNITRON ACCESSORIES

THERMOSTAT KITS

Kit includes thermostat and spring-loaded fastener in a captive assembly for connection to mounting pad located on ignitron water jacket.

Single-pole contacts perform control functions as shown in chart below.

Kit No.	Function	Contacts	Temperature Open (°F)	Temperature Close (°F)	Termination
N15272AA	Water control	NO	86	96	36-inch leads with spade terminals
N15273AA	Over-temperature protection	NC	125	105	36-inch leads with spade terminals
N15286AA	Water control	NO	86	96	Terminal block
N15287AA	Over-temperature protection	NC	125	105	Terminal block

COOLING CLAMP

Suitable for use with GL-5550, GL-7171 and GL-7703 to accomplish cathode connection and liquid cooling: Cat. No. L 6922259-G5

IGNITOR TERMINAL CONNECTING LEADS

Insulated leads for connection to 0.250-inch diameter ignitor terminals

Cat. No. N 22006LC — 7¾ inches long
Cat. No. N 22007LC — 13½ inches long

QUICK-CHANGE WATER CONNECTORS

Ignitron installation time is reduced through the use of slotted anode and cathode terminals . . . provided as a regular feature on all standard GE welding ignitrons . . . and the use of the quick-change brass water hose connectors shown in table.

Fitting No.	Description	Use with G-E Ignitron Type

B2K16	Plug	

CONDENSED WARRANTY INFORMATION

G-12—
(Rectifier service only.) Warranted for full replacement within one year of service. Expires 18 months from date of sale to ultimate user or two years from date of shipment by GE.

H-12—
Warranted for one year with prorated adjustment after 15 days of service. Expires 18 months from date of sale to ultimate user, 12 months from date of initial installation, or 2 years from date of shipment by GE.

H-24—
Warranted for two years with prorated adjustment after 15 days of service. Expires 36 months from date of sale to ultimate user, 24 months from date of initial installation, or 3½ years from date of shipment by GE.

K-1000—
Warranted for 1000 operations or six months of service with prorated adjustment for the difference between elapsed number of operations and 1000. Expires nine months from date of sale to ultimate user, six months from date of initial installation, or twelve months from date of shipment by GE.

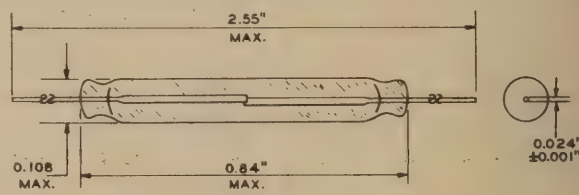
Special Devices — Reed Switches

GENERAL ELECTRIC

In a relatively short period of years, the dry reed switch has begun to play an important role in performing the switching function for a wide variety of electronic/electro-mechanical equipment. Major application, now in general use, range from telephone switchgear, appliances, and data processing units to logic circuitry for industrial controls.

The General Electric reed switch capsule consists of a pair of low reluctance, magnetically actuated, flat metal reeds, hermetically sealed in an atmosphere of dry inert gas. The reeds are of equal length and are supported as cantilevers, overlapping at the center of the glass cylinder where they are separated by a small air gap, thus forming a normally opn Single Pole, Single Throw (SPST) switch.



Type*	Former Designation	MAXIMUM CONTACH RATING			SENSITIVITY		Maximum Initial Contact Resistance In Milliohms	Breakdown Voltage Minimum, 60 cps rms	Life Expectancy In Millions of Cycles 2	MAXIMUM DIMENSIONS IN INCHES			Contacts And Leads	Contact Arrangement
		Resistive Load	Maximum Current	Maximum Voltage	Pull-In Ampere-Turns	Drop-Out Ampere-Turns				Glass Dia.	Glass Length	Overall Length		
MINIATURE — INERT-GAS FILLED

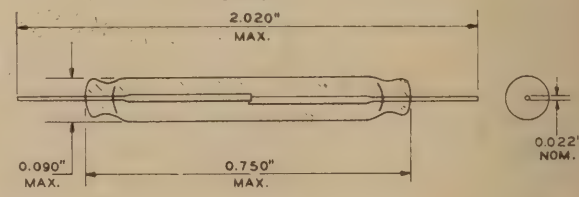
2" — VACUUM														
DRV120	2VR15	—	3.0A, **16**	5000, **16**	125 ± 25, **17**	60 ± 15, **17**	50	7000	—		See Drawing		**18**	**3**

*Types shown here represent only the basic families of General Electric reed switches presently available. Special variations in both electrical and physical characteristics are available.



1 With the exception of Type DRV120, which is a vacuum switch, all switches are filled with inert gas at an internal pressure of approximately ½ atmosphere.
2 Some degradation or improvement in performance may be expected at operating conditions other than those specified.
3 Form A, single-pole, single-throw, normally open switch.
4 Form C, single-pole, double-throw switch in which the reed is maintained against the normally-closed contact by mechanical bias.
5 Sensitivity measured using a 6300-turn coil of #41 wire wound on a 0.8" long bobbin approximately 0.17" in diameter.
6 At 4VA, 25 volts d-c, 60 operations per second.
7 Diffused gold contacts with gold-plated leads.
8 Rhodium-over-gold contacts with gold-plated leads.
9 Sensitivity measured using a 10000-turn coil of #39 wire wound on a 2.0" long bobbin approximately 0.25" in diameter.
10 Full load, 50 volts d-c, 60 operations per second.
11 Diffused gold contacts with both leads tinned.
12 Full load, 125 volts d-c, 60 operations per second.
13 Rhodium-plated contacts with both leads tinned.
14 Full load, 50 volts d-c, 20 operations per second.
15 Immersion gold leads with normally-closed contacts of copper and diffused gold; normally-open contacts of diffused gold.
16 The voltage rating is a "hold-off" value, and the current rating is a measure of the current the contacts will carry but not switch. Maximum permissible switching currents are to be determined.
17 Sensitivity measured using a 5700-turn coil of #36 wire wound on a 2.0" long bobbin having an oval cross-section of approximately 0.5" by 0.28"
18 Tungsten-plated contacts with both leads tinned.
19 Sensitivity measured using a 10000-turn coil of #48 wire wound on a 0.75" bobbin approximately 0.17" in diameter. Miniature coil "A" as per Mil-S-55433A Specification.

■Low-Microphonic †Lower Ratings ‡Higher Ratings •Balanced Sections ϕShorter Envelope ¶Higher Heater Current *General Electric Five-Star Type
▲Electrical and Mechanical replacement for other type listed. May require change in water control or oven temperature protection switches.
§Minor dimensional and voltage differences exist which will not affect interchangeability in most circuits.

This interchangeability listing has been prepared to help you find a GE replacement for your tube requirements. It is believed to be accurate as of date issued. However, no responsibility is assumed by the General Electric Company for its use; nor for any infringements of patents or other rights of third parties which may result from its use.

GTE SYLVANIA

INTRODUCTION

This catalogue contains concise technical data for Sylvania's broad line of Industrial Products.

Products are grouped categorically as shown by the Table of Contents.

A complete Numerical/Alphabetical Index is also provided for easy access to data by type number.

TABLE OF CONTENTS

Introduction 3
Table of Contents 3
Index 4
1. Industrial and Military Receiving Tubes 8
2. GB Gold Brand Tubes for Critical Applications 11
3. Premium Subminiature Tubes 13
4. Power Amplifier Tubes 14
5. Thyratrons 16
6. Ignitrons 17
7. Rectifier Tubes 18
8. Cathode Ray Tubes 19
9. TV Camera Pick-up Tubes 23
10. Video Monitors 23
11. Strobotrons 24
12. Flash Tubes 25
13. Glow Modulators 25
14. Phototubes 25
15. Counter Tubes 26

GTE SYLVANIA

1 INDUSTRIAL & MILITARY RECEIVING TUBES

An exceptionally broad line covering a wide variety of general and specialized equipment needs. Types are designed and manufactured to Applicable Sylvania Industrial and Military specifications for reliability under extreme conditions.

GTE SYLVANIA

2 GB—GOLD BRAND TUBES/for critical applications

An exclusive line of premium electron tubes tailored to the specialized electrical, physical-environmental and long-life requirements of commercial aircraft, manufacturing, process control, mobile communications, broadcasting and TV distribution systems. Features include 10,000-hour life, exceptional stability, maximum uniformity and extreme physical ruggedness.

8 CATHODE RAY TUBES

A line of unparalleled breadth, for industrial and military applications, ranging from spiral accelerator tubes for precision oscilloscopes to special multi-gun designs for highly sophisticated equipment. High, precise standards of engineering, design, and manufacture are followed in the production of all Sylvania CRT's.

9 TV CAMERA PICK-UP TUBES

Vidicons for commercial and industrial television camera applications.

Type	Description	Length Inches	Max. Dia. Inches	Ef/If
1319	Vidicon operable to 0.2 foot candle illumination.	6¼	1	6.3/600
7038	Vidicon operable to 0.2 foot candle illumination.	6¼	1	6.3/600
7325	Vidicon operable to .1 foot candle illumination.	6¼	1.125	6.3/600
7735A, B	Vidicon operable to 0.1 foot candle illumination.	6¼	1	6.3/600
8484	Vidicon similar to 7325 but with greater sensitivity and uniformity. Premium replacement for 7325 and 7735A.	6¼	1.125	6.3/600
8507	Vidicon operable to 0.2 foot candle illumination.	6¼	1	6.3/600

10 VIDEO MONITORS

Type	Description	Model Variations
SDM5305-12	12" Video Monitor of all solid state design offering high definition in raster displays. The module is specifically designed to provide optimum legibility for the presentation of alpha-numeric display information in the form of a dot matrix. Model variations include: AC or DC operation, DC regulation, composite or separate sync, and with or without cabinet.	A (C) -00: 120 VAC; Composite Sync -15: 120 VAC; Composite Sync; Regulated DC -04: 120 VAC; Separate Sync -19: 120 VAC; Separate Sync; Regulated DC B (C) -00: 24 VDC; Composite Sync -04: 24 VDC; Separate Sync (C) - : Denotes Cabinet

Max. Cathode Load Resistor	(Ohms)	150K	150K	150K	50K	50K	50K	50K

© United Technical Publications

We have only one standard 12″ monitor. All three are shown above.

A 12″ monitor is standard in everybody's line.

Except in GTE Sylvania's.

The only thing standard about our 12″ monitor is the size of the CRT.

We can't work magic with a 12″ hunk of picture tube, but you'll be amazed at what we can do with the rest of the unit.

Would you like the controls on the top? Back? Front? Side?

Do you need more space in the upper right-hand corner? Or the lower left? Or maybe you need a little extra space on top.

That's no problem for us because our standard monitor is designed to be flexible.

If you can find the space for a 12″ CRT, we'll find the space for the electronics.

Three versions of our standard monitor are shown above.

Yours could be number four.

Sylvania Electronic Components, Seneca Falls, New York 13148.

AJ2100 SERIES — Except for AJ numbers listed on the price schedule (sockets & adaptors), other AJ numbers refer to special accessories for the RCA 8568 super power Klystron used in very sophisticated Gov't Systems. Orders thru distributors will be handled in same manner as Developmental types. Contact your RCA Distributor for price and delivery information.

DEVELOPMENTAL TYPES — RCA tube type numbers which have an 'A' or 'C' prefix are usually identified as **Developmental** types. Contact your RCA Distributor for price and delivery information.

NOTICE: †Replacement information supplied in this chart is based primarily on electrical and mechanical similarity of the picture tube types covered. The service technician should make certian that replacement is in accord with all safety precautions required by the TV receiver for picture tube insulation or mechanical mounting.

The tube type to be replaced may have a manufacturer's coding prefix such as AN, C, CR, H, HR, OC, RE, REA, etc. Since these prefixes do not affect the electrical characteristics or interchangeability of the type, the prefixes have been omitted from the type numbers. Please consult the RCA Picture Tube Product Guide, PIX-300E, for specific characteristics and replacement information.

1,500,000 TEST HOURS A MONTH

MEANS THE KIND OF QUALITY, DEPENDABILITY AND FEWER CALL-BACKS THAT ZENITH "ROYAL CREST" REPLACEMENT TUBES GIVE YOU!

We spend a lot of time checking Zenith "Royal Crest" circuit tubes. To help you avoid embarrassing and costly call-backs. To give you replacement tubes tested for reliability and longevity.

1,500,000 hours of tube testing are logged each month in Zenith Quality Control Laboratories. And no tube is passed unless it meets the same rigid quality standards as the original equipment used in Zenith products.

Result: a complete line of more than 1,200 "Royal Crest" replacement tubes . . . each one built with Zenith quality for fewer call-backs and longer life.

ZENITH®

THE QUALITY GOES IN BEFORE THE NAME GOES ON®

© United Technical Publications

Mil-W-76B Plastic Wire

alpha

DESCRIPTION: Solid or extra flexible stranded tinned copper, color coded polyvinylchloride insulation. Shielded constructions employ braided TC shields, 80% minimum coverage.

CHARACTERISTICS: Temperature rating −40°C to +80°C (with nylon, 90°C). Resistant to acids, alkalis, oil, flame. moisture and fungus.

***STOCK COLORS:** 1-White, 2-Black, 3-Red, 4-Green, 5-Yellow, 6-Light Blue, 7-Brown, 8-Orange, 9-Gray (slate), 10-Violet (purple), 11-White/Black, 12-White/Red, 13-White/Green, 14-White/Yellow, 15-White/Blue, 16-White/Brown, 17-White/Orange, 18-White/Gray, 19-White/Violet, 20-White/Black/Red, 21-White/Black/Green, 22-White/Black/Yellow, 23-White/Black/Blue, 24-White/Black/Brown, 25-White/Black/Orange, 26-White/Black/Gray, 27-White/Black/Violet.

Mil-W-16878D Plastic Wire

alpha

DESCRIPTION: Stranded tinned copper, color coded polyvinylchloride insulation. Shielded constructions employ braided tinned copper shields, providing 90% minimum coverage.

CHARACTERISTICS: Temperature rating −55°C to +105°C (115°C with nylon). Resistant to acids, alkalis, oil, flame, moisture, solvents and fungus.

TYPE B — UNCOVERED PLASTIC
REGULAR TINNED COPPER CONDUCTOR — 600 VOLTS

Flat Ribbon Cable
MULTI-CONDUCTOR — PLASTIC INSULATION CONDUCTORS PER MIL-16878D — TYPE C — 1000 VOLTS

DESCRIPTION: Each conductor stranded tinned copper, color coded .016" polyvinylchrolide insulation, conductors bonded together to form flat ribbon cable.
CHARACTERISTICS: Temperature rating −55°C to +105°C. Voltage rating 1000 volts. Resistant to acids, alkalis, oil, flame, moisture, solvents and fungus.
COLOR CODE OF CONDUCTORS: 1-White, 2-Black, 3-Red, 4-Green, 5-Yellow, 6-Light Blue, 7-Brown, 8-Orange, 9-Gray (slate), 10-Violet (purple), 11-White/Black, 12-White/Red, 13-White/Green, 14-White/Yellow, 15-White/Blue, 16-White/Brown, 17-White/Orange, 18-White/Gray, 19-White/Violet, 20-White/Black/Red.

Mil-W-5086A

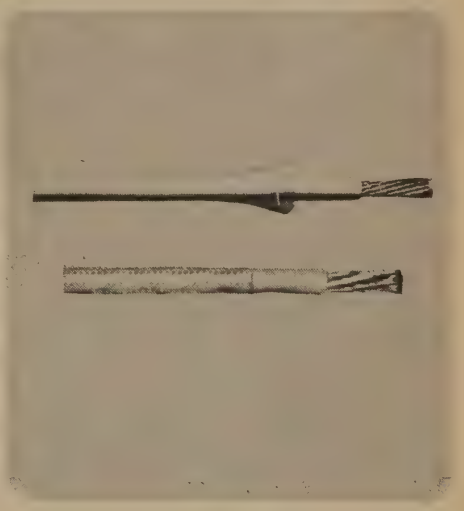
UNSHIELDED AIRCRAFT WIRE FOR ELECTRICAL SYSTEMS

DESCRIPTION:

MIL-W-5086A — Type I — AN-22 thru AN-12 — Single conductor stranded tinned copper, white polyvinylchloride insulation, clear nylon, (polyamide) jacket overall.

MIL-W-5086A — Type II — AN-22 thru AN-12 — Single conductor stranded tinned copper, white polyvinylchloride insulation, white glass braid, clear nylon (polyamide) jacket overall.

MIL-W-5086A — Type II — AN-10 thru AN-0000 — Single conductor stranded tinned copper, white polyvinylchloride insulation, white glass braid, flame retardant nylon lacquered nylon braid overall.



CHARACTERISTICS: Temperature Rating, −55°C to +105°C. Voltage Rating, 600 V.

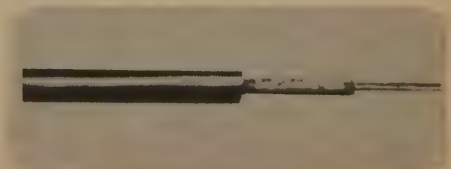
Test Lead Wire



DESCRIPTION: Single conductor, extra flexible stranded tinned soft annealed copper, separator, color coded rubber insulation, smooth satin finish.

APPLICATIONS: As test leads in analyzers, oscillators, multi-meters, and all other types of testing apparatus or wherever an extra flexible insulated wire is required. Heavy Duty type designed for television, therapeutic equipment, analyzers, oscillators, etc.

Suggested operating temperature −20°C to +60°C.

Rayovin Irradiated PVC Hook-Up Wire

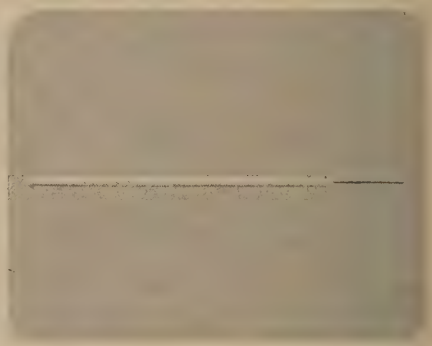
MEETS MIL-W-16878D TYPE B AND U.L. STYLE 1429

New irradiated hook-up wire will not shrink back, melt, blow or deform when soldered. Increased abrasion and cut through resistance.

DESCRIPTION: Solid or stranded tinned copper conductor, irradiated, color coded polyvinylchloride insulation.

CHARACTERISTICS: Type B: Temperature rating 55°C to 105°C, 600 volts.
UL 1429: Temperature rating 55°C to 80°C, 300 volts.
Resistant to acids, alkalis, oil, flame, moisture, and fungus.

APPLICATIONS: The ideal hook-up wire for use in production soldering of tight high density systems.



STOCK COLORS: 1-White, 2-Black, 3-Red, 4-Green, 5-Yellow, 6-Light Blue, 7-Brown, 8-Orange, 9-Gray (slate) 10-Violet (purple).

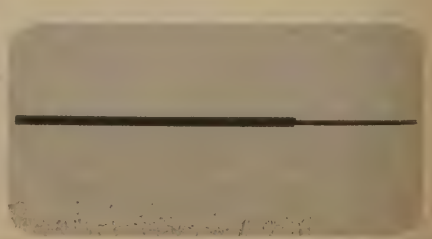
Miniature U.L. Kynar® Insulated Hook-Up Wire

OPERATING TEMPERATURE 125°C 300 VOLTS

DESCRIPTION: Solid, silver-plated, oxygen-free, high conductivity (OFHC) copper conductor, extruded Kynar® (Polyvinylidene fluoride) insulation.



CHARACTERISTICS: Operating temperature through 125°C continuous (U.L. rated at 105°C). Extremely tough; high cut-through resistance. Self-extinguishing; will not support combustion. Resistant to most chemicals and solvents. Excellent ultra-violet and weathering resistance.

APPLICATIONS: Designed for use in automatic wire wrapping equipment for applications in the computer and related industries.

U.L. LISTING: Each spool bears U.L. Label certifying conformance to all requirements of U.L. style 1422.

STOCK COLORS: 1-White, 2-Black, 3-Red, 4-Green, 5-Yellow, 6-Blue, 7-Brown, 8-Orange, 9-Slate, 10-Violet.
Other sizes, colors and put-ups available on special order. Write for quotation.

Unshielded Audio Cable

MULTI-CONDUCTOR — PLASTIC JACKET

alpha

DESCRIPTION: Each conductor, solid or stranded tinned copper, color coded polyvinylchloride insulation, conductors twisted, gray polyvinylchloride jacket overall. Suitable for outdoor installations.

APPLICATIONS: Unbalanced intercom systems. Low voltage relay control cable. P.A. systems. Electronic computer cable. Interconnecting cables. Remote control circuits. Telephones. Telemetering connecting cable. "Baby Sitter" intercom.

CHARACTERISTICS: Suggested operating temperature −20°C to +60°C.

MULTI-CONDUCTOR — SHIELDED

DESCRIPTION: Each conductor stranded tinned copper, color coded polyvinylchloride insulation, braided tinned copper shield (See Chart) over one, two, or three conductors, remaining conductors unshielded and paired, chrome polyvinylchloride jacket overall.

APPLICATIONS: General wiring from station to station where shielded conductor(s) is essential to eliminate cross talk. 1243: Recommended for unbalanced system with remote "break-in." 1243/4: Recommended for balanced systems. 1243/6: Recommended for circuits requiring complete isolation.

CHARACTERISTICS: Suggested operating temperature −20°C to +60°C. Suggested operating voltage 350 volts.

Shielded Plastic Jacketed Cable

alpha

DESCRIPTION: Each conductor tinned copper, color coded polyvinylchloride insulation, conductors twisted. Spiral wrapped or braided copper shield. .020" gray polyvinylchloride jacket overall. Suitable for outdoor installations.

CHARACTERISTICS: Spiral shield makes pigtailing off extremely simple and fast. Excellent for production line work. Provides 85% shielded coverage for audio and RF frequencies. Braided shield provides approximately 75% coverage; is particularly desirable where flexibility is required. The copper shield allows ease of pigtail soldering. Shield construction provides additional cable strength. Operating temperature −20°C to +60°C.

APPLICATIONS: For public address and sound systems, ideal for recording studios, amateur radio transmitters, shielded power or electronic circuits, wherever an economical shielded cable is required.

COLOR CODE OF CONDUCTORS: 1-Black, 2-Red, 3-White, 4-Green, 5-Yellow, 6-Blue.

Shielded Audio & Data Cable

alpha

INDIVIDUALLY SHIELDED MULTIPLE PAIRS—PLASTIC JACKET

DESCRIPTION: Each conductor, tinned copper, color coded, high density polyethylene, conductors twisted into pairs. 22 gauge tinned copper drain wire. Mylar-supported aluminum foil shield, aluminum facing inward. Chrome Grey PVC jacket overall.

CHARACTERISTICS: Mutual conductance between conductors of a pair, 25 pf/ft. Capacitance of a single conductor to shield, 45 pf/ft.

APPLICATIONS: For audio, R.F. and pulse applications requiring superior circuit isolation.

COLOR CODE OF CONDUCTORS: 1-Black p.w. Red, 2-Black p.w. White, 3-Black p.w. Green, 4-Black p.w. Blue, 5-Black p.w. Brown, 6-Black p.w. Yellow, 7-Black p.w. Orange, 8-Red p.w. Green, 9-Red p.w. Shielded Plastic Jacketed Cable

MYLAR SUPPORTED ALUMINUM FOIL SHIELD

DESCRIPTION: Each conductor stranded tinned copper, color, coded polyethylene insulation, conductors cabled, wrapped mylar supported aluminum foil shield, 100% coverage with drain wire* laid parallel, aluminum foil facing outward to provide maximum ground, gray PVC jacket overall.

CHARACTERISTICS: Operating temperature −20°C to +60°C. Operating voltage 400 volts. Lightweight, reduces cable diameter, and provides 100% shield coverage.

COLOR CODE OF CONDUCTORS: 1-Black, 2-Red, 3-White, 4-Green.

Hi-Fi & Stereo Interconnecting Cable Phono Wire

DESCRIPTION: 1115 and 1116 — Each conductor stranded tinned copper, color coded polyvinylchloride insulation, conductors twisted.
1101-1107 — Each conductor stranded tinned copper, color coded polyvinylchloride insulation, conductors twisted with an extra tight lay for flexibility. When shielded, the overall shield has been specially designed for extreme limpness so as not to impede the movement of the phono arm when tracking.
CHARACTERISTICS: Suggested operating temperature −55°C to +105°C.

Shielded Microphone Cable
PLASTIC JACKET

DESCRIPTION: 1702-1706 — Single conductor, stranded tinned copper, white polyethylene insulation, braided or spiral wrapped tinned copper shield, gray polyvinylchloride jacket overall.

1709-1712 — Each conductor stranded tinned copper, color coded polyethylene insulation, cabled with fillers, textile wrap, braided or spiral wrapped tinned copper shield, gray polyvinylchloride jacket overall.

APPLICATIONS: 1702-1706 — All high impedance microphones, lapel, ribbon, velocity, crystal contact, hi-fi interconnecting cables.

1709-1712 — All low impedance microphones — carbon, condenser, dynamic.

CHARACTERISTICS: Suggested operating temperature −20°C to +60°C.

ALPHA No.	No. of Cond.	Conductor Size	Conductor Strand	Nom. Wall Thickness	*Capacity Nom./ Ft.	Sugg. Working Voltage	Type of Shield	Nom. Jkt. Thickness	Nom. O.D.

CELLULAR FOAM POLYETHYLENE INSULATION — PLASTIC JACKET

DESCRIPTION: Single conductor, stranded tinned copper, white foam polyethylene insulation, braided tinned copper shield, chrome gray polyvinylchloride jacket. Two conductors, stranded tinned copper, color coded foam polyethylene insulation, 1 white and 1 black, cabled with fillers, textile wrap, braided tinned copper shield, chrome gray polyvinylchloride jacket.

CHARACTERISTICS: Suggested operating temperature −20°C to +60°C. Low loss foam polyethylene provides lower capacitance and attenuation than standard solid polyethylene microphone cables, thereby increasing the effective length of usable cable without loss of signal.

RUBBER AND NEOPRENE JACKETS

DESCRIPTION: Each conductor stranded tinned copper, color coded rubber insulation, cotton wrap, braided tinned copper shield, tough black rubber or neoprene jacket overall.

APPLICATIONS: 1248-1449 — All high impedance microphone, broadcast and heavy duty studio use, communication and audio systems.
1250-1450/16 — All low impedance microphone, broadcast and heavy duty studio use. Can also be used for control circuits, video and audio interconnection cable, and as electronic power cables.

CHARACTERISTICS: Suggested operating temperature −20°C to +60°C. Rubber jacketed cable suited for standard duty indoor use. Neoprene jacketed cable suited for heavy duty outdoor use and direct burial. Will resist oil, acid, sunlight, aging and abrasion.

alpha

HEAVY-DUTY MULTI-CONDUCTOR RUGGED NEOPRENE JACKET
600 VOLTS

DESCRIPTION: Each conductor stranded bare copper, color coded rubber insulation, cabled with fillers where necessary, wrap over conductors, heavy duty black neoprene jacket overall. 600 volt operating voltage.

APPLICATIONS: Remote control of automatic electrical equipment and sub-stations, telemetering, voltage pressure and motor control, signal transmission. Flexible heavy duty neoprene jacketed cable, recommended for outside installation, cable resists oil, ozone, sunlight, moisture, abrasion and impact.

COLOR CODE: The color code of neoprene jacketed control cables conforms to I.P.C.E.A. standards either with full color code or surface printed with color name and number.

Unshielded Station Control Cable

alpha

HEAVY-DUTY MULTI-CONDUCTOR PLASTIC JACKET
600 VOLTS

DESCRIPTION: Each conductor, stranded bare copper, polyethylene insulation,* .010" polyvinylchloride jacket over each conductor, color coded, cabled with fillers where necessary, moisture resistant tape, black polyvinylchloride jacket overall. 600 volt operating voltage.

APPLICATIONS: Remote control of automatic electrical equipment, recording and relaying devices, telemetering, switchgear operations and indicators, substation operation, temperature voltage, pressure and motor control, dimensional tolerance on automatic quality control.

COLOR CODE: The color code of Plastic-jacketed control cables conforms to I.P.C.E.A. standards either with full color code or surface printed with color name and number.

*16 gauge — .015" Polyethylene Insulation. 14 & 12 gauge — .020" Polyethylene Insulation.

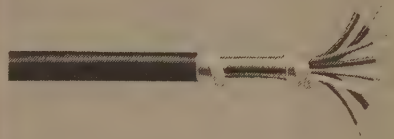
Shielded Control Cable

alpha

DESCRIPTION: Each conductor, stranded tinned copper, color coded rubber insulation, cabled with fillers where necessary, cotton wrap, braided tinned copper shield, tough black rubber or heavy duty black neoprene jacket overall or heavy.



CHARACTERISTICS: Suggested operating temperature −20°C to +60°C.

APPLICATIONS: Cables are extremely flexible for control circuits, video and audio inter-connecting cable, broadcast and heavy duty studio use. Neoprene jackets for outdoor use or where subjected to abuse.

COLOR CODE OF CONDUCTORS: 1-Black, 2-White, 3-Red, 4-Green, 5-Yellow, 6-Blue, 7-Brown, 8-Orange, 9-Slate, 10-Purple, 11-White/Black (Braid), 12-White/Red (Braid), 13-White/Green (Braid), 14-White/Yellow (Braid), 15-White/Blue (Braid), 16-White/Brown (Braid), 17-White/Purple (Braid), 18-White/Slate (Braid), 19-Black/Red (Braid), 20-Black/Yellow (Braid).

Replacement Cord Sets

U.L. AND C.S.A. LISTED

DESCRIPTION: Durable, open end cord replacement set with a flexible high quality black rubber cord. One end has a black molded straight plastic plug, the other end of the jacket is stripped back 1½″, and ⅝″ of the conductors are stripped assuring easy termination into equipment or components. Cord set has a 300 volt rating.

APPLICATION: Replacement cords for direct termination; for office business machines, small electric hand tools, and home appliances which use fractional horsepower motors. 3 conductor cord used when 1 conductor requires grounding.

PVC Retractile Coil Cords Shielded & Unshielded

alpha

RETRACTED LENGTHS—1 FT., 2 FT., 3 FT., 4 FT.
EXTENDED LENGTHS—6 FT., 12 FT., 18 FT., 25 FT.

DESCRIPTION: Durable, long lasting plastic retractile coil cords. Economically priced, but offering maximum flex resistance and long life. Each conductor is stranded tinned copper PVC insulation and PVC jacket over all.

APPLICATION: Heavy duty machinery, electrical tools, mobile and ham radio equipment, head sets. Eliminates hazards and inconveniences caused by tangled straight cords.

CHARACTERISTICS: Suggested operating temperature −20°C to +60°C. 23 AWG conductor—21/36 strands, 120 volts, 1 amp.

COLOR CODE: 1-Black, 2-White, 3-Red, 4-Green, 5-Blue, 6-Yellow, 7-Brown, 8-Orange, 9-White/Black, 10-White/Red, 11-White/Green, 12-White/Blue, 13-White/Yellow, 14-White/Brown, 15-White/Ora·

Retractile Coil Cords

POWER CORDS—NEOPRENE JACKET—U.L. LISTED
RETRACTED LENGTHS 2 FT., 4 FT.
EXTENDED LENGTHS 12 FT., 25 FT.

DESCRIPTION: Durable, quality multi-conductor power cord. Each conductor is stranded copper, with rubber insulation, and a rugged weather and oil resistant neoprene jacket overall.

APPLICATION: Used on electric tools, portable drills, soldering irons, electrical and household appliances, etc., to eliminate hanging wires and to prevent wires from tangling.

CHARACTERISTICS: Suggested operating temperature −20°C to +60°C.

COLOR CODE OF CONDUCTORS: 1-Black, 2-White, 3-Green, 4-Red.

Retractile Coil Cords (Continued)

RETRACTILE POWER CORD SETS
U.L. LISTED
RETRACTED LENGTH 18 IN. — EXTENDED LENGTH 7½ FT.

DESCRIPTION: Coiled power cord with a sturdy molded male plug on one end; on other a portion of the neoprene jacket has been removed with the conductors exposed and stripped for easy termination. Operating voltage, 300 volts.

APPLICATION: Same as power cords, but equipped with a plug on one end.

COLOR CODE OF CONDUCTORS: 1-Black, 2-White, 3-Green.

ALPHA No.	No. of Cond.	Conductor Size	Conductor Strand	U.L. Type	Nom. Coil O.D.	Nom. Cord O.D.

RETRACTILE TEST LEAD WIRE
RETRACTED LENGTH 12 IN. — EXTENDED LENGTH 6 FT.

DESCRIPTION: High grade quality rubber insulation for maximum flex life extruded over a single conductor of extra flexible tinned copper. Available in a 12" retracted length with a 6" straight lead on each end, the cord extends to approx. 6 feet.

ALPHA No.	Conductor Size	Conductor Strand	Amp Rating	Volt Rating	Nom. Coil O.D.	Nom. Cord O.D.	Color Code
650	20	41/36	4	5,000	3/4"	.165"	Black or Red

RETRACTILE COMMUNICATION COIL CORDS
RETRACTED LENGTHS 2 FT., 4 FT. — EXTENDED LENGTHS 12 FT., 25 FT.

DESCRIPTION: Multi-conductor communication cord manufactured with extra flexible #23 AWG-21/36 tinned soft cadmium copper for maximum flex life. Insulated with rubber for communication circuits of maximum 120 working volts. Specially compounded cured neoprene jacket gives long life to the retractile cord.

APPLICATION: Eliminate hazards and inconveniences caused by tangled straight cords in communication equipment, such as telephone car carriers, mobile and ham radio head sets, radio transmitter to receiver head sets, communication cords.

COLOR CODE OF CONDUCTORS: 1-Black, 2-White, 3-Red, 4-Green, 5-Blue, 6-Yellow, 7-Brown.

ALPHA No. 2 Ft. Lengths	ALPHA No. 4 Ft. Lengths	No. of Cond.	Conductor Size	Conductor Strand	Amp Rating	Voltage Rating	Nom. Coil O.D.	Nom. Cord O.D.

RETRACTILE COMMUNICATION CORDS
SHIELDED
RETRACTED LENGTHS 2 & 4 FT. — EXTENDED LENGTHS 12 & 25 FT.

DESCRIPTION: Same as above, except that shielded conductors are individually shielded with a cadmium copper shield to eliminate external electrical interference. Shield can be pigtailed for direct soldering connections.

APPLICATION: Same applications as above, but where a shielded conductor is needed.

ALPHA No. 2 Ft. Lengths	ALPHA No. 4 Ft. Lengths	No. of Cond.	Conductor Size	Conductor Strand	Voltage Rating	Shielding	Nom. Coil O.D.	Nom. Cord O.D.	Color Code of Conductors

			2-24	41/40	75	Individually Shielded			White & Green

MINIATURE RETRACTILE COMMUNICATION CORDS
RETRACTED LENGTH 2 FT. — EXTENDED LENGTH 10 FT.

DESCRIPTION: Small diameter plastic cord with stranded tinned copper conductors for maximum flexibility, insulated and jacketed with polyvinyl-chloride. Each cord is available in a 2 ft. retracted length with a 6" straight lead on each end and extends to approx. 10 feet.

APPLICATION: For low voltage power and communication equipment where miniaturization is required due to space and weight limitations.

COLOR CODE OF CONDUCTORS: 1-Black, 2-White, 3-Green, 4-Red.

Extension Cord Sets

U.L. AND C.S.A. LISTED

alpha

DESCRIPTION: Extension cord sets manufactured for lasting service with a flexible 2 or 3 conductor quality black rubber cord. This rugged cord has a black molded plastic male and female plug on either end to fit conventional sockets and plugs. Extension cords have a 300 volt rating.

APPLICATION: Small business machines, vacuum cleaners, lamps, movie projectors, or any other home appliance. 3 conductor cord used when 1 conductor requires grounding.

E-Z-Strip Lamp Cords

U.L. LISTED

DESCRIPTION: Conductors parallel, stranded extra flexible bare copper, poly vinylchloride jacket overall. Slit in jacket to permit "E-Z" separation.

APPLICATIONS: For line cord on radios, lamps, electric clocks, food mixers and other small instruments and appliances.

CHARACTERISTICS: Suggested operating temperature −20°C to +60°C. Suggested operating voltage 300 volts.

STANDARD SPOOL PUT-UP: 100 FT., 250 FT., 500 FT., 1000 FT.

Neoprene Welding Cable

DESCRIPTION: Stranded bare copper conductor, tape wrap, black neoprene rubber insulation.

CHARACTERISTICS: Lightweight, flexible cables with high resistance to abrasion, impact, flexing, and twisting.

RECOMMENDED CABLE SIZES: The sizes of cable recommended by the Machine Group of the NEMA Electric Welding Section for standard hand welding equipment based on lengths up to 90 ft. that is, 45 ft. of welding cable and 45 ft. of return cable, as as follows:

100-Ampere Welder-4 AWG, 150-Ampere Welder-3 AWG, 200-Ampere Welder-2 AWG, 300-Ampere Welder-1/0 AWG, 400-Ampere Welder-2/0 AWG, 500-Ampere Welder-2/0 AWG, 600-Ampere Welder-3/0 AWG.

The above values for carrying capacity are based on a copper temperature of 60°C and an ambient temperature of 40°C and yield load factors of from approximately 32 percent for size 2 AWG cable to approximately 23 percent for the size 3/0 AWG cable and higher for the smaller sizes. The sizes of the cable generally used range from size 2 to 3/0 AWG. In actual service the load factors may be much higher without overheating the cable as the ambient temperature will generally be substantially lower than 40°C.

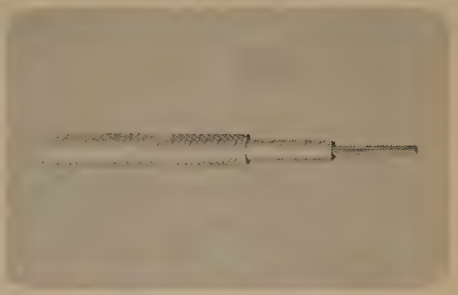
Projector & Arc Lamp Cable

TYPE AA ASBESTOS
SINGLE CONDUCTOR — FLEXIBLE STRANDED

DESCRIPTION: Extra flexible stranded, untinned, annealed copper conductor. Asbestos insulation saturated with flame and heat-resisting compound. White overall asbestos braid, saturated and finished with flame and heat-resisting compound.



CHARACTERISTICS: Maximum operating voltage 300 volts. Maximum operating temperature 200°C.

APPLICATIONS: Recommended for wiring motion picture projectors, arc lamps, search lights, flood lights, spot lights and similar equipment.

Tinned Copper Tubular Braid

TO MIL SPEC QQ-B-575

alpha

DESCRIPTION: A woven tinned copper braid which is manufactured completely round as outlined in Mil Spec QQ-B-575. Each strand of the braid is soft drawn tinned copper wire. The braid is self-supporting and maintains its round configuration. The percentage of shielding coverage is 95% or more when placed over a mandrel of an equivalent diameter to the inside braid diameter.

APPLICATIONS: Maximum shielding against electrostatic interference for wires, cables and other compopents. Also as a protective covering against mechanical abrasion and stresses.

Alpha Teflon Extruded Tubing

DESCRIPTION: Alpha Teflon Tubing is unmatched by any other type of tubing for use in electrical applications at high frequencies and temperatures. Teflon is rated for continuous operation at 250°C, and retains an exceptional toughness and its flexibility throughout its temperature range.

APPLICATIONS: A thin flexible insulation, Alpha Teflon tubing permits a miniaturization and compactness of design never before possible. Invaluable in any application where a high heat resistant, flexible, non-flammable, chemical solvent and corrosion-resistant material is required.

Alpha Zipper Tubing

Select the type of Zipper Tubing desired from the charts below and the required Inside Diameter. When ordering, request as follows: For example, ZIP-31 Tubing in ⅝″ Inside Diameter order — ZIP-31 — ⅝.

A tighter fitting jacket will result when using an I.D. of Zipper Tubing, the same size as, or to the nearest larger size of the O.D. of the cable to be covered. However, in this case, the Zipper Tubing must be closed by manually engaging the tracks.

High Temperature Teflon Tubing

HEAT SHRINKABLE — FIT-500

CHARACTERISTICS: Continuous operating range −67°C to +250°C. Outstanding chemical and solvent resistance. Non Flammable. High mechanical strength and lowest coefficient of friction. Offers all the outstanding physical, electrical and chemical advantages of Teflon, in an easy to use heat-shrinkable, tubing. Has the same high resistance to chemicals and corrosive agents as ordinary Teflon tubing (Alpha TFT-200 and TFT-250). Non-burning, non-corrosive and has excellent electrical characteristics that remain stable throughout its electrical range. When a temperature of 327°C is applied to FIT-500, the tubing shrinks to approximately 65% of its supplied size returning to its original pre-determined diameter. Longitudinal shrinkage is less than 10%. FIT-500 forms a tight, flexible, protective covering for wires, and electronic components, is recommended for use as a mechanical shield and is ideal for friction-proofing.

FIT-500-0	.470″	.000″	.015″	20′	10

How to Apply FIT-500 — Use Alpha HG-2 heat gun to obtain proper heat for shrinkage. When a temperature of 327°C is obtained, the tubing will change from a cloudy translucence to a completely clear appearance. When this occurs, heat source should be removed, and tubing allowed to continue shrinking without applying further heat.

Alpha Polyvinylchloride Plastic Tubing (PCV-105)

DESCRIPTION: The superior mechanical, thermal, and electrical properties of Alpha PVC-105, coupled with its economical cost have led to an ever increasing use of this all-purpose insulating material. Another major advantage of Alpha PVC-105 is its high degree of flexibility, which is maintained even under severe environmental conditions. Rated for temperatures as high as 105°C, PVC-105 has a high resistance to the agents of heat, oil, chemical corrosion and temperature throughout its range. PVC-105 maintains a high dielectric strength that remains unaffected by increasing fungi with no loss in tensile strength, or flexibility. Other features include an exceptional resistance to abrasion and indefinite shelf life.

APPLICATIONS: For general electronic, aircraft and electrical applications involving temperatures as high as 105°C. Especially useful to protect wires and cables subject to abrasion or where a flexible tubing with a high degree of resistivity to oil, chemicals or solvents is necessary. **STOCK COLORS:** 1-Clear, 2-Black, 3-White.

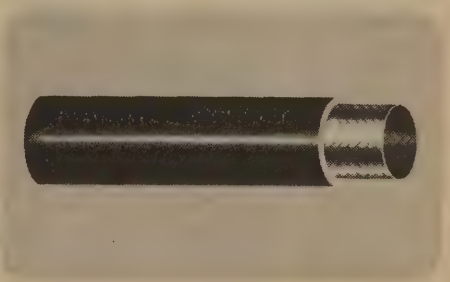
Alpha Plastic Impregnated Fiberglass Tubing (PIF-130)

DESCRIPTION: PIF-130 is the toughest and most pliable of insulating materials and is formulated to provide the maximum in electircal characteristics, chemical resistance, heat stability and abrasion resistance. A Class B, Grade B, insulating material, PIF-130, is recommended for conditions requiring continuous operation at temperatures up to 130°C. Prolonged baking at this high temperature does not affect the tubing's retention of color. The tubing is constructed from an inorganic fiberglass base sleeving coated with a heat resistant, extremely flexible, tough plastic insulation. Alphlex PIF-130 has excellent "cut-through" characteristics and is heat-treated to permanently set the glass fibers assuring perfect roundness and ends that will not fray, when cut. Neither the fiberglass base sleeving nor the plastic coating will support combustion.



APPLICATIONS: Because of its toughness and flexibility the material is widely used where tubing is subject to bending, knotting, and high torque. PIF-130 will not peel or crack or lose its dielectric values even under conditions involving extreme abuse. Other applications include use in electric motors, generator or resistor leads where maximum push-back of insulation is desirable.

STOCK COLOR: Black.

Irradiated Polyolefin FIT-Caps

Polyolefin FIT-Caps are short lengths of semi-rigid Shrinkable Tubing sealed on one end and specifically designed to act as termination caps over wire, cable and splices. Polyolefin FIT-Caps, with controlled shrinkage, form a tight-fitting mechanical bond over terminations. Made of flame resistant, extremely tough, abrasion-resistant polyolefin tubing, the caps shrink and seal the ends of one or more wires, making a firmly encapsulated, moisture-resistant termination. Controlled shrinkage to the correct predetermined size takes place within seven seconds at 275°F to 300°F. Shrinkage Ratio 2:1.

SELF-ENCAPSULATING FIT-CAPS

A new method of wire encapsulation that allows permanent, abrasion resistant, moisture-proof encapsulations without molding, potting, or special tools. Molded caps are made of a molded, heat shrinkable, cross-linked polyolefin with two inserts. The insert at the closed end of the cap melts and flows between the splice forming a moisture proof encapsulation. The insert near the open end acts as a dam, preventing the molten material from flowing out beyond the cap. Cap shrinks and melts at 275°F.

FIT-Markers — Shrinkable Wire Markers

AN IRRADIATED FLEXIBLE POLYOLEFIN PRODUCT

Shrinkage Ratio 2:1 (50% Shrinkage). Easy to apply—even over terminations. Slip-proof. Insulates and marks terminations and connectors.

ASSORTMENTS: FIT-Markers are available in various assortments of 100 markers each. Number assortments contain 2 markers of every number from 1-50; letter assortments contain 4 markers of every letter from A-Z.

COLOR STOCK: Black.

STANDARD MARKINGS: Individual numbers, 1, 2, etc. thru 50 or individual letters, A, B, C.

DACRON: Retains all the above characteristics of nylon, plus: less elongation, better resistance to acids, no appreciable discoloration.

Nylon: Synthetic fiber, resistant to: Fungus, flame, acids, abrasion. Excellent tensile strength, lightweight, small size.

FINISHES

GE: A synthetic rubber-like resin formulated with a non-mercuric compound which lends the finish fungicidal properties. This finish permits easier handling and better knot retention. This finish has a melting point in excess of 190°F and will soften, but not flow, at 140°F.

MW: A micro-crystalline wax with a melting point above 130°F compounded with a fungicide which does not contain either copper of mercuric materials. Excellent knot retention, yet finish does not have too great a "waxy" feel to the user. MW is soft, pliable, easy to tie and meets Government Spec. MIL-T-713.

AM: A thermoplastic synthetic resin with a melting point above 350°F for use where a "wax-free" type is specified. It is a non-dusting or flaking, dry finish with good knot tying qualities.

SR: A special continuous coating of fungistatic synthetic rubber containing no corrosive compounding ingredients. Knots tied with this finish will not slip. It is extremely pliable and soft and will not injure the user's hands. This finish will not flake or dust.

Alpha Heat Guns & Accessories

TURBO FAN
PROVIDES TEMPERATURES UP TO 1000°F.
HG-1 TO 500°F. HG-2 750°F. TO 1000°F.

DESCRIPTION: Flameless, quiet operating, hot air torches that may be used for portable operations or secured permanently to a bench by means of a mounting bracket. Heavy duty construction to withstand continuous operation use, the HG-1 is the recommended tool for shrinking ALL FIT tubing, except FIT-500 Teflon tubing. Both have adjustable air intake to control temperature and a double jacketed housing of die cast aluminum. Equipped with an 8 ft. neoprene jacketed 3-wire cord and plug and adaptor for 2 prong receptacle.

HG-1 & HG-2 SPECIFICATIONS: Voltage, 115V, AC/DC. Amperage, 14 amp. Air Volume, 35 CFM at 3000 FPM velocity. Overall Height, 8". Nozzle Length, 4". Overall Length, 11". Nozzle Diameter, 1 3/32". Base Plate, 5 3/4" each side (triangular shaped). Power Cord, 8' neoprene jacketed 3 conductor cord with adaptor for 2 prong receptacle.

Alpha Heat Guns & Accessories (Continued)

NEW MINIATURE FIT-GUN

USE FOR FIT SLEEVES AND ALL FIT TUBING

DESCRIPTION: A new miniature heat gun that has been developed for shrinking all FIT Tubing as well as FIT Sleeves. A durable, electric motor-driven unit delivers a high volume of air to the nozzle. Easily replaceable heat elements. 3 position rocker switch. Lightweight—use as bench or hand unit.

SPECIFICATIONS: Amp Rating, 7. Operating Volt., 115 AC. Wt. of Gun, 3 lbs.

TYPICAL TEMPERATURES: 175°C (347°F) without adaptor; 205°C (401°F) with adaptor only; 230°C (446°F) with tubing reflector; 340°C (664°F) with FIT Sleeve reflector.

Temperatures will vary with fluctuations in line voltage.

MODEL FG-1: Includes gun, stand, tubing reflector and FIT Sleeve reflector.

FIT® SOLDERING SLEEVES

SOLDERS—INSULATES—ENCAPSULATES FOR WIRE SPLICING AND SHIELD GROUNDING

MEETS PERFORMANCE REQUIREMENTS FOR MIL-F-21608A, MIL-T-7928

A new pre-packaged soldering device that insulates, encapsulates and prepares a reliable, uniform solder joint.

The sleeve consists of an irradiated, heat-shrinkable, polyolefin sleeve containing a preform of fluxed solder at the center and a thermoplastic sealing ring on each end. When placed over a cable shield and ground lead, or splice, and briefly heated, the outer sleeve shrinks and the solder and thermoplastic inserts melt forming an insulated, encapsulated, soldered termination. Soldering sleeves offer many advantages over crimped and other forms of connection including: the proper type and quantity of solder for each joint; easy observation of solder flow, and inspection of completed joint; built-in stress relief by shrinkage of sleeving over ends of insulated wire, giving longer life and greater flexibility at connection points. Cost savings are gained by eliminating braid cutting, space saving, and excellent moisture and environmental resistance characteristics.

Soldering sleeves may be used in shield ground applications, as junctions or as a stub splice. The FG-1 heat gun with soldering sleeve reflector is recommended. Heating time is from three to five seconds. Heat should be maintained on sleeve until solder ring changes from dull grey to bright silver and flows toward dam on both ends of sleeve.

HOW TO ORDER: Measure maximum and minimum diameters of wire with shield to be terminated or wires to be lap spliced. Select soldering sleeve that falls in range shown on chart.

SLEEVE TYPES

FSL sleeves contain a solder alloy of 51.2% tin, 30.6% lead, 18.2% cadmium to MIL-F-14256. Solder melting temperature is 293°F. Application includes use on vinyl, vinyl-nylon and other thermoplastic insulations.

FSH sleeves contain an Sn63 solder preform to QQ-S-571 and are coated with activated resin to MIL-F-14256. Solder melting temperature is 361°F. Applications include use on teflon, high temperature and irradiated insulations.

Alpha Quick Custom Cable Division

alpha

WE'LL GO TO ANY LENGTH TO MAKE SPECIAL WIRE AND CABLE AND WE'LL MAKE IT IN ANY LENGTH—AND FAST!

Alpha Wire has set up a special division. It's called Quick Custom Cable — because it is equipped to design from scratch, or to design to your specifications, virtually any wire or cable, any construction. And deliver it rapidly.

And when we say special, we mean special. Special shielding, braiding, special conductors — any material, any jacket. We're prepared to give you the special wire you must have and must have promptly — in any lengths, from one foot to a meter. We're prepared to design and produce it and get it to you fast. We'll air ship to meet your deadlines. This is the first service of its kind offered by any nationally known wire and cable manufacturer.

Our Quick Custom Cable division — just another way Alpha makes it easier for you to get the cable you want when you want it.

PRICES

Prices in this MASTER should not be considered as final. They were submitted for publication before the government price freeze of August 14th, 1971, and may not reflect any possible roll-backs or increases which are effective when this MASTER is distributed. Inquire about latest prices and delivery.

INVENTORY

While most distributors maintain a large and varied stock, they do not represent that they stock all manufacturers' products shown in this MASTER catalog.

ORDERING

It is important, when ordering, to mention specifically the edition and page number, also the catalog number of each item. This will avoid possible confusion and delay.

DISCOUNTS

Trade discounts apply in most cases where LIST PRICES are shown.

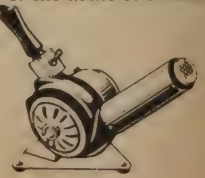
BIRFLON SHRINK SERIES TE TUBING

HEAT SHRINKABLE TEFLON TUBING*

Is a Class C material modified from polytetrafluorethylene. The tubing will shrink when heated to 621°F. (It should be heated until it turns semi-transparent, then the heating process immediately stopped. Overheating can cause splitting, therefore trial and error testing is recommended to establish the proper time and temperature for each application.) Correct procedure will result in a snug-fitting insulating wrap possessing hi-heat resistance, superior chemical resistance and excellent electrical characteristics. The tubing is available in a full range of colors. Stock colors: black, white, natural.

* Dupont Polytetrafluorethylene

TUBING PROPERTIES



Dielectric Strength (20 Mil Wall)	850 Volts/Mil
Dielectric Constant	2.2
Power Factor	.00
Volume Resistivity	10^{17} Ohms/CM
Fungus Resistance	Inert
Flammability	Will not Support Combustion
Fuel and Oil Resistance	Superior
Hydraulic Fluid Resistance	Superior
Solvent Resistance	Superior
Acid and Alkali Resistance	Superior
Corrosion Resistance	Excellent
Tensile Strength	5000-7500 PSI
Ultimate Elongation	300-500%
Water Absorption	Nil
Low Temperature Brittle Point	−66°F
Hardness	98 Shore A
Specific Gravity	2.2

HOT AIR GUN

HAG-12 500/750°F For PVC Series

HAG-13 750/1000°F For TE Series

The quickest and most versatile method for applying heat is the hot air gun noted herein. Also, use of an oven, radiant heat, dipping in hot liquids, or using a soldering iron or the flame of a match.

EXTRUDED PLASTIC TUBING

APPROVED FOR 105°C. OPERATION — MEETS MIL-I-631D SPECS — A quality plastic Vinyl tubing designed for electronic and electrical insulation work. Has high dielectric strength, extreme flexibility, non-flammability, abrasion resistance, impervious to oil, water, alkalies, alcohol, solvents, etc., high heat stability and resistance to aging. Meets all A.S.T.M. specifications, Mil. Spec. (Type F, Form U, Grade A and C, Class 2, Category 1). **U. L. Approved**

STANDARD COLORS

EVEN NUMBERS — #24, 22, 18, 16 — Clear Black, Yellow, Red, Green, Brown, Orange, Blue, White, Violet and Gray; #14, 12, 10, 8, 6, 4, 2, 5/16", — Clear, Black, Yellow, Red, Green, Brown, Orange, Blue and White.

ODD NUMBERS — #19, 17, 15, 13, 11, 9, 7, 5, 3, 1, 0 — Clear, Black, White; #3/4" thru 2 1/2" — Clear, Black, White.

IN STOCK The Birnbach Line of insulated sleeving and tubing is the basic quality line designed for the rigid performance requirements of the Aircraft, Electrical and Electronic Industries. Meets or exceeds the required MIL Specifications and ASTM and NEMA standard. We invite your inquiries on special problems and requirements.

VINYL COATED/ FIBERGLASS SLEEVING

B-130 • Per Mil-I-3190B and NEMA Standards to 130°C.

(ASTM, NEMA Grade B-B-1) MEETS MIL-I-3190 SPECS. — Quality Electronic and Electrical Tubing. It is Class B Insulation that combines the best features of the inorganic fiberglass base sleeving with heat resistant, flexible plastic insulation. The plastic compound provides the highest electrical properties, heat stability (130°C), flexibility and toughness. Meets performance requirements of specs. MIL-I-3190 A, NEMA VSI, ASTM D 372.

BIRNBACH COMPANY INC.

TEFLON* TUBING

TFE EXTRUDED TUBING

T-500 T-500 Tubing is extruded from DuPont Tetrafluoroethylene Resin. Used in electronic and electrical equipment for connection of components. Its flexibility, ease of handling has established it as the best and most popular insulation sheathing. This high temperature Class C insulation does not melt and flow as the conventional thermoplastic materials. Birflon T-500 Teflon has unique electrical, chemical and mechanical properties unmatched by any other type tubing for use in applications requiring high frequencies and high temperatures.

Because of Teflon's continuous service temperature of 250° C., which is more than 100° C. above other materials, the soldering technique is simplified since "Teflon" is not harmed by the hot barrel of the soldering iron — therefore, the assembly of aircraft, missile and electronic communication equipment is greatly speeded up. Thin Wall flexible Teflon Tubing can be processed easily into flexible and rigid printed circuits. As a thin, flexible insulation, it permits miniaturization and compactness of design never before possible.

TABLE OF PROPERTIES

SMALL PIECE CUTTING AVAILABLE TO ORDER

STOCK COLORS: Natural, Red, Black, Blue, Brown, Green, Orange, Yellow, Gray, Violet, White.

Nos. T-500-3/8 thru T-500-1¼ available in Natural. Additional Colors. Sizes Made to Order.

Teflon Tubing can be ordered cut to your specifications.

Tracer Colors Available—We Invite Your Inquiries For Your Special Requirements

ADDITIONAL ADVANTAGES OF BIRFLON T-500 TEFLON*

- **ELECTRICAL:** Low power factor, low dielectric constant, high volume and surface resistivity, good dielectric strength (500 to 1000 volts/MIL) constant over wide ranges of temperatures and frequencies. Dielectric constant of 2.0 and dissipation factor of 0.0002 are lowest of any solid dielectric.
- **THERMAL:** No change of electrical properties with temperature (25°C. to 250°C.) or frequency (60 CPS to 100 MC). Class C insulation — capable of continuous service at temperatures to 250°C. Has color stability.
- **TOUGHNESS AND FLEXIBILITY:** Has high impact strength. Is tough and flexible over the broad temperature range of —90°C. to 250°C. Service range —320°F. to 500°F.
- **CHEMICAL INERTNESS:** Completely inert to all chemicals and solvents except molten alkali metals and fluorine at elevated temperatures and pressures. Non-corrosive to all metals.
- **MOISTURE ABSORPTION:** Zero moisture absorption. Completely sun and weather resistant.
- **NON-FLAMMABLE** • **LOWEST COEFFICIENT OF FRICTION**
- **FUNGI RESISTANCE:** Inert to all fungi growths.
- **SIZES:** Birflon T-500 Teflon Tubing available in sizes to fit B & S gauge wires. Thin wall available from stock, in sizes No. 32 thru 1¼" I.D. Additional sizes and wall thicknesses made to order.

  Birflon T-500 is made from high molecular weight virgin "Teflon" and meets AMS 3651B, 3653B, 3654, 3655, MIL-C-17B and MIL-I-22129C.

NOTE: When cutting Teflon Tubing, use single edge razor blade for clean unpinched cut.

"Teflon"* DuPont Trade Name for Tetrafluoroethylene Resin

STANDARD PACKAGE: 100 pieces of 2 Ft. each.

HEAVY FORMVAR (HF) TYPE 2 — MIL-C-583C

Single conductor round bare copper, baked film insulation from a varnish based on a vinyl acetal resin. 105°C.

Has new tough abrasion resisting film. Replaces enamel and fabric insulations for certain applications requiring exceptional abrasion resistance. Stable under heat. High dielectric strength. Infinite resistance to water and moisture. Does not fail after two hours at 105°C. Takes up less winding space.

MIL-W-76B PLASTIC WIRE

TYPE MW — UNCOVERED PLASTIC 1000 V

DESCRIPTION: Solid or extra flexible tinned copper, color coded **medium wall** polyvinylchloride insulation.

CHARACTERISTICS: Temperature rating −40° to +80°C, Voltage rating 1000 volts. Resistant to acids, alkalis, oil, flame, moisture and fungus.

PLASTIC HOOK-UP WIRE

MIL-W-16878D — TYPE B
High Temperature Vinyl — 600 Volt

Suitable for general purpose wiring for miniature high temperature hook-ups in aircraft, electronic instruments, devices, etc., where excellent resistance to moisture and solvents may be required. .010" Wall Vinyl

DESCRIPTION: One conductor stranded tinned copper with rated —55°C to +105°C high temperature thermoplastic light wall insulation. Resistant to acids, alkalis, oil, flame, moisture, solvents, and fungus. Nominal wall: 0.010.

MIL-W-16878D — TYPE B
Nylon Jacket — 600 Volt

Suitable for general purpose wiring for miniature high temperature hook-ups in aircraft, electronic instruments, devices, etc., where excellent resistance to moisture and solvents may be required.

DESCRIPTION: Stranded tinned copper, color coded. .010" polyvinylchloride insulation, clear nylon (polyamide) jacket overall.

CHARACTERISTICS: Temperature rating —55°C to +115°C. Voltage rating 600 volts. Resistant to acids, alkalis, oil, flame, moisture, solvents, and fungus.

MIL-W-16878D — TYPE C
Shielded — Nylon Jacket

DESCRIPTION: Stranded tinned copper, white .016" polyvinylchloride insulation, braided tinned copper shield, 90% coverage, clear nylon (polyamide) jacket (which can be striped to order for color identification) overall.

CHARACTERISTICS: Temperature rating —55°C to +115°C. Voltage rating 1000 volts. Resistant to acids, alkalis, oil, flame, moisture, solvents and fungus.

BIRNBACH COMPANY INC.

TEST LEAD WIRES

KINKLESS TEST LEAD WIRE

Used with portable test equipment; as tested, leads in analyzers, oscillators, instruments; wherever extreme exibility and limpness is required. Has excellent dielectric properties.

DESCRIPTION: **RUBBER INSULATED**

No. 61—#20—41/36 extra flexible annealed tinned copper, stranded.

No. 66—#18—65/36 extra flexible annealed tinned copper stranded; paper serve; 3/64" special low capacity rubber, wax finish.

Colors: Red, Black.

Types WS-16/U Black, WS-17/U Red; No. 70 per MIL-W-13169 Specification available same construction as Birnbach #66 except compound per specification.

Cat. No.	Size AWG	Strand	Insulation	Puncture Voltage	Nom. O.D.

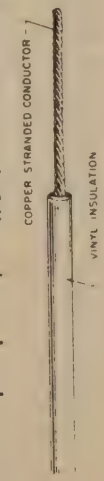
STANDARD PUT-UPS: 100' - 250' - 500' - 1000'



NEW PLASTIC KINKLESS TEST LEAD WIRE

New formulation vinyl compound insulation allows maximum flexibility; rough treatment; extreme variation in climatic conditions; excellent abrasion resistance; greater temperature stability from −80°C to +115°C; fungus resistant; self extinguishing-flame proof; smooth surface. Resists exposure to gasoline and oil. 5000 volts.

For portable test equipment; as test leads for instrumentation exceeds the requirements for MIL-I-3930A type JP (PVC). It is superior to synthetic rubber spec MIL-R-6855, Class II, Grade 60.

DESCRIPTION: One conductor tinned copper stranded, special formulation vinyl insulation.

Colors: Black, Red, Yellow, Green, White, Blue.

U.L. HOOK-UP WIRES

KYNAR® "WIRE WRAP" WIRE—UL APPROVED (POLYVINYLDENE FLUORIDE) INSULATED, 130°C—300V

Description: Solid silver plated copper, Kynar insulation.
Applications: Especially designed for use on computer back panel wiring in conjunction with "wire wrap" ssytems. Kynar insulation is particularly suited for this application because of its cut through resistance, high temperature rating and because it can be made available in long lengths.

Part No.	Conductor	Nom. Insulation Thickness	O.D.	U.L. Style	Stock *Color

BIRNBACH COMPANY INC.

RETRACTILE CORDS

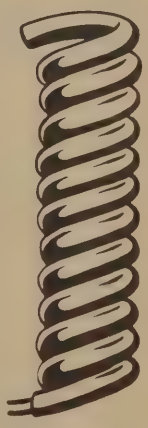
This series of Birnbach Coiled Kinkless Retractile Cords are permanently coiled into a spring-like shape without the use of metal springs or elastic bands. They have inherent "Recover'y' properties. These Retractile cords extend approximately six times its retracted length, returning to its original shape and length when released. Always as long as you need them and no longer, they will not kink, tangle, trail, knot or dangle on the floor or bench and cause accidents. Useful wherever cords or cables must change length or position.

RETRACTILE TEST LEAD WIRE

Stretch coiled kinkless test lead wire description. 12" coil—stretches to approx. 6 feet. One conductor #20 stranded copper rubber insulation .165 O.D. Coil O.D. ¾".
100 Volts Maximum Working

Cat. No.		Pkge. Std.
64	12" Retracted - Approx. 6' Extended	6
65	24" Retracted - Approx. 12' Extended	6

MINIATURE RETRACTILE CORD



This small size is suitable where compact equipment is required. 2 ft. retracted, approximately 10 ft. extended. Black plastic jacket overall.
Tinsel Cordage
Nom. Cond. resistance:
.07 OHMS per linear foot (approx. .6 OHMS per retracted ft.)
Maximum working voltage: 100; current capacity ½ amp.

Also available in retracted lengths of 12", 24" and 48".

RETRACTILE (KINKLESS) COILED SHIELDED COMMUNICATION CORDS

DESCRIPTION: Single and multi-conductor shielded microphone cable neoprene or geon plastic jacketed. This cable remains neat and compact with no danger of tripping or of the wire becoming entangled in equipment. Also suitable for stereo and additional speaker extensions. Shield can be pigtailed for soldering. No. 24 AWG Str. is 41/40 tinned soft cad. copper: No. 23 has 21/36 tinned soft cad. copper. Spiral wrapped tinned soft copper shielding.

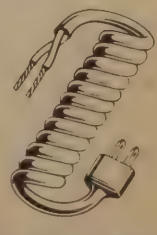
Additional conductors and sizes available. CONDUCTORS ARE COLOR CODED.

RETRACTILE COMMUNICATION CORDS



PREPARED FOR EASY INSTALLATION AND REPLACEMENT

RETRACTED LENGTH 12" — EXTENDED LENGTH 6 FEET

DESCRIPTION: Same as communication cords except each end is prepared as indicated. Tinsel Cordage

Cat. No.	Cond.	Size AWG	Nom. Coil O.D.	Nom. Cord O.D.	Preparation
883	3	23-21/36	13/16"	.220"	**1 end:** total length 1½". Conductors stripped and tinned. **Other end:** total length 1½" jacket removed.
884	4	23-21/36	15/16"	.250"	**1 end:** total length 1". Conductors stripped and tinned. **Other end:** total length 1½" jacket removed.
885	5	23-21/36	1 1/16"	.285"	**1 end:** total length 4¼". Conductors stripped and tinned. **Other end:** total length 4⅛" conductors stripped and tinned.

RETRACTILE POWER CORD SETS

Excellent for portable use. All mobile equipment and office equipment wherever the device application is synonymous with repetitive movement. The "Answer" to most tough hazard problems. 2 and 3 conductors SVO and SJO Retractile Kinkless Neoprene Service Cord Sets with Molded Male Plug one end, other end stripped for application. Adds reliability, compactness and portability.

BIRNBACH COMPANY INC.

RETRACTILE HEAVY DUTY AND POWER CORD SETS

GUARANTEED TO RETRACT FOR 4 YEARS MILITARY INDUSTRIAL. AWG SIZES — 12, 14, 16, 3 AND 4 COND.

Especially desirable in the maintenance of **industrial automation** equipment, refrigerated trucks and trailers, mass assembly and production equipment, plane maintenance, control cable for cherry pickers, magnetic cranes, standby power distribution, heavy duty machinery.

Useful whenever and wherever a tougher, more rugged heavy duty power cable is indicated as in foundries, aboad ships, reelins on overhead cranes and hoists, tanks, plug-in power for refrigeration and immersion heaters, etc. Usable around salt water, chemicals and many other areas which makes the use of reels undesirable . . . 48″ retracted — 25′ extended.

NEW! All Birnbach Retractiles Available in One Foot Lengths.

Bureau of Mines, C.S.A. (Canada), U.S. Coast Guard, UL and Army/Navy approved

RETRACTILE (KINKLESS) POWER CORDS RUBBER, NEOPRENE AND PLASTIC — UL AND CSA APPROVED

DESCRIPTION: Multi-conductor power cords, each conductor stranded copper, tough rubber, neoprene or geon plastic jacket overall UL and CSA approved. Available from stock in indicated lengths, can be cut to desired length.

BIRNBACH COMPANY INC.

SHIELDING BRAID

FLAT TINNED COPPER SHIELDING

Used for shielding and bonding on aircraft, marine and auto radio wires and cables. Shields speaker leads, lead-ins, amplifier wires. Extremely flexible, slides over wires and cables.
DESCRIPTION:
No. 853 thru 856/7—Composed of extremely flexible fine soft annealed copper tinned wires closely woven, braided and **Rolled Flat.**
No. 860—Composed of extremely flexible fine soft annealed copper wires closely woven, braided and **Rolled Flat.**

TUBULAR BRAID PER MIL SPEC. QQ-B-575

Manufactured completely round as noted in MIL Spec. QQ-B-575, this tinned copper shielded braid has self-supporting characteristics which enables it to maintain its round shape. The shielding coverage percentage is 95% or more. This tubular braid is used in military applications where maximum shielding against electrostatic interference is indicated. In addition, it is used as a protective covering against mechanical abrasion and stresses for the wires, cables and other components.

STANDARD SPOOL PUT-UPS: 50′ — 100′ — 250′, 500′ — 1000′

*Values based on copper in free air at 65°F.
Additional constructions and variations made to order. Also available in silver plated copper, bare copper and stainless steel.

SILVER PLATED TUBULAR BRAID AVAILABLE IN ALL SIZES: 1/32", 1/6", 5/64", 7/64", 1/8", 5/32", 11/64", 13/64", 1/4" and more.

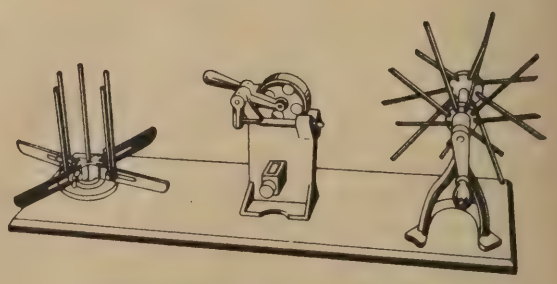
COMPLETE WIRE MEASURING OUTFIT

ACCURATE • COMPACT • NOISELESS

MEASURING MACHINE

Sturdy and compact construction. Has a precision quality built counter with large numbers for easy reading and will register wire up to .9,999 feet for direct accurate reading. Can be easily reset to zero position.

Wire passes through two rollers, the upper roller being self-adjusting and the tension of the upper roller can be set by a thumb screw to provide the proper grip for very fine as well as for heavy wire.



Two hardened lead bushings with an opening of 1/8" diameter will guide the wire properly through the rollers. Bushings are removable to allow cables up to 1" dia. to pass through. Will measure accurately all electric wires, cables, coaxial cables, rope, tape, etc.

WIRE WINDER

Has adjustable arms to be set to the desired coil size and the arms will open to a flat position for easy removal of the coil. Simply open thumb screw which holds the front collar tight on the shaft, push the collar in any direction to the desired position and tighten the thumb screw again.

HOLDING REEL

Compact, adjustable to size of coil and folding. Will hold spools or coils of wire.

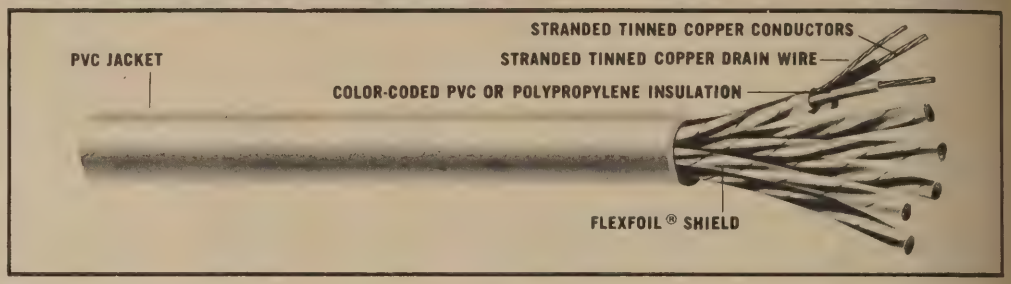
It's easy

to order from this catalog.

When ordering products shown in this catalog
or writing for additional information,
be sure to specify:

1. **The year and edition of this MASTER**
2. **Manufacturers' catalog numbers and page numbers**

This will avoid confusion
and expedite delivery.



Thank you!

COLUMBIA ELECTRONIC CABLES

AUDIO/COMMUNICATIONS

Audio/Data Individually Shielded Multiple Pair Cable PVC Jacket

Stock Color: Chrome gray jacket.

Construction: Tinned copper conductors, color-coded polypropylene insulation, cabled in pairs, each pair and its drain wire under Flexfoil® aluminum foil polyester shield, PVC jacket overall.

Specifications: +105°C. Suggested working voltage 300V. 100 Megohms/M insulation resistance between shields. 115 MMF/Ft. capacitance between adjacent shields. 1500V voltage breakdowns between adjacent shields. 50V working voltage between adjacent shields.

Applications: For audio RF and pulse applications requiring superior circuit isolation. The use of polypropylene insulation results in excellent high frequency properties and mechanical durabilty.

Put-up: 100′, 500′ and 1000′ spools. (Other put-ups also available.)

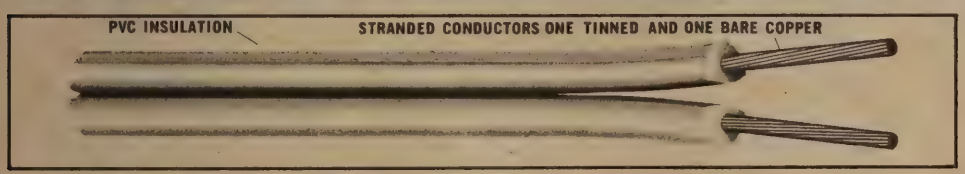
AUDIO/COMMUNICATIONS

Audio Cable Miniature Zip-Cord

Stock Color: See table below.

Construction: One conductor tinned copper, one conductor bare copper for polarity identification, PVC insulation, conductors parallel, rip-type construction for easy separation of conductors when split apart.



Specifications: −20°C to +60°C.

Applications: Hi-Fi and stereo speaker cable, miniature juke box speaker connection cable, automotive rear seat extension cable. Decorator colors will blend with interior room decor.

Put-up: 50′, 100′, 250′, 500′ and 1000′ spools packaged in attractive counter display cartons. (Other put-ups also available.)

Test Lead Unshielded Rubber Insulation

Stock Color: Black or red. (Other colors available on special order.)

Construction: Extra flexible stranded tinned soft annealed copper conductor, separator, color-coded rubber insulation.

Specifications: −20°C to +60°C. All breakdown voltages and suggested working voltages are AC RMS values.

Applications: Test lead wire for use in multimeters, analyzers, oscillators, and other applications requiring extra flexible insulated wire.

Put-up: 250′, 500′ and 1000′ spools.

AUDIO/COMMUNICATIONS

Audio Cable Unshielded Unpaired Multi-Conductor PVC Jacket

Stock Color: Chrome gray jacket.

Construction: Tinned copper conductors (Cat. Nos. 02754 and 02755 are bare copper), color-coded PVC insulation, PVC jacket overall, conductors cabled.

Specifications: −20°C to +60°C.

Applications: PA systems, unbalanced intercom systems, interconnecting cables, remote control circuits, telephones, low-voltage relay control cables.

Put-up: 100′, 500′ and 1000′ spools. (Other put-ups also available.)

COLUMBIA ELECTRONIC CABLES

MICROPHONE

Microphone Cable One Conductor Spiral Shield Flexlife® Jacket

Stock Color: Silver gray jacket. (Cat. No. 01359 available in black jacket.)

Construction: Single conductor 3 strands tinned copper, 4 strands tinned copperweld, white foam polyethylene dielectric, spiral tinned copper shield, high gloss Flexlife jacket.

Specifications: −20°C to +60°C.

Applications: For use with high impedance microphones and hi-fi interconnecting cables. Flexfoam dielectric (foam polyethylene) provides as much as 35% lower capacitance than the best standard solid polyethylene dielectric microphone cables. Flexfoam cables are the most flexible plastic microphone cable available, with limpness almost equal to rubber and with better abrasion resistance.

Put-up: 100′, 250′, 500′ and 1000′ spools. (Other put-ups also available.)

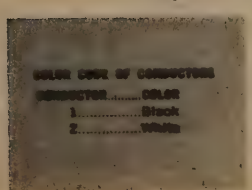
Microphone Cable Braided Shield Rubber Jacket

Stock Color: Black jacket.

Construction: Tinned copper conductors, color-coded rubber insulation, cotton wrap, filled where required, braided tinned copper shield, cotton wrap, rubber jacket.



Specifications: −20°C to +60°C. Recommended operating voltage 600V.

Applications: CATALOG NUMBERS 01300, 01301, 01311: For use with high impedance microphones, broadcast and studio use, communication and audio systems.

CATALOG NUMBERS 01302, 01303: For use with low impedance microphones, studio use, control circuits, video and audio interconnecting cables, electronic power supply cables.

All cables are precision engineered to transmit clear signals, eliminate hum pick-up and provide extra limpness.

Put-up: 100′, 250′, 500′ and 1000′ spools. (Other put-ups also available.)

CONTROL

Control Cable Multi-Conductor Shielded Neoprene or Rubber Jacket

Stock Color: Black jacket.

Construction: Tinned copper conductors, color-coded rubber insulation, cabled, filled where required, cotton wrap, tinned copper braided shield, cotton wrap, neoprene jacket or rubber jacket.

Specifications: −20°C to +60°C. Suggested working voltage 350V.

Applications: Control circuits, video and audio interconnecting cables, broadcast and studio use. Precision engineered to prevent cross-talk and eliminate hum pick-up. Neoprene and rubber jackets are resistant to impact and abrasion and have extra limpness. For outside installations, neoprene is recommended being resistant to oil, ozone, moisture and sunlight.

Put-up: 100′, 500′ and 1000′ spools. (Other put-ups also available.)

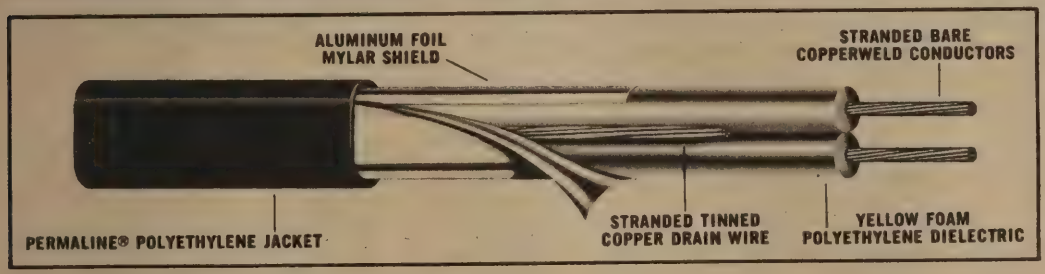
*Durafoam® 300 Ohm 82 Channel Transmission Cable

Stock Color: Black jacket

Construction: Stranded bare copper conductors, each conductor insulated with a carefully spaced tube of yellow foam polyethylene. Outer jacket and barrier separating the conductors Permaline® high molecular weight polyethylene.



Specifications: 300 ohm cable. Resistant to moisture, salt air, chemical fumes, ultra violate rays of sunlight.

Applications: TV and FM lead in. Durafoam lowest loss, highest efficiency of any available TV-FM transmission line.

Features: Unconditionally guaranteed not to deteriorate under normal atmospheric conditions in any area for 15 years. Installs as easily as flat twin lead. Permaline jacket prevents deterioration and increased attenuation as is the case with brown polyethylene. No matching transformers or special stand-offs required.

Shielded Permafoam® 82 Channel Transmission Cable

Stock Color: Black jacket.

Construction: Stranded bare copperweld (copper covered steel) conductors, each conductor insulated with a carefully spaced tube of yellow foam polyethylene, conductors laid parallel, Flexfoil® aluminum foil/polyester shield. Stranded tinned copper drain wire under shield, overall Permaline® high molecular weight polythylene jacket.

Specifications: Resistant to moisture, salt air, chemical fumes, ultra-violet rays of sunlight.

Applications: Provides superior 82 channel reception in congested areas. Flexfoil® shield eliminates ghost signals and electrical noise.

Features: Can be taped to antenna mast, run in gutters and conduits or buried directly. Unconditionally guaranteed not to deteriorate under normal atmospheric conditions in any area for 15 years. No matching transformers required.

Rotor Cable Flat Polyethylene

Stock Color: Brown.

Construction: Stranded bare copper conductors, one outside conductor tinned for polarity identification, conductors parallel, polyethylene insulation.

Specifications: −40°C to +60°C. Suggested working voltage 200V.

Applications: For use with antenna rotor controls.

Put-up: 500′ and 1000′ spools. 50′, 75′ and 100′ flat packs. (Other put-ups also available.)

Rotor Cable Round Permaline®

Stock Color: Black jacket.

Construction: Conductors stranded bare copper, color-coded PVC insulation, conductors cabled, high molecular weight Permaline® polyethylene jacket.

Specifications: −20°C to +60°C. Suggested working voltage 200V.

Applications: For use with antenna rotor controls. Permaline® jacket provides maximum resistance to weathering.

Put-up: 100′, 500′ and 1000′ spools. (Other put-ups also available.)

...NEW LOW LOSS FOAM POLYETHYLENE ALL CHANNEL COLOR TV CABLE.

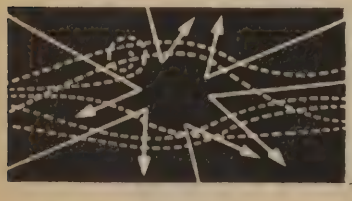
Rome Synthinol*
...A THERMO-PLASTIC INSULATED HOOK-UP WIRE APPROVED FOR 80°, 90° & 105° C. OPERATING TEMPERATURE.

CT-B, CT-C Control Cable
...600 AND 1000 VOLT CONTROL CABLE PER IPCEA AND NEMA STANDARDS.

Consolidated Control Cables types CT-B and CT-C

Meeting IPCEA-NEMA standards for use on both AC and DC circuits, these control cables are designed to handle a wide range of applications. Lighter in weight, smaller in diameter and more flexible than conventional rubber insulated multi-conductor cables, consolidated CT Thermoplastic insulated control cables are easy to handle, store and install.

The Consolidated CT control cables are available with various types of copper, bronze or copper clad stainless shielding to provide electrostatic or electromagnetic protection. Shielding also provides added physical protection and acts as a positive deterrent against rodent or insect attack.



Synthinol (polyvinylchloride) is used for jacketing individual conductors as well as for an over-all jacket. Synthinol provides added resistance to heat and to chemical and corrosive attack. It also provides mechanical protection and is a flame retardant barrier for the cable insulation.

600 volt rated Type CT-B cables are primarily for use in general applications, while 1000 volt rated Type CT-C cables are more frequently used in connection with heavy magnetic trip devices, where induced over-voltages may occur.

Both CT-B and CT-C are made with bare stranded copper conductors, individually insulated and fully color-coded. These cables are suitable for all types of installations — aerial, conduit, duct, tray, direct burial — in wet or dry locations.

USES

In power generating stations and substations as well as throughout industry in both manufacturing and processing plants.

RATINGS

For AC and DC circuits. Type CT-B is rated 600 volts. Type CT-C, 1000 volts. Both are recommended for operation at 90° C. maximum continuous conductor temperature.

INSULATION

Polyethylene insulation is used on individual conductors since it has proven superior to many other dielectric materials used on solid insulated cables. This material is particularly well suited for DC circuits in moist locations where electro-osmosis maye be a problem. Along with its important outstanding electrical properties, polyethylene also resists acids, alkalies and oils. It is thus capable of standing up well under many hazardous environmental conditions.

TELEMETERING & DATA SHIELDED CONTROL CABLE

STANDARD PUT-UP: CUT TO SPECIFICATION — MIN. 25 FT.

Description: Each conductor bare solid copper, high molecular weight polyethylene insulation, color coded, twisted into pairs, cabled with a non-hygroscopic binder tape .008″ aluminum shield, black polyethylene jacket overall. Operating voltage 300 volts.

Double jacketed types, (8306-8420 below) same except for additional inner black polyethylene jacket over binder, and .005″ copper shield.

Applications: Remote control of rocket recording data and test-firing control, transmission of signals which telemeter temperature, voltage, pressure, etc., control of multiple circuits, measuring devices, quality control equipment, radar antenna. For aerial, duct and conduit installations. Double jacketed types have higher dielectric strength and suited for direct burial installations.

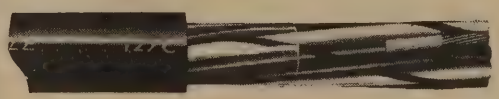
UNSHIELDED STATION CONTROL CABLE

HEAVY DUTY MULTI-CONDUCTOR PLASTIC JACKET — TYPE CT-B CONTROL CABLE — 600 VOLTS



Description: Each conductor, stranded bare copper, .020″ polyethylene insulation, .010″ polyvinylchloride jacket over each conductor, color coded, cabled with fillers where necessary, moisture resistant tape, black polyvinylchloride jacket overall. 600 volt operating voltage. Approved per IPCEA-NEMA standards.

COLOR CODING FOR PAIRED INTERCOM CABLES

Identification is simple with Consolidated Intercom Cables because they are all color coded. See chart below.

1 Black paired with Red
2 Black paired with White
3 Black paired with Green
4 Black paired with Blue
5 Black paired with Brown
6 Black paired with Yellow
7 Black paired with Orange
8 Red paired with Green
9 Red paired with White
10 Red paired with Blue
11 Red paired with Yellow
12 Red paired with Brown
13 Red paired with Orange
14 Green paired with Blue
15 Green paired with White
16 Green paired with Brown
17 Green paired with Orange
18 Green paired with Yellow
19 White paired with Blue
20 White paired with Brown
21 White paired with Orange
22 White paired with Yellow
23 Blue paired with Brown
24 Blue paired with Orange
25 Blue paired with Yellow
26 Brown paired with Oronge
27 Brown paired with Yellow
28 Purple paired with Red
29 Purple paired with White
30 Purple paired with Green
31 Purple paired with Blue
32 Purple paired with Brown
33 Purple paired with Yellow
34 Purple paired with Orange
35 Purple paired with Slate
36 Purple paired with Black
37 Slate paired with Red
38 Slate paired with White
39 Slate paired with Green
40 Slate paired with Blue
41 Slate paired with Brown
42 Slate paired with Yellow
43 Slate paired with Orange
44 Slate paired with Black
45 White/Black paired with Red
46 White/Black paired with Green
47 White/Black paired with Blue
48 White/Black paired with Brown
49 White/Black paired with Yellow
50 White/Black paired with Orange
51 White/Black paired with Purple

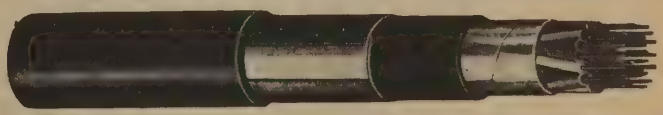
TELEPHONE AND COMMUNICATION CABLE

AERIAL & DUCT INSTALLATION — MEETS REA-PE-22

Description: Each conductor bare solid copper, color coded polyethylene insulation, insulated conductors paired, pairs cabled with non-hygroscopic tape wrap, .008″ corrugated aluminum shield, black polyethylene jacket overall.

Characteristics: Average mutual capacitance — .083 microfarads/mile. Minimal cross talk.

Applications: A tough, long lasting communication cable that can withstand moisture, ultra-violet and weathering.



#22 AWG — SOLID

Catalog Number	No. of Pairs	Nom. Jacket Thickness (Inches)	Nom. O.D. (Inches)	Ship. Wt. Lbs. M/Ft.

DIRECT BURIAL INSTALLATION — MEETS REA-PE-23

Description: Each conductor bare solid copper, color coded polyethylene insulation, insulated conductors paired, pairs cabled with non-hygroscopic tape wrap, polyethylene inner jacket, .005″ corrugated copper shield, black polyethylene jacket overall.

Characteristics: Average mutual capacitance — .166 microfarads/mile. Minimal cross talk.

Applications: Impervious to moisture, abrasion resistant, suitable for direct burial.

SHIELDED CONTROL AND MICROPHONE CABLES

SHIELDED RUBBER JACKET

CONDUCTOR COLOR CHART: 1—Black; 2—White; 3—Red; 4—Green; 5—Yellow; 6—Blue; 7—Brown; 8—Orange.

STANDARD SPOOL PUT-UP: 9 FT., 10 FT., 25 FT., 50 FT., 100 FT., 250 FT., 500 FT., 1000 FT.

SHIELDED: Weatherproof rubber and Neoprene jacket for all microphone Electronic Power, Control Circuits, or weatherproof extension work. (Longer continuous lengths if desired).

No.	No. of Condr.	Size & Stranding	Special Use	Specifications	Finished O.D. (Inches)	Nominal Capacity per ft. (mmf)
1460	1	20 (26x34)	Crystal microphone	Tinned copper, yarn serve; wall of live rubber; cotton fillers and wrap; tinned copper braid shield; cotton wrap rubber jacket overall.	.240	33.
1462	2	20 (26x34)	Low impedance microphones	Same as 1460; color coded	.268	68.
1456	2	18 (41x34)	Heavy duty studio cable	Same as 1460; color coded	.295	80.
1463	3	20 (26x34)	Low impedance microphones	Same as 1460; color coded	.277	85.
1464	4	20 (26x34)	Low impedance microphones	Same as 1460; color coded	.295	95.
1465	5	20 (26x34)	Interconnecting power cable for all electronic uses	Same as 1460; color coded	.323	
1466	6	20 (26x34)	Same as 1465	Same as 1460; color coded	.349	
1467	7	20 (26x34)	Same as 1465	Same as 1460; color coded	.360	
1455	8	20 (26x34)	Same as 1465	Same as 1460; color coded	.386	

SHIELDED NEOPRENE JACKET

No.	No. of Condr.	Size & Stranding	Specifications	Finished O.D. (Inches)
1701	1	18 (41x34)	Tinned copper, yarn serve; wall of live rubber; cotton fillers and wrap; tinned copper braid shield; cotton wrap neoprene jacket overall.	.250
1702	2	18 (41x34)	Same as 1701, color coded	.305
1703	3	18 (41x34)	Same as 1701, color coded	.325
1704	4	18 (41x34)	Same as 1701, color coded	.335
1705	2	16 (65x34)	Same as 1701, color coded	.345
1706	3	16 (65x34)	Same as 1701, color coded	.365
1707	4	16 (65x34)	Same as 1701, color coded	.390
1708	6	18 (41x34)	Same as 1701, color coded	.430
1709	8	18 (41x34)	Same as 1701, color coded	.465

SHIELDED PLASTIC JACKET

No.	No. of Condr.	Size & Stranding	Special Use	Specifications	Finished O.D. (Inches)	Nominal Capacity per ft. (mmf)
1721	1	24 (7x32)	Low capacitance	Tinned copper polyethylene insulation with a close spiral tinned copper shield. Grey plastic jacket.	.132	29.
1461	1	22 (16x34)	Lapel microphone	Same as 1721	.125	36.
1457	1	22 (16x34)	Crystal, Ribbon and other high impedance microphones	Same as 1721 except heavier polyethylene insulation on conductor.	.200	25.
1458	2	22 (16x34)	Low impedance microphones	Tinned copper polyethylne insulation; black and clear. Cabled with fillers rayon braid spiral tinned copper shield. Gray vinyl plastic jacket.	.231	32.
1459	1	20 (26x34)	Lapel microphone	Tinned copper wire, with polyethylene to .087" O.D. with a closely tinned copper shielded braid, and a heavy black plastic jacket overall.	.175	40.
1722	2	20 (26x34)	Same as 1458	Same as 1458 except braided tinned copper shield.	.245	32.
1723	3	20 (26x34)	Same as 1458	Same as 1722	.250	45.
1724	4	20 (26x34)	Same as 1458	Same as 1722	.255	45.
1725	5	20 (26x34)	Same as 1458	Same as 1722	.275	45.

INTERCOMMUNICATION AND SOUND SYSTEM CABLES

STANDARD SPOOL PUT-UP — 10 FT., 25 FT., 50 FT., 100 FT., 500 FT. and 1000 FT.

	No.	Type	Size & Stranding	Insulation Thickness (Inches)	SPECIFICATIONS AND GENERAL APPLICATIONS	Nominal Diameter (Inches)
 STATION-TO-STATION EXTENSION WIRING SHIELDED	5501	2 Condr.	22 Solid	.015	Tinned copper vinyl plastic insulation, wires twisted together—1 condr. red—1 condr. black—closely woven braided tinned copper shield.	.110
	5506	3 Condr.	22 Solid	.015	Same as 5501—1 condr. red—1 condr. black—1 condr. blue.	.145
	5521	2 Condr.	20 Solid	.015	Tinned copper vinyl plastic insulation, wires twisted together—1 condr. red—1 condr. black—closely woven braided tinned copper shield.	.155
 EXTENSION WIRING SHIELDED — PLASTIC JACKET	5511	2 Condr.	22 Solid	.015	Tinned copper vinyl plastic insulation, wires twisted together—1 condr. red—1 condr. black—and a spiral tinned copper shield with .020" tubed gray vinyl plastic jacket.	.170
 PAIRED CABLE — SHIELDED PLASTIC JACKET	5516	2 Pair 4 Condr.	22(7x30)	.015	Stranded tinned copper vinyl plastic insulation. 2 pair cabled (4 conductors)—1 pair black & white with braided tinned copper shield mylar tape—1 pair black & brown unshielded—both pair bunched and .020" gray vinyl plastic jacket overall.	.168x.276
 EXTENSION-SPEAKERS SHIELDED FOR LONG RUNS	5526	2 Condr.	20(10x30)	.015	Tinned copper vinyl plastic insulation, wires twisted together—1 condr. red—1 condr. black—closely woven braided tinned copper shield.	.215
	5531	3 Condr.	20(10x30)	.015	Same as 5526—1 condr. red—1 condr. black—1 condr. blue.	.230
	5536	2 Condr.	18(16x30)	.015	Stranded tinned copper vinyl plastic insulation, wires twisted together. 1 condr. red—1 condr. white, closely woven braided tinned copper shield.	.235
 EXTENSION-SPEAKERS SHIELDED — PLASTIC JACKET	5568	2 Condr.	22(7x30)	.015	Tinned copper vinyl plastic insulation, 2 condrs.—cabled black and red—tinned copper **spiral** wrapped shield .023" chrome vinyl plastic jacket.	.166
	5569	3 Condr.	22(7x30)	.015	Tinned copper vinyl plastic insulation, 3 condrs.—cabled black, red, white—tinned copper **spiral** shield—chrome vinyl plastic jacket.	.193
	5538	2 Condr.	18(16x30)	.015	Stranded tinned copper vinyl plastic insulation, wires twisted together. 1 condr. red, 1 condr. white. **Spiral** tinned copper shield and .020" gray vinyl plastic jacket overall.	.225
	5543	2 Condr.	20(10x30)	.015	Same as 5538—1 condr. red—1 condr. black.	.185
	5541	2 Condr.	18(16x30)	.015	Stranded tinned copper vinyl plastic insulation, wires twisted together. 1 condr red—1 condr. white, closley woven braided tinned copper shield and .020" gray vinyl plastic jacket overall.	.260
 JUKE BOX SPEAKER CABLE	5547	2 Condr.	24(7x32)	.015	Stranded 1 condr. bare copper—1 condr. tinned copper—2 condrs. parallel vinyl plastic insulation. Colors: gray, white, brown, clear.	.058x.115
 DUAL CHANNEL AUDIO CABLE For Stereo & Language Laboratories	5587	2 Condr.	24(7x32)	.018	Tinned copper conductor. **Spiral** tinned copper individual shield, .020" gray vinyl jacket.	.106x.213
 ELECTRIC GUITARS High Impedance Lapel Microphones	5551	1 Condr.	22(16x34)	.020	Stranded tinned copper polyethylene insulation closely spiral tinned. copper shield with .020" gray vinyl jacket.	.135
 INTER COMMUNICATING SOUND SYSTEM	5556	2 Condr.	19 Solid	.015	Bare copper vinyl plastic insulation, wires twisted together—1 condr. brown—1 condr. tan.	.115
	5561	3 Condr.	19 Solid	.015	Same as 5556—1 condr. brown—1 condr. tan—1 condr. gray.	.132
 INTER COMMUNICATING SOUND SYSTEM — JACKETED	5557	2 Condr.	19 Solid	.015	Same as 5556 except .025" outer gray PVC jacket.	.162
 INTER COMMUNICATING SOUND SYSTEM - WEATHER-PROOF	5566	2 Condr.	22 Solid	.015	Bare copper .015 rubber insulation with a black cotton braid weatherproof finish. Conductors coded for easy identification. Ideal for exterior or interior communication installations.	.131x.203

UNIFOAM CABLE SPECIFICATIONS

Inner Conductor | Dielectric | Outer Conductor (Sheath) | Jacket (When specified)

Consolidated Uniform CATV cable

Inner Conductor: High purity (99.9% minimum) soft, uncoated copper

Dielectric: Cellular polyethylene

Outer Conductor (sheath): High purity (99.6% minimum) seamless aluminum

Jacket (when specified): Black, high molecular weight polyethylene

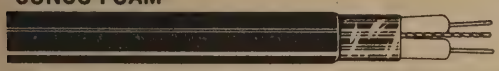
* Conductor resistance at any temperature t (F°) may be determined by multiplying these values by the following:

Inner conductor: [1+0.00218 (t-68)]



Outer conductor: [1+0.00224 (t-68)]

SWEEP TESTING — STRUCTURAL UNIFORMITY

Each length of Consolidated Unifoam CATV cable is checked for structural uniformity over the frequency range of 5-220 MHz. This includes the 88-105 MHz FM band and the 105-174 MHz band, as well as all 12 VHF TV channels. Factory acceptance standards require that each length of cable have a Structural Return Loss (SRL) at least 28 db. down at any frequency within this range. The 28 db. value is not subject to any frequency weighting factors.

SHIELDED AND UNSHIELDED "CONCO-FOAM" (Low Loss Foam Polyethylene All Channel Color TV Cable)

4535 SHIELDED "CONCO-FOAM"

Conco-Foam assures excellent VHF, UHF, Color and B/W TV reception in crowded areas where reception is critical. Mylar-aluminum shielding provides strong and clean signals, eliminating electrical noise and ghost signals. Conco-Foam can be attached to mast, installed in gutters, conduit, or underground.

AWG and STRANDING	COLOR	NOMINAL O.D.	NOMINAL VELOCITY OF PROPAGATION	NOMINAL CAPACITANCE (MMF/FT.)	NOMINAL ATTENUATION PER 100′	SPOOL PUT-UP*

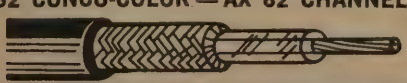
Copperweld, 2 conductors, white CONCO-FOAM insulation, mylar aluminum foil shield, stranded tin copper drain wire, outer Black polyethylene jacket.

* Spade terminals available with Catalog 4535.
** Furnished individually packed coils.

4530 "CONCO-FOAM"



Conco-Foam assures excellent VHF, UHF, Color and B/W TV reception in uncongested and fringe regions. Will provide far greater signal than any other unshielded twin lead cable. Assures highest efficiency even when exposed to weathering and atmospheric conditions.

AWG and STRANDING	COLOR	NOMINAL O.D.	NOMINAL VELOCITY OF PROPAGATION	NOMINAL CAPACITANCE (MMF/FT.)	NOMINAL ATTENUATION PER 100′	SPOOL PUT-UP*

Bare Copper, 2 conductors parallel, white CONCO-FOAM insulation, overall Black polyethylene jacket with web.

** Furnished individually packed coils.

4582 CONCO-COLOR — AX 82 CHANNEL CABLE

Conco-Color-AX is manufactured for distribution systems carrying both UHF and VHF. Cable loss is about half of ordinary RG59/U coax and less than twin lead. Ideal for homes and stores.

PROTECTA-METAL SPOOLS

Popular, profitable specialty wire packaged for easy selling in radio-electrical, scientific, specialty and hardware.
Wide variety of sizes and insulations.
Keeps stock in perfect order, always saleable.
Supplied on Spools as Shown and in Heavier Weights.
Here is a handy and convenient way to stock small quantities of wire. It prevents wire from matting or tangling.

MAGNET WIRE #2000

The correct wire for practically any application. Magnet wire is indispensible in the manufacture and repair of both radio and audio frequency coils, transformers, chokes, speaker field coils, short wave coils, tuners, transmitters, etc. Also widely used in the construction and repair of motors, generators, dynamos, etc.

Larger Quantities At Same Per Pound List

SPECIAL MAGNET WIRES

In addition to the standard listing shown here, we maintain an extensive stock of all other sizes in round, rectangular and square magnet wire.

RESISTANCE WIRE #2000

ON PROTECTA-METAL SPOOLS

Recommended for electrical heating appliances and other devices where the hghest quality in performance is required, whose operating temperatures do not exceed 1850°F. Particularly suited for heavy duty rheostats and controls which require compact resistance.

DABURN

DABURN electronics & cable corp.

WIRE • CABLE • TUBING • MIL/COMM • SWITCHES • ELECTRONIC HARDWARE

DAFLEX 105 PLASTIC TUBING

105°C POLYVINYLCHLORIDE (PVC) MEETS MIL-I-631D SPECS

Specifically compounded vinyl resins for superior all around performance. UL approved for 105°C, conforms to Spec MIL-I-631D Type F, Form U, Grades A and C. Class 1 and 2, Category 1. Resistant to heat, oil, water, chemical corrosion, fungi and aging. Very hi abrasion resistance. Will retain its flexibility. Suitable for covering and protecting wires and cables. Designed for electrical, electronic and aircraft applications. Non-flammable. Meets ASTM—D876, ASTM—D922.

D105 compounded with non-migratory resin type plasticizors. Retains its flexibility, permitting it to cling and protect irregular shapes. D105 snakes well under practically all conditions.

DIMENSIONAL TOLERANCES OF DAFLEX 105

IN STOCK

PROPERTIES OF DAFLEX-105 TUBING

Recommended for Temperatures to
105°C (220°F)

Low Temperature Flexibility to
—30°C

Dielectric Strength — .020" Wall
800 V/MIL

Dielectric Constant
6.0

Tensile Strength — Min. (PSI)
2700

Ultimate Elongation
300%

Oil Resistance
Excellent

Fungus Resistance
Excellent

Flammability
Self-Extinguishing

Corrosion and Abrasion Resistance
Excellent

COLORS AVAILABLE FROM STOCK:
All sizes 24 thru 2½": Clear, black, white.

ALSO STOCKED—Sizes 2 thru 7: Clear, black, white, yellow.
Sizes 8 thru 14: All above plus green, red.
Sizes 15 thru 24: All above plus blue. **Additional Colors Available.**

ALL THE ABOVE TUBING CAN BE ORDERED CUT AND MARKED TO YOUR SPECIFICATIONS

DAFLON TEFLON® SPAGHETTI TUBING

Daflon 500 and 550 tubing is extruded from Dupont Tetrafluoroethylene resin and is unmatched by any other tubing for use in applications for hi frequencies and hi temperatures. Rated for continuous operation of 250°C it retains its toughness and flexibility thruout. Has high resistance to fatigue and stresses. Will not shrink back during soldering operation. Non-flammable, flexible, it permits miniaturization of design and compactness. Lowest coefficient of friction. Inert to all fungus growth. Conforms to **MIL-I-22129C Spec.** AMS 3651B, 3653B, 3654, 3655.

TABLE OF PROPERTIES

Test	ASTM Method	Result

DAFLEX VINYL COATED FIBERGLASS TUBING 130°C
MEETS MIL-I-3190B SPECS (ASTM, NEMA GRADE B-B-1)

DAFLEX 130, Class B, Grade B-1 is recommended for continuous temperatures up to 130°C. Constructed to provide a tough, flexible, heat resistant tubing. Made from an inorganic fiberglass base sleeving with heat resistant coating, extremely flexible tough plastic insulation. Will not support combustion. Meets MIL-I-3190B, NEMA VSI ASTM D372. MIL-1-21557.

PROPERTIES OF DAFLEX 130 VINYL COATED FIBERGLASS

Recommended for Temperatures to 130°C

Ins. Resistance
Max. Low Temperature Flexibility —20°C
Over 1,000,000 Megs.
Dielectric Strength 4000 V/MIL
Dielectric Constant 7.0
Oil Resistance — Excellent
Tensile Strength — Min. (PSI) 1500
Ultimate Elongation 350%
Non-Flammable
Will not support Combustion, Abrasion, Oil, Chemical Corrosion Resistance Excellent
Fungus Resistance Good
Gamma Radiation Dosage to 25% 10^{9}
Degradation ERGS/GRAM
Color Stability even on Prolonged Baking at Elevated Temperatures

Hot Air Gun
FOR DAFLEX SHRINKABLE TUBING

DABURN No.

HG1—For SH265, SH275, SH290 & SH160 Series
HG2—For SH400 & SH621 Series

A flameless heat source; light in weight; portable and/or permanent mounting.

An oven, hot liquids, radiant heat, open flame or soldering iron may also be used for all types of shrinkable tubing with excellent results.

See accessories on page 27.

HEAT SHRINKABLE TUBING

SHRINKABLE IRRADIATED POLYOLEFIN TUBING

This series is designed for maximum mechanical strength at stress or points of connection. It is strong and abrasion resistant and is supplied in expanded sizes. It insulates, jackets, splices, encapsulates, weatherproofs components, connectors, cables and irregular shaped objects. When exposed to heat (300°F) the tubing shrinks 50% in diameter, 5% longitudinal contraction. Controlled shrinkage to exact requirement takes place. Meets or exceeds MIL-I-23053B/5 Class 1 and 2. Available with UL approval. AMS 3636B 3637A.

STOCK COLORS: Black, White, Red, Clear. Additional colors available. Although processed by hi-energy radiation the **Daflex SH-275** and **SH-290** shrinkable tubings **do not** at any time become radioactive or possess any residual radioactivity. *Wall thickness will be less if recovery is restricted. **4' lengths. SHRINKABLE POLYOLEFIN END CAP AVAILABLE.

SPECIFICATIONS—All Tests Made on Tubing in Recovered Dimension

Continuous Operating Temp: 135°C	Shrinkage Ratio: 2:1 (50%)
Longitudinal Change: 5% Max.	Dielectric Strength: 500 V/MIL Min.
Tensile Strength: 1500 PSI Min.	Dielectric Constant: 2.87 Max.
Ultimate Elongation: 200% Min.	Corrosive Resistance: Non-Corrosive
Special Gravity: 1.29 Max.	Resistance to Soldering Iron: Excellent
Low Temp. Flexibility (—54°C): No Cracking	Fuel, Oil, Solvent, Acid, Alkali, Hydraulic Fluid Resistance: Excellent

DABURN SHRINKABLE POLYVINYLCHLORIDE ALL PURPOSE

Shrinkage Ratio: 2:1 (50%)

Flexible, shrinks 50% on heat application, less than 10% longitudinal contraction. Suitable for insulating components and cables in varying shapes and diameters. Has a higher resistance to oils than low density polyethylene. Conforms to MIL-I-631D, Type F, Form U, Grade A and C, Class 1 and 2, Cat. 1. Controlled shrinkage on application of heat to predetermined size takes place at temperatures below 200°F (one minute or less). Meets or exceeds MIL-I-23053B/2 Class 2.

OPERATING TEMPERATURE: —20° to +105°C.

HEAT SHRINKABLE TEFLON‡ TUBING

DAFLON SH-400 (FEP)

Made with Modified TEFLON‡ FEP will shrink over inserted objects upon exposure to moderate heat. Heretofore, many joints, parts, components, devices could not be protected because of hi temperature required for shrinkage. FEP TEFLON‡, which has a continuous service temperature of 400°F., will shrink at 300°F. Supplied in natural (transparent) color. Complete shrinkage at 350°F. Now, many heat sensitive products can use the permanent protection of TEFLON.* Will not burn or support flame, long lengths available. Will not split, melt, or cold flow. Extruded. Meets MIL-I-23053/11.

WIRE • CABLE • TUBING • MIL/COMM • SWITCHES • ELECTRONIC HARDWARE

TUBULAR BRAID PER MIL SPEC QQ-B-575

Tinned copper shielded braid mf'd completely round per Mil Spec QQ-B-575. Maintains its round configuration. Shielding coverage is 95% or more. Used in military applications where maximum shielding is required against electrostatic interference. Useful against mechanical abrasion and stresses for cables — as grounding cable.

STANDARD SPOOL PUT-UP: 50 Ft., 100 Ft., 250 Ft.
Larger Spools Available — Advise.

*Values based on copper in free air at 65°F and intended as a guide only.

†These sizes are mfg. to standards of QQ-B-575 although they are not listed in the specification.

Additional constructions and variations made to order. Also available in **silver plated copper,** bare copper, stainless steel, and nickel plated copper.

TINNED COPPER SHIELDING — FLAT BRAID

Soft annealed tinned copper woven braid, rolled flat at time of manufacture. It is extremely flexible. Used as battery grounding, bonding strap for aircraft, vehicles, marine equipment. Eliminates ignition interference and moving parts. Slides over wire and cables.

DAPRENE™ HEAT SHRINKABLE NEOPRENE* TUBING

This unique tubing meets or exceeds MIL-T-23053B specs. Shrinks down to under 33% of its supplied inside diameter. Upon exposure to heat of 160°F — will remain elastomeric — with no cracks (longitudinal shrinkage 50%). Will protect components, solder joints, terminals, fittings, harnessing and jacketing of wires, medical equipment, etc. Resistant to abrasion, flame, chemicals. Suitable electrical and mechanical properties. Has continuous range of −67° to +212°F. Tubing is self extinguishing when flame is removed. Variety of intermediate recovered sizes. Available expanded sizes: 1/2", 1", 1 1/2", 2". **COLOR:** Black. Tubing must be stored below 100°F.

PROPERTIES:

ELECTRICAL
Dielectric Strength: V/M, 400 Min.
Volume Resistivity: OHM/CM, 1 x 10^{14} Min.

CHEMICAL
Solvent Resistance: Excellent
Corrosion: Good.
Water Absorption: 1.0 Max.
Flammability: Self-Extinguishing in 15 Seconds

PHYSICAL
Elongation: 400% Min.
Temperature Range: −67° to +212°F
Tensile Strength: 1500 PSI Min.
Dielectric Strength: 360 V/M Min.
Heat Resistance: 212°F for 96 Hours — No cracking.
Specific Gravity: 1.40 Max.

HARDNESS
Shore A Durometer: 85 ±5.

HEAT SHOCK
302°F for 4 Hours — No cracking, flowing or dripping.

DAPRENE™ SH160 HEAT SHRINKABLE NEOPRENE* TUBING COLOR: BLACK

STD. PUT-UP 2555 & 2560 SERIES: 100 Ft., 500 Ft., 1000 Ft.
STD. PUT-UP 2565 SERIES: 100 Ft.-1000 Ft.

NYLON JACKET THICKNESS: #24 .002; 22, 20, 18 .003; 16, 14 .004; 12 .005; 10 .007.

Stock Colors, Type MW: White, Orange, Purple, Black, Yellow, Gray, Brown, Green, Red, Blue, Tan, Pink, Lt. Blue, Lt. Green.
Spiral tracer combinations available to order.

GLASS BRAID PER SPEC. MIL-W-76B

DESCRIPTION: One conductor stranded tinned copper with thermoplastic insulation and lacquered glass braid overall.

GLASS BRAID — TYPE HW (Heavy Wall)

TEMPERATURE RATING: —40°C to +80°. **NOM WALL: .045"**

DABURN Cat. No.	Spool	Size AWG	MIL-W-76B Type Designation	Conductor Strand	Nom. O.D.
2575/10	100'-1000'	10	HW-C 10(105)B	105/30	.237"
2575/8	100'-1000'	8	HW-C 8(133)B	133/29	.293"
2575/6	100'-1000'	6	HW-C 6(133)B	133/27	.340"

STOCK COLORS: White, Black.
Additional colors available to order.
ALSO multi-conductors can be formed to order twisted, shielded, with or without plastic jacket overall.

GLASS BRAID — 1000 VOLTS — TYPE MW (Medium Wall)

TEMPERATURE RATING: —40°C to +80°C. **NOM. WALL: .017"**

DABURN Cat. No.	Spool	Size AWG	MIL-W-76B Type Designation	Conductor Strand	Nom. O.D.

MULTI-CONDUCTOR CABLE TYPE B NYLON SHIELDED-PLASTIC JACKET PER MIL-W-16878D — 600 V

DESCRIPTION: One or more conductors stranded tinned copper, PVC insulation, color coded, clear nylon (polyamide) jacket, cabled conductors, 90% coverage braided tinned copper, white polyvinylchloride jacket overall.

TEMPERATURE RATING: −55°C to +105°C. Voltage rating 600 volts. Resistant to acids, alkalis, flame, fungus, oil, moisture, solvents.

NEW — MINIATURIZED SHIELDED CONTROL AND INSTRUMENTATION CABLE

PER MIL-W 16878D — TYPE B — 600 VOLT

DESCRIPTION: Each conductor stranded tinned copper, .010″ wall high temperature PVC, cabled with a mylar tape wrap, braided tinned copper shield for 90% coverage overall, covered with gray PVC jacket.

Rated: −55°C to +105°C, 600 volt.

Resists acid, alkalis, flame, moisture, oil, solvents, fungus. Used as interconnecting cable for electronic equipment; control and instrumentation cable, telemetry and remote control with sensitive recording instruments.

SUBMINIATURE TEFLON* HOOK-UP WIRE

PER MIL-W-16878D — TYPE ET — 250 VOLTS, 200°C

Thin miniature hook-up wire is suitable in miniature slip ring assemblies, as interconnecting wire between wafers in microminiature electronic circuitry, instrument wire, medical wire, subminiature thermo-couple lead wire, strain gauge wire, etc. Provides lighter weight, greater flexibility and hi temperature resistance. Size Nos. 32 thru 20 conform to MIL-W-16878D type ET 250 volts, 200°C. Silver plated copper conductor.

DABURN electronics & cable corp.

WIRE • CABLE • TUBING • MIL/COMM • SWITCHES • ELECTRONIC HARDWARE

KINKLESS TEST LEAD WIRE • UL & CSA HOOK-UP WIRE • TYPE F & FF PER MIL-W-16878D • SILICONE RUBBER LEAD WIRE • HIGH VOLTAGE CABLE • SHIELDED HOOK-UP WIRE

RUBBER KINKLESS TEST LEAD WIRE

Suitable as Test Lead Wire in analyzers, instruments, oscillators, meters, etc. Wherever extra flexibility and limpness is necessary. Single conductor, extra flexible stranded soft tinned copper, separator, wall color coded rubber, smooth wax finish.

OPERATING TEMPERATURE: −20°C to +60°C. Colors: Red, black

DABURN No.	Size	Strand	Nom. Insul. Wall	Sugg. Voltage	O.D. Nom.

* Types WS-16/U Black, WS17/U Red Per MIL-W-13169.

STD. PUT-UP: 100 Ft., 500 Ft., 1000 Ft.

PLASTIC KINKLESS TEST LEAD WIRE

Soft formulation vinyl maximum flexibility. Temperature stability from −80°C to +115°C. Exceed requirements for MIL-I-3930A Type JP (PVC). Suitable for test leads, etc. Resistant to gasoline and oil. Excellent abrasion Resistance.

DESCRIPTION: One conductor tinned copper stranded, special formulation vinyl insulation — smooth surface.

OPERATING TEMPERATURE: −80°C to +115°C, 5000V rating.

COLORS: Black, Red, Yellow, Green, White, Blue.

600 VOLT UL APPROVED — 105°C (CSA 600V — 90°C)

STYLE 1015, CSA TR-32

Resistant to acids, alkalis, oil, flame, fungus and moisture. Temperature Rating: −10°C to +105°C.

DESCRIPTION: One conductor stranded annealed copper tinned, plastic insulation.

Kynar Wire Wrap to UL specifications available to order.

SILICONE RUBBER LEAD WIRE

600 VOLT — 200°C

FLEXIBILITY FROM −104°C TO +400°F

Suitable for high-heat and hi-frequency applications. Resistant to acids, alkali, oil. Retains physical properties under extremes. Low power factor, low dielectric constant. Tinned copper, stranded, silicone rubber insulation, glass braid, lacquered. Color: White. Additional Colors Available.

DESCRIPTION: One conductor, tinned copper strands, silicone rubber insulation, glass braid, lacquered.

STOCK COLOR: White.

HI-VOLTAGE CABLE

One conductor, stranded copper tinned, rulan — flame retardant — polyethylene insulation, braided tinned copper overall when shielded. Used as hi-voltage leads in electronic equipment to minimize RF radiation in equipment.

DESCRIPTION: One conductor, stranded copper tinned, rulan (flame retarding type) polyethylene insulation. Available white/red tracer. Temp. Rating: 105°C.

Shielded: Same as above with tinned copper braided shield overall. Special construction available to order.

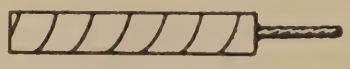
WIRE • CABLE • TUBING • MIL/COMM • SWITCHES • ELECTRONIC HARDWARE

NEW CRT HI-VOLT CORONA RESISTANT TEFLON* CABLE©

Voltage Rating at Sea Level • Voltage Rating at 80,000 feet, approximately 1/3 lower
• Minimum life expectancy: 10,000 hours.



SMALL SIZE:
You do not need bulky, thick, insulation jacketing as used with silicone rubber and polyethylene insulations to get your hi-voltage requirements. Wire used is MIL-SPEC QQ-W-343 and MIL-W-16878D. Insulation used conforms to and surpasses MIL-SPEC-W-16878D

AVOID CORONA PROBLEMS:
Corona resistant Teflon construction is specifically designed to retard and prevent corona penetration. Temperature variations from −60° to +300°C have no life effect on the corona resistant Teflon. In addition, there is no stress or crack failure under severe, adverse conditions including mechanical strain, moisture, corona or chemical conditions.

DESCRIPTION:
Single Conductor, Stranded Silver Plated Copper, Corona Resistant Teflon* Insulation.

TEMPERATURE RATING:
−90°C to +250°C.

VOLTAGE RATING:
Based on insulation thickness.

AVAILABLE COLORS:
White, Black, Red, Green, Yellow, Lt. Blue, Brown, Orange, Gray, Violet. (Also available in tracer colors)

PUT-UP: 250′, 500′, 1000′

*DUPONT

NEW DABURN HIGH TEMPERATURE LEAD WIRE

Small Diameters and High Temperature performance make an outstanding combination for these unique constructions. Basic wire conforms to MIL-W-3861 spec. shielding per MIL-N-46026A. 600V RMS.

800°F TEMPERATURE RATING

High temperature aircraft and missile lead wire for operation between 500°F and 800°F. Nickel clad copper conductors with glass braided fiber insulation impregnated with silicone varnish. Multiconductor and shielded construction will be manufactured to customer's specifications.

2497/22	22	19/.0063″	755	.070″

STD. PUT-UP: 500 Ft., 1000 Ft.

1500°F TEMPERATURE RATING

High temperature radiation resistant aircraft and missile lead wire for operation between 800°F and 1500°F. Nickel clad copper conductors with inorganic braided insulation. Useful up to 1500°F providing moisture resistance is not required. Multiconductor and shielded construction can be made to customer's specifications.

2000°F TEMPERATURE RATING

High temperature radiation resistant aircraft and missile lead wire for operation between 1500°F and 2000°F. Nickel clad copper conductors with vitreous silica braided insulation and a braided shielding. Useful up to 2000°F providing no initial moisture resistance or abrasion resistance is required. Multiconductor construction can be made to customer's specifications.

H FILM KAPTON* WIRE

DALITE™

HIGH TEMPERATURE HOOK-UP AND AIRFRAME WIRE 200°C CONTINUOUS TEMPERATURE RATING (a)

INSULATED WITH DUPONT KAPTON* POLYMIDE FILM WITH TEFLON* — FEP HEAT SEALED COATING CONFORMS TO MIL-W-81381.

CHARACTERISTICS: Dalite™ insulated wire provides high temperature stability, low temperature flexibility, high radiation resistance, resistance to cold flow, impervious to most chemicals, high dielectric strength, low dielectric constant, smaller diameters and lighter weight than any other comparable wire used for continuous operation up to 200°C. This hook-up wire meets the test requirements of MIL-W-16878 for 300 V, 600 V and 1000 V with **smaller wall thicknesses, weight and dimensions.**

(a) Temperature based on lowest temperature rating of materials in the insulation — FEP 200°C. Will pass 96 hour heat age tests at 290°C per MIL-W-16878.

DESCRIPTION: Single conductor, silver plated annealed copper conductors, Type H* Polymide film with Teflon* FEP coating tape wrapped overall.

NEW FLAT RIBBON CABLE, TYPES B & C PER MIL-W-16878D

MULTI-CONDUCTOR — POLYVINYLCHLORIDE INSULATION CONDUCTORS
Per MIL-W-16878D — TYPE B — 600 V

DESCRIPTION: Each conductor stranded tinned copper .010" polyvinylchloride insulation bonded to form flat ribbon cable.

Rated: −55°C to +105°C. Voltage Rating: 600 volts. Resists acid, alkalis, flame, moisture, oil, solvents, fungus. Conductors are color coded and separate easily for clean terminations. Saves space, time on circuit and interconnecting assemblies, wiring harnesses, sliding drawers and drop assemblies.

MULTI-CONDUCTOR — PLASTIC JACKET

UNSHIELDED AUDIO — FLEXIBLE

Each Cond. #22 7/30 Tinned Copper, stranded, .010″ wall plastic insulation, color coded, twisted, gray vinyl jacket overall. Suitable for signal, P.A. systems, computer cable—for outdoor use.
STD. PUT-UP: 500 Ft.
Operating Voltage: 200 Volts. **Operating Temperatures:** −20°C to +60°C.

PORTABLE CORD, CONTROL CABLES — MIL-C-3432C SERVICE CORD

RUBBER, NEOPRENE & PLASTIC PORTABLE CORD
UL APPROVED — 300 AND 600 VOLT

For power line requirement where rough usage is indicated as for amplifiers, sound systems, speakers, vacuum cleaners, washing machines, trouble lights, refrigerators, etc. Color coded. Underwriters approved. Neoprene and plastic construction recommended for equipment exposed to oil, acids, outdoor use, direct burial, etc.

SUGGESTED OPERATING TEMPERATURE: —20°C to +60°C.

Each conductor, copper conductor, paper separtor, color coded, rubber insulation, filler, (where necessary) separator, tough rubber or neoprene jacket, black.

CONTROL CABLE
HEAVY DUTY MULTI-CONDUCTOR
PORTABLE TYPE SO
NEOPRENE JACKETED — 600 VOLT

DESCRIPTION: Stranded bare copper each conductor, rubber insulation color coded, filler where necessary, wrap over conductors, flexible heavy duty black Neoprene jacket overall.

Recommended for outside installation, this heavy duty control cable resists oil, ozone, sunlight, moisture, impact and abrasion. Suitable for remote control automatic equipment, telemetering, signal transmission.

DABURN

DABURN electronics & cable corp.

WIRE • CABLE • TUBING • MIL/COMM • SWITCHES • ELECTRONIC HARDWARE

TELEPHONE CABLE

(Meets REA-PE-22)

EXCHANGE AREA — COMMUNICATION CABLE AERIAL, DUCT AND CONDUIT INSTALLATION

DESCRIPTION: Color coded polyethylene insulation over each bare copper conductor. Conductors are paired. Pairs are cabled with non-hygroscopic tape wrap, corrugated aluminum shield, .008" thick and black polyethylene jacket overall.

Minimal cross talk .083 microfarads/mile — average mutual capacitance, 1 KC. This is a tough, long lasting cable — withstands weathering, ultra-violet and is abrasion resistant.

#22 AWG — SOLID CONDUCTORS

STD. PUT-UP: 500 Ft., 1000 Ft.

CONDUCTOR COLOR CODE: 1—Black, 2—Red, 3—White, 4—Green.

SHIELDED CABLE
PLASTIC JACKETED BRAIDED COPPER SHIELD

Suitable for P.A. and sound systems, installation in schools, hospitals and institutions, transmitters, electronic circuits, etc. Construction allows ease of pigtailing. Shield provides additional strength for cable. Each conductor tinned copper, PVC insulation, color coded, twisted, braided T-C shield, gray PVC jacket overall. Suitable for outdoor installations.

OPERATING TEMPERATURE: −20°C to +60°C.

STD. PUT-UP: 500 Ft., 1000 Ft.

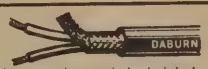
CONSTRUCTION VARIATION TO ORDER

SHIELDED PLASTIC MICROPHONE CABLE

Will withstand abuse and is resistant to oil, moisture, aging. Have low capacitance, Hi insulation resistance and low attenuation. Will not strain or mark.

2772 — For hi impedance microphone
2773 — For crystal, ribbon, etc. mikes. All are suitable for hi-fi interconnecting cables.
2774 — For hi impedance lapel mikes.

OPERATING TEMPERATURE: −20°C to +60°C.



SHIELDED MICROPHONE CABLE ONE CONDUCTOR

Uses tinned copper spiral shield — for ease in soldering — extremely flexible-plastic.

DABURN Cat. No.	Cond.	Size	Strand	Shield	Nom. Cap./Ft. MMF	Sugg. Work Voltage	Nom. O.D.

SHIELDED ULTRA LOW CAPACITY MICROPHONE CABLE
Plastic Jacket — Cellular Foam Polyethylene Insulation
BRAIDED SHIELD

DESCRIPTION: Constructed with white foam polyethylene insulation, braided tinned copper shield, chrome gray vinyl jacket. The low loss foam polyethylene construction has lower capacitance and attenuation than standard polyethylene mike cables as much as 50%. This increases the effective length of cable as much as 50% without signal loss.

OPERATING TEMPERATURE −20°C to +60°C.

ELECTRONIC LACING CORDS AND TAPES, CABLE CLAMPS & CLIPS

LACING CORD-TAPE TO MEET MIL-T-713C TYPE P* AND MIL-T-43435 COMP. P-TYPE S

NYLON FLAT BRAIDED LACING TAPE

Nylon fiber flat braided impregnated with MW microcrystalline fungicidal wax. Stays flat. Designed to create a wider contact to distribute the stress. Flexible. Won't slip when knotted. Resistant to fungus, flame, abrasion, acids, MIL-T-43435 (new) supersedes MIL-T-713 (old).

Daburn No.	Color	(New) Size	(Old) Class	Nom. Width	Nom. Thickness	Tensile Strength	Standard Put-Up Tubes

NYLON CABLE CLAMPS

MADE OF DU PONT "ZYTEL" 101 NYLON RESIN

Meets MIL-P-26093A and MIL-P-17091A Amend. 2

Light and tough these nylon cable clamps are used as a clamp, strain relief, clip hanger, fastener or strap. Smooth non-abrasive surfaces, rounded edges will not cause shorts or grounds in cable. Insoluble in solvents, gasoline, oils, hydraulic fluids, alcohol, acids, alkalies. Temperature range −60°F to +300°F. Does not support combustion. Inside matte finish. Prevents slippage and is self aligning. Snaps on cable. Meets MIL-P-20693A specs. fungus resistant.

ESSEX electronic wire & cable

TRIAXIAL CABLES

ESSEX Triaxial Cables are especially desgigned to satisfy the need for a high degree of shielding in a flexible transmission line. This is achieved by adding a high coverage braid over the cable jacket and then applying a second or outer jacket. This type of construction provides more effective action than two adjacent braids. Aside from applications requiring maximum attenuation of radiated signals or minimum pickup of external interference, this cable can also be used to carry two separate signals.

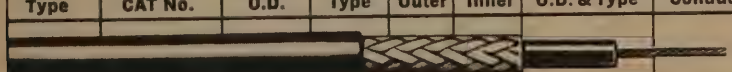
RG SUBMINIATURE CABLE

ESSEX line of subminiature coaxial cables were created for use in any miniaturized electronic application where high temperature and extreme flexibility is a consideration. This Teflon dielectric subminiature cable is able to withstand continuous operating temperatures up to 250°C. Teflon jacket is weatherproof, chemically inert, insoluble in liquids and gases — provides the greatest flexibility and lowest attenuation. ESSEX subminiature cables have been laboratory tested at −55°C and retained all its flexible properties.



The polyethylene dielectric miniature coaxial cable is intended for use in any miniaturized electronic applications where extremely high temperature is not a consideration.

LOW NOISE CABLES

ESSEX Low Noise Cable fulfills the need for cable which will remain electrically neutral under conditions of shock and vibration. The spurious signals generated by flexing or distorting a standard cable may well be of a higher level than the useful signal being transmitted along the cable. The reduction of inherent noise is achieved on these cables by the application of a semi-conductive coating over the dielectric.

HIGH VOLTAGE CABLE AND WIRE

ESSEX High Voltage Cable and Wire is designed to satisfy a multitude of high voltage applications — where flexibility and temperature extremes may be a factor. High voltage wire operates up to 50,000 volts D.C. — coaxial cables up to 35,000 volts D.C. These cables and wires retain their flexible characteristics at temperature ranges of −55°C to +80°C.

Let us put our manufacturing experience at your disposal to solve your high voltage coaxial cable and wire problems.

METAL JACKETED COAXIAL CABLE

ESSEX Aljak and Cujak Cables have a number of outstanding characteristics for a wide variety of applications. Their electrical advantages over the standard RG Type coaxial cable are lower attenuation and minimum signal radiation or pick-up. Mechanically, they have the advantage of light weight in the Aljak version as well as small size and complete weather-proofing in both versions.

BC/U 100% SHIELDED CABLE

ESSEX Bc/u Bonded Cable is a high reliability, low loss, 100% shielded, flexible, lightweight cable from applications where efficiency and performance are a factor.

The aluminum shield is bonded to the polyethylene jacket to produce a tough cable that can take bending and flexing. Meets or exceeds all requirements of MIL-C-17.

Neoprene Jacketed Control Cable 600 Volts

APPLICATIONS: Designed for heavy duty use in relay control, power and signal transmission, lighting, motor and turbine control, telemetering, switching control of automatic electronic and electrical equipment, substation operations, traffic control and fire alarm control. Neoprene has exceptional flexibility, mechanical strength and suited for either indoor or outdoor installation.

CONDUCTOR: Stranded bare copper-minimum strands*
INSULATION: Color coded rubber per National Electric Code standards
CABLING: Cabled with fillers when necessary, separator over conductors
JACKET: RUGGED BLACK NEOPRENE
VOLTAGE TEMPERATURE RATING: 600 Volts - 60°C
STANDARD PUT-UP: Cut to requirements.

No. 16 - 26/30 BARE COPPER* - 1/32" INSULATION

Shielded Audio Cable

BRAIDED COPPER SHIELD - PLASTIC JACKET

APPLICATIONS: Audio and sound systems where severe flexing requires added tensile strength.

CONDUCTOR: Stranded tinned copper
INSULATION: .016" color coded PVC
CABLING: Conductors twisted
SHIELD: Braided copper shield
JACKET: .020" CHROME GRAY PVC
VOLTAGE RATING: 300 Volts RMS
STANDARD PUT-UP: 1000' Reel

MYLAR BONDED ALUMINUM FOIL SHIELD - PLASTIC JACKET

APPLICATIONS: A light weight, low cost, small diameter shielded audio and sound systems cable easily terminated with drain wire. Foil shield provides 100% coverage at audio and radio frequencies.

CONDUCTOR: Stranded tinned copper
INSULATION: .016" color coded low density polyethylene
CABLING: Conductors twisted
SHIELD: Mylar bonded aluminum foil shield 100% coverage, wrapped with aluminum foil facing outward, drain wire between foil and jacket for maximum grounding contact.
JACKET: .020" CHROME GRAY PVC
VOLTAGE RATING: 400 Volts RMS
STANDARD PUT-UP: 1000' Reel

Control Cable-600Volts-90°C

GENERAL PURPOSE—PLASTIC JACKET IPCEA

APPLICATIONS: Small diameter control cable used in process control equipment, remote sub-station operations, signalling and indicating devices, measurement and recording equipment, telemetering and switchgear operating.

CONDUCTOR: Flexible stranded copper
INSULATION: Polyethylene insulation with PVC jacket over primary insulation, color code IPCEA
CABLING: Conductors cabled with fillers when necessary, mylar tape over core
JACKET:- BLACK PVC PLASTIC
VOLTAGE RATING: 600 Volts
TEMPERATURE RATING: 90°C
SPECIFICATION: IPCEA-NEMA S 61-402
STANDARD PUT-UP: Cut to requirements.

Paired Intercom Cable

UNSHIELDED MULTIPLE PAIRS - PLASTIC JACKET

APPLICATIONS: Multiple speaker and sound cable, balanced intercom systems providing a quiet circuit free from cross talk telephones, hospital call systems, signal and alarm systems.

CONDUCTOR: Solid or stranded tinned copper
INSULATION: Color coded PVC
PAIRED: Conductors paired with short lay for balance and easy identification
CABLING: Pairs cabled with open binder when necessary
JACKET: FREE STRIPING CHROME GRAY PVC
VOLTAGE RATING: No. 22 gauge - 200 Volts RMS
No. 18 gauge - 400 Volts RMS
STANDARD PUT-UP: Cut to requirements

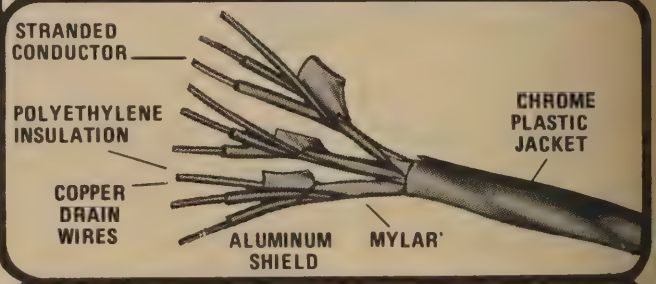
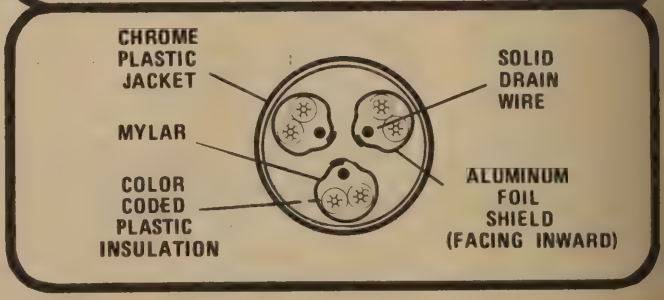
CONDUCTOR: Stranded tinned copper

INSULATION: Color coded high molecular weight polyethylene

PAIRED: Conductor paired with short lay for balance, free from cross talk, drain wire twisted together



SHIELD: Each pair shielded with aluminum foil, bonded mylar wrap over pair with individual drain in contact with aluminum foil. 100% coverage



CABLING: Shielded pairs cabled on planetary cabler to eliminate conductor strain and distortion, mylar tape wrap over core

JACKET: SMOOTH CHROME GRAY PVC PLASTIC

VOLTAGE RATING NO. 22 GAUGE - 300 Volts RMS
NO. 18 GAUGE - 600 Volts RMS

STANDARD PUT-UP: Cut to requirements

NATIONAL WIRE & CABLE CORPORATION

MULTIPLE CONDUCTOR CONTROL CABLES

IN STOCK
MIL-SPEC
U.L. LISTED

National Wire & Cable Corporation manufactures a complete line of multiple conductor control cable. Conductors are stranded tinned copper with 1/64" wall of vinyl primary insulation for use up to 105°C per MIL-W-16878 Type C.* Insulated for 1000 volts working voltage. Color coded using 10 standard colors plus stripes on white per MIL-STD-681.

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape serve over cable bundle. Shielded cables have a tinned copper braid overall, of 85-90% coverage per MIL-C-7078, and braid angles below 40 for easy pushback.

The outer jacket is black abrasion-resistant 105°C vinyl meeting MIL-I-631 Class F. All materials are self-extinguishing and fungus resistant. All cables are U. L. LISTED STYLE 2343; rated 80°C. (Higher temp. ratings apply to any non-U.L. service.) Specify polyurethane sheath for extreme rough usage or low-temp. service.

STANDARD PUTUPS: 100 ft, 500 ft or 1000 ft. No-deposit reels.

* Insulated wires also meet U.L. style 1007 and CSA type TR-64.
† Denotes U.L. Style 2344.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage: Greater than 8000 volts AC RMS, 60 cps.

Capacitance: Nominal capacitance from a wire to all else in the cable ranges from 40 to 65 mmfd per ft., @ 1000 cps; dependent on gauge and position.

Insulation Leakage Res.: 200. megohms/1000 ft. min. at 500 VDC from any conductor to all else in cable.

Sheath Leakage Res.: 10. megohms/1000 ft. min. at 500 VDC from overall shield through sheath to outside world.

Usable Temp. Range: Suitable for continuous use from +105°C to −55°C.

Cold Bending Capability: All cables are suitable for flexing to a circle diam. of approx. 6 cable diameters from +105°C to −20°C; Recommended flex diameter should be greater than 20 cable diam. for flexing at −40°C., or for continuous flexing service to −55°C, specify polyurethane sheath, in lieu of vinyl sheath.

MULTI-CONDUCTOR STOCK CABLES

Conductor sizes 22, 20, 18, 16, 14 & 12 gauge. 22 AWG is 7 strand. All others 19 strand.

NATIONAL WIRE & CABLE CORPORATION

MULTIPLE PAIR SIGNAL & CONTROL CABLES

IN STOCK MIL-SPEC

U.L. LISTED

Identical to National's NW-Series Cables except offered as twisted pairs.

National Wire & Cable Corporation manufactures a complete line of multiple pair control cables. Conductors are of tinned copper strand with 1/64" vinyl primary insulation for use up to 105°C per MIL-W-16878D Type C. Insulated for **1000** volts working voltage. Conductors are color coded using 10 standard basic colors, plus spiral tracers on white per table below.

All pairs are planetary cabled and contra-helically laid with a Mylar tape serve over the cable bundle. The overall jacket is a 105°C black vinyl plastic per MIL-I-631; or may be Neoprene to MIL-R-6855 Class 2 Grade 60 specification. (Neoprene at added cost).

SHIELDED CABLES

National Multiple Conductor SHIELDED CABLES are to the same specifications as above with addition of tinned copper braided shield over cable complex with 85-90% coverage to MIL-C-7078A. STANDARD PUT-UPS: 500 ft. and 1000 ft. No-deposit reels.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage: Greater than 8,000 volts AC RMS, 60 cps.

Capacitance: Nominal capacitance wire to wire for a pair ranges from 27. to 40. mmfd/ft. Capacitance from both wires tied together measured to all else in common ranges from 35. to 60. mmfd/ft. dependent on gauge and position. Overall shield has negligible effect on W-W capacitance.

Insulation Leakage Res.: 200. megohms/1000 ft. min. at 500 VDC from any conductor to all else in cable.

Sheath Leakage Res.: 10. megohms/1000 ft. min. at 500 VDC from overall shield through sheath to outside world.

Usable Temp. Range: Suitable for continuous use from +105°C to −55°C.

Cold Bending Capability: All cables are suitable for flexing to a circle diam. of approx. 6 cable diameters from +105°C to −20°C; Recommended flex diameter should be greater than 20 cable diam. for flexing at −40°C., or for continuous flexing service to −55°C, specify our neoprene sheath, in lieu of plastic sheath.

U.L. APPROVED COMPUTER GRADE

MINIATURE SIGNAL & CONTROL CABLES

National Wire & Cable Corp. manufactures a complete line of MINIATURE low voltage signal and control cable. Available as cabled pairs or cabled singles, with optional overall shield. Conductors are stranded tinned copper with .010" wall of vinyl primary insulation for use up to 105°C. per MIL-W-16878 Type B. Insulated for **600 volts** working voltage. (Also meets U.L. AWM Type 1061; 300 volt, 80°C.) All are coded using 10 standard colors plus stripes on white per MIL-STD-681.

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape barrier under shields. Shielded cables have a tinned copper braid overall, of 85–90% coverage per MIL-C-7078; and braid angles below 40° for easy pushback.

The outer jacket is black abrasion-resistant 105°C. vinyl meeting MIL-I-631 Type F. All materials are self-extinguishing and fungus resistant. All items are U.L. APPROVED STYLE 2343 COMPUTER CABLE; rated 80°C. (Higher temp. ratings apply for any non-U.L. service.)

Standard Putups: 500 & 1000 ft. No-deposit reels.

† Denotes U.L. Style 2344.

TECHNICAL DATA (all cables)

Insulation Breakdown Voltage: Greater than 5000 volts AC RMS, 60 cps.

Capacitance: Nominal capacitance from a wire to all else in a cable ranges from 45. to 70. pf/ft at 1. kc, depending on gauge and position.

Insulation Leakage: 200. megohms/1000 ft. min. @ 500. VDC from any conductor to all else in cable.

Sheath Leakage: 10. megohms/1000 ft. min. @ 500 VDC from shield or conductor group through sheath to ground.

Temperature Range: Suitable for continuous use from −40°C. to +105°C. (U.L. Service limited to +80°C.)

Bending Characteristics: All cables are suitable for flexing to a circle diameter of 6. cable diameters from +105°C. to −20°C. Recommended flex diameter should be greater than 20 cable diameters for flexing at −40°C.

Impedance: (24. AWG pairs) Balanced: 87. ohms ±5%
Unbalanced: 52. ohms ±5%

*Pair Color Code is the same as National NWP-Series Cable Coding.

NATIONAL WIRE & CABLE CORPORATION

MILITARY & U.L. GRADE RFI SHIELDED PAIR CABLES

MEETS U.L. STYLE 2343 OR 2344 FOR COMPUTER USE.

SHIELDED PAIR CABLES

SIGNAL & CONTROL CABLES

National Wire & Cable Corp., manufactures a complete line of flexible multi-pair cables in which each pair is individually twisted, shielded and plastic-jacketed.

Provides a minimum of crosstalk between signal channels, plus complete isolation between shields. Excellent for analog signals. All jackets moisture-proof. Suitable for use in duct, conduit, aerial or burial installations.

Conductors are stranded tinned copper with .010" vinyl primary insulation, plus .004" nylon insulation over the vinyl per MIL-W-16878 Type B. Insulation for 600 volts working rating at 105°C. Color coded: White and black (all conductors are 19 strand.)

Shielding is tinned copper braid with 90% minimum coverage per MIL-C-7078, and shield angle below 40 degrees for easy push-back.

Jackets over shields are extruded 105°C white polyvinyl chloride plastic per MIL-I-631, Class F; Color coded with stripes per MIL-STD-681, starting with 9.

All pairs are planetary cabled and contra-helically laid with a mylar tape serve over the cable bundle. The overall sheath is abrasion-resistant black 105°C vinyl thermoplastic per MIL-I-631, Class F.

Optional overall shielding of cabled bundle is 90% minimum coverage of tinned copper braid applied per MIL-C-7078 over the tape serve under sheath.

STANDARD PUT-UPS: 500 & 1000 FT. ON NO-DEPOSIT REELS.

TECHNICAL DATA

Insulation Breakdown Voltage: Greater than 5000 volts RMS, 60 hz.

Capacitance: (mmfd/ft.)

AWG	Wire-Wire	Wire-Shield
22	37	64
20	44	77
16	55	96

Insulation Leakage Resistance: 200 Megohms/1000 ft. min. at 500 VDC from any conductor to all else in cable.

Sheath Leakage Resistance: 10 Megohms/1000 ft. min. at 500 VDC from overall shield through sheath to saline bath at 25°C.

Usable Temperature Range: Suitable for continuous use from +105°C to −55°C when stationary. Flexing service: +105°C to −25°C.

Cold Bending Capability: All cables are suitable for bending to a circle diameter of 8 cable diameters from +105°C to −20°C. Recommended flex diameter should be greater than 20 cable diameters at −40°C.

Crosstalk: Common-mode, adjacent pairs: Worst case, −50 db @ 1 mhz; falling to −100 db below 100 khz. (Ref. MIL-C-23437 for test method.) For 100 ft. test length.

MIL-SPEC FOR ROUGH USAGE & EXTREME ENVIRONMENTS

TEFLON®-INSULATED CABLES

SIGNAL & CONTROL CABLES

National Wire & Cable Corp., manfactures a standard line of TEFLON®-INSULATED multi-conductor signal and control cables designed for extreme environments and rough usage.

Construction is widely used in aerospace and industrial applications requiring a near-ultimate in cable physical and electrical performance plus high reliability.

Conductors are stranded silver-plated copper, insulated with .010" of extruded TFE Teflon®; rated at 600 volts working from −65°C to +260°C per MIL-W-16878 Type E. Conductors are color coded using 10 standard colors plus spiral stripes on white per MIL-STD-681. (All conductors are 19 strand.)

All conductors are planetary cabled and contra-helically laid for optimum flexibility, with a Mylar tape wrap over the cabled bundle. The outer sheath is abrasion-resistant black Neoprene per MIL-S-6855, Class 2, Grade 60.

Optional overall shield is a 90% coverage tinned copper braid over the tape wrap per MIL-C-7078.

STANDARD PUT-UPS: 250 FT. LENGTHS ON NO-DEPOSIT REELS.

® Trademark, E. I. Dupont Co.

TECHNICAL DATA

Insulation Breakdown Voltage: Greater than 4000 volts RMS, 60 hz.

Capacitance: Nominal capacitance from a wire to all else in cable ranges from 25 to 45 mmfd/ft. dependent on gauge and position in cable bundle.

Insulation Leakage Resistance: 5000 Megohms per 1000 ft.; minimum from any wire to all else in cable.

Sheath Leakage Resistance: 20 Megohms/ft. minimum; from shield through sheath to saline bath after 24 hr. at 25°C.

Usable Temperature Range: Suitable for continuous use from −55°C to +75°C in flexing service or stored.

Cold Bending Capability: All cables are suitable for bending to a circle diameter as small as 4 times their diameter from −55°C to +75°C. Continuous flexing to less than 6 times diameter is not recommended below −40°C.

General Performance: All materials are self-extinguishing after exposure to flame. Non-nutrient to fungus. Highly resistant to ozone, oils, mild acids and bases, high humidity.

PANDUIT® wiring components

PAN-TY® ONE PIECE CABLE TIES

**** Part Number System:**

For clamps the letter and number after cross-section designate hole size. Example: -S6 is #6 screw.

PART NUMBER SYSTEM

Channel Only — Example

Cover Only — Example

Color Code: Dark Gray (DG); Light Gray (LG); White (WH).

Order by Total No. of Ft. Req'd. (must be multiple of length per part). Standard Mounting Holes: No Charge — Supplied Only if Specified — See Duct Catalog for Dimensions.
NOTE: Standard Length: 6 ft. Standard Color: Light Gray. White and Dark Gray available. NOTE: Type "S" has solid walls and no wire slots or openings.
NOTE: Total length of all sizes of duct and cover, ordered for shipment at one time to one location, determines price columns.

Delivery: F.O.B. Our plant. Minimum Billing: $25.00 net, each customer-designated shipment. Terms: Cash Discount 2%, 10 net 30. FREIGHT ALLOWED via PANDUIT routing on domestic shipments of $300.00 or more net billing. All prices subject to change without notice.

NEW!

1972 JEDEC DIRECTORY

■ More than 12,000 types of semiconductors: transistors, diodes, zeners, Darlingtons, FET's, phototransistors, rectifiers, SCR's, tetrodes, unijunctions, and light-sensitive devices . . . JAN and MIL Types.

■ Cross-references JEDEC type numbers to leading manufacturers.

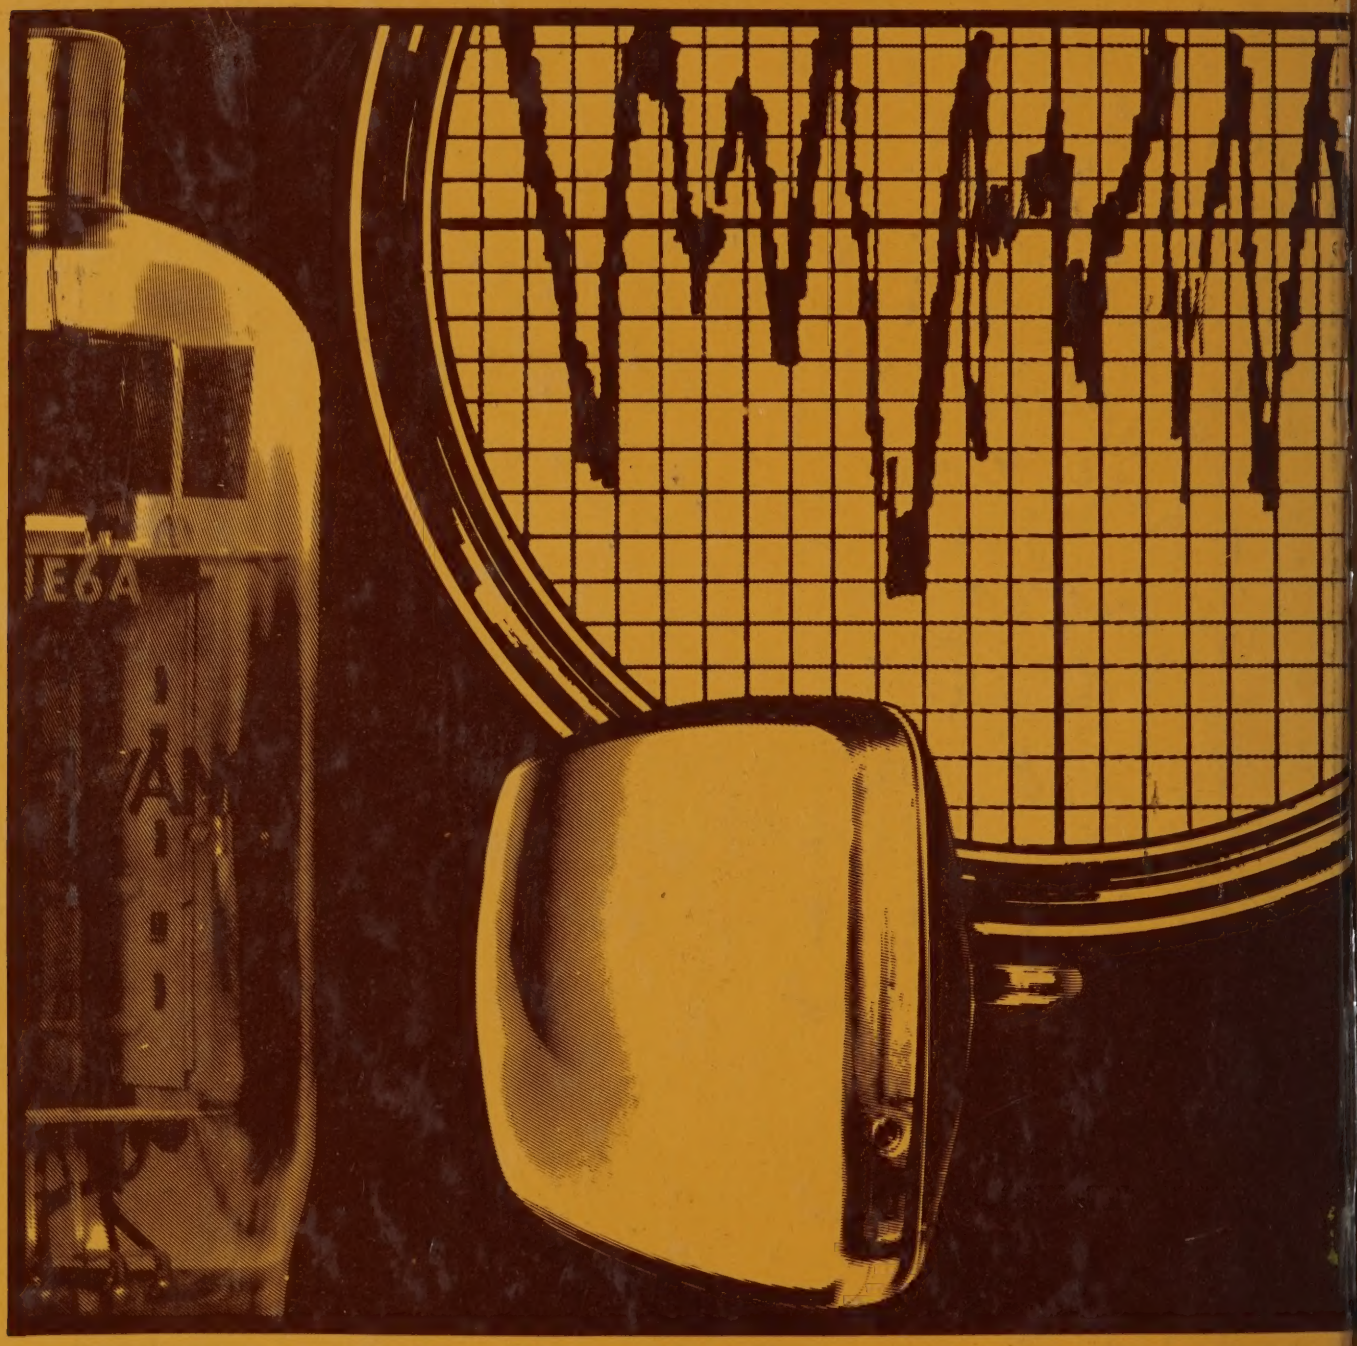
See Yellow Section preceding Section 4800—following page 960

PRICES

Prices in this MASTER should not be considered as final. They were submitted for publication before the government price freeze of August 14th, 1971, and may not reflect any possible roll-backs or increases which are effective when this MASTER is distributed. Inquire about latest prices and delivery.

INVENTORY

While most distributors maintain a large and varied stock, they do not represent that they stock all manufacturers' products shown in this MASTER catalog.



ORDERING

It is important, when ordering, to mention specifically the edition and page number, also the catalog number of each item. This will avoid possible confusion and delay.

DISCOUNTS

Trade discounts apply in most cases where LIST PRICES are shown.
